## Introduction

In June 2017, NCWVCAA enlisted the assistance of EPIC Mission and Collective Impact, LLC, to conduct a comprehensive community needs assessment in its ten-county service area including Barbour, Greenbrier, Marion, Monongalia, Pocahontas, Preston, Randolph, Taylor, Tucker and Webster Counties. NCWVCAA is required to conduct a comprehensive community needs assessment every three years.

The project included planning sessions, surveying residents, clients, and community stakeholders, conducting community discussions, researching available secondary data sets, facilitating a review session with NCWVCAA staff, and providing a community needs assessment report with key findings.

### Purpose of the Community Needs Assessment:

To conduct a community needs assessment with an emphasis on meeting the Community Services Block Grant and Head Start/Early Head Start program requirements and developing a report of key findings to be used by NCWVCAA and its community partners for planning and other related efforts.

### Objectives of the Community Needs Assessment:

- Conduct a local assessment of needs by compiling county-level data.
- Collect and analyze *primary data* by gathering community feedback through surveys and community discussions.
- Collect and analyze *secondary data* by researching national, state, and local data sources.
- Utilize data collected in NCWVCAA's customer outcome tracking system.
- Facilitate an analysis process that identifies priority needs in each county served by NCWVCAA.

Community needs assessments can and should be more than just a gathering and analyzing of data; they can also be a basis for creating change. A comprehensive community-based needs assessment can help an agency address community and family needs by providing a snapshot of the community and families within that community, including their economic well-being, educational status, health, and welfare. A comprehensive assessment can provide important community information as to what other agencies or organizations may be working on to address particular issues, and where gaps in community services lie. In addition, it provides a mechanism to meet and develop partnerships with other community groups interested in strengthening services to citizens in the area.

Finally, a comprehensive community needs assessment helps an agency in its planning process by providing the foundation for strategic and operational planning, assessing the agency's impact on meeting the needs of the community, determining what programs or strategies may have become obsolete, and deciding what strategies may provide new opportunities for the agency and the community. A multi-level community needs assessment approach was used to provide guidance in the planning process for improving services and programs to combat poverty in North Central West Virginia.

## Methodology and Data Sources

An Assessment Committee was convened by NCWVCAA to provide general oversight and assistance for the project. The committee represented a diversity of service providers and other community members throughout the service region familiar with the needs of low income people. The Assessment Committee met in September 2017 to define areas of concern, review survey tools, and provide guidance to the consulting team about priorities and considerations for the needs assessment process.

<i>Beth Nair</i>	Monongalia County Board of Education	<i>Jamie Wright</i>	NCWVCAA

A ten-domain typology was utilized to organize all assessment data collected. For purposes of the assessment a domain is defined as a poverty indicator or area of influence affecting local community conditions and the quality of life of low income people residing in the service area. The community assessment is comprehensive as it describes general community conditions in each of the counties served by NCWVCAA while also being targeted to local conditions contributing to poverty and the needs of low income residents in each county.

The ten domains examined include:

***Health and Healthcare Services***  
***Transportation and Public Transit Services***  
***Employment and Jobs***  
***Education and Training***  
***Emergency Services***

***Nutrition and Supplemental Food Programs***  
***Use of Income and Money Management***  
***Housing***  
***Community Resources and Services***  
***Children's Needs***

The Community Needs Assessment is based on a comprehensive review of both qualitative and quantitative data sources including: (1) statistical data from relevant secondary data sources, (2) survey data collected from key informants in each county including current NCWVCAA clients, (3) review of current NCWVCAA client data reports, and (4) opinions of community discussion participants convened in each of the ten counties served by NCWVCAA.

The primary components of the Community Needs Assessment include:

- Planning sessions with the executive team made up of key NCWVCAA staff.
- Planning and input from the broader Assessment Committee made up of community partners.
- Primary research to gather input from local community-based organizations, public and private agencies, educational institutions, community residents, and current clients in each county through:
  - A community survey, and
  - Community discussions.
- Secondary research and analysis of available data sets used to inform needs and local conditions within each county.
- Informational websites and other information provided by the Assessment Committee describing local county resources.
- A review of agency reports summarizing services provided to current clients that were provided by NCWVCAA including Head Start/Early Head Start outcomes reports, Head Start/Early Head Start client data from the Program Information Reports (PIR), and overall Program Demographic Reports for each county in the service region.

### Planning Sessions

A conference call with NCWVCAA project staff was held in late June 2017 to discuss the Community Assessment process, timeline, and activities necessary to carry out the project. A face-to face planning session was then held with NCWVCAA staff to kick-off the project in late July and seek guidance on the project and assess what outcomes would be desirable from the Community Assessment project. Participants reviewed the last needs assessment document and identified what to keep, change or remove from the report when preparing the next Community Needs Assessment.

Meeting participants also reviewed a draft of the proposed community survey instrument and offered suggestions for additions and changes to the survey instrument. Applicable secondary data sources to inform community needs were discussed by the team and a list of secondary data sources to be considered by the researcher was compiled. Finally, strategies for recruiting local persons to serve on a broader Assessment Committee and next steps were also discussed.

The broader Community Assessment Committee was convened in early September in order to brief members on the project and solicit input about proposed components of the research and report

development from diverse agencies and individuals representing the ten-county area. Meeting participants worked in teams to develop plans and strategies for promoting the community survey and local community discussions in each county. The county-based teams developed “survey distribution plans” for each county and committee members were asked to promote the community assessment project and encourage as many local residents as possible to complete the community survey either on paper or on-line.

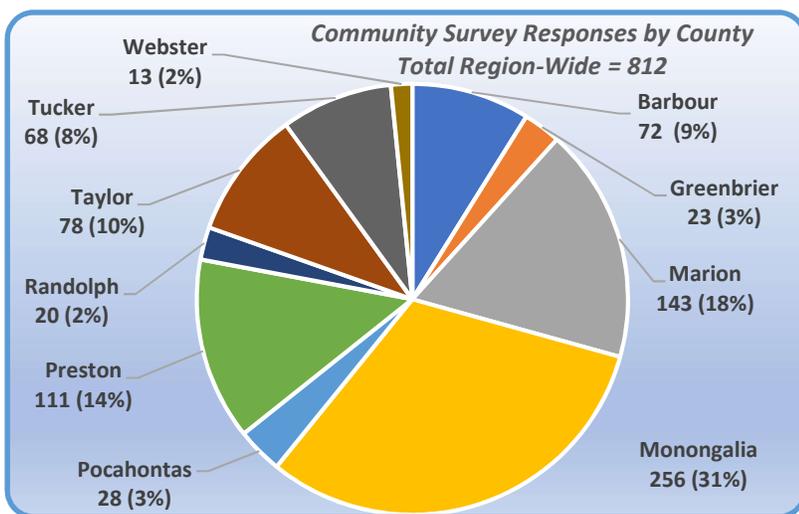

Meeting participants were also briefed about the proposed community discussion sessions and worked in groups organized by each of the 10 counties in NCWVCAA’s service area to develop promotion plans for recruiting local participation in the community discussions. Committee members completed a “secondary data collection plan” for each County and identified contacts at the local level to assist the consulting team with obtaining information about local resources not available through compiled data sets. That information was compiled, analyzed, and summarized into this report prepared by Collective Impact as applicable.

Internal consulting team planning and communications with NCWVCAA staff were ongoing throughout the project, and in early February 2018, the consulting team met with key staff from NCWVCAA to review a draft of the Community Assessment report and identify any further information that might be necessary to complete the project.

### Community Survey

An online survey was designed to collect information from key informants residing in each of the ten (10) counties served by NCWVCAA. The community survey could be completed on-line from any computer or mobile device with Internet access or by using paper surveys that were entered into the on-line database. On-line surveys were completed in all counties and paper surveys were collected in nine of the ten counties making up the service region. Planning Team members were provided with instructions for accessing and completing the survey and encouraged to disseminate information about the survey as widely as possible within the ten-county area.

A total of 812 responses to the on-line survey were received from residents of the ten-county service

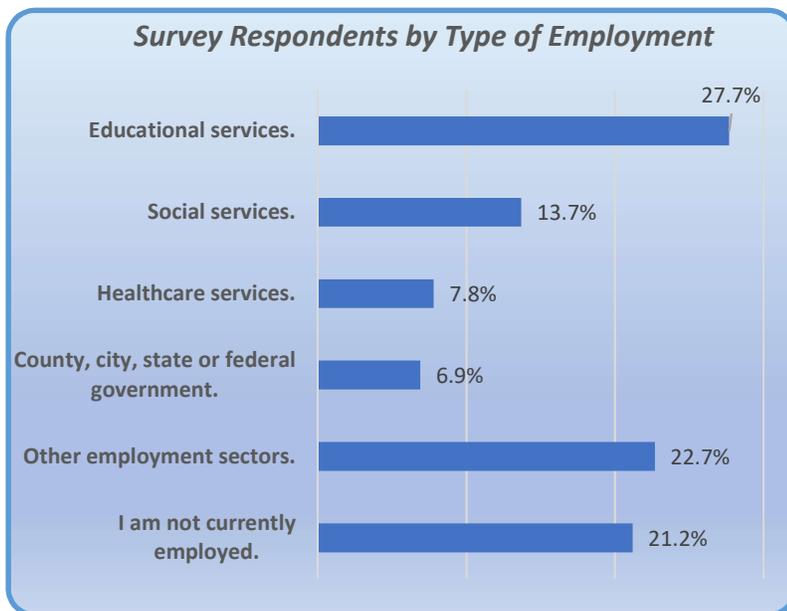

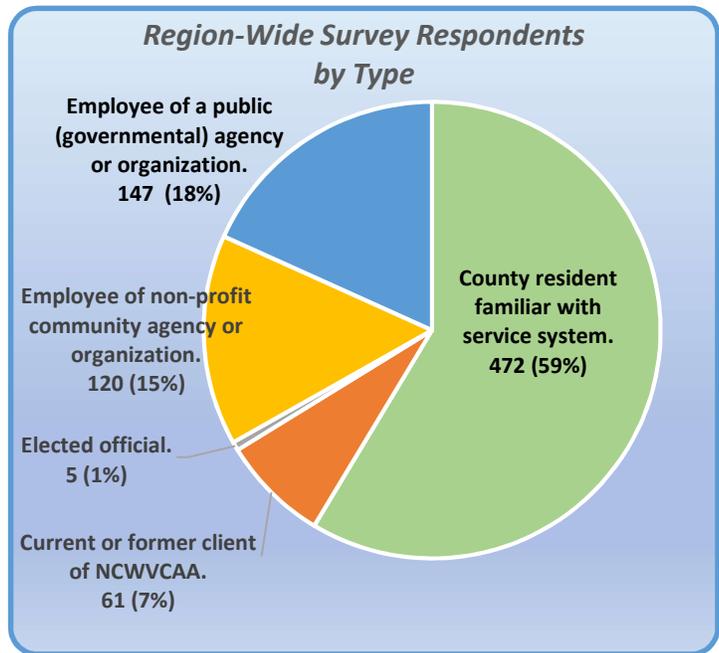

area. The number of completed surveys collected ranged from 256 in Monongalia County to 13 in Webster County. Findings from the survey reflect only the opinions of those persons responding from each county and are not necessarily representative of the opinions of the county-wide population. Given the community sectors represented in the survey responses, the survey serves as a key informant survey and, as such, survey results are informative about local conditions and needs in each of ten counties.

472 surveys were completed by a diversity of local residents generally familiar with available community services and 267 were completed by service providers employed by public or private agencies serving low income people. 61 of the 812 surveys were completed by current or former clients of NCWVCAA.

Respondents were predominately female (83.3%) and white (93.8%). Those persons completing the community survey ranged in age from 18 to over 75 years and the median was between 35 and 44 years of age. 52.0% of people participating in the survey reported having children in the household under 18 yrs. of age and 34.5% have children under 5 yrs. of age.

Characteristics of the respondents (educational attainment, employment status, and income) provides some evidence that most survey respondents would likely be knowledgeable of county-wide needs and conditions.

Region-wide, 27.7% of those persons responding to the survey represent the educational sector, 13.7% are employed in social services, 7.8% are healthcare providers, and 6.9% work in county, city or federal government jobs. These respondents would generally be expected to have a considerable degree of insight into the general needs of county residents and local community conditions within each the counties comprising the NCWVCAA service region.

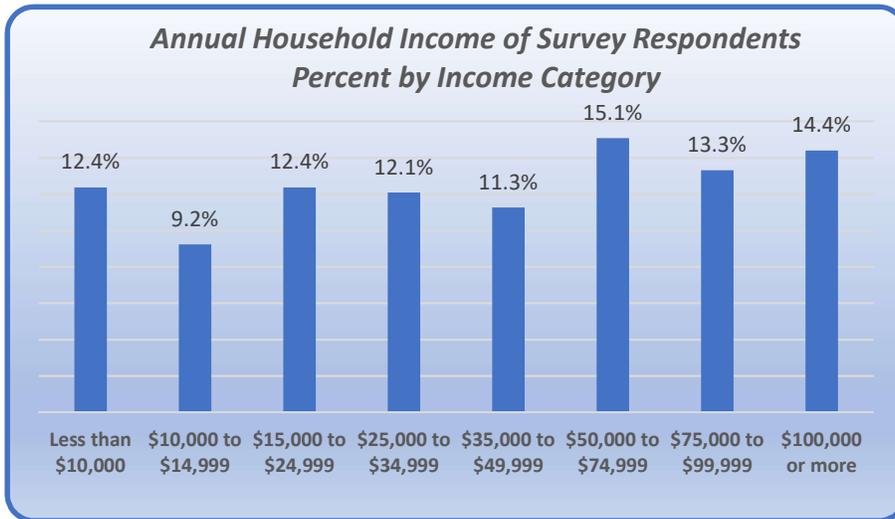

Nearly half (49.2%) of survey respondents throughout the region are employed in social services, healthcare, or the educational services sectors. At the time of survey 21.2% of the respondents were community residents not currently employed.

Four of the counties making up the service region experienced a low survey response rate (Webster, Randolph Greenbrier, and Pocahontas); however, most respondents in these counties are current or former clients of NCWVCAA and are, therefore, in a good position to represent the needs of persons with incomes below the poverty level. The

survey results are likely to be more indicative of a broad range of community opinion in those counties

with a higher number of responses.

Overall, the survey respondents are better educated than the overall population of the region with 19.4% holding a bachelor’s level degree and 25.1% holding a graduate degree; however, the high number of responses from Monongalia and Marion counties (49% of all responses) would be expected to disproportionately skew the educational attainment of respondents toward higher levels of education.

Annual household income reported by survey respondents reflects a broad range of income levels with 21.6% of respondents reporting annual income below \$15,000 while 42.8% report income above \$50,000. Although lower income people likely eligible for services from NCWVCAA are included in the survey results in each county, the relatively high numbers of survey participants residing in

Monongalia and Marion counties where economic conditions are better than many other counties accounts for the higher overall income level of survey participants.

A summary of the complete survey results for each county may be found in Appendix A.

### Community Discussions

Additional qualitative information was secured to inform the needs assessment through facilitated community discussions held in each county during November 2017. A total of ten discussion sessions were held; however, no one attended the session scheduled in Webster County. A total of 73 people participated in one of the remaining nine community discussion sessions.

Barbour County – 6 participants  
 Marion County – 13 participants  
 Pocahontas County – 9 participants  
 Randolph County – 6 participants  
 Tucker County – 13 participants

Greenbrier County – 5 participants  
 Monongalia County – 9 participants  
 Preston County – 8 participants  
 Taylor County – 4 participants  
 Webster County – No participants attended

Five questions were discussed to solicit information from those attending in each county.

- What is your vision for the ideal future of your County?
- What are the priority needs for your County to achieve this ideal vision?
- What are the greatest strengths/assets of your County?
- How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...
- What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?

Community discussion comments were analyzed to identify common themes and issues of concern identified by participants in each county to inform the community assessment and these themes are included in the county-by-county discussion of community needs and resources. A summary of each discussion is included as Appendix B.

### Secondary Data Review and Research

Secondary data sources were also reviewed and quantitative data from numerous data sets were compiled for each of the ten counties making up the NCWVCAA service region. The secondary data sets for each of the ten counties in the NCWVCAA service region were analyzed to identify key information that could inform local causes and conditions of poverty and the needs of low-income residents. A list of secondary data sources reviewed is included as Appendix C and Appendix D provides a summary of all secondary data compiled for each county.

## Description of the Agency and Service Area

### Agency Overview

NCWVCAA is one of the largest Community Action Agencies in West Virginia with approximately 300 employees and a budget of roughly \$12 million per year. Established in 1966, NCWVCAA is a private, non-profit corporation that provides a wide variety of services to low-income individuals and families. NCWVCAA strives to make North Central West Virginia’s communities a better place to live.

### NCWVCAA Vision:

NCWVCAA reduces the effects of poverty by empowering individuals, families and communities to meet the challenges of today and the changes of tomorrow.

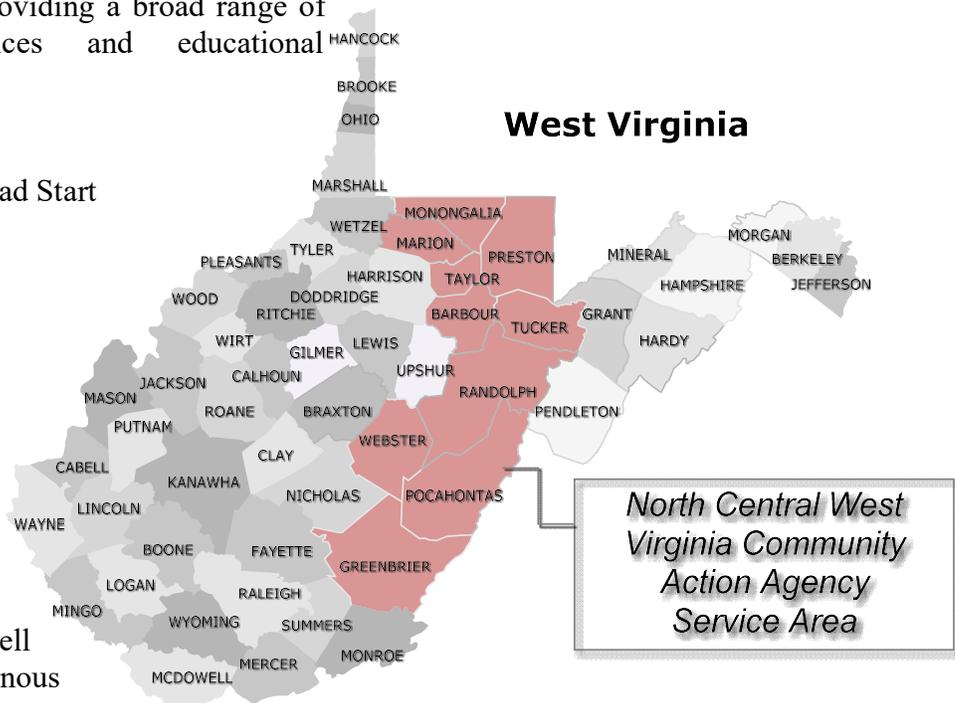

### NCWVCAA Mission:

NCWVCAA helps individuals and families reach their highest levels of social and economic independence by providing a broad range of anti-poverty services and educational resources.

### NCWVCAA Programs:

- Head Start/Early Head Start
- Housing Assistance
- Homeless Services
- Case Management
- Weatherization

The North Central West Virginia Community Action Agency service area encompasses ten counties. The area includes more populous counties along the I-79 corridor as well as counties that are mountainous and primarily rural.

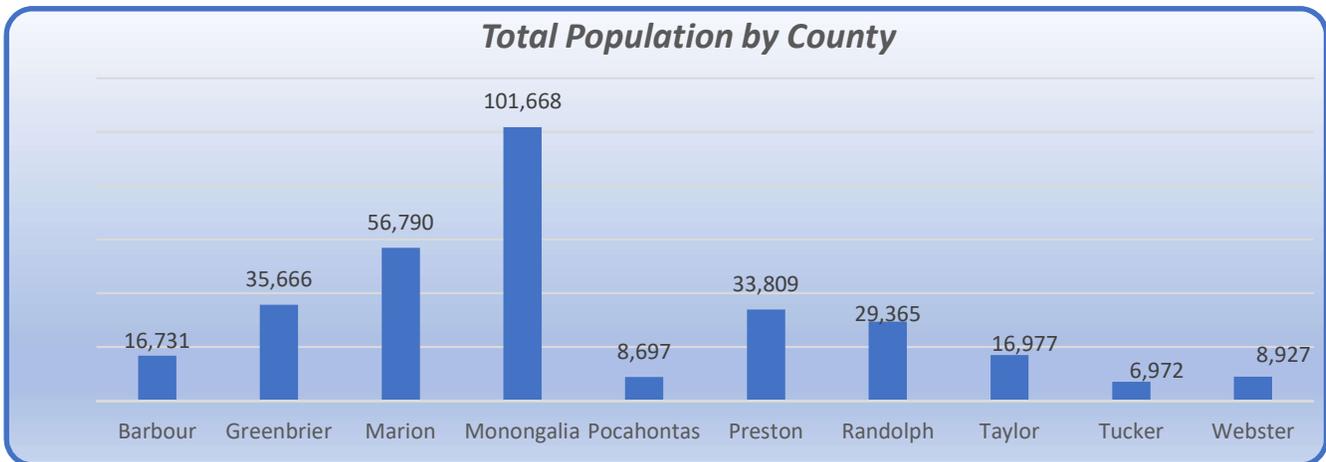

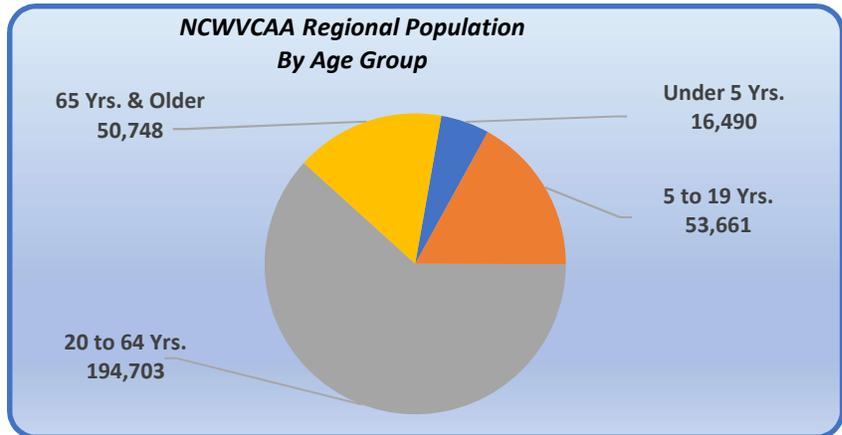

### Demographic Characteristics of the NCWVCAA Service Area

The total population of the ten-county area was estimated to be 315,602 persons in 2015. More than half the total population is found in Monongalia and Marion counties.

There is a total of 122,297 households in the region and 76,307 family households (2 or more persons related by birth marriage or adoption living together).

Children under the age of 18 years reside in 31,380 households - 41.1% of all family households in the ten-county region.

There are 16,490 children under the age of 5 years living in these households. Young children under 5 yrs. of age make up 5.2% of the total population of the 10-county region.

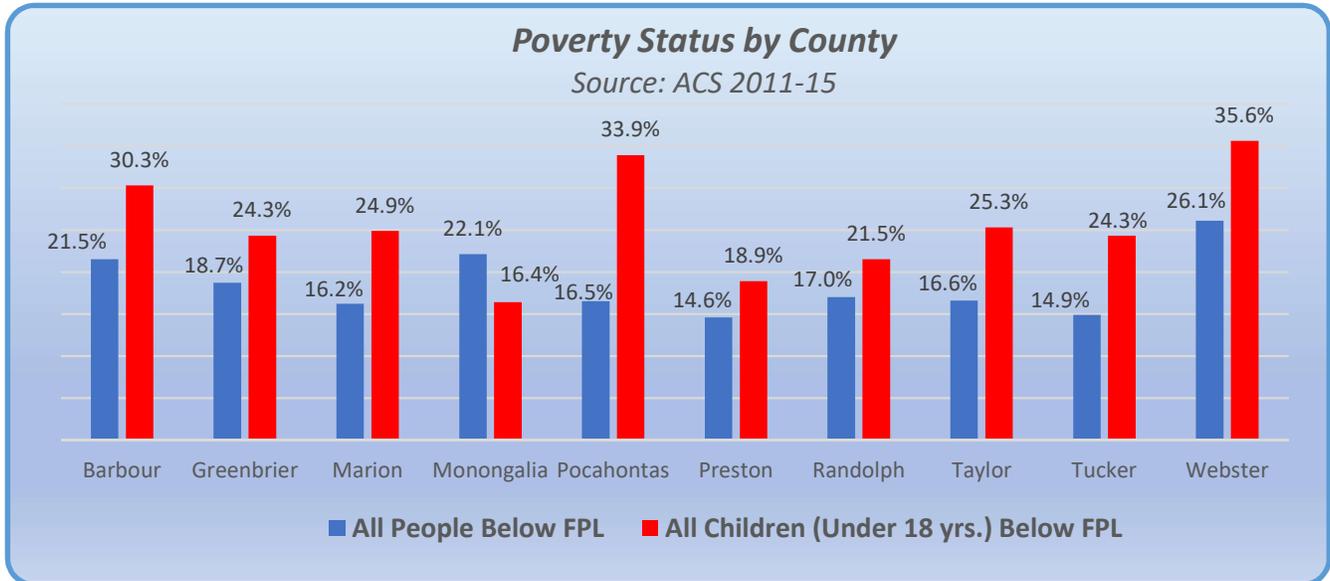

There is little racial and ethnic diversity to be found in most of the ten counties making up the NCWVCAA service area. The greatest racial diversity is found in Monongalia County where 9.4% of the population is non-White

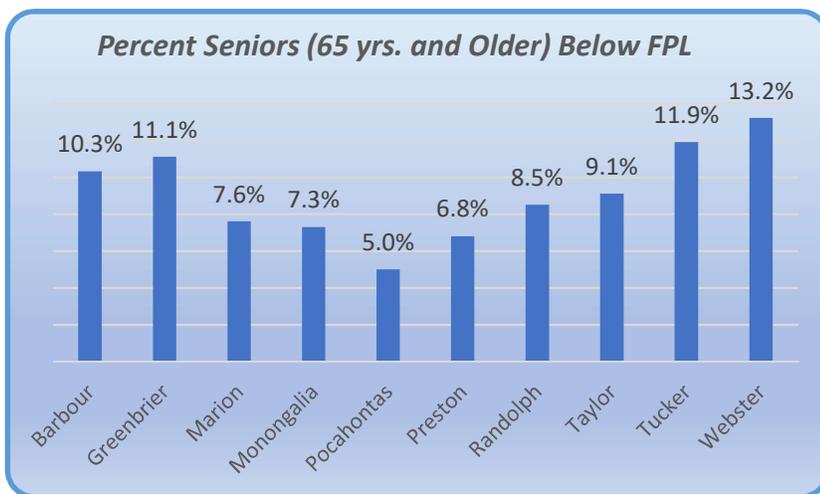

### Analysis of Poverty Characteristics Within the NCWVCAA Service Area

A total of 49,726 persons reside in the ten-county service area with annual income below the federal poverty level (FPL). This is 18.6% of the regional population which is higher than both the statewide poverty rate of 18.0% and the national rate of 14.7%. The percentage of people in poverty increased by 2.9% over the period 2000 to 2015 (*Small Area Income and Poverty Estimates - 2015*).

The total number of children (under 18 yrs.) within the NCWVCAA service area living in households below the FPL is 11,213 which is 21.7% of children under 18 yrs. of age; and the total children in the ten-county area under 5 yrs. of age who are in poverty is 3,863 (*Small Area Income and Poverty Estimates - 2015*).

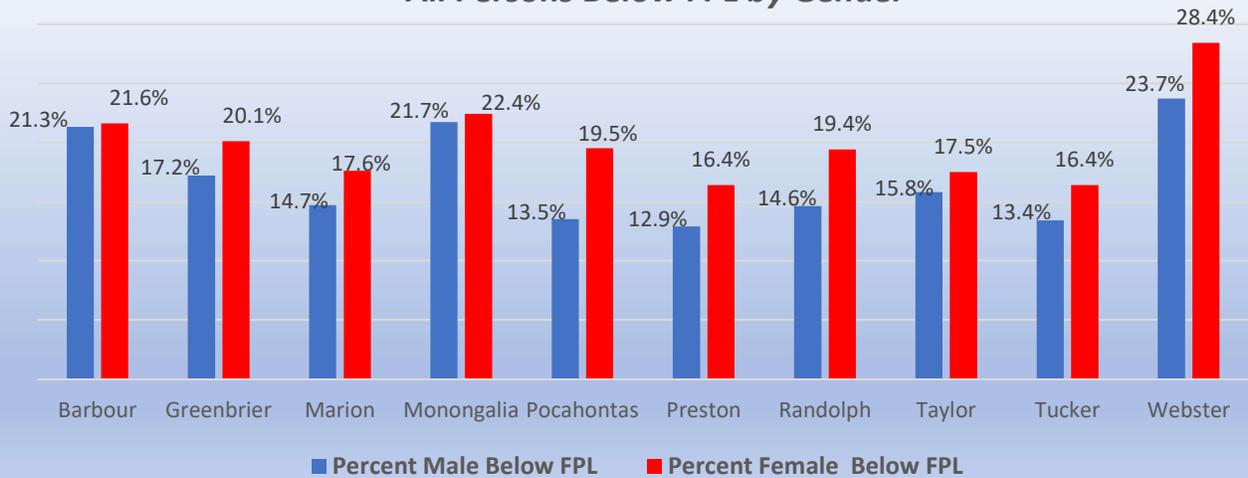

The highest rate of poverty for all people is found in Webster County (26.1%). The highest rates of poverty among children under 18 yrs. of age are found in Webster and Pocahontas counties - 35.6% in Webster and 33.9% in Pocahontas.

The poverty rate among Seniors 65 yrs. of age and older is lower than that of all people or children. The total number of seniors in poverty throughout the ten-county region is 4,175 and this is 8.2% of the population 65 yrs. of age and older. The highest poverty rate among seniors is in Webster County and the lowest is in Pocahontas County.

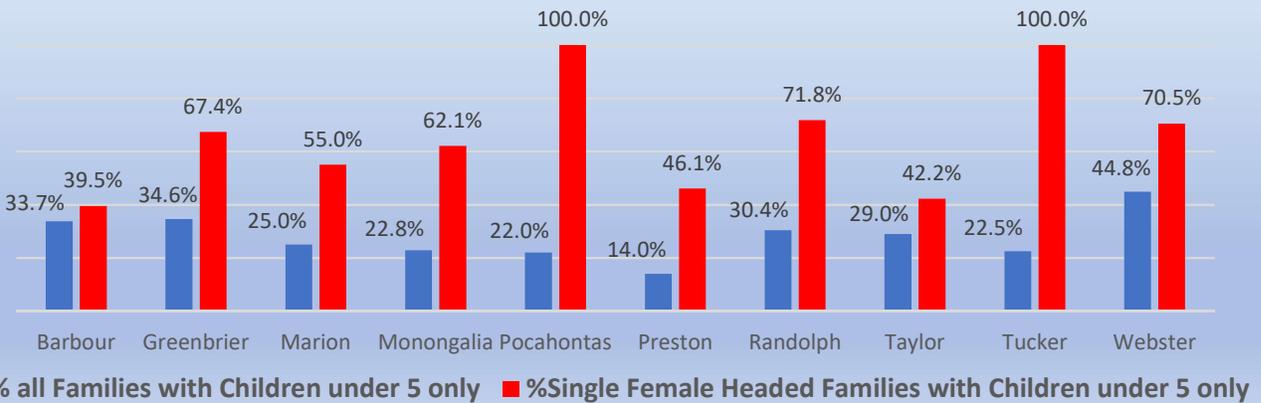

When examined by gender, poverty rates among the female population are consistently higher in all ten counties making up the service region than the rate for males.

### All Persons Below FPL by Gender

When poverty status of families with children under 5 yrs. of age is examined, the percentage of families with young children below the FPL ranges from a high of 44.8% in Webster County to a low of 14.0% in Preston County.

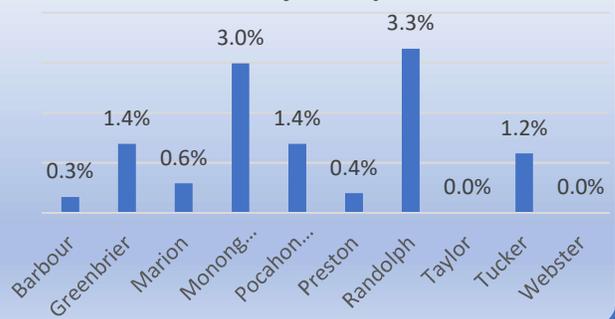

### Families With Children Under 5 Yrs. of Age Below FPL

Families headed by a single female with young children are particularly prone to low incomes below the FPL. Poverty rates are generally much higher for these single parent families when all children are under 5 years of age. 100% of single females with all children under 5 yrs. in Tucker and Pocahontas counties and over 70% of those in Randolph and Webster counties have annual household income below the federal poverty level.

Poverty Status was also examined by Ethnicity and Race. Due to the overall low number of people in

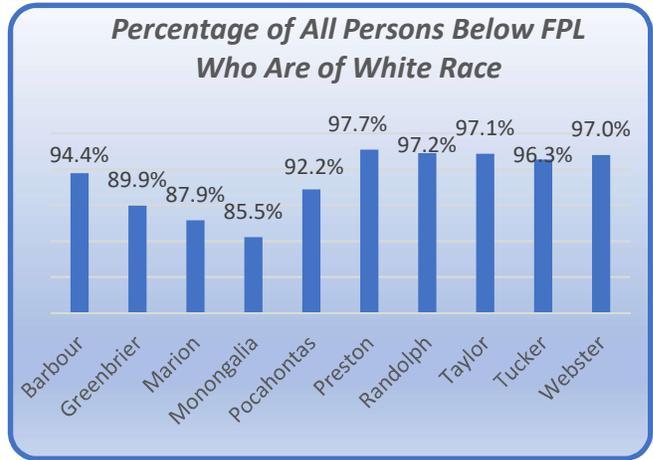

### Percentage of All Persons Below FPL Whose Ethnicity Is Hispanic or Latino

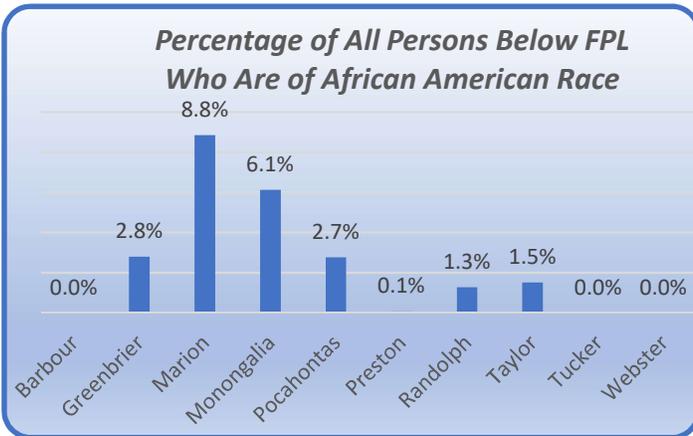

most counties within the region who are of Hispanic/Latino descent, relatively low numbers of Hispanics are in poverty. 979 people with Hispanic or Latino ethnicity fall below the federal poverty level and most (625) reside in Monongalia County. Hispanic/Latino persons make up the most notable portion of those persons in poverty in Randolph and Monongalia counties where the poverty population is 3% or higher.

Due to the lack of overall racial diversity in counties served by NCWVCAA, a high percentage of all persons in poverty are White. Persons of White race make up 90.3% of the people in poverty region-wide. The highest minority population is found in Monongalia County where 14.5% of persons in poverty are non-White. Notable numbers of people of other races also experience poverty in Marion and Greenbrier counties.

African Americans make up 4.2% of those persons below the FPL across the ten-county region;

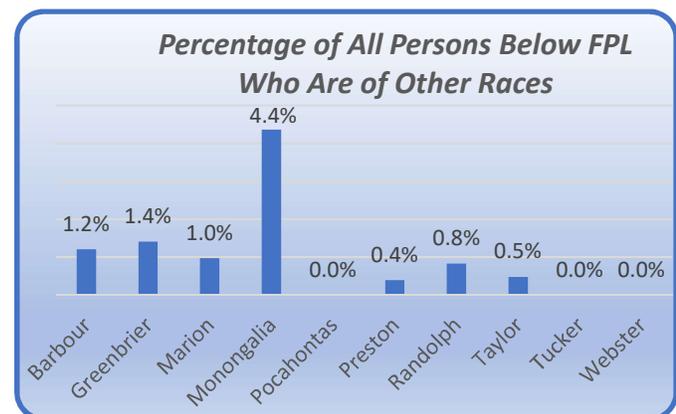

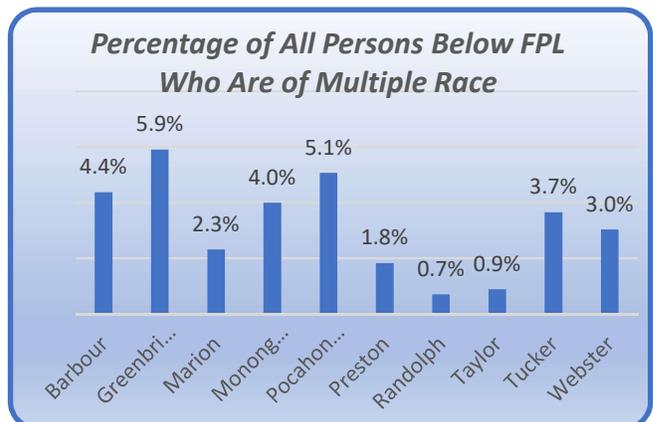

however, African Americans are 8.8% of all people in poverty in Marion County and 6.1% in Monongalia County.

The highest number of persons of multiple or mixed race with incomes below the FPL are found in Monongalia County (834 people); however, the highest percentage of the poverty population composed of multi-racial persons is in Greenbrier County (5.9%).

1,201 people in poverty throughout the region are of other races including Asian and Native American. These people make up 2.1% of the total number of people below the FPL across the ten counties.

The highest number of persons of other races in poverty (911 people) are found in Monongalia County where they make up 4.4% of all county residents below the FPL.

### Current Services Provided by NCWVCAA

The characteristics of current clients, and the current level of services provided by NCWVCAA within the ten-county region can provide key indicators of future needs. In the absence of major social or economic events affecting the region, it is reasonable to assume service needs and capacities will be similar to current services over the next five years. Services supported by the Community Services Block Grant (CSBG) and other available funds including housing, homeless services, case management and weatherization are currently provided in 9 of the 10 counties (services in Webster County are limited to Head Start and Early Head Start).

### Head Start/Early Head Start Families and Children Served

West Virginia is an acknowledged leader in early childhood education and Head Start is a key to its success. In 2002, West Virginia lawmakers passed an education provision requiring all four-year-old children to have access to Pre-K by the 2012-2013 school year. The law mixed existing Pre-K funds into the state public school funding formula and required county school systems to coordinate the provision of Pre-K services with Head Start programs and other early childhood service providers in each county. Standards as outlined in WVDE Policy 2525 must be met by all providers of Pre-K services; however.

Head Start programs in counties served by NCWVCAA were designated as meeting Universal Pre-K standards in 2012 acknowledging all four-year-old children and three-year-old children with Individualized Education Plans (IEPs) have access to quality early childhood preschool classrooms through Head Start. During the period July 1, 2016 to June 30, 2017 (PY51), center-based Head Start programs were provided in eight of the ten counties served by NCWVCAA. Programs in Monongalia County were provided by a delegate agency (Monongalia County Schools). HS/EHS programs are not provided in Greenbrier County and only EHS services are provided in Tucker County.

### *Head Start children and families served (July 1, 2016 to June 30, 2017).*

	Barbour	Marion	Monongalia (Delegate)	Pocahontas	Preston	Randolph	Taylor	Webster	PY51 Totals

Monongalia County Board of Education Grantee  
Information from the PY51 EHS PIR July 1, 2016 to June 30, 2017

### *Early Head Start children and families served (July 1, 2016 to June 30, 2017).*

	Barbour County	Marion County	Randolph County	Taylor County	Tucker County	PY51 NCWVCAA Totals	*PY51 Monongalia Totals
Families Served	10	25	15	17	3	70	150
Children Served	12 Children 1 Prenatal	27 Children 1 Prenatal	18 Children 2 Prenatals	21 Children 4 Prenatals	4 Children	82 Children 8 Prenatals	136 Children 14 Prenatals

\*Monongalia County Board of Education Grantee  
Information from the PY51 EHS PIR July 1, 2016 to June 30, 2017

*Race, Ethnicity, and Language*

Socio-demographic data describing current client characteristics for the most recent completed program year are good indicators of expected needs over the next five years. During the period July 1, 2016 to June 30, 2017 (PY51), 89.3% of all Head Start children were White, 5.7% were Bi-racial, and 3.9% were African American. 22 (2.5%) of the children served by Head Start programs were Hispanic. The greatest ethnic and racial diversity is found in Monongalia and Marion counties. English continued to be the primary language for nearly all children in the Delegate and Grantee counties during PY51; however, there was a small increase in the number of non-English speaking homes. During PY51, a total of 23 Head Start homes spoke a language other than English including 8 where the primary language was Spanish. Twenty (20) of the 23 families where the primary language was not English were in Monongalia County and the remaining 2 were in Marion County.

Children served through Early Head Start exhibited slightly more racial diversity than those served through Head Start - 83.4% White, 6.2% Bi-racial, and 7.5% African American. 4 EHS children (1.7%) were Hispanic. As was the case with Head Start during PY 51, nearly all non-White children served reside in Marion or Monongalia counties. All 4 Hispanic children enrolled in Early Head Start were in Monongalia County. English was the primary language for all enrollees in Early Head Start.

*Other Family Characteristics*

Only 3 Head Start parents or guardians were active duty service members during PY51 and 14 were veterans. Homelessness was experienced by a total of 87 Head Start families and 29 of these families acquired housing during PY51.

Living arrangements for the Head Start population is summarized in the chart below:

COUNTY	OWN	RENT-UNSUBSIDIZED	RENT-SUBSIDIZED	LIVING W/FRIENDS OR FAMILY	TRANSITIONAL/SHELTER/HOMELESS	OTHER
Barbour	33	21	8	14	0	0
Marion	82	62	33	39	11	3
Monongalia (Delegate)	50	75	31	20	4	7
Pocahontas	10	8	6	1	0	1
Preston	29	29	13	10	0	0
Randolph	49	29	25	16	7	3
Taylor	27	31	17	17	5	2
Webster	30	15	7	6	0	0
<b>PY51 Total</b>	<b>310</b>	<b>270</b>	<b>140</b>	<b>123</b>	<b>27</b>	<b>16</b>

*Information from DBA FACS Pro-PY51 July 1, 2016 to June 30, 2017.*

43.7% of families served through Head Start programs during the period July 1, 2016 to June 30, 2017 were 2 parent households with children and 35.3% were single female headed households.

A total of 53 children or 6.0% of all children enrolled in Head Start programs within the NCWVCAA service region were in foster care.

Total Head Start families served by family type are summarized below:

COUNTY	Multi-Adults (w/children)	Single Parent (Male)	Raised by Grandparents	Two Parents (w/children)	Single Parent (Female)
Barbour	14	1	4	27	30
Marion	24	13	9	101	83
Monongalia (Delegate)	17	8	6	97	59
Pocahontas	4	1	0	11	10
Preston	26	0	3	24	28
Randolph	23	3	7	51	45
Taylor	12	2	3	39	43

<b>PY51 Total</b>	<b>125</b>	<b>29</b>	<b>32</b>	<b>387</b>	<b>313</b>

Information from DBA FACS Pro-PY51 July 1, 2016 to June 30, 2017.

The Early Head Start families served included 1 parent or guardian on active military service and 1 veteran. During the July 1, 2016 to June 30, 2017 year, 25 families experiencing homelessness received Early Head Start services and 19 of these were in Marion and Monongalia counties (11 in Marion and 8 in Monongalia). 13 of the 25 families acquired housing during the year.

Primary living arrangements for Early Head Start families are summarized in the chart below:

COUNTY	OWN	RENT-UNSUBSIDIZED	RENT-SUBSIDIZED	LIVING WITH FRIENDS OR FAMILY	TRANSITIONAL SHELTER/HOMELESS	OTHER
Barbour	7	2	1	3	0	0
Marion	10	5	4	9	0	0

#### *Special Needs of Head Start and Early Head Start Children*

As of December 31, 2017; 122 children served in Head Start programs (15.7%) had special needs. Half (61) of these special needs children were experiencing a speech or language impairment and 34.4% (42 children) had some type of non-categorical developmental delay. 18 of the 122 children (14.8%) had multiple disabilities, and 1 was experiencing a visual impairment.

A total of 22 of the 196 children being served by Early Head Start programs in December of 2017, exhibited special needs. This is 11.2% of the children served. 11 of these children with special needs had a speech or language impairment, 9 had a non-categorical developmental delay, 1 child had an orthopedic impairment and 1 was visually impaired.

#### *Resources to Address Special Needs within Head Start and Early Head Start Programs*

Outcomes reports for 2017 indicate children enrolled in Head Start and Early Head Start received a variety of health and nutrition related services including immunizations, medical and dental care, and improved nutrition to enhance physical development. Services are provided both directly and through relationships with healthcare providers in the community. School readiness skills in preschool age children were also enhanced through participation in Head Start/Pre-K programs.

Both Head Start and Early Head Start programs offer developmental screenings to identify any special needs of enrolled children. Special needs of children under 3 yrs. of age are often addressed through the West Virginia Birth to Three program (Part C of the Individuals with Disabilities Act). Services are available in each county of the state for eligible children under the age of three who have a developmental delay, medical condition or multiple risk factors identified through an Individual Family Service Plan (IFSP). Specialized ancillary services are provided through the program as necessary including speech, physical, and occupational therapy. NCWVCAA and the delegate agency (Monongalia County Schools maintains agreements for services with the WV Birth to Three program.

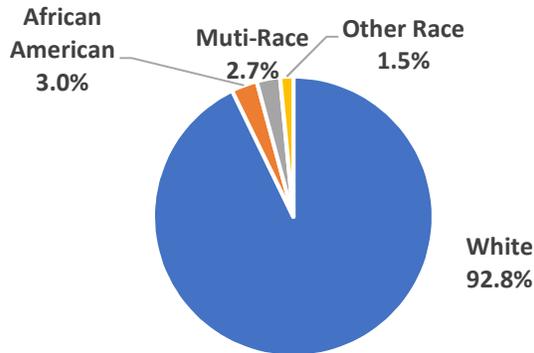

County Boards of Education also provide specialized services to children with special needs who may be enrolled in Head Start/Pre-K programs either directly or through contracts with qualified providers. In some cases, services may be provided to parents of children with special needs through telemedicine connections to professionals located at the Center for Excellence in Disabilities (CED) located in Morgantown and is part of the Robert C. Byrd Health Sciences Center at West Virginia University. Licensed professionals provide hearing screenings, behavior management, speech, and physical therapies

to identified children based on an Individual Education Plan (IEP's). Other specialty services for children with special needs may be available through local community mental health centers and/or private practitioners located in each county within the service region.

Characteristics of all Persons Served by NCWVCAA during CY 2017

Service information was captured for a total of 3,753 families and 9,919 individuals across the ten-county region.

**Racial Makeup of Persons Receiving NCWVCAA Services in 2017**

This data related to clients served and services delivered during 2017 is included in the Community Needs Assessment since the characteristics of persons and families served during 2017 is a good predictor of the types of low income residents in need of services and the types of services likely to be needed over the next five years.

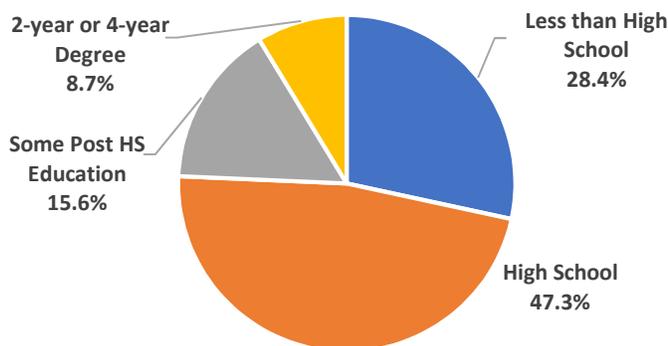

During CY 2017, 92.8% of all persons served were White, 3.0% were African American, and 2.7% were mixed or multi-racial, and 1.5% were of other races.

Only 1.8% of the total person served by the agency in 2017 were Hispanic. 54% of persons served were female and 46% male.

77.4% of the households served had annual income below the federal poverty level and 33.9% reported no household income for the year. 198 persons receiving services during CY2017 had no health insurance.

**Educational Attainment of NCWVCAA Clients in 2017**

Persons 18 Yrs. of Age and Older

Educational attainment of NCWVCAA clients 18 yrs. of age and older reflects 28.4% who have not completed high school, 47.3% with a high school diploma or GED, 15.6% with some post high school training, and 8.7% with either a 2-year or 4-year degree.

46.5% of the 2017 NCWVCAA households owned their place of residence and 37.7% rent. 7.2% reported they were homeless and 8.6% reported some other living arrangement.

Services Provided to Low Income Persons – CY 2017

A wide variety of services were provided to individuals and families by NCWVCAA in nine of the ten counties within the service region (only Head Start/Early Head Start is provided in Webster County). The region-wide Program Demographic Report for 2017 (1/1/2017 – 12/31/2017) on outcomes achieved provides data about the types of services provided to these low-income households.

A review of the outcomes achieved through provision of NCWVCAA services during 2017 indicates low income families most frequently benefitted from:

- Infant and child health and physical development is maintained or improved (1,049 children),
- Age appropriate immunizations, medical and dental care (935 children),
- Age appropriate pre-school activities to develop school readiness skills (814 children),
- Increased access to supplemental and emergency food programs (799 households),
- Assistance with tax preparation (449 households),
- Emergency fuel or utility assistance (412 households),
- Other emergency services (275 people)
- Support services that enhance employment opportunities (264 households),
- Emergency temporary shelter (152 people),
- Garden programs (133 households),
- Emergency rent or mortgage assistance (91 households),
- Housing related services including construction, rehabilitation, or weatherization (87 households),  
and
- Emergency car or home repairs (76 households).

# *Barbour County*

## *Community Needs and Resources*

# Findings Related to Community Needs and Resources

## BARBOUR COUNTY

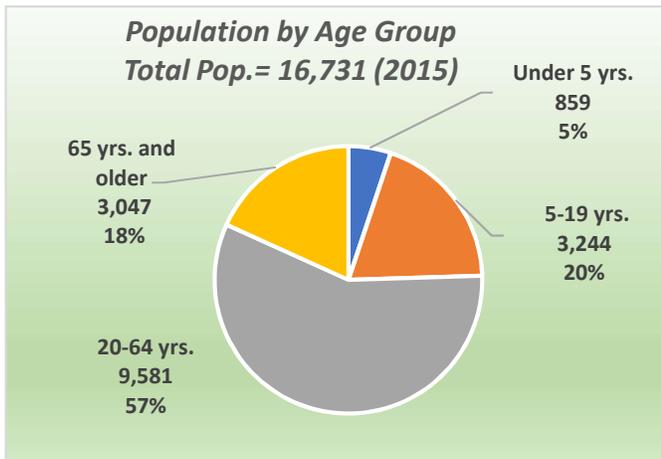

### History & Geography

Barbour County is located in north-central West Virginia. It was formed in 1843 when the region was still part of the state of Virginia. Philippi, the county seat, was chartered in 1844. Both county and city were named for Philip Pendleton Barbour (1783–1841), a U.S. Congressman from Virginia and Associate Justice of the U.S. Supreme Court. The Battle of Philippi, also known as the "Philippi Races", was fought in Barbour County on June 3, 1861. Although a minor action, it is generally considered the first land engagement of the American Civil War. (Wikipedia, 2011)

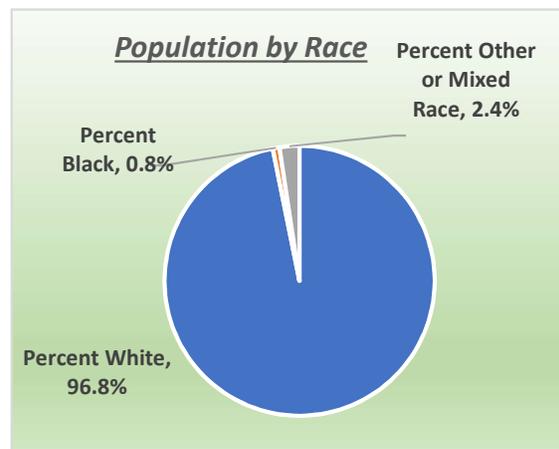

Nestled in the mountains of the Appalachian Plateau region, Barbour County is a rural area covering 341 square miles. U.S. Routes 250 and 119 and WV Routes 92, 76, 57, 38, and 20 serves as the main transportation arteries in the county, but none are four lane highways. The climate is dry and hot in the summer adding to health issues for residents, particularly respiratory problems. The winters are cold and snowy making travel dangerous. The mountains give runoff in rainy weather that increases flooding in low-lying areas. The land is rolling mountains, with a beautiful yet treacherous river with a rich historic past that lends itself to tourism. It is located in the central part of the state of West Virginia with access to major highways on the southern and northern ends of the county.

### Demographic Characteristics

The total population of Barbour County is 16,731 persons (ACS, 2015). 5% of the population is under five years of age and 18% is over the age of 65 yrs.

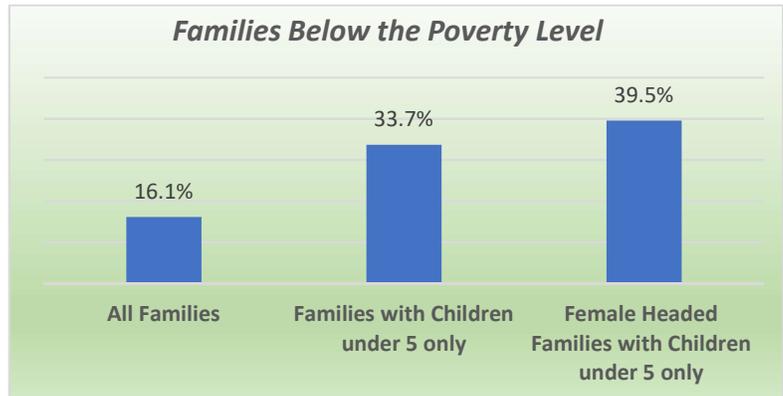

96.8% of the population is White and only 0.8% is Black. The remaining 2.4% of Barbour County residents are of mixed or other races.

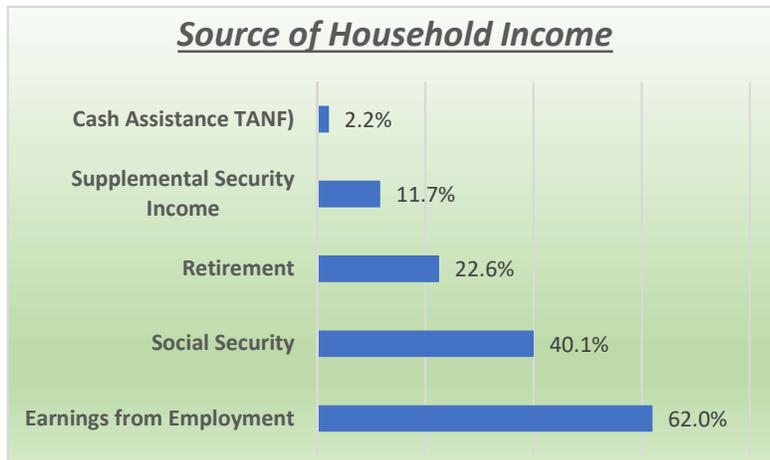

There are 6,041 households and 4,239 family households in the county. 1,652 or 27.3% of the total family households have children under 18 yrs. of age.

### Socio-Economic Characteristics

16.1% of Barbour County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate doubles reaching 33.7%. Single female headed families with all children under 5 yrs. of age are particularly susceptible to poverty with 39.5% of these single parent families with young children struggling with annual income below the FPL.

Median household income in Barbour County is \$36,733 which is significantly below the state average of \$42,644 (ACS 2012-16). 62.0% of the households in the county have income from employment and 2.2% receive cash assistance through the TANF program. 17.7% of households in the county receive food stamps to supplement their income (ACS 2015).

A high percentage of households in Barbour County appear to be an unexpected event away from poverty. The “Liquid Asset Poverty Rate” defined as a lack of sufficient liquid assets to subsist at poverty level for three months in absence of income, is at 43.5% in the county (2014 Survey of Income and

Program Participation, US Census Bureau).

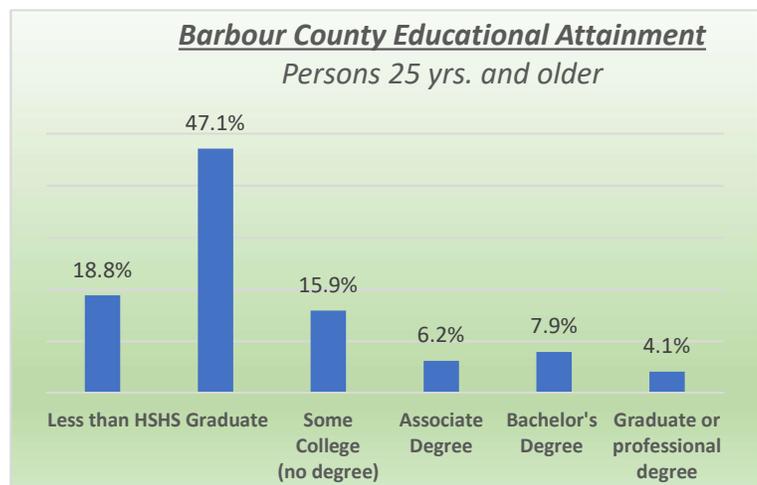

### Causes of Poverty

Primary causes of poverty in the county appear to include:

- An unemployment rate of 5.9% (August 2017),
- Lack of education and skills, and
- Lack of access to “good jobs” paying a living wage.

Although the unemployment rate declined by 0.5% between August of 2016 and August of 2017, it remains higher than the state average of 5.4%.

Educational attainment is relatively low among Barbour County residents. 12.0% of those 25 yrs. of age and older hold a college degree and an additional 6.2% have an associate degree. More than half of county

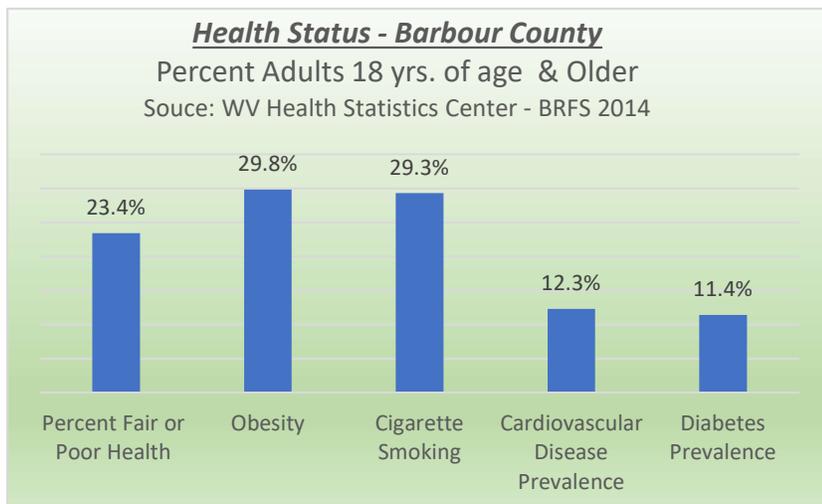

residents have no education beyond high school and 18.8% have less than a high school education (*ACS 2015*). The research on secondary data sets documents the school dropout rate in Barbour County at 7.1% (*Kids Count 2015*), and the 4-year cohort graduation rate is 89.6% (*WVEIS 2016*).

The 2016 college going rate in the county is at 36.7% of graduating high school seniors (*WV Higher Education Policy Commission*). 11<sup>th</sup> grade reading proficiency is at 50.0% and mathematics proficiency is quite low at only 17.2% (*WVEIS 2016-17*).

The community discussion held in the county identified several factors contributing to poverty including:

- A need for jobs that provide a living wage,
- A desire for a larger company or chain to locate in the county, and
- The need for additional education and rehabilitation programs.

When asked to define poverty and the factors that keep people in poverty, community discussion participants identified: (1) Families unable to meet basic needs, (2) A lack of gainful employment opportunities, (3) Kids not prepared to succeed, and (4) Inability to escape the stigma of addiction. Generational poverty is also a potential issue with 15.2% of births to mothers with less than a high school education (*Kids Count 2015*).

Health status of the population and access to healthcare, mental health services, and substance abuse treatment are also major contributing factors to poverty in Barbour County.

Obesity rates are at 29.8% among the adult population and 29.3% of the adult population smoke (*BRFS 2014*). In addition, 13.4% of the population is without any type of health insurance (*ACS 2015*). The infant mortality rate in Barbour County is 4.6 deaths per 1,000 live births and 8.3% of babies

born to county residents are low birth weight (less than 2500 grams). The teen birth rate is at 26.8 births per 1,000 females (*Kids Count 2015*).

### Community Needs

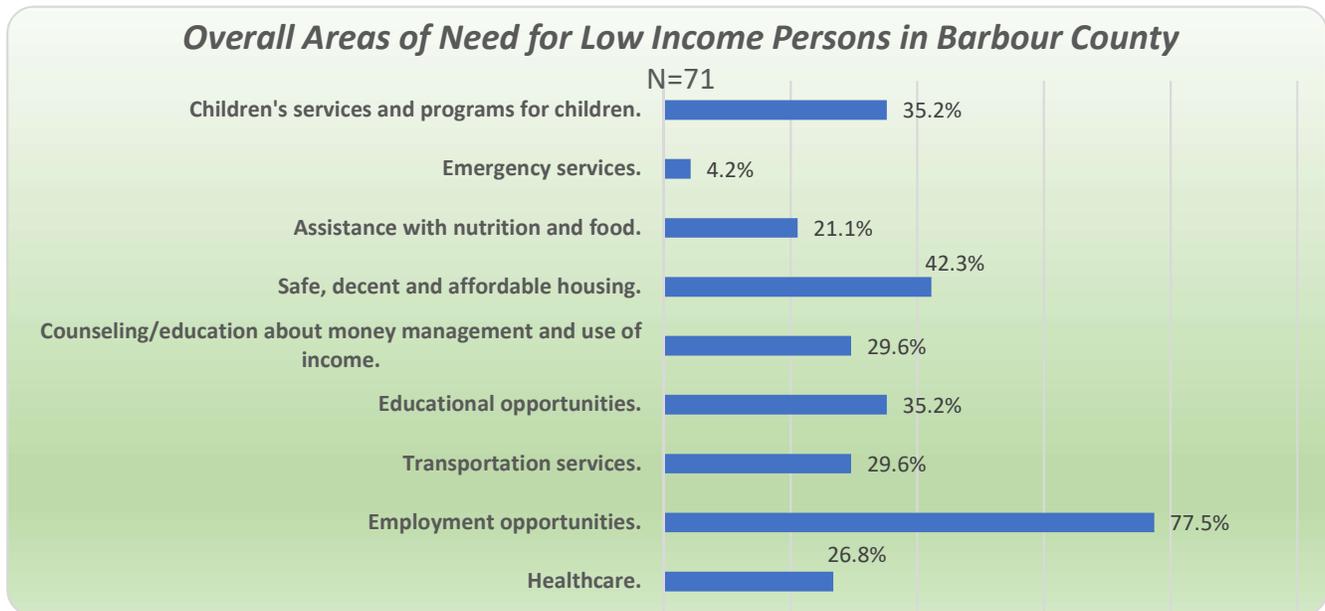

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

#### Overall Needs and Priorities

Barbour County survey respondents were asked:

” What do you think are the top three areas of need of low income people in Barbour County?”

Employment opportunities were, by far, the most frequently selected area of need with 77.5% of respondents focusing on this domain. Safe, decent and affordable housing options was identified as a secondary priority in Barbour County.

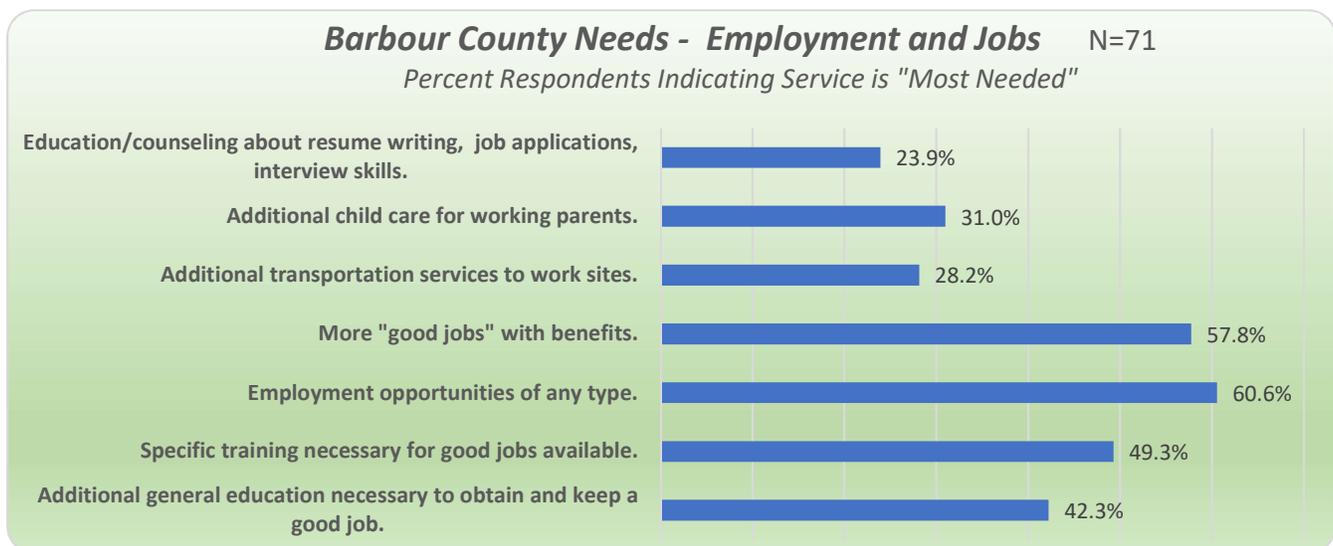

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

*Employment and Jobs:*

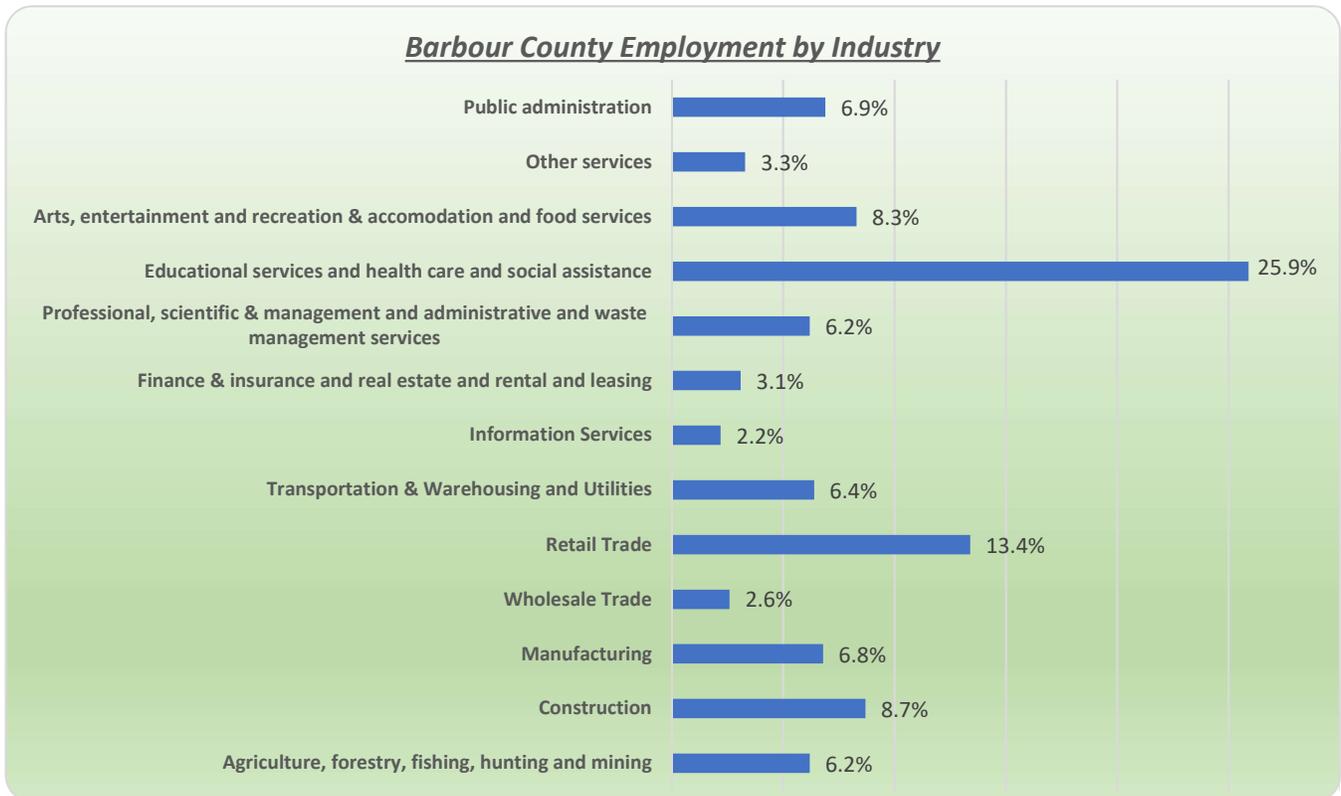

Most people responding to the survey in Barbour County focused on the need for additional employment opportunities in the county. Based on the survey responses, the top three priorities in Barbour County related to Employment and Jobs are:

- Employment opportunities of any type,
- More good jobs with benefits, and
- Specific training for types of jobs available.

When asked about needs related to employment and jobs, some of the key informants in the county prioritized support services for working people such as child care, transportation to work sites, and skills in seeking employment; however, most focused on the need to improve economic opportunity through job development and training.

Current employment in the county tends to focus on educational, healthcare, and social service programs generally supported by public funds. Manufacturing accounts for only 6.8% of current employment. Lower income jobs in retail trade account for 13.4% of employment in the county (BLS 2015).

The largest employers in Barbour County (in order of number of people employed) are:

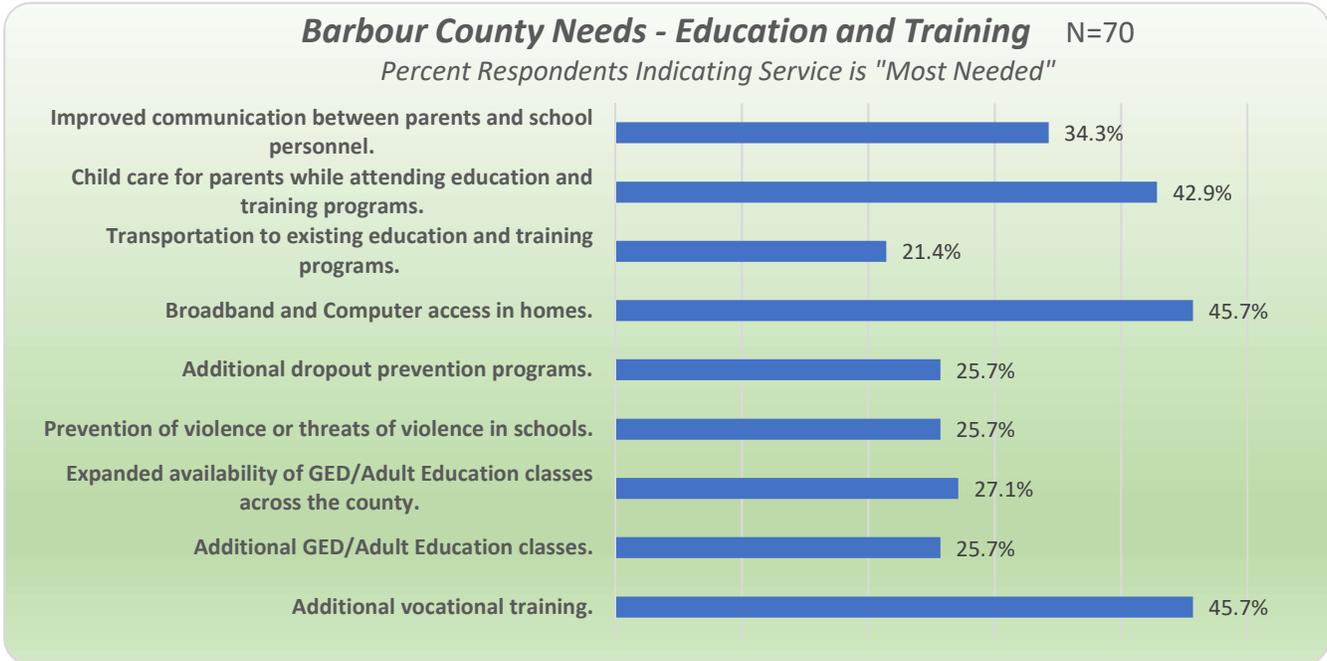

1. Barbour County Board of Education,
2. Alderson Broaddus University,
3. Arch Coal, and
4. Broaddus Hospital.

*Education and Training:*

Most people responding to the survey in Barbour County focused on the need for vocational training programs, broadband access in homes, and child care for people attending education and training programs. Based on the survey responses, the top three priorities in Barbour County related to Education and Training are:

- Additional vocational training programs.
- Expanded Broadband and access to computers in homes.
- Child care options for people attending education and training programs.

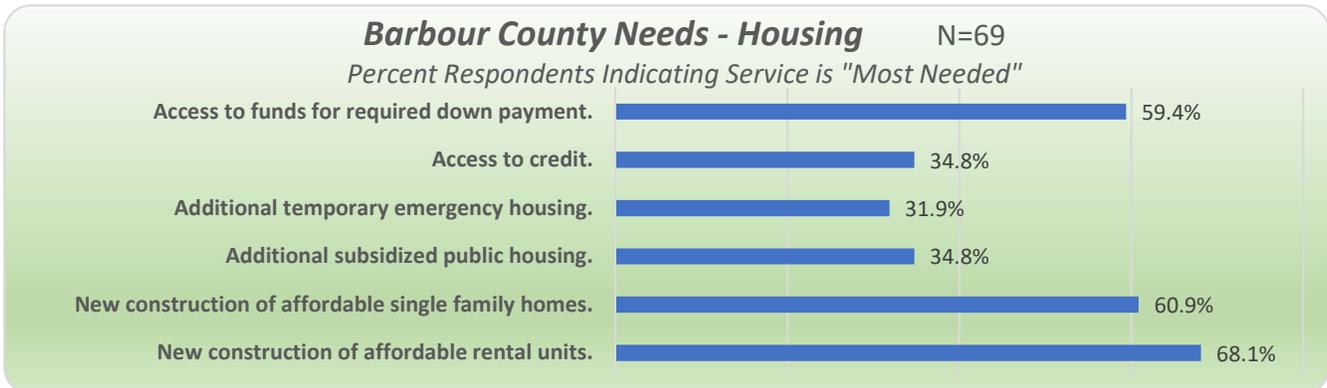

34.3% of survey respondents in Barbour County indicated improved communication between parents and K-12 school personnel was a priority need, and a variety of other needs related to K-12 schools and transportation to training programs were identified by a minority of survey respondents (20% to 27%). Notably higher numbers of people, however, expressed an opinion that vocational training programs, child care for people attending those programs, and expanded access to broadband were priority needs in the county.

*Housing:*

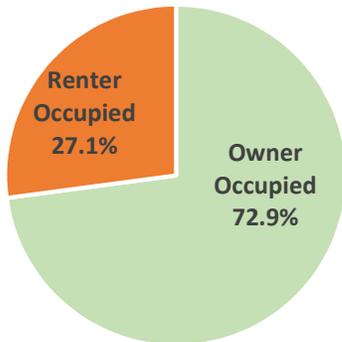

Most people responding to the survey in Barbour County identified a need for new construction of affordable housing including rental units and single-family homes and assistance in purchasing a home. Access to funds for any required down payment on a home and general access to credit were identified by a substantial number of the respondents as areas that need to be addressed. Based on the survey responses, the top three priorities in Barbour County related to Housing are:

- New construction of affordable rental units,
- New construction of affordable single-family homes, and
- Access to funds for down payment on a home.

Secondary data sets reviewed tend to reinforce the survey findings related to housing needs and affordability. A little less than three-quarters of Barbour County residents are home owners while a little more than one-quarter live in rental properties.

**Type of Housing Tenure**

The median age of housing units in the county is 42 years; however, 21.7% of existing homes were built prior to 1940. As of 2015, there were an estimated 42 occupied homes without plumbing in the county (ACS 2011-15).

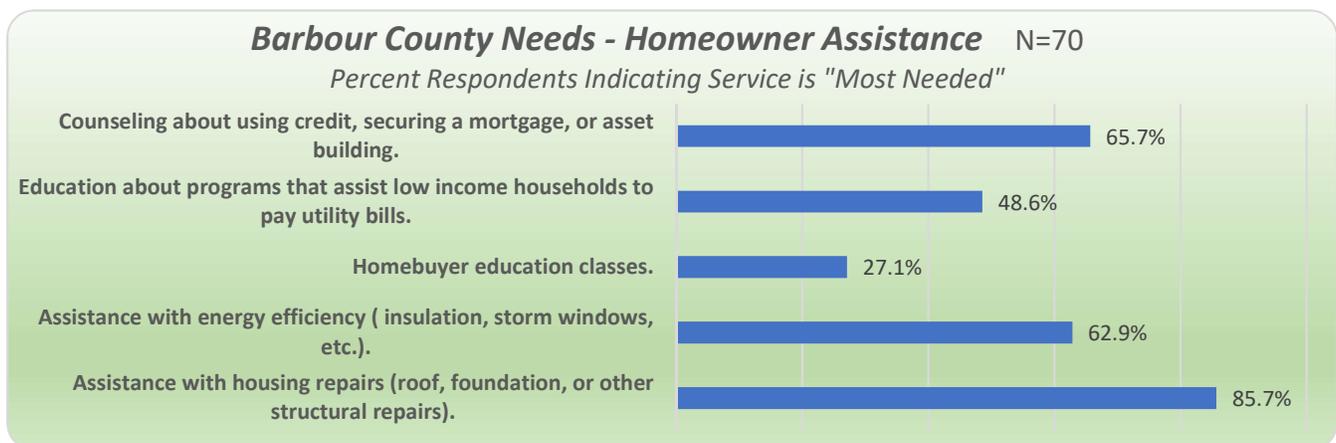

24.6% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income. Twice as many renters are cost burdened (48.9%) based on their gross rent exceeding 30% of the household income.

The median value of owner occupied housing in the county is \$96,200 and median monthly owner costs for those with a mortgage is \$830 (ACS 2011-15).

*Homeowner Assistance:*

Survey respondents in Barbour County believe home repairs are the greatest need among low-income persons. Counseling services for potential home buyers and assistance with energy efficiency are also high priorities based on the survey responses. The top three priorities in Barbour County related to Homeowner Assistance are:

- Housing repairs.
- Credit, mortgage, asset building counseling.
- Energy efficiency (insulation, storm windows, etc.).

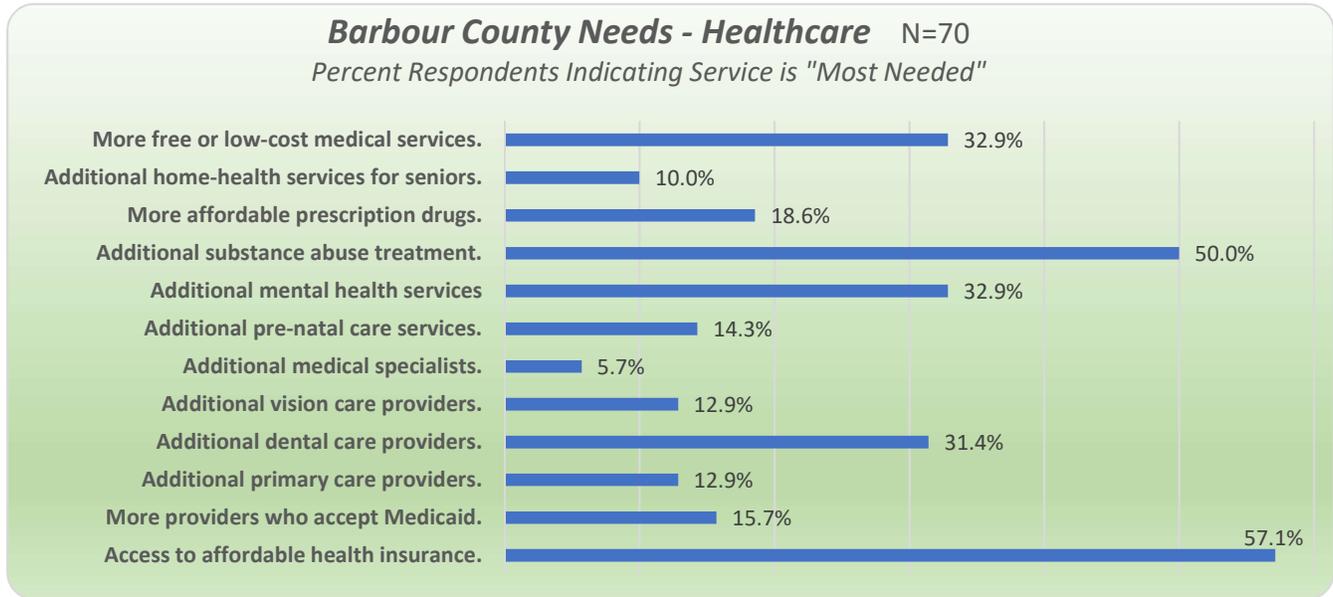

Community survey responses tend to support the need for many of the types of programs offered by NCWVCAA in areas related to Housing and Weatherization. Additional home repair services are needed if resources can be found to support such services.

*Healthcare:*

Affordable health insurance options and access to substance abuse treatment are the major priorities identified by the survey respondents within the Healthcare domain. The most frequently cited needs in

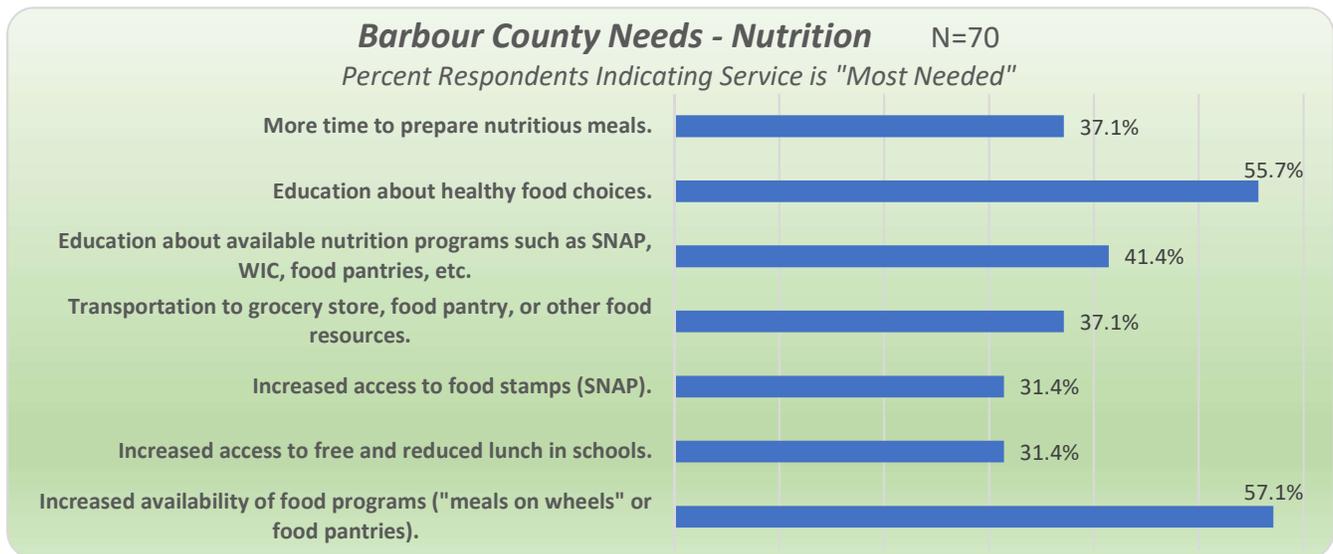

this area are:

- Access to affordable health insurance,
- Access to substance abuse treatment,
- Access to mental health services,
- Additional low-cost or free clinics providing healthcare services, and
- Additional dental care services and providers.

*Nutrition:*

When asked about community needs related to food and nutrition, Barbour County survey respondents focused on increasing the number of supplemental food programs available in the county; and educational services for low-income people about making better food choices and how to access supplemental food programs.

Survey respondents identified the following priorities related to food and nutrition:

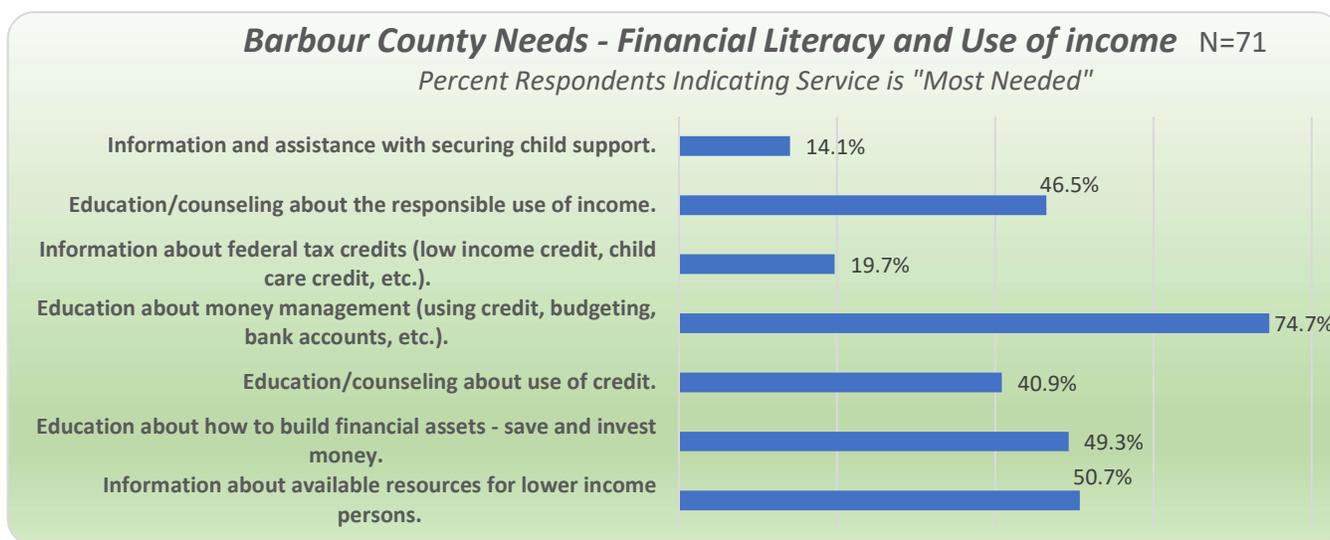

- Increased availability of food programs (Senior meals, “meals on wheels”, food pantries, and .
- Education about healthy food choices and available food programs.

Currently, there are 7 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) serving the county (*WV Foodlink 2015*) and 17.7% of households in Barbour County receive food stamps to supplement their food budgets. 517 families are enrolled in WIC through the WIC office serving the county. The *WV Foodlink* County Profile for Barbour County documents 11 retail locations that accept food stamps and 2 locations accepting WIC (2015).

1,767 school-age children are eligible for free and reduced cost meals at school; however, data reflects only 72% of eligible students participate in the program (*WV FoodLink*).

#### *Financial Literacy:*

Survey responses indicate a need for educational services about money management including responsible use of credit, budgeting, using bank accounts, and other issues related to financial literacy. Some type of education about these issues is clearly a high priority based on survey responses.

Other priorities related to financial literacy include:

- Access to information about available resources to assist low income person,.
- Education about how to build financial assets, and
- Education/counseling about the responsible use of income.

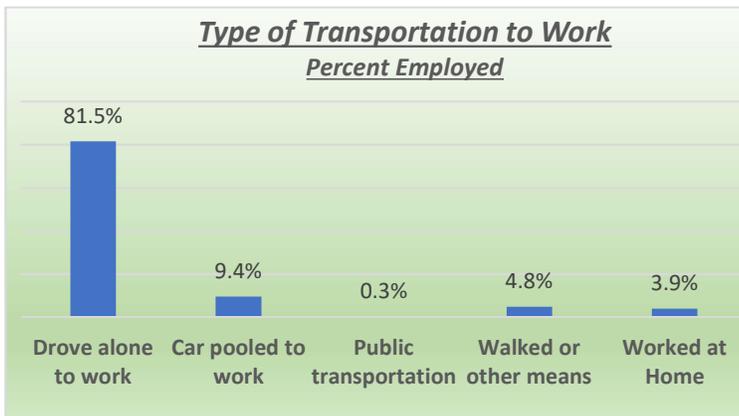

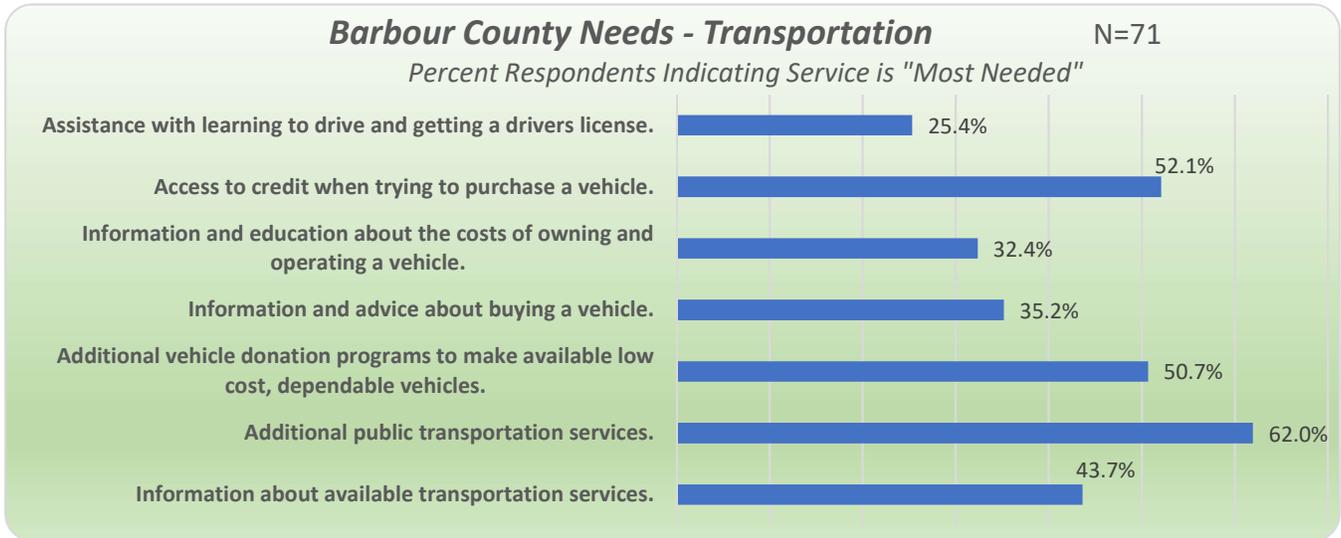

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 7.0% of Barbour County households are “unbanked” (have no checking or savings accounts).

#### *Transportation:*

Access to public transportation services and inability to purchase a vehicle are notable issues for low income people in Barbour County based on survey responses. The highest areas of need related to transportation identified include:

- Expanded public transportation service,

- Access to credit to purchase a vehicle, and
- Vehicle donation programs to make available low cost, dependable vehicles to low income persons.

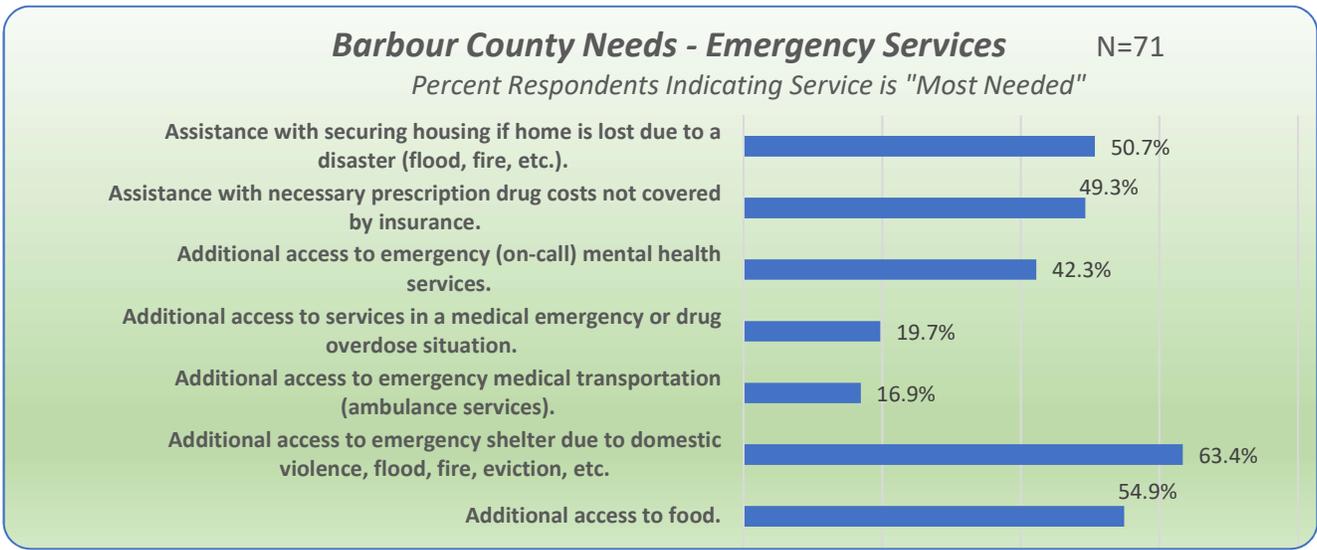

Dependable transportation is necessary for most people to access employment as the mean travel time to work for current workers is 30.4 minutes. Most workers also rely on private transportation to get from home to their work site. 90.9% of all persons employed either drive alone or car pool to work (ACS 2011-15).

*Emergency Services:*

Some of the priorities related to emergency services tend to overlap with issues related to food, housing and health related services. Increased access to emergency crisis shelter, assistance with obtaining housing if home is lost in a disaster, and access to food and healthcare are identified issues needing attention.

Priority areas of concern related to the emergency services domain include:

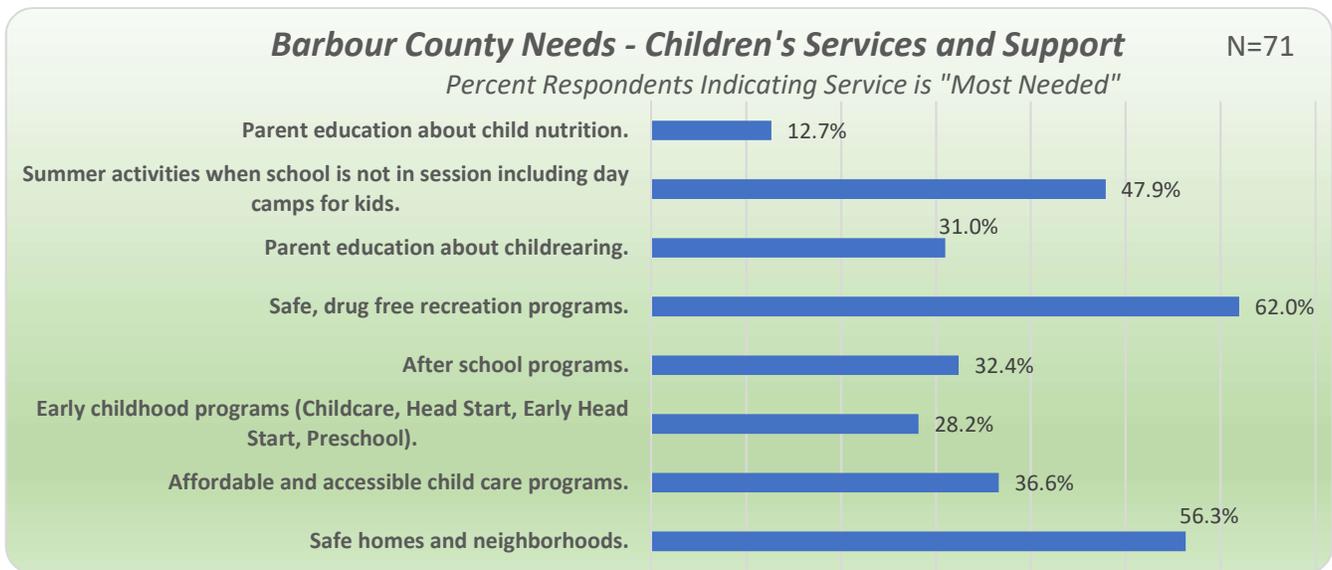

- Access to shelter facility due to domestic violence, flood, fire, eviction, etc.,
- Expanded access to food programs,
- Temporary housing due to loss of home in a disaster, and
- Assistance with prescription drug costs.

Access to emergency services and medical transportation appears to be a concern for relatively few survey respondents indicating these services are more likely to be a resource within the county.

*Children's Services and Supports:*

Safety issues and summer programs were identified as areas of concern when survey respondents were asked about needs within the Children's Services domain.

Priorities for attention related to services and programs for children include:

- Safe and drug free recreation programs,
- Safe homes and neighborhoods, and
- Summer activities for children/youth including day camps.

The concerns expressed through the survey are further documented by quantitative data related to child and family safety. The child abuse/neglect rate in the county was 19.1 per 1,000 children (Kids Count

2015); however, there were 108 court filings for child abuse/neglect in 2016 which is 30.9 filings per 1,000 children (2016 *Circuit Court case filings data*). There were also 114 domestic violence cases filed in 2016 which is a rate of 26.9 filings per 1,000 family households (2016 *Family Court case filings data*).

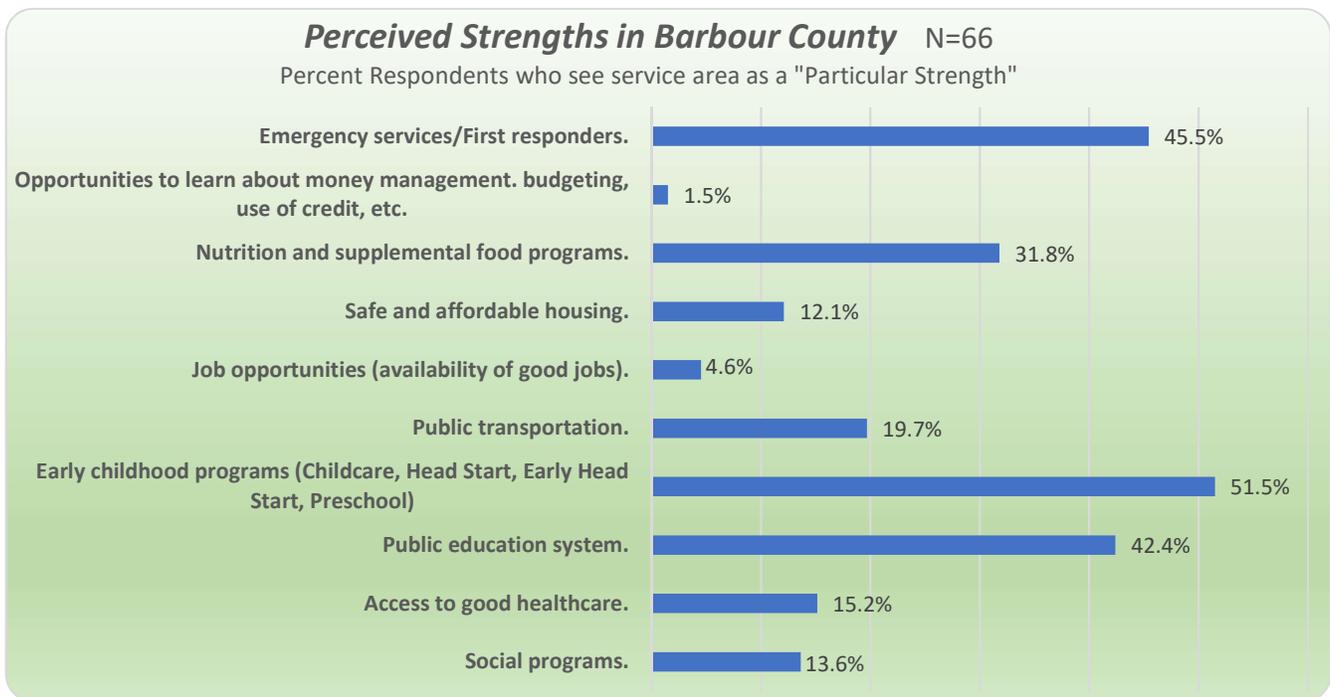

Early childhood programs in Barbour County (including childcare, preschool Head Start and Early Head Start) appear to be a relative strength as compared to safety concerns related to homes and safe and drug free children’s programs.

Primary Strengths and Community Resources

Survey respondents in Barbour County were asked what they considered to be the greatest strengths in Barbour County and they were asked to select all options they consider to be a “particular strength”.

Based on the responses, early childhood programs including Head Start and Early Head Start are perceived as strong by a majority of all respondents. First responder emergency services and public education were also seen as relatively strong components of the community service system.

Other areas of the broad community services system were seen by few people responding to the survey as areas of strength.

Persons participating in the community discussions identified a number of strengths and assets within the county including:

- Diverse and accepting people living in Barbour County,
- Natural beauty, history of the area, and the annual Blue and Gray Festival,
- Alderson Broaddus University and educational opportunities offered by the college,
- Good working relationship among community organizations in the county, and
- The World Vision Appalachia location in the county.

Other resources that address the needs of low income families identified within Barbour County include:

- A range of public health and mental health services,
- *Right from the Start* program for Medicaid eligible pregnant women and infants,
- 4 licensed child care centers,
- 33 licensed family day care providers,
- *Parents As Teachers* program,
- A limited route public transportation service - *Here and There Transit*,
- Local office of the WV Department of Health and Human Resources,
- Barbour County Family Resource Network,
- Barbour County Senior Center, and
- Three banking locations.

#### Head Start/ Early Head Start Needs and Resources

135 children were served through Public Pre-K programs during the 2016-17 school year and the Pre-K participation rate for 4-year-olds in Barbour County was at 76% (WV Dept. of Ed). These 4-year-olds were served through approved voluntary programs operated by Head Start, public schools, and other early childhood providers.

For fiscal year 2017 (July 1, 2016-June 30, 2017) a total of 76 children received Head Start services and 13 (1 prenatally) received Early Head Start services in Barbour County. 69 of the Head Start children were Caucasian, 1 was African American, and 6 were bi-racial. One child was Hispanic. All 13 of the Early Head Start children served in Barbour County were Caucasian and there were no Hispanic children served.

There were 4 foster children served through Head Start programs in Barbour County during the period July 2016 to June 2017 and 8 homeless children were served. One (1) of the Early Head Start children was homeless and 4 EHS children were in foster care. English was the primary language spoken in the home for all Head Start and all Early Head Start children. During calendar year 2017, annual program attendance and enrollment totals in Barbour County Head Start programs were at 103.9% of available program slots and EHS enrollment was at 103.7%.

#### *Head Start Needs Projections for 2018-19*

For program year (PY53), 123 four-year old children and 144 three-year old children are projected to be potentially eligible for services. Even though the number of eligible children is about the same for three-year-olds, a decrease in four-year old eligibility compared to PY52 suggests there could be fewer Head Start eligible children to serve in the classes at Belington Pre-K I, Philippi Elementary I, Philippi Elementary II, Philippi I Head Start, Philippi II Head Start, Junior Elementary I and Junior Elementary II for the 2018-2019 school year. A recent change in the law requiring children to be four years of age by July 1 instead of September 1 will leave a lapse of fourteen (14) children in the Belington area and fifteen (15) in the Philippi area. These twenty-nine (29) children who will be 4 within those months will not be age eligible to receive Universal Pre-K services for the 2018-2019 school year.

Information for this enrollment projection was gathered from existing family information, recruitment cards, birth announcements in newspaper, referrals from the Birth to Three program, information provided by DHHR, family responses to posters in the community, and Internet contacts.

### *EHS Needs Projections for 2018-19*

The number of eligible children for PY53 compared to PY52 projections have slightly increased for the pre-natal to one-year olds but has greatly decreased for two-year-old children. According to the demographic map analysis for PY53, there are one-hundred and fifty-four (154) prenatal to one-year olds compared to one-hundred and forty-seven (147) projected in PY52 and sixty-five (65) two-year olds in PY53 compared to one-hundred and fifteen (115) estimated in PY52. These numbers indicate that the population of eligible children in Barbour County continue to support the current Early Head Start home-based services and possible expansion.

### *Services Provided by NCWVCAA*

The characteristics of clients served, and the types of services provided in Barbour County by NCWVCAA provides insight into eligible people and their needs. During the most recent calendar year completed (2017), data was collected for a total of 1,146 persons who received services from the agency in Barbour County. 518 of the persons served were male and 628 were female. 93.9% of all persons receiving services were White, 3.1% were Multi-racial, 1.4% were American Indian or Alaska Native, and 0.9% Black. Those persons of Hispanic ethnicity made up 2.0% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 24 to 44 yrs. age group.

74.1% of all families served have annual income below the federal poverty level and 110 families (25.6%) reported zero income. 3.5% of those served have no health insurance and 11.7% are disabled.

The most numerous types of outcomes achieved through services provided include:

- Preservation of safe, affordable housing through construction, weatherization, or rehabilitation,
- Infant and child health and physical development maintained or improved through adequate nutrition,
- Improved school readiness skills through participation in pre-school activities,
- Increased financial assets and/or financial skills,
- Assistance with emergency fuel or utility payments, and
- Infants and children obtain age appropriate immunizations, medical and dental care.

# *Greenbrier County*

## *Community Needs and Resources*

## GREENBRIER COUNTY

**Note: NCWVCAA does not provide Head Start/EHS services in Greenbrier County.**

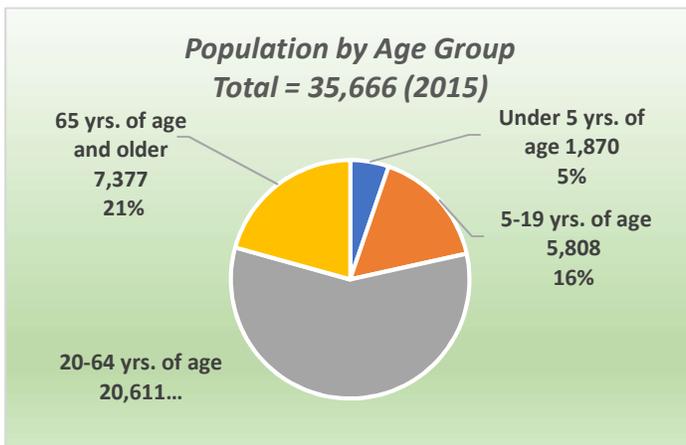

### History and Geography

Greenbrier County is the second largest county in West Virginia, with 1,021 square miles. The county was created by an act of the Virginia General Assembly in October 1777 from parts of Montgomery and Botetourt counties. It was named in honor of the Greenbrier River, a 173-mile long tributary of the New River. The river forms at Durbin and flows through Pocahontas, Greenbrier, and Summers County at which point it flows out into the New River at Hinton. (*Greenbrier County Convention & Visitors Bureau, 2011*)

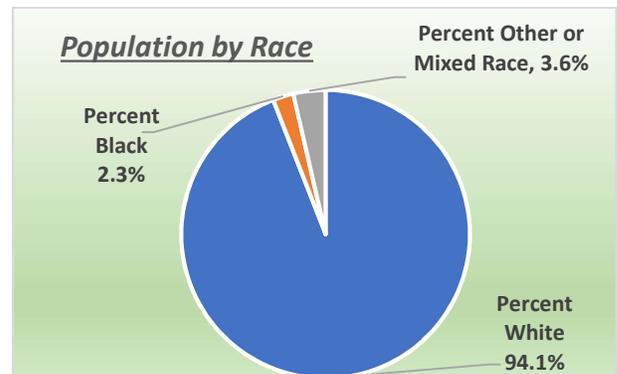

Nestled in the Allegheny Mountains, the area offers many recreational opportunities and considers outdoor recreation and tourism one of its most important resources. The county seat and major town is Lewisburg, located in the southeastern part of the county. Interstate 64 runs east to west through the south-central part of the county. The county also has rail connections and an airport. The northern and eastern corner sections of Greenbrier County are part of the Monongahela National Forest. In the southeast near Interstate 64 is the Greenbrier State Forest and in the north on the border with Pocahontas County.

### Demographic Characteristics

over the age of 65 yrs.

The total population of Greenbrier County is 35,666 persons (ACS, 2015). 5% of the population is under five years of age and 21% is

94.1% of the population is White and 2.3% is Black. The remaining 3.6% of Greenbrier County residents are of mixed or other races.

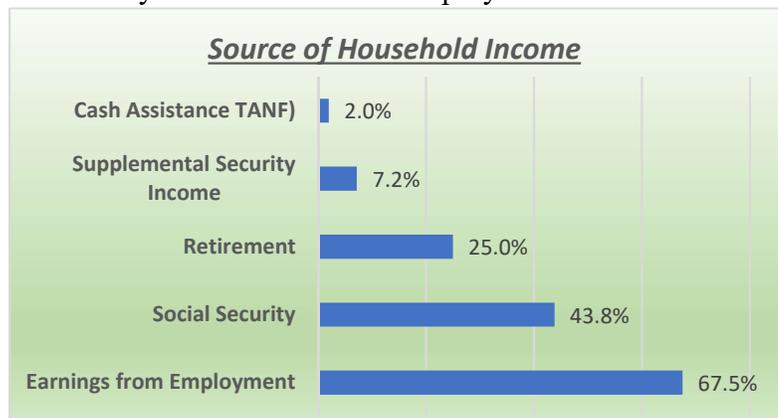

There are 15,339 households and 9,873 family households in the county. 4,165 or 27.2% of the total family households have children under 18 yrs. of age.

**Socio-Economic Characteristics**

14.6% of Greenbrier County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate more than doubles reaching 34.6%. Single female headed families with all children under 5 yrs. of age are particularly susceptible to poverty with 67.4% of these single parent families with young children struggling with annual income below the FPL.

Median household income in Greenbrier County is \$40,026 which is below the state average of \$42,644 (ACS 2012-16). 67.5% of the households in the county have income from employment and 2.0% receive cash assistance through the TANF program. 17.0% of households in the county receive food stamps to supplement their income (ACS 2015).

A high percentage of households in Greenbrier County are close to poverty should they lose income. The “Liquid Asset Poverty Rate” defined as a lack of sufficient liquid assets to subsist at poverty level for three months in absence of income, is at 42.3% in the county (2014 Survey of Income and Program Participation, US Census Bureau).

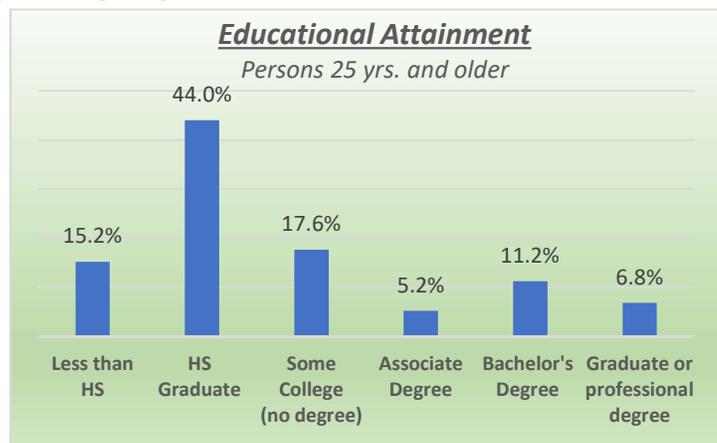

**Causes of Poverty**

Primary causes of poverty in the county appear to include:

- Lack of education and skills, and
- Restricted access to “good jobs” paying a living wage.

The unemployment rate declined slightly by 0.1% between August of 2016 and August of 2017 to a level below the state average of 5.4%.

Educational attainment is relatively low among Greenbrier County residents. 18.0% of those 25 yrs. of age and older hold a college degree and an additional 5.2% have an associate degree. More than half of county residents have no education beyond high school, and 15.2% have less than a high school education (ACS 2015). The research on secondary data sets documents the school dropout rate in

Greenbrier County at 6.5% (*Kids Count 2015*); however, the 4-year cohort graduation rate is only 90.0% (*WVEIS 2016*).

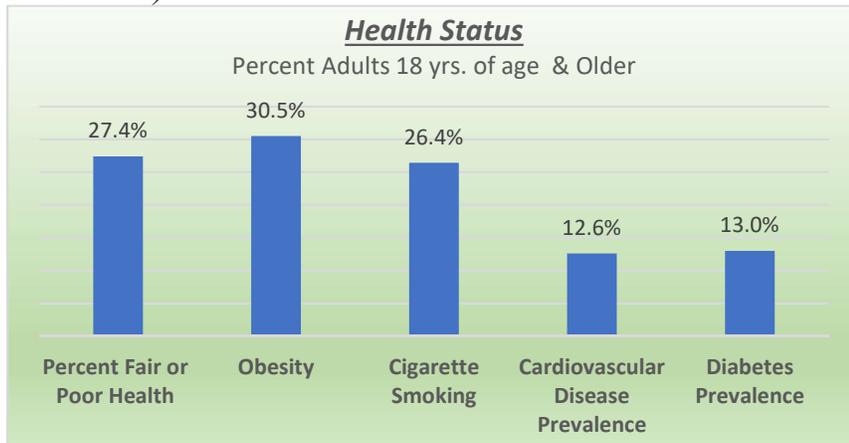

The 2016 college going rate in the county is at 54.4% of graduating high school seniors (*WV Higher Education Policy Commission*). 11<sup>th</sup> grade reading proficiency is at 32.4% and Mathematics proficiency is quite low at only 14.0% (*WVEIS 2016-17*).

The community discussion held in the county identified several factors contributing to poverty including:

- Need for affordable housing and healthcare services,
- Lack of intergenerational learning, and
- Need for development of agricultural industries.

When asked to define poverty and the factors that keep people in poverty, community discussion participants identified: (1) lack of education, (2) low levels of financial literacy, (3) stigma associated with seeking help for mental health issues and addictions, and (4) family dynamics (generational poverty). One indicator of the potential for generational poverty is births to mothers with less than a high school education which is 12.2% of all births in Greenbrier County (*Kids Count 2015*).

There were 30 overdose deaths in Greenbrier County over the period 2013-15; an overdose mortality rate of 28 per 100,000 population during the period (*County Health Rankings, Robert Wood Johnson Foundation*).

Health status of the population and access to healthcare, mental health services, and substance abuse treatment is also a major contributing factor to poverty in Greenbrier County. Obesity rates are at 30.5% among the adult population and 26.4% of the adult population smoke (*BRFS 2014*). In addition, 12.2% of the population is without any type of health insurance (*ACS 2015*).

The infant mortality rate in Greenbrier County is 6.5 deaths per 1,000 live births and 6.8% of babies born to county residents are low birth weight (less than 2500 grams). The teen birth rate is at 36.0 births per 1,000 females (*Kids Count 2015*).

### Community Needs

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

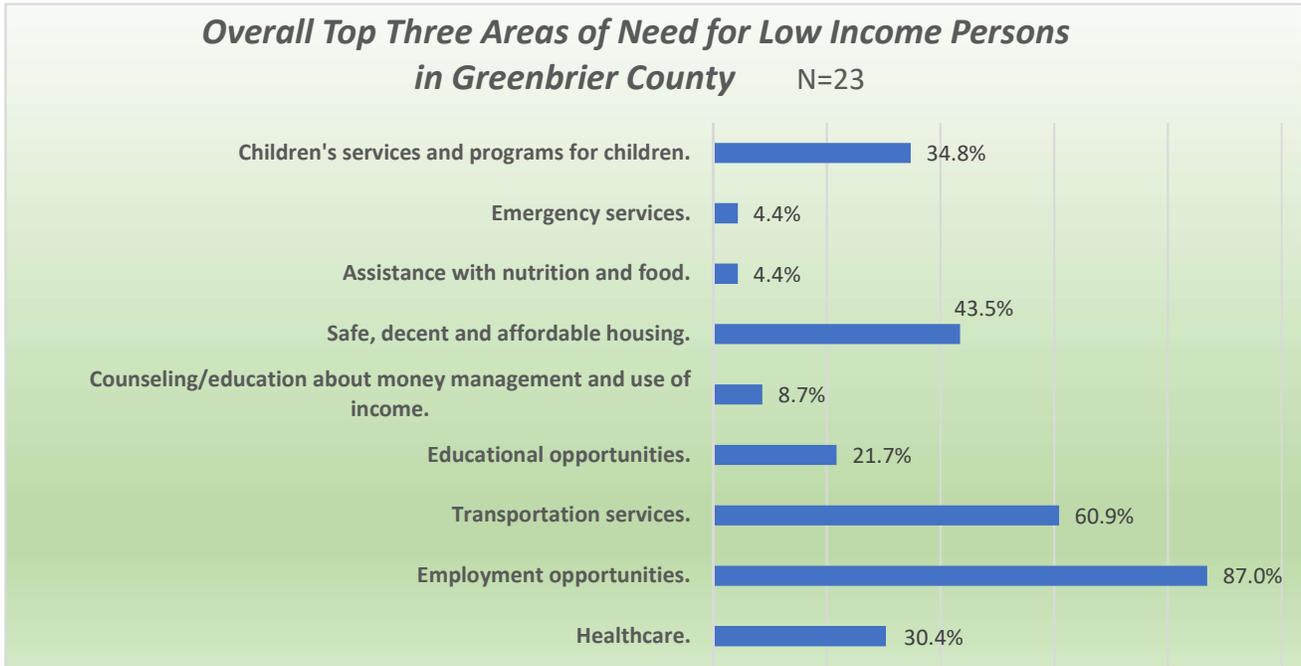

#### Overall Needs and Priorities

Greenbrier County survey respondents were asked:

” *What do you think are the top three areas of need of low income people in Greenbrier County?*”

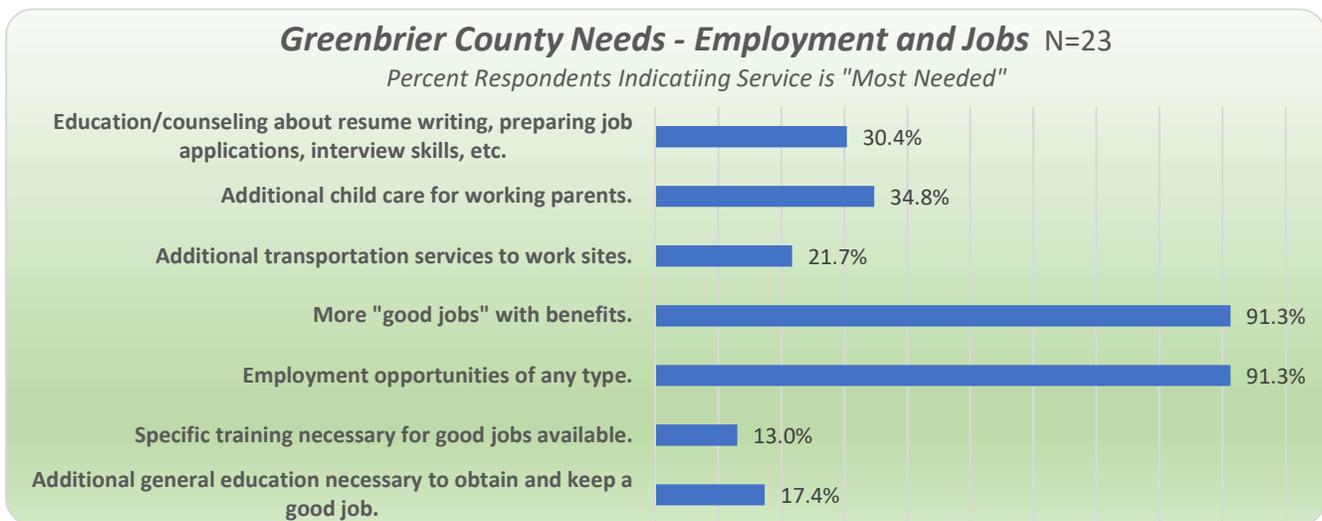

Employment opportunities were, by far the most frequently selected area of need with 87.0% of respondents focusing on this domain. Transportation services was identified as a secondary priority in Greenbrier County.

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

*Employment and Jobs:*

Most people responding to the survey in Greenbrier County focused on the need for additional employment opportunities in the county.

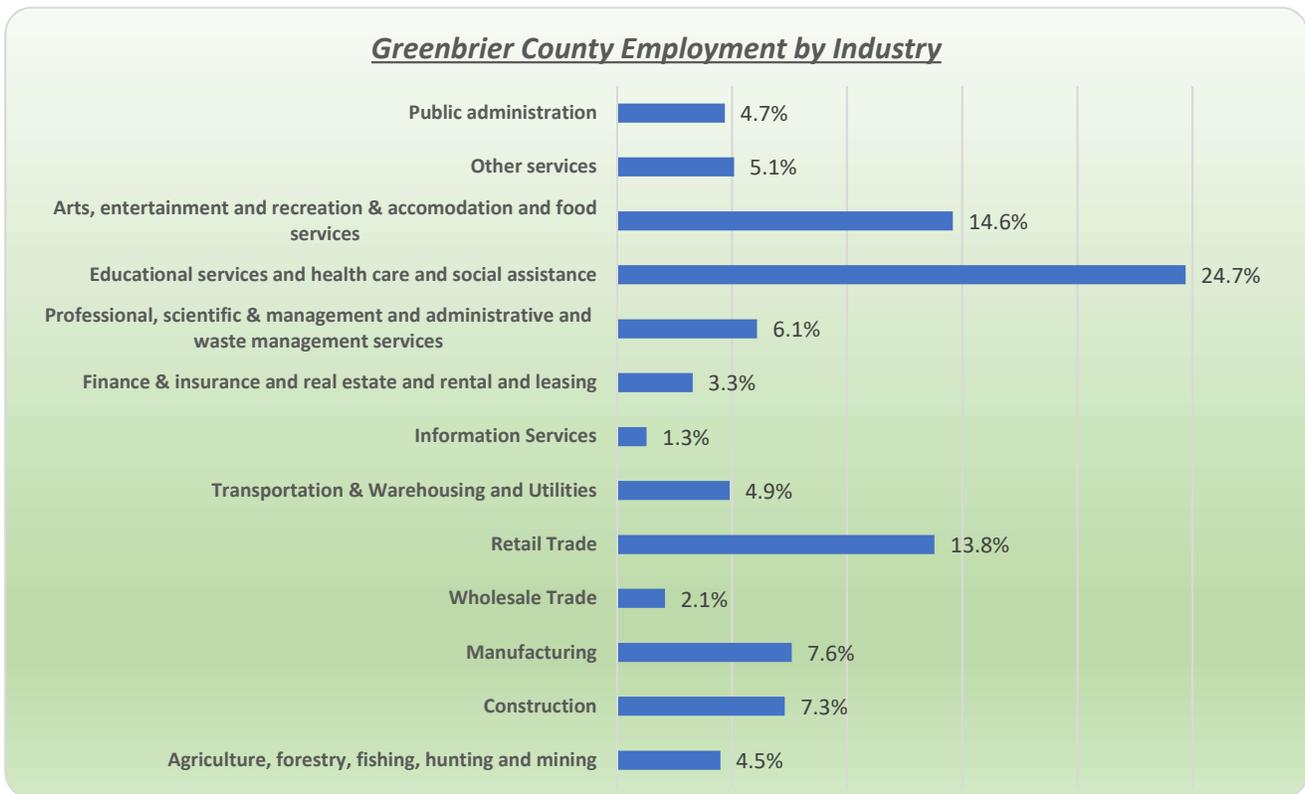

Based on the survey responses, the top priorities in Greenbrier County related to Employment and Jobs are:

- Employment opportunities of any type, and
- More good jobs with benefits.

Nearly all of the limited number of surveys completed focused on the development of good employment opportunities. Some survey respondents also indicated a need to address other issues related to employment such as child care, skills in seeking employment, and transportation services to work locations. Employment in Greenbrier County is in the educational, healthcare, and social service sectors (24.7% of employment); and in arts, entertainment recreation, accommodation and food services (14.6%). Retail trade accounts for 13.8% and manufacturing accounts for 7.6% of current employment. (BLS 2015).

The largest current employers in Greenbrier County (in order of number of people employed) are:

1. Greenbrier Hotel Corporation,
2. Greenbrier County Board of Education,
3. Greenbrier Valley Medical Center, and
4. Walmart.

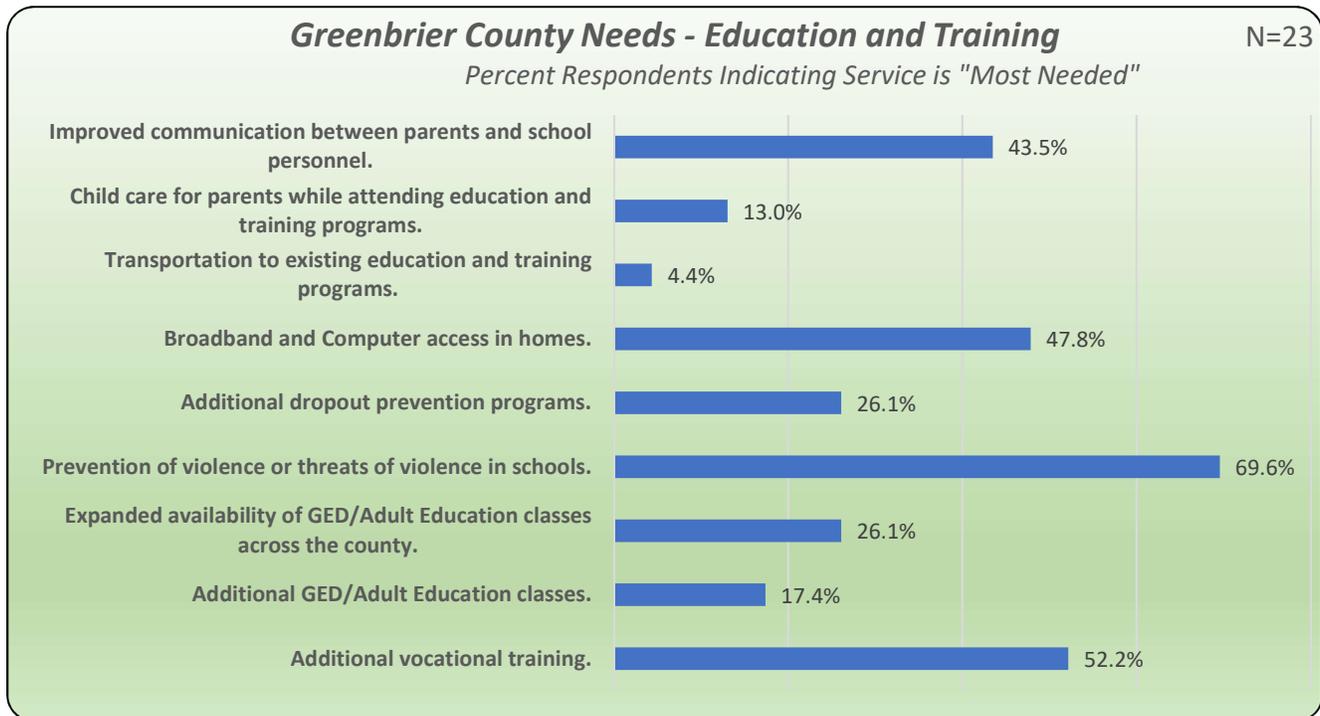

*Education and Training:*

Greenbrier County residents responding to the survey are concerned about violence in schools with 69.6% of respondents prioritizing prevention of violence or threats of violence in schools as a need in the county. Other areas of need identified include additional vocational training, broadband access in homes, and improved communication between parents and school officials. Based on the survey responses, the top three priorities in Greenbrier County related to Education and training programs are:

- Prevention of school violence,

- Additional vocational training, and
- Expanded Broadband and access to computers in homes.

43.5% of survey respondents in Greenbrier County also indicated improved communication between parents and K-12 school personnel was a priority need.

Some respondents (about 1 in 4) identified dropout prevention and expanded availability of GED/Adult Education classes as a priority.

*Housing:*

People responding to the survey in Greenbrier County indicated there was a need for new construction of affordable housing. Additional rental units were the highest priority of survey respondents. General access to credit and access to funds for required down payment on a home were identified by more than half of the respondents as a priority.

Based on the survey responses, the top four priorities in Greenbrier County related to Housing are:

- New construction of affordable rental units,
- Access to credit,
- Access to funds for down payment on a home, and
- Additional subsidized public housing.

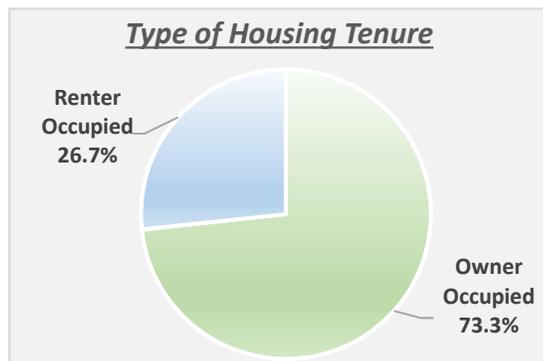

## Greenbrier County Needs - Homeowner Assistance

N=23

Percent Respondents Indicating Service is "Most Needed"

Secondary data sets indicate reviewed indicate a little less than three-quarters of Greenbrier County residents are home owners while a little more than one-quarter live in rental properties.

The median age of housing units in the county is 41 years; however, 19.1% of existing homes were built prior to 1940. As of 2015, there were an estimated 65 occupied homes without plumbing in the county and 171 without complete kitchen facilities. (ACS 2011-15).

23.7% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income. More than twice as many renters are cost burdened (47.9%) based on their gross rent exceeding 30% of the household income.

The median value of owner occupied housing in the county is \$105,300 and median monthly owner costs for those with a mortgage is \$863 (ACS 2011-15).

### Homeowner Assistance:

All persons (100%) responding to the survey in Greenbrier County believe homebuyer education classes are needed in the county, and nearly all (95.7%) think counseling services related to using credit, securing a mortgage or asset building is a priority. Assistance with home repairs are also a need identified through the survey for low-income persons. The top priorities in Greenbrier County related to Homeowner Assistance are:

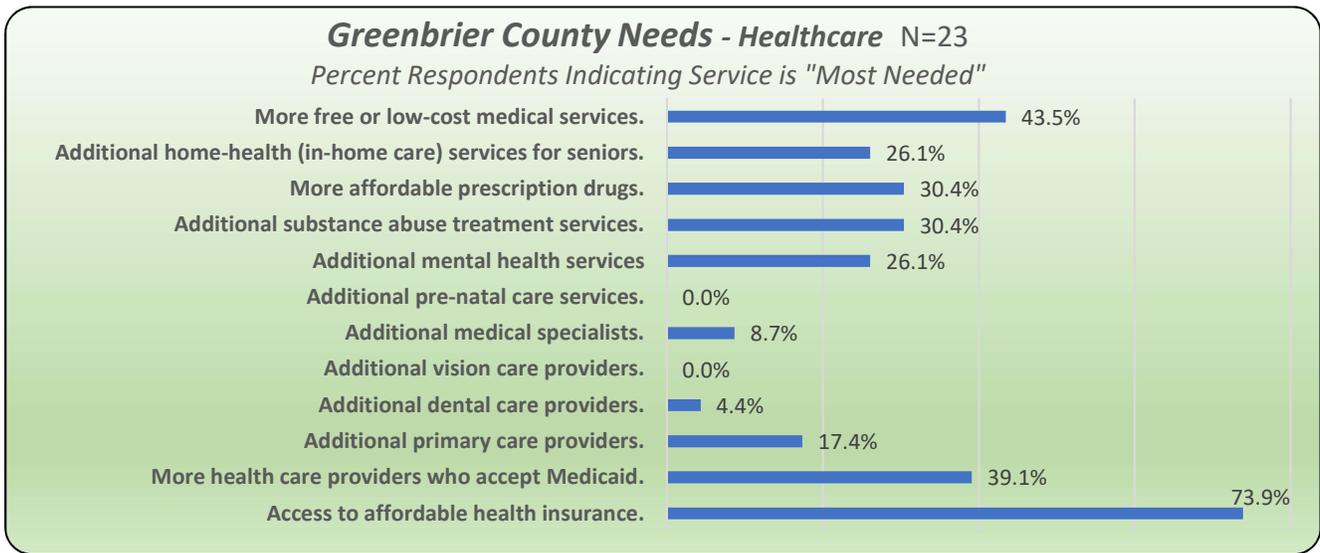

- Homebuyer education classes,
- Credit, mortgage, asset building counseling,
- Housing repairs, and
- Education about programs to assist with utility bills.

### Healthcare:

Affordable health insurance is the major priority identified by the survey respondents within the Healthcare domain. The most frequently cited needs in this area are:

- Access to affordable health insurance,
- Additional low-cost or free clinics providing healthcare services, and

- More healthcare providers who accept Medicaid.

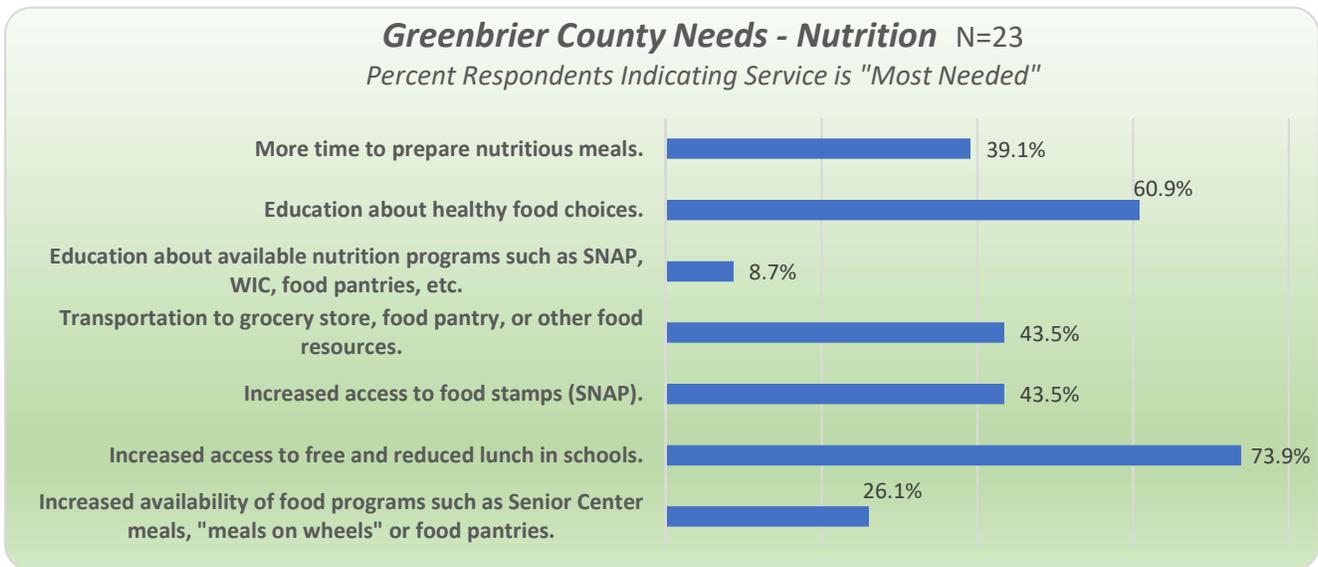

*Nutrition:*

When asked about community needs related to food and nutrition, Greenbrier County survey respondents focused on increasing participation in the school lunch program and educational services for low-income people about making better food choices.

Survey respondents identified the following priorities related to food and nutrition:

- Increased access to free and reduced meals at school,
- Education about healthy food choices,
- Increased access to food stamps, and
- Transportation to grocery stores and supplemental food programs.

Available data confirms a relatively low rate of participation in the school meals program. Only 62.0% of eligible students participate in the free and reduced cost meals program at school (*WV FoodLink 2015*).

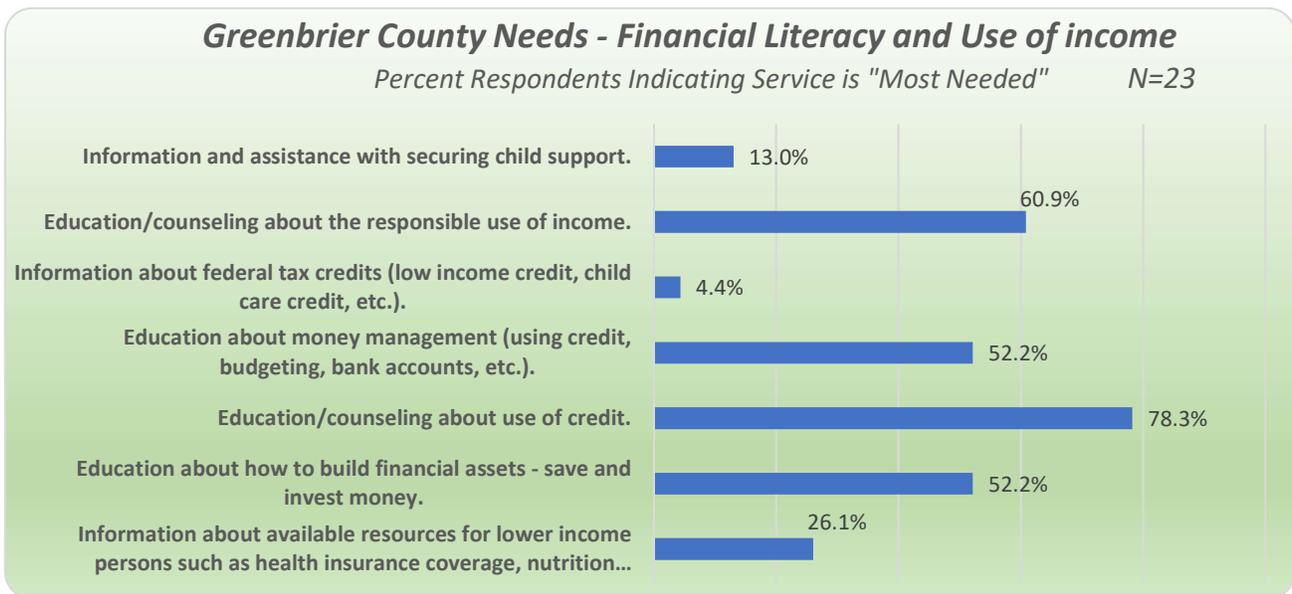

As of 2015, there were 25 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) serving the county (*WV Foodlink*) and 17.0% of households in Greenbrier County receive food stamps to supplement their food budgets. 998 families are enrolled in WIC through the WIC office serving the county based on average enrollment in 2013. The *WV Foodlink* County Profile for Greenbrier County documents 51 retail locations that accept food stamps and 5 locations accepting WIC (2015).

*Financial Literacy:*

Survey responses indicate a need for education and counseling services about the responsible use of credit and income. There also appears to be a need for education about money management and building assets in the county. Some type of educational program focused on education and counseling related to financial literacy is clearly a high priority based on survey responses.

Priorities within this domain include:

- Education/counseling about use of credit,
- Education/counseling about the responsible use of income, and
- Education about how to build financial assets.

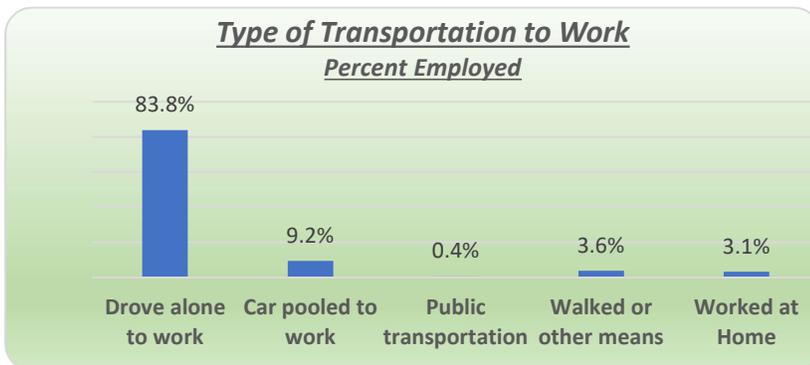

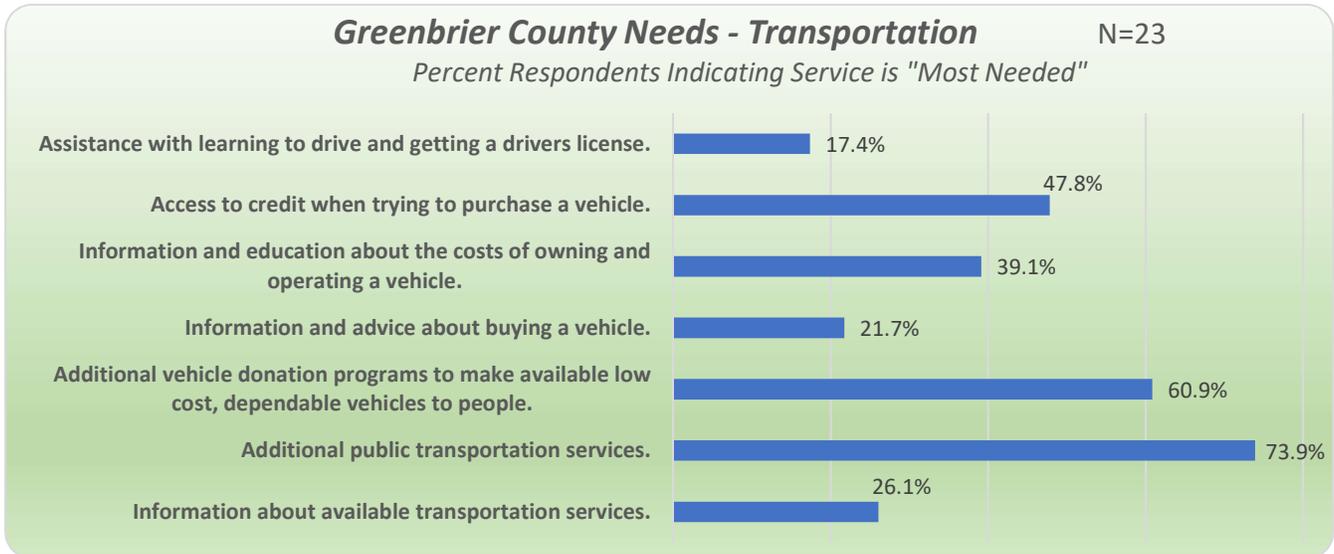

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 6.1% of Greenbrier County households are “unbanked” (have no checking or savings accounts).

*Transportation:*

Access to public transportation services and access to low cost programs that assist with the purchase of a vehicle are notable issues for low income people in Greenbrier County based on survey responses.

Access to credit for purchase of a vehicle is also an identified issue related to transportation needs. The highest areas of need related to transportation identified include:

- Expanded public transportation service,
- Vehicle donation programs to make available low cost, dependable vehicles to low income persons, and
- Access to credit when trying to purchase a vehicle.

Dependable transportation is necessary for most people to access employment as the mean travel time to work for current residents is 25.3 minutes.

Most workers also rely on private transportation to get from home to their work site. 93.0% of all persons employed either drive alone or car pool to work (ACS 2011-15).

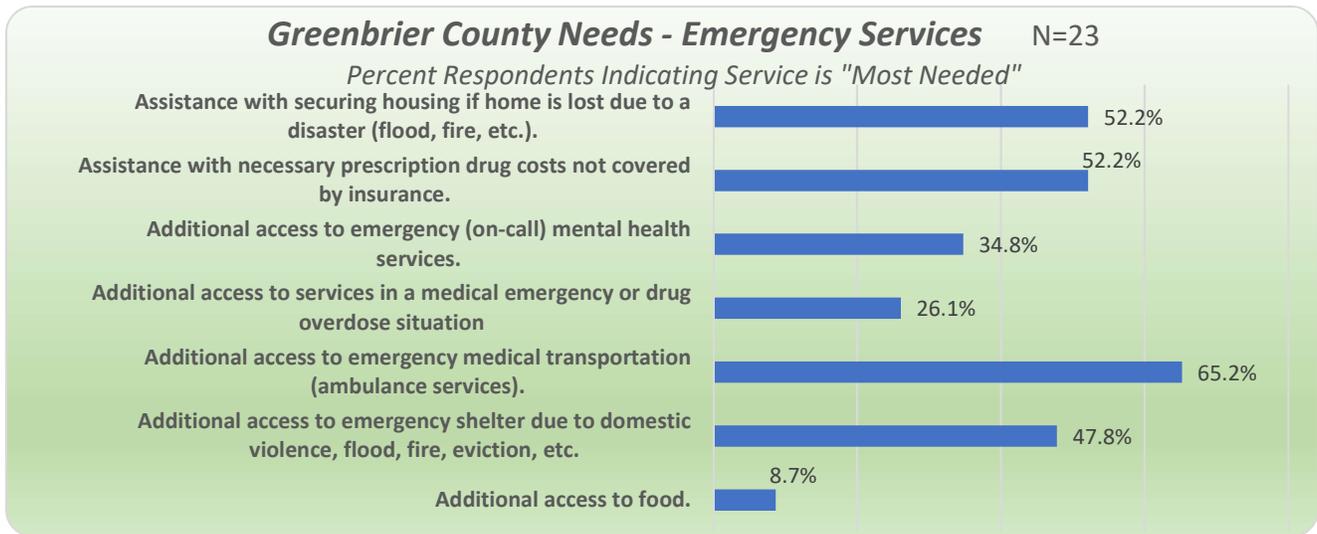

*Emergency Services:*

Based on the survey responses, Greenbrier County residents would like to see additional access to emergency medical transportation in parts of the county. Other emergency services issues identified through the survey include increased access to emergency crisis shelter, assistance with obtaining housing if home is lost in a disaster, and assistance with the high cost of prescription drugs.

Priority areas of concern related to the emergency services domain include:

- Additional medical emergency transportation (ambulance services),
- Access to shelter facility due to domestic violence, flood, fire, eviction, etc., and
- Assistance with prescription drug costs.

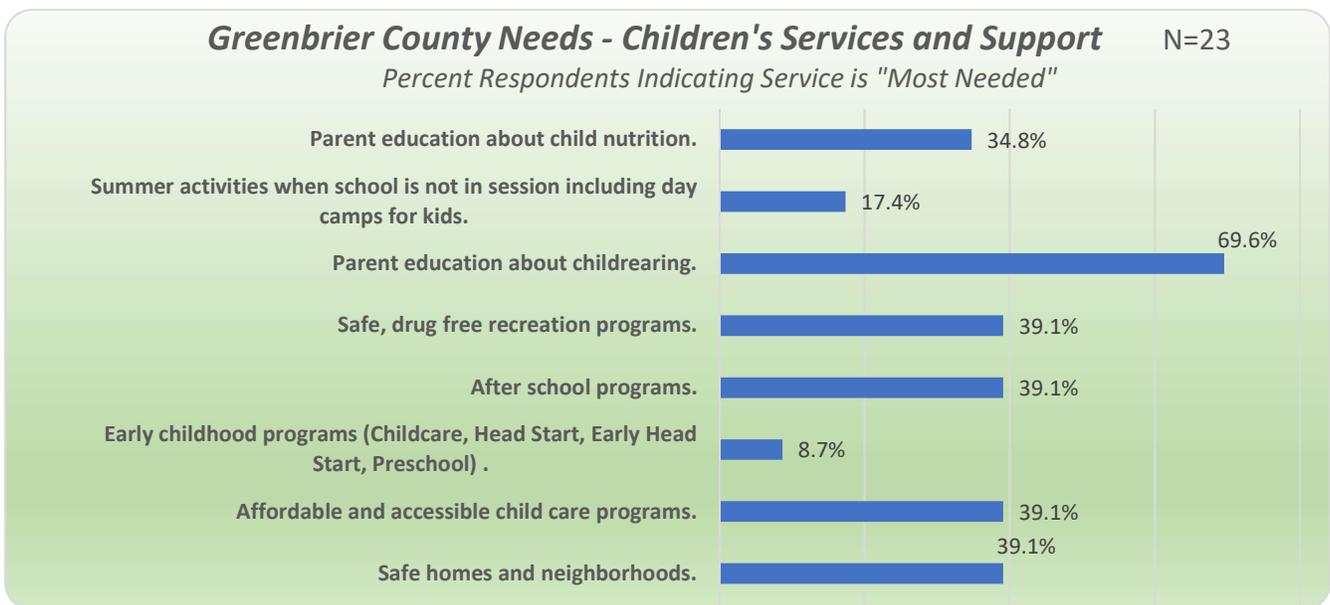

- Temporary housing due to loss of home in a disaster.

*Children's Services and Supports:*

Parent education about childrearing is the top priority related to child services and supports based on the survey responses. 70% of respondents selected this as one of the top three priority needs in the county. Several other concerns were expressed by about 40% of the respondents including safety issues, after school programs, child care, and safe and drug free recreational programs for children and youth. Priorities for attention related to services and programs for children include:

- Parent education,
- Safe and drug free recreation programs,
- Safe homes and neighborhoods,
- After school programs, and
- Affordable and accessible child care options.

Child safety appears to be an area of concern based on the Kids Count data. The child abuse/neglect rate in the county was 26.5 per 1,000 children (Kids Count 2015). However, there were only 68 court filings for child abuse/neglect in the county during 2016 which is a much lower rate of 9.7 filings per 1,000 children (circuit court case filings data). There were also 247 domestic violence cases filed in 2016 which is a rate of 25.0 filings per 1,000 family households (2016 family court case filings data).

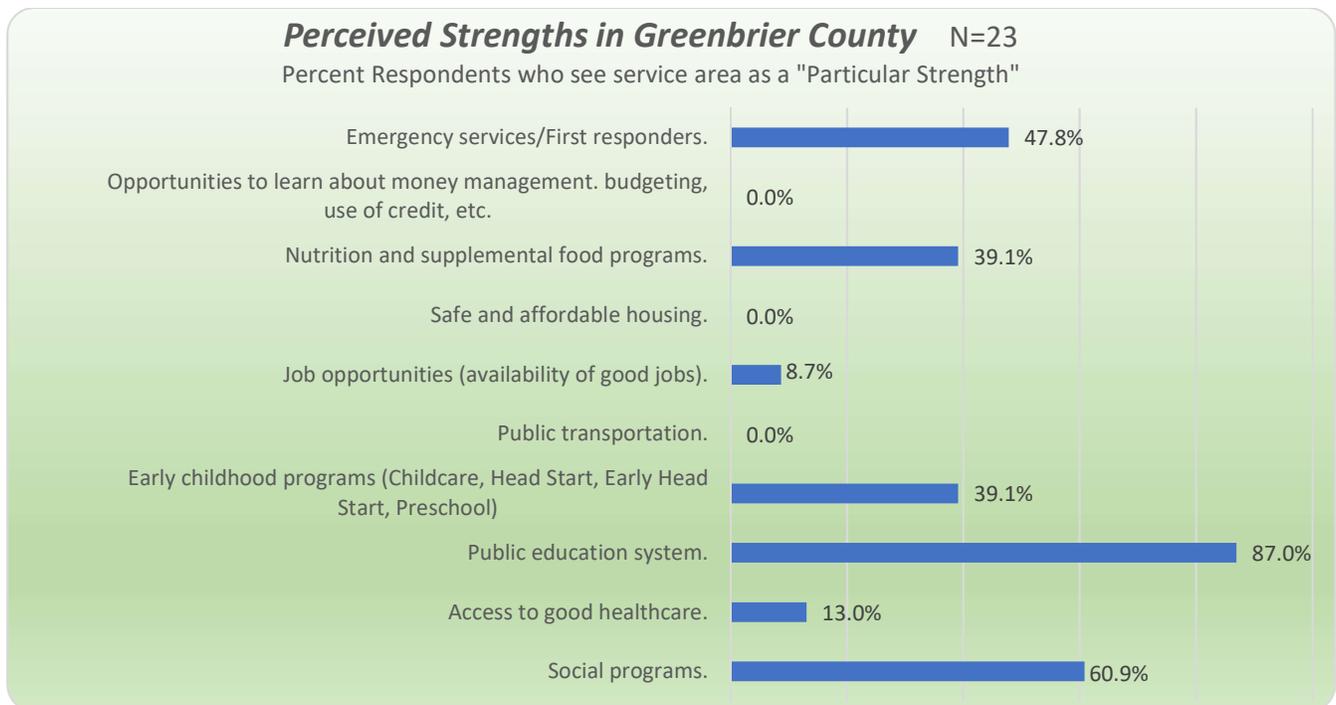

The Pre-K participation rate for 4-year-olds in Greenbrier County was at 74% for the 2016-17 school year. (WV Dept. of Ed). These 4-year-olds were served through approved voluntary programs operated by the Greenbrier County Board of education including Head Start and in cooperation with other early childhood providers.

**Primary Strengths and Community Resources**

Survey respondents in Greenbrier County were asked what they considered to be the greatest strengths in the county and they were asked to select all options they consider to be a particular strength.

Based on the responses, the public education system is perceived as strong by most (87%) of the respondents as a strength. Social programs in the county are seen as a strength by a majority (60.9%) of those persons completing the survey, and first responder emergency services are a strength in the opinion of nearly half of the survey respondents (47.8%).

None of the people responding to the survey identified opportunities to learn about money management, safe and affordable housing, and public transportation as a strength in the county and very few respondents see job opportunities and access to good healthcare as strengths.

Persons participating in the community discussions identified a number of strengths and assets within the county including:

- People who care,
- Natural beauty of the area,
- Arts & humanities programs,
- Attractive tourism destinations,
- Outdoor activities (caves, trails, fishing),
- The airport and train service,
- The local culinary scene,
- Ecumenical community in the area, and
- The Veterans Administration clinic.

Other resources that address the needs of low income families identified within Greenbrier County include:

- A range of public health services including immunizations, family planning, cancer screening clinics, limited primary care services, and community health education.
- *Right from the Start* program for Medicaid eligible pregnant women and infants.
- Licensed child care programs,
- *Parents As Teachers* programs,
- A limited route public transportation service - Mountain Transit Authority,
- Local office of the WV Department of Health and Human Resources,
- Greenbrier County Family Resource Network,
- Greenbrier County Senior Center,
- Eighteen banking locations, and
- Nine fire department/rescue service locations.

#### Head Start/ Early Head Start Needs and Resources

Head Start and Early Head Start programs in Greenbrier County are not provided by NCWVCAA.

#### Services Provided by NCWVCAA

The characteristics of clients served, and the types of services provided in Greenbrier County by NCWVCAA provides insight into eligible people and their needs. During the most recent calendar year completed (2017), data was collected for a total of 273 persons who received services from the agency in Greenbrier County. 119 of the persons served were male and 154 were female. 89.4% of all persons receiving services were White, 4.0% were Black, 3.7% were Multi-racial, and 2.9% were other races. Those persons of Hispanic ethnicity made up 2.6% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 24 to 44 yrs. age group.

76.7% of all families served have annual income below the federal poverty level. 2.6% of those served have no health insurance and 12.5% are disabled.

The most numerous types of outcomes achieved through services provided include:

- Assistance with emergency fuel or utility payments.
- Emergency food assistance and access to supplemental food programs
- Information and referral services.

# *Marion County*

## *Community Needs and Resources*

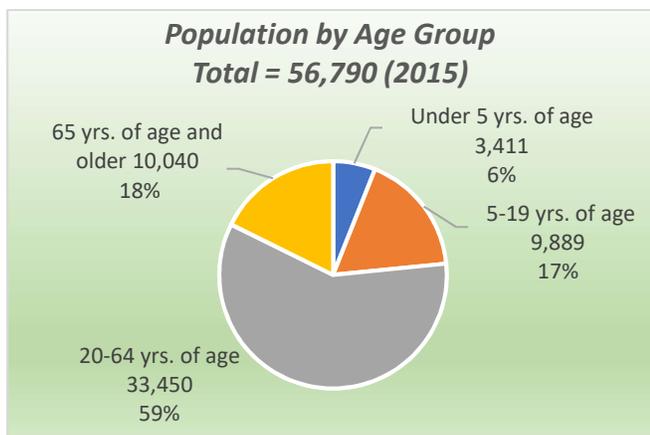

## MARION COUNTY

### History & Geography

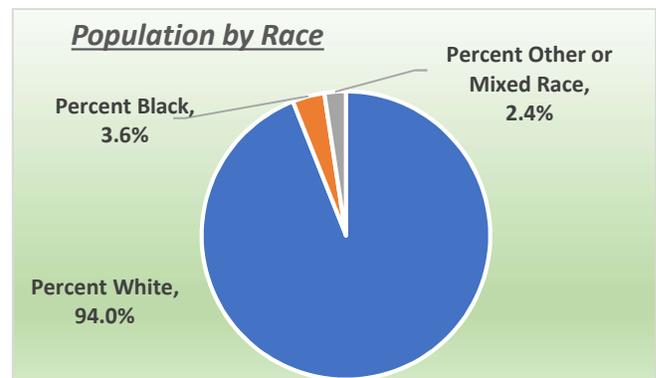

Marion County is located in the northern part of West Virginia covering 310 square miles. Marion County was formed on January 14, 1842 from portions of Harrison County and Monongalia County. It was named after Francis Marion, a.k.a. "Swamp Fox", a General in the Continental Army and later Brigade general of the South Carolina militia in the American Revolutionary War (*Wikipedia, 2011*). The I-79 corridor passes through Marion County and the largest city in the county is Fairmont, the county seat.

### Demographic Characteristics

The total population of Marion County is 56,790 persons (ACS, 2015). 6% of the population is under five years of age and 18% is over the age of 65 yrs.

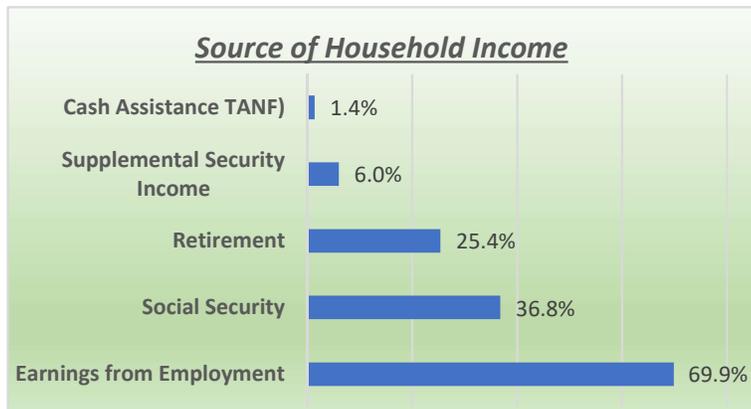

94.0% of the population is White and 3.6% is Black. The remaining 2.4% of Marion County residents are of mixed or other races.

There are 22,481 households and 14,742 family households in the county. 6,021 or 26.8% of the total family households have children under 18 yrs. of age.

### Socio-Economic Characteristics

16.2% of Marion County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate is higher at 25.0%. More than half (55.0%) of all single female-headed families with all children under 5 yrs. of age have annual income below the FPL.

14.5% of households in the county have zero net worth, and one in three Marion County households appear to close to poverty should their income be reduced or halted. The "Liquid Asset Poverty Rate" defined as a lack of sufficient liquid assets to subsist at the poverty level for three months in absence of income, is at 34.3% in the county (*2014 Survey of Income and Program Participation, US Census Bureau*).

Median household income in Marion County is \$46,430 which is above the state average of \$42,644 (ACS 2012-16).

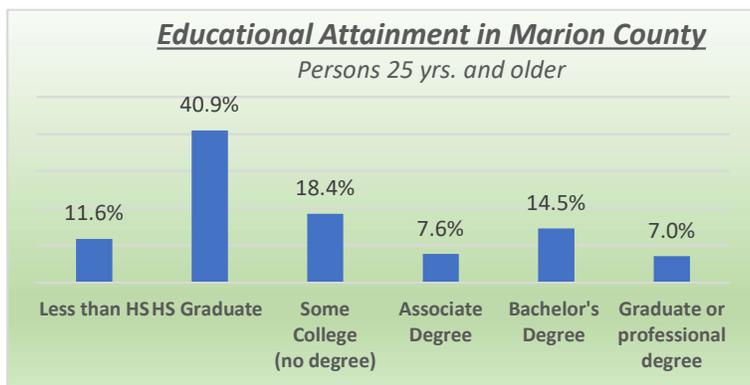

69.9% of the households in the county have income from employment and 1.4% receive cash assistance through the TANF program. 13.9% of households in the county receive food stamps to supplement their income (ACS 2015).

### Causes of Poverty

Primary factors keeping people in poverty in Marion County appear to include:

- An unemployment rate of 5.5% (August 2017),
- Low educational attainment and student debt for some with post-secondary education, and
- Lack of access to “good jobs” paying a living wage and inability to afford child care and health insurance.

Although the unemployment rate in the county declined by 0.7% between August of 2016 and August of 2017, it was higher than the state average of 5.4%.

Marion County residents have higher educational attainment than is the case in many more rural counties of the state. 21.5% of those 25 yrs. of age and older hold a college degree and an additional 7.6% have an associate degree. More than half of county residents, however, have no education beyond high school, and 11.6% have less than a high school education (ACS 2015). The research on secondary data sets documents the school dropout rate in Marion

County at 4.5% (Kids Count 2015); and the 4-year cohort graduation rate is 94.9% (WVEIS 2016).

The 2016 college going rate in the county is at 52.8% of graduating high school seniors (WV Higher Education Policy Commission). 11<sup>th</sup> grade reading proficiency is at 61.6% and mathematics proficiency is lower at only 29.5% (WVEIS 2016-17).

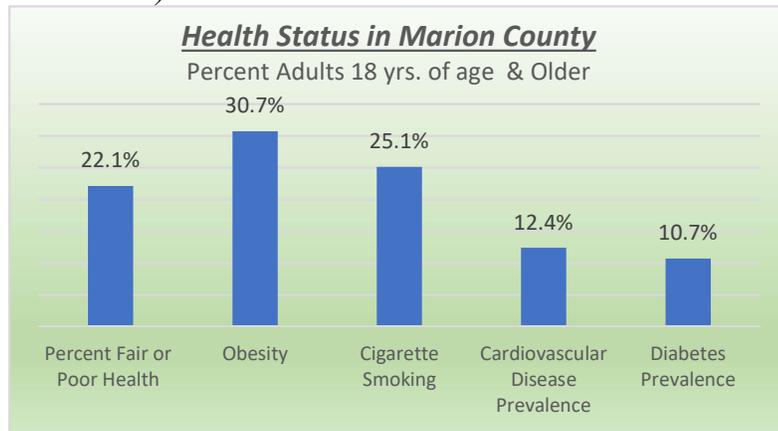

The community discussion held in the county identified several factors contributing to poverty including:

- Generational poverty including mindset of some and a lack of basic life skills,
- Situational poverty sometimes caused by natural disasters, health issues, or substance abuse, and
- Rural dying communities in the county with little opportunities.

Secondary data indicates generational poverty is a potential issue with 11.4% of births to mothers with less than a high school education (Kids Count 2015).

When asked to define poverty and the factors that keep people in poverty, community discussion participants identified: (1) Low paying jobs and inability of persons convicted of a crime or with a history of drug abuse to find work, (2) A lack of money management skills, (3) High cost of education beyond high school, (4) A general lack of opportunity.

There were 18 overdose deaths in Marion County over the period 2013-15; an overdose mortality rate of 11 per 100,000 population during the period (*County Health Rankings, Robert Wood Johnson Foundation*).

Health status of the population and access to healthcare, mental health services, and substance abuse treatment is also a major contributing factor to poverty for some people in Marion County. Obesity rates are at 30.7% among the adult population and 25.1% of the adult population smoke (*BRFS 2014*). In addition, 11.2% of the population is without any type of health insurance (*ACS 2015*).

The infant mortality rate in Marion County is 6.8 deaths per 1,000 live births and 10.1% of babies born to county residents are low birth weight (less than 2500 grams). The teen birth rate is at 31.0 births per 1,000 females (*Kids Count 2015*).

### Community Needs

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

#### Overall Needs and Priorities

Marion County survey respondents were asked:

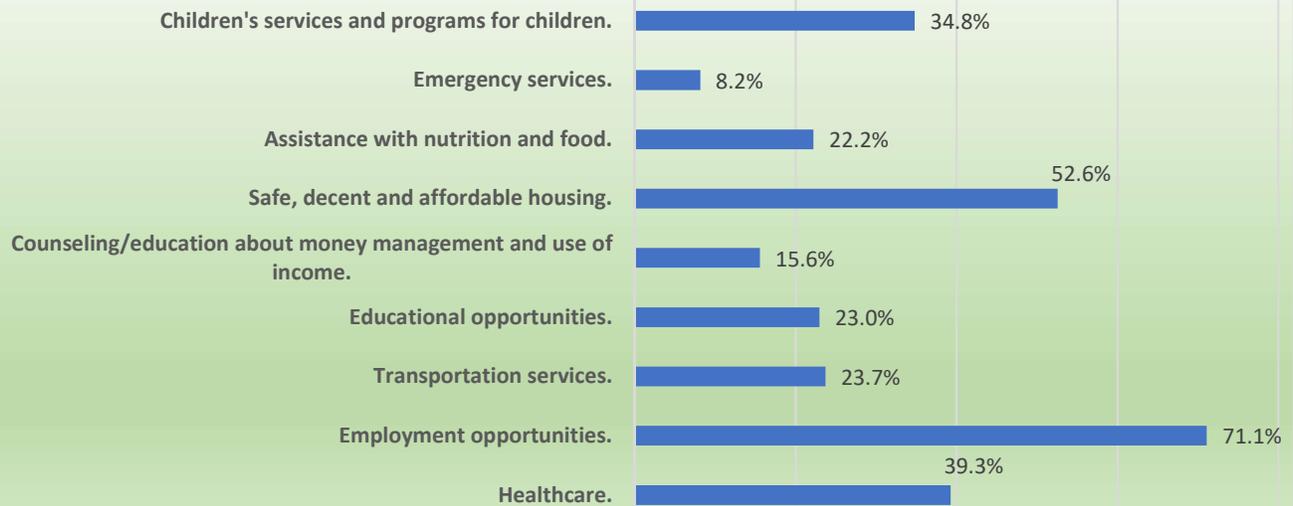

” *What do you think are the top three areas of need of low income people in Marion County?*”

Employment opportunities were, by far, the most frequently selected area of need with 71.1% of respondents focusing on this domain. Safe, decent and affordable housing options was identified as a secondary priority in Marion County by 52.6% of the key informants. Other general areas of need within the broad service system include healthcare services and programs and services for children and youth.

Emergency services were seen by relatively few of the survey respondents as an area of need within the county likely indicating that emergency services and first responders are viewed more as a strength within the service system.

**Overall Top Three Areas of Need for Low Income Persons  
in Marion County**

N=135

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

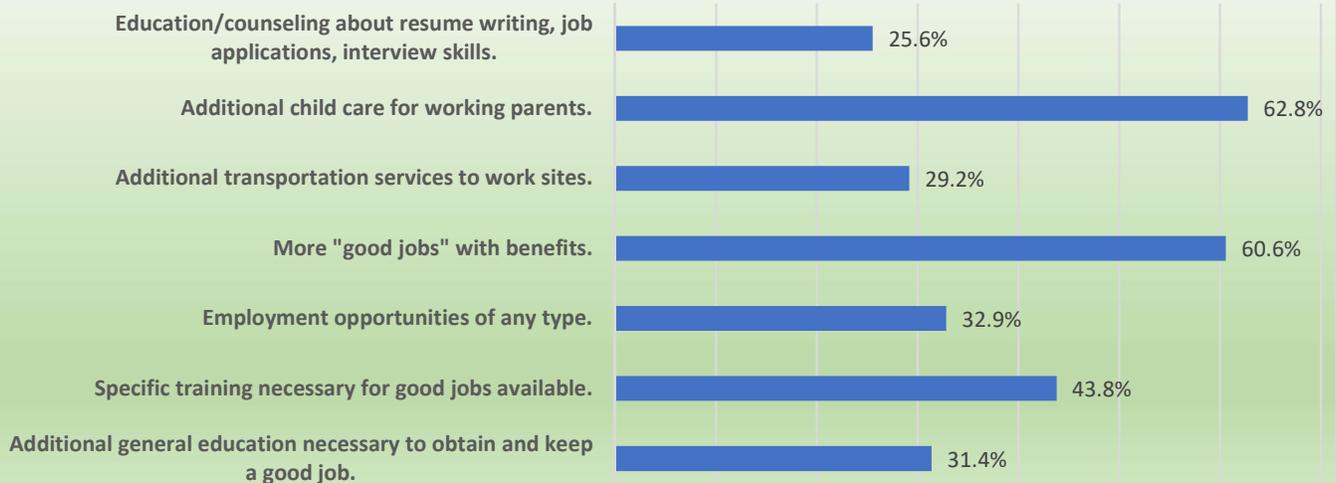

*Employment and Jobs:*

Most people responding to the survey in Marion County focused on the need for additional child care for working parents and development of more jobs with benefits in the county.

**Marion County Needs - Employment and Jobs**

N=137

*Percent Respondents Indicating Service is "Most Needed"*

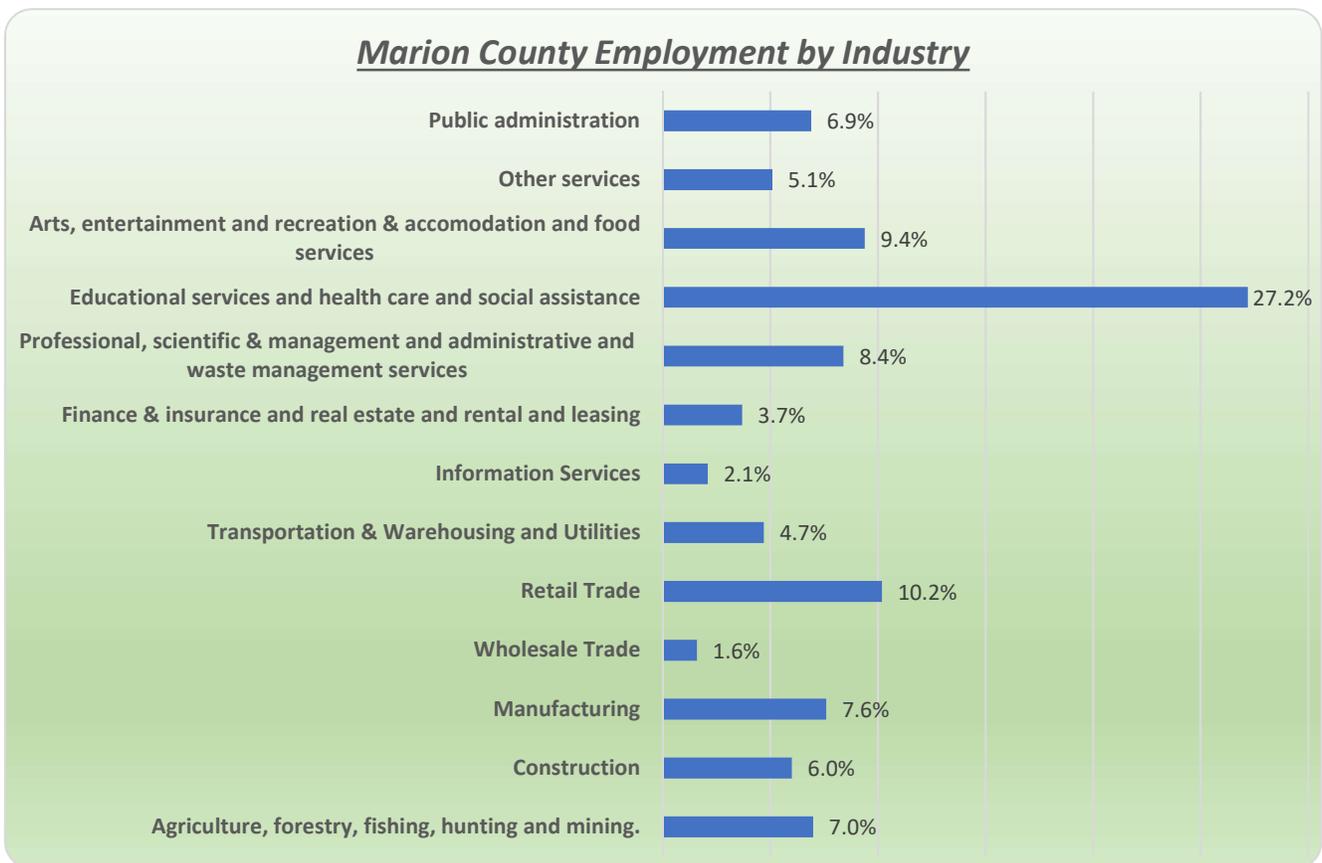

Based on the survey responses, the top priorities in Marion County related to Employment and Jobs are:

- Child care for working parents,
- More good jobs with benefits, and
- Training specific to the skills needed to secure currently available jobs.

Current employment in Marion County is highest in the educational, healthcare, and social services sectors. These jobs are generally supported by public funds. Manufacturing accounts for only 7.6% of current employment and the agriculture, forestry, hunting and mining sectors comprise 7.0% of employment in county. Lower income jobs in retail trade account for 10.2% of employment (*BLS 2015*). Employment in the arts, entertainment, recreation, accomadations, and food sectors make up 9.4% of overall employment in the county.

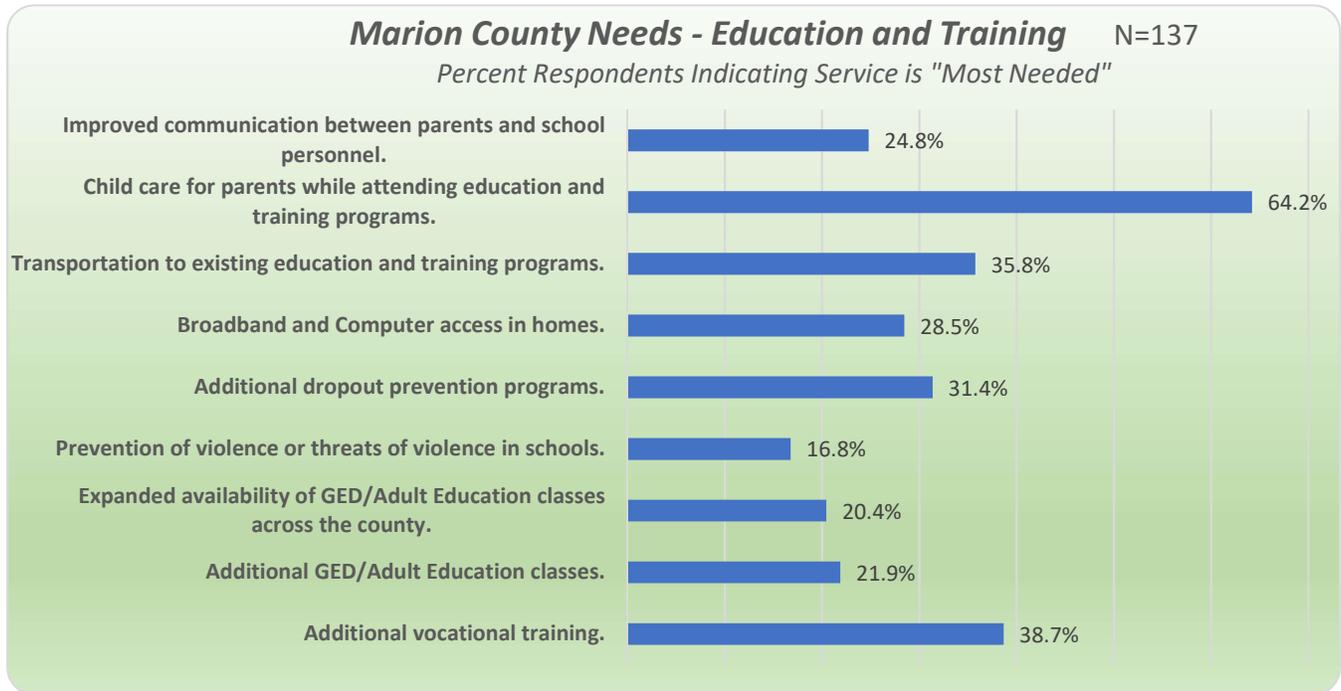

The largest employers in Marion County (in order of number of people employed) are:

- Marion County Board of Education,
- Fairmont State University,
- Fairmont Regional Medical Center, and
- Murray American Energy.

*Education and Training:*

Most people responding to the survey in Marion County (64.2%) focused on the need for child care for people attending education and training programs when asked about priority needs within the domain of education and training.

Additional vocational training programs and transportation to education and training programs were prioritized needs by more than one in three survey respondents. Based on the survey responses, the top three priorities in Marion County related to Education and Training are:

- Additional child care options for people attending education and training programs,
- Additional vocational training programs, and
- Transportation services to existing education and training programs.

A minority (around 30%) of survey respondents in Marion County indicated dropout prevention programs were needed in the county and expanded availability of broadband and computers in homes was also identified by close to 30% of the respondents as something that was needed to improve education and training opportunities.

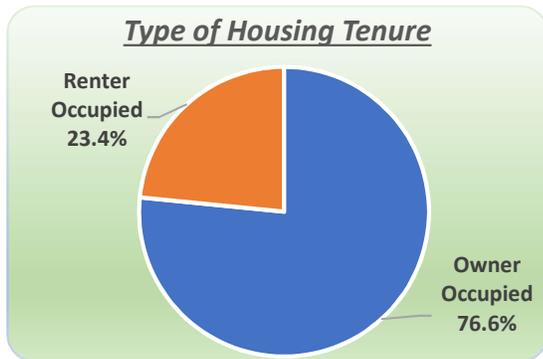

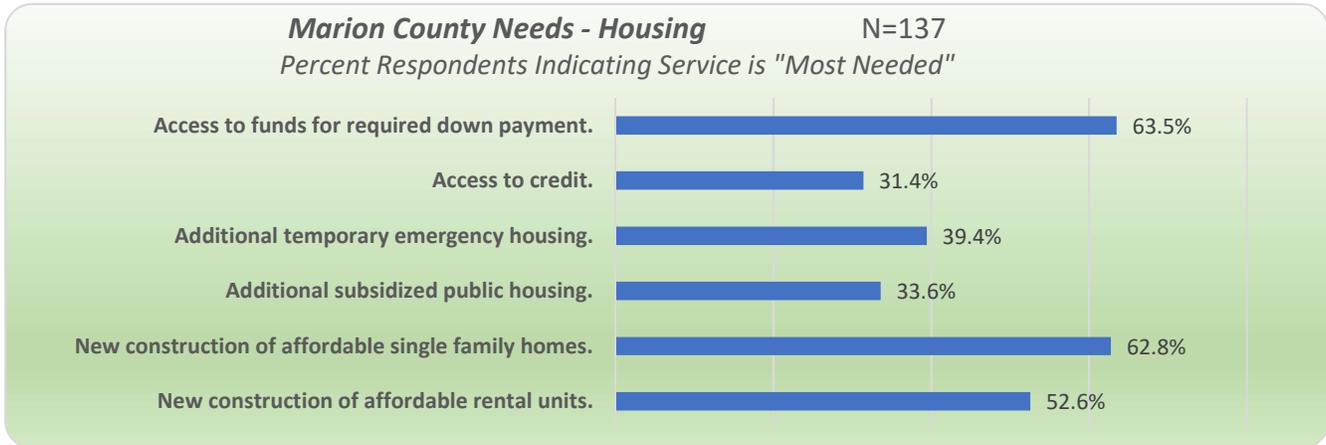

**Housing:**

63.5% of the people responding to the survey in Marion County identified access to funds for required down payment as something needed by many low-income families. There also appears to be a shortage of single family homes in the area as 62.8% prioritized new construction of such homes. More than half of the survey respondents indicated a need for new construction of affordable rental units in Marion County as well.

Based on the survey responses, the top three priorities in Marion County related to Housing are:

- Access to funds for down payment on a home.

- New construction of affordable single-family homes.
- New construction of affordable rental units.

Secondary data sets reviewed indicate a little more than three-quarters of Marion County residents are home owners while a little less than one-quarter live in rental properties.

The need for new construction of homes is reinforced by the secondary data sets reviewed. The median age of housing units in the county is 55 years; however, 27.8% of existing homes were built prior to 1940. As of 2015, there were an estimated 152 occupied homes without plumbing in the county (ACS 2011-15).

17.0% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income; however, half of all renters are cost burdened (50.0%) based on their gross rent exceeding 30% of the household income.

The median value of owner occupied housing in the county is \$99,800 and median monthly owner costs for those with a mortgage is \$968 (ACS 2011-15).

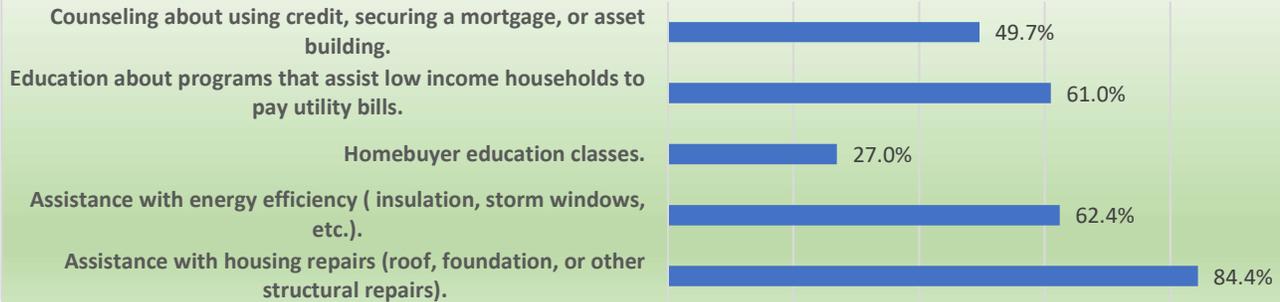

*Homeowner Assistance:*

Most people responding to the survey in Marion County believe home repairs are the greatest area of need for low-income persons. Counseling services for potential home buyers and assistance with energy efficiency are also high priorities based on the survey responses. The top three priorities in in the county are:

- Housing repairs.
- Energy efficiency (insulation, storm windows, etc.)
- Assistance with utility bills.
- Credit, mortgage, asset building counseling.

### Marion County Needs - Homeowner Assistance N=141

Percent Respondents Indicating Service is "Most Needed"

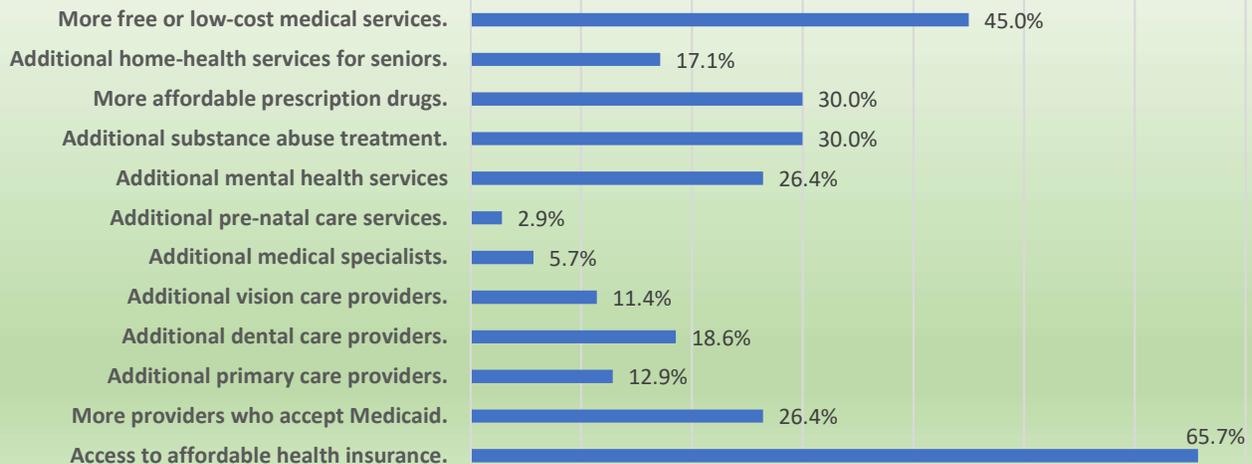

Based on survey responses, assistance with housing repairs appears to be a major need in the county. 84.4% of the survey respondents listed repairs to existing homes as one of their three top priorities. The community survey responses also support the need for services currently offered by NCWVCAA. 62.4% of respondents believe weatherization services are needed in the county and 61.0% see a need for low income households to have information about assistance with paying utility bills.

#### Healthcare:

Affordable health insurance options and access to free or reduced cost clinics are the major priorities identified by the survey respondents within the Healthcare domain.

### Marion County Needs - Healthcare N=140

Percent Respondents Indicating Service is "Most Needed"

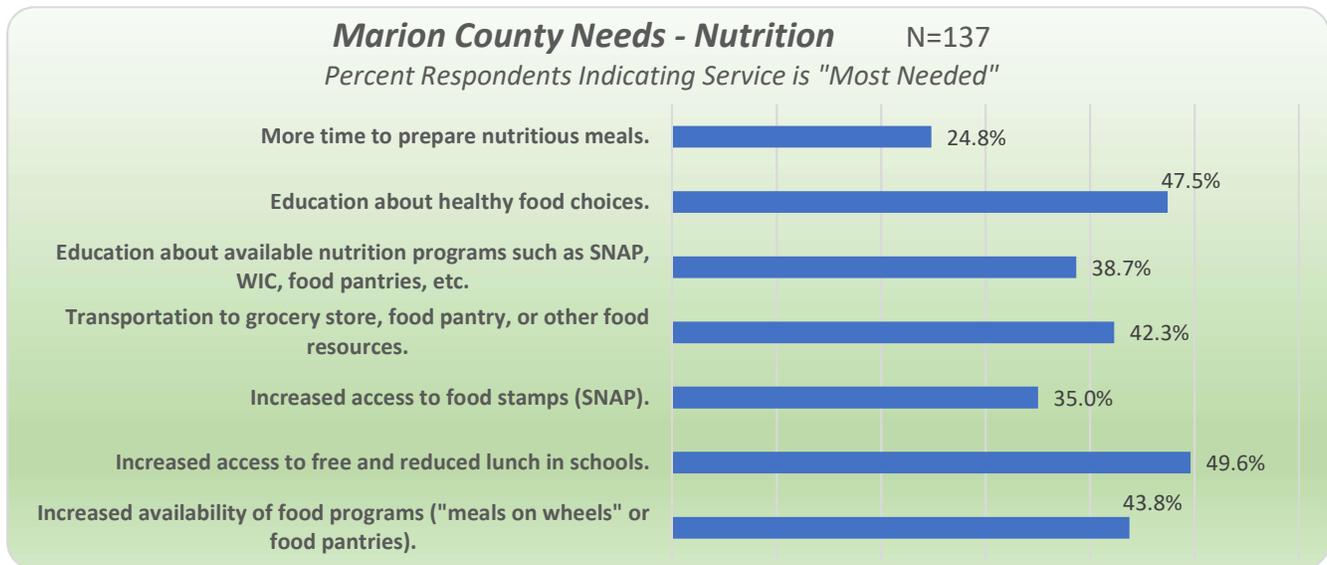

The most frequently cited health care needs cited by the key informants are:

- Access to affordable health insurance,
- Additional low-cost or free clinics providing healthcare services,
- More affordable prescription drugs,
- Access to substance abuse treatment,

- Expanded availability of mental health services, and
- More providers who accept Medicaid.

*Nutrition:*

When asked about community needs related to food and nutrition, Marion County survey respondents did not have a clear priority but identified a range of services needed in local communities. Half of the respondents (49.6%) identified increased access to free and reduced school lunch as a priority and nearly half said education about healthy food choices was important.

Survey respondents identified the following priorities related to food and nutrition:

- Greater access to free and reduced school meals.
- Education about healthy food choices and available food programs.
- Increased availability of food programs (senior meals, “meals on wheels”, food pantries).
- Transportation to grocery stores and supplemental food programs.

There are 14 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) serving the county (*WV Foodlink 2015*) and 13.9% of households in Marion County receive food stamps to supplement their food budgets. 1,146 families are enrolled in WIC through the WIC office serving the county; however, this is only 75.9% of those eligible to participate in the program. The *WV Foodlink County Profile for Marion County* documents 67 retail locations that accept food stamps and 9 locations accepting WIC (2015).

The secondary data available tends to confirm the survey results regarding access to free and reduced school lunch. There are 4,841 school age children eligible for the program but only 64.0% of eligible students participate (*WV FoodLink*).

*Financial Literacy:*

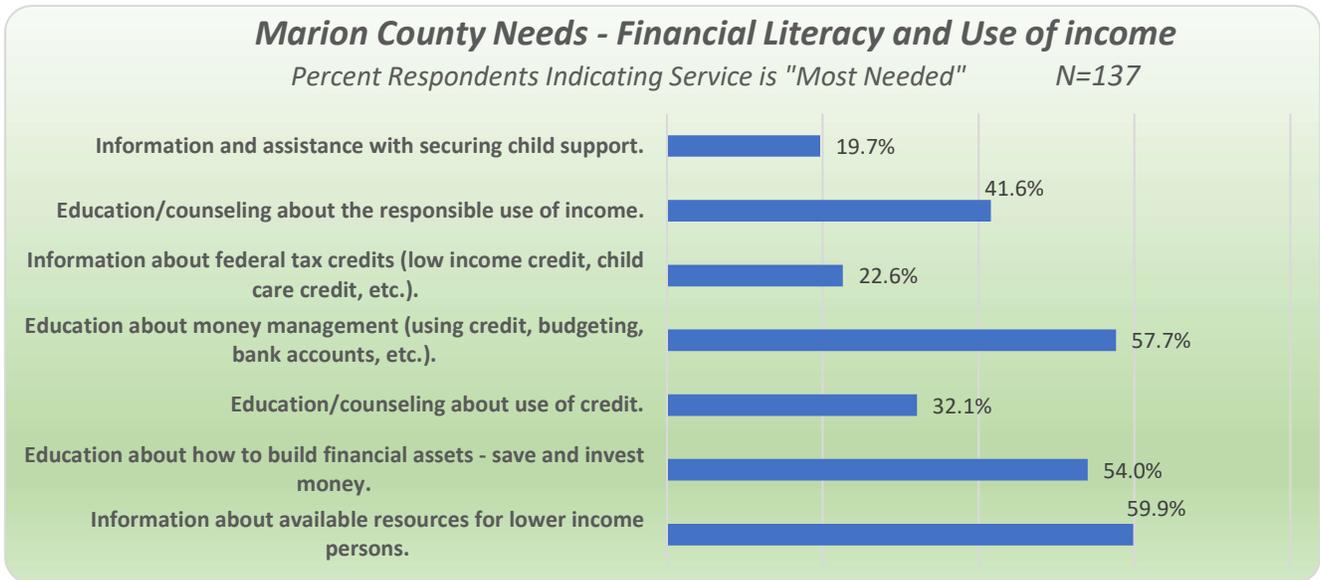

Survey respondents identified a need for information about available resources for lower income persons and educational services about money management including responsible use of credit, budgeting, using

bank accounts, and other issues related to financial literacy.

Education and information about available resources and a range of financial literacy issues appears to be the highest priorities based on the survey responses.

Survey respondents indicate needs in the financial literacy area include:

- Access to information about available resources to assist low income persons,
- Education about money management,
- Information and education about how to build financial assets, and
- Education/counseling about the responsible use of income.

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 6.3% of Marion County households are “unbanked” (have no checking or savings accounts).

*Transportation:*

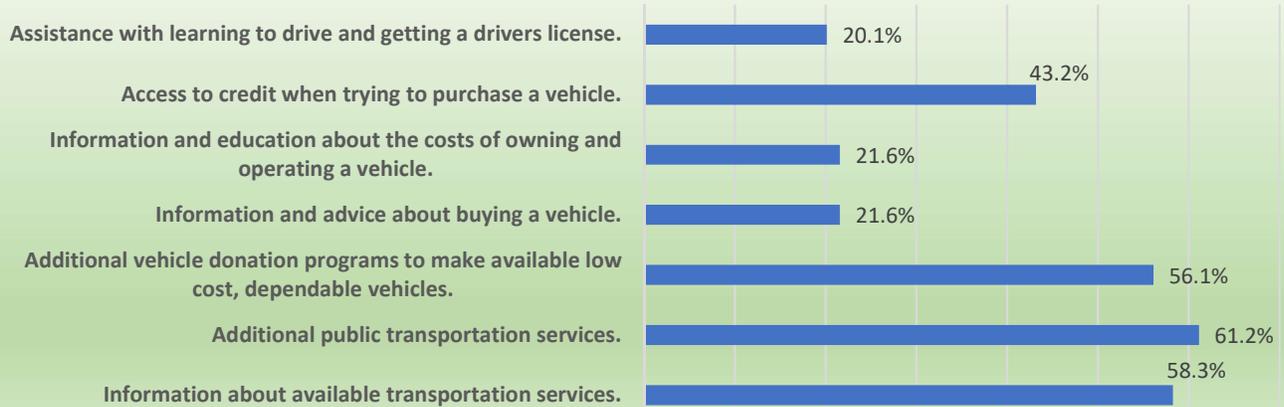

Access to public transportation services, information about available transportation options, and vehicle donation programs appear to be priorities related to transportation services in Marion County. The highest areas of need related to transportation identified through the survey include:

- Additional public transportation services,
- Improved access to information about available services,
- Vehicle donation programs to make available low cost, dependable vehicles to low income persons, and
- Access to credit to purchase a vehicle.

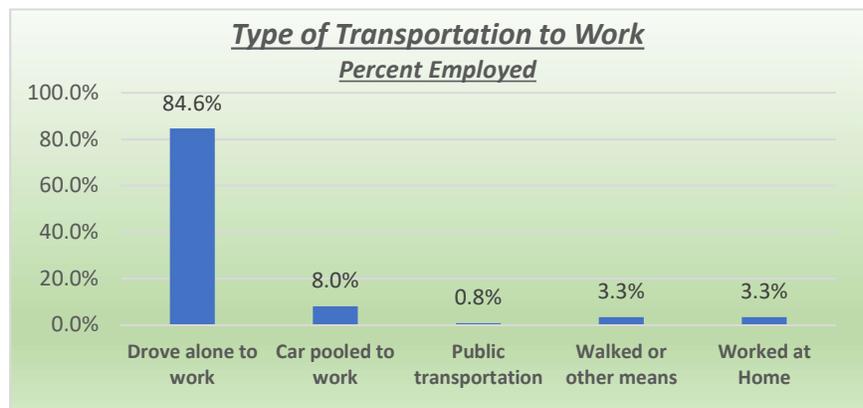

### Marion County Needs - Transportation

N=139

Percent Respondents Indicating Service is "Most Needed"

A high percentage of employed Marion County residents rely on a vehicle to get to work. The mean travel time to work for current workers is 24.0 minutes and workers rely on private transportation to get from home to their work site. 92.6% of all persons employed either drive alone or car pool to work (ACS 2011-15).

#### Emergency Services:

Increased access to emergency shelter in times of crisis is the clear priority need identified through the survey. 70.7% of all respondents prioritized this need in the county. Secondary concerns were in areas related to assistance with securing housing if a home is lost due to a disaster and assistance with prescription drug costs in cases where needed drugs are not covered by insurance.

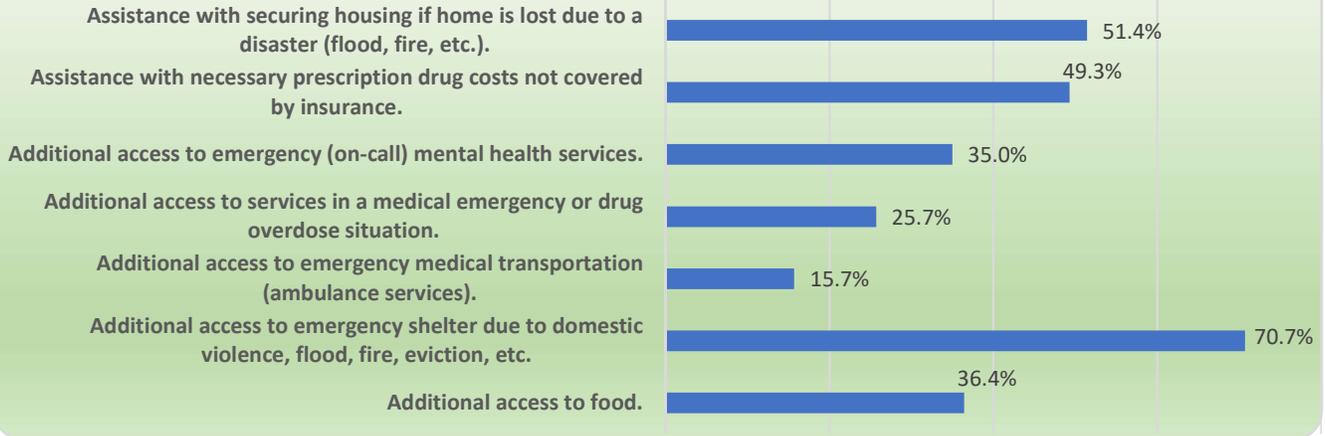

Priority areas of concern related to the emergency services domain include:

- Additional shelter facilities in cases of domestic violence, flood, fire, eviction or other emergencies,
- Assistance in finding housing if is lost in a disaster, and
- Assistance with prescription drug costs.

### Marion County Needs - Emergency Services

N=140

Percent Respondents Indicating Service is "Most Needed"

Access to emergency services in a medical or drug overdose situation and medical transportation (EMT and ambulance services) was not identified as a priority by many survey respondents indicating these services are likely seen as adequate within the county.

#### Children's Services and Supports:

Safety issues, summer programs, and child care were identified as areas of concern when survey respondents were asked about needs within the Children's Services domain.

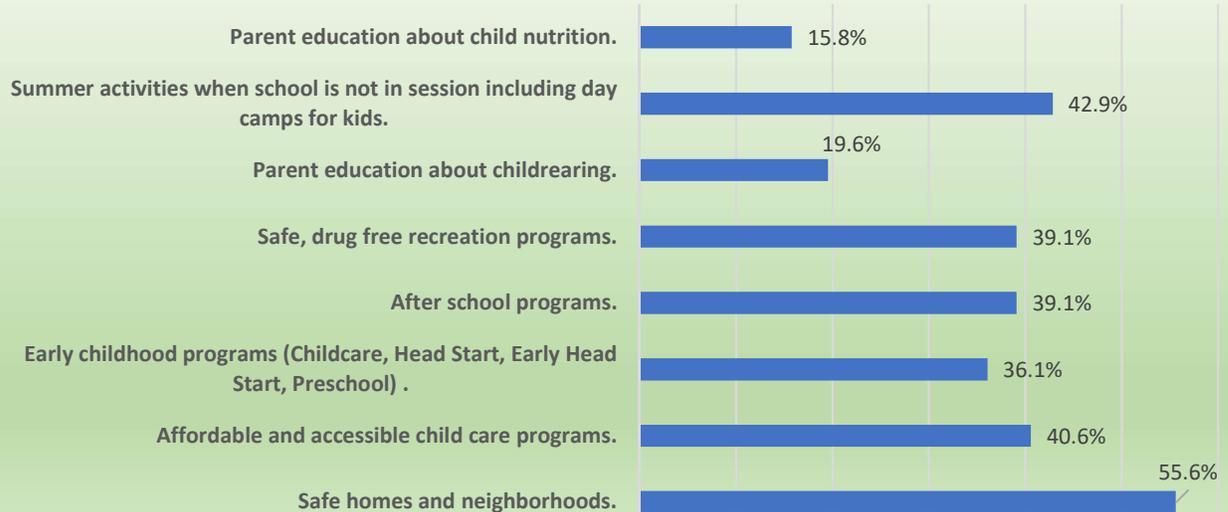

Priorities for attention related to services and support for children include:

- Safe homes and neighborhoods,
- Summer activities for children/youth including day camps, and
- Affordable and accessible child care programs.

### Marion County Needs - Children's Services and Support

Percent Respondents Indicating Service is "Most Needed"

N = 143

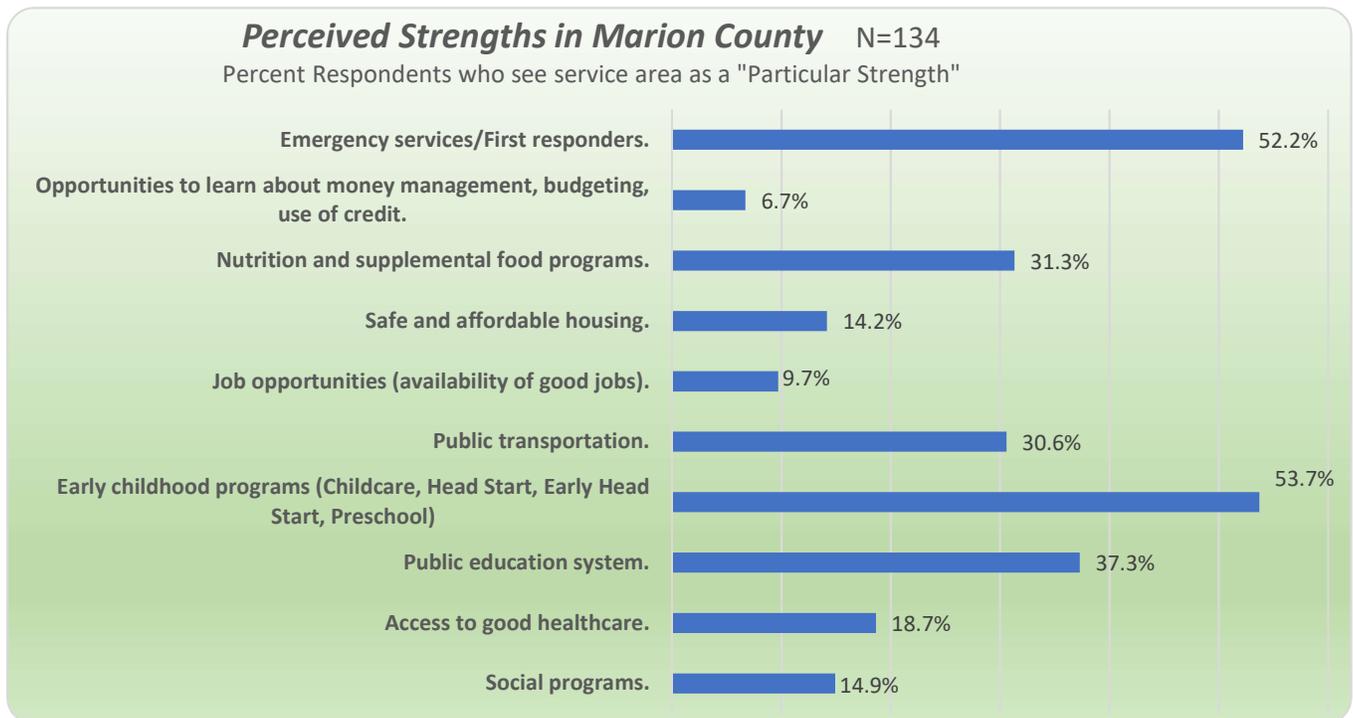

Safe and drug free recreational programs and after school programs are also seen by survey respondents as areas of need within the county (39.1% of respondents), and early childhood services was identified as a needs area by 36.1% of the survey respondents.

The safety concerns expressed through the survey are further documented by quantitative data related to child abuse/neglect and family violence. The child abuse/neglect rate in Marion County was 53.7 per 1,000 children (Kids Count 2015). The number of court filings for child abuse/neglect was not available for the county but there were 305 domestic violence cases filed in 2015 which is a rate of 20.7 filings per 1,000 family households (2015 family court case filings data).

### Primary Strengths and Community Resources

Survey respondents in Marion County were asked what they considered to be the greatest strengths in within the overall service system and they were asked to select all options they consider to be a “particular strength”.

Based on the responses, early childhood programs including Head Start and Early Head Start and first responders providing emergency services are perceived as strong components of the overall services available to people in the county. These two areas were seen as a strength by a majority of survey respondents.

Other areas of the broad community services system were seen by no more than one in three of those persons completing the survey as areas of strength in the county.

Persons participating in the community discussions identified many strengths and assets within the county including:

- Head Start programs,

- Higher education (Fairmont State University),
- Fairmont Regional Hospital,
- Prickets Fort State Park,
- Small business development, and
- Services, restaurants, shopping outlets, parks and other amenities within the city of Fairmont.

Other resources that address the needs of low income families identified within Marion County include:

- A range of public health and mental health services, including 6 Federally Qualified Health Centers.
- Nineteen institutional Medicare and Medicaid providers.
- Public transportation through the Fairmont-Marion Transit Authority including regular route services to Clarksburg and the VA Hospital, Barrackville, Morgantown and various locations in the greater Fairmont area.
- *Right from the Start* program for Medicaid eligible pregnant women and infants,
- 11 licensed child care centers,
- 29 family day care providers.
- A limited route public transportation service - *Here and There Transit*,
- Local office of the WV Department of Health and Human Resources,
- Marion County Family Resource Network,
- Fifteen fire departments/emergency responder locations throughout the county,
- Marion County Senior Center, and
- Twenty-one banking locations throughout Marion County.

#### Head Start/ Early Head Start Needs and Resources

485 children were served by Public Pre-K programs during the 2016-17 school year and the Pre-K participation rate for 4-year-olds in Marion County was at 77% (WV Dept. of Ed). These 4-year-olds were served through approved voluntary programs operated by Head Start, public schools, and other early childhood providers.

Eleven child care centers were identified within the county and ten early childhood (Pre-K) programs are located in Marion County Schools.

For fiscal year 2017 (July 1, 2016-June 30, 2017) a total of 230 children received Head Start services and 27 (1 prenatally) received Early Head Start services in Marion County. 184 of the Head Start children were Caucasian, 19 were African American, 25 were Bi-racial, and 2 were Asian. Three (3) children were Hispanic. The racial breakdown for Early Head Start services in Marion County reflects 23 Caucasian children, 2 African American, and 3 Bi-racial. No Hispanic children were served through the Early Head Start program in Marion County.

There were 18 foster children served through Head Start programs in Marion County during the period July 2016 to June 2017 and 38 homeless children were served. 12 of the Early Head Start children were homeless and 3 EHS children were in foster care. English was the primary language spoken in the home for 228 Head Start enrollees and Chinese was spoken at home in two cases. English was the primary language for all Early Head Start children. During calendar year 2017, annual program attendance and enrollment totals in Marion County Head Start programs were at 94.5% of available program slots, and

EHS enrollment was at 97.4%.

#### *Head Start Needs Projections for the 2018-19*

There are 298 eligible four-year-olds 211 eligible three-year-olds. A total of five hundred and nine (509) children are projected to be eligible for PY53 compared to five hundred and ninety-one (591) in PY52, a reduction of eighty-two (82) children. The numbers suggest the continuation of Head Start (HS) services for the following Head Start full-day operated sites: Carolina I\* and Carolina II\*, Edgemont I\* and Edgemont II\*, Fairmont I\* and Fairmont II\*, Mannington I\* and possibly Mannington II\*, Rivesville I\* and Rivesville II\*, and West Fairmont\* in PY53. However, despite the PY53 projections and current PY52 enrollment and wait lists, numbers may not support the continuation of two classrooms at Mannington in part because there are multiple Universal Pre-K options available in the Mannington area.

The number of three-year-olds and four-year-olds indicate that it is possible to maintain an adequate wait list for two classes at Carolina, Edgemont, Fairmont, and Rivesville and one class at Mannington and one at West Fairmont. However, it may not support expansion at this time due to the number of already existing Universal Pre-K classrooms and increased family incomes within the county. A new West Virginia (WV) Legislature law requiring children to be four years of age by July 1 instead of September 1 will result in sixty-six (66) children that will no longer be able to be served in WV Universal Pre-K but could be served in HS operated Marion County classrooms as three-year-olds.

As part of the Universal Pre-K partnership, the Marion County BOE pays the NCWVCAA Head Start Grantee a per diem for serving four-year-olds and three-year-olds with IEPs. MCBOE has expressed an interest in negotiating the possibility of serving HS eligible families within certain BOE operated sites in the near future. The MCBOE also has an additional twenty-two (22) collaborative Universal Pre-K classrooms. Of these, nine (9) are with Childcare collaboratives and thirteen (13) are MCBOE operated classrooms. The Marion County Pre-K Core Partners did not make changes to sites during PY52 and none are being planned as of date for PY53; however, the BOE has seen a significant increase in the number of children transitioning from WV Birth to Three.

Information for this enrollment projection was gathered from existing family information, recruitment cards, birth announcements in newspaper, referrals from the Birth to Three program, and family responses.

#### *EHS Needs Projections for 2018-19*

Currently, there are seventy-eight (78) eligible prenatal to one-year olds in PY53 projections to be served compared to three hundred and forty (340) in PY52 and three hundred and twenty-two (322) eligible one to two-year olds for PY53 compared to four hundred and twenty-nine (429) in PY52 in Marion County according to the demographic maps. In the North Marion area, there are thirty-three (33) prenatal to one-year olds and one hundred and two (102) two-year olds. In the East Fairmont area, there are nineteen (19) prenatal to one-year olds and fifty-seven (57) two-year olds. Therefore, even those these estimates have modestly decreased from PY52, it still indicates that the population of eligible children in Marion County would support the continuation of current Early Head Start center-based services at the East Fairmont High School and the North Marion County Votech Center. According to the current demographic needs assessment numbers, EHS expansion could be also supported at Rivesville, Edgemont, Monongah, Carolina, and West Fairmont.

### Services Provided by NCWVCAA

Current services provided by NCWVCAA in Marion County can provide guidance about the needs of low income people and the types of services that can be provided by the agency to meet those needs. During the most recent calendar year completed (2017), data was collected for a total of 1,607 persons who received services from the agency in Marion County. 744 of the persons served were male and 863 were female. 83.3% of all persons receiving services were White, 10.4% were Black 5.4% were Multi-racial, and 0.9% were other races. Those persons of Hispanic ethnicity made up 1.7% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 18 to 23 yrs. age group and 47.1% of the persons served were under the age of 18 yrs.

79.6% of all families served have annual income below the federal poverty level. 2.3% of those served have no health insurance and 7.2% are disabled.

The most numerous types of outcomes achieved through services provided during 2017 include:

- Infants and children obtain age appropriate immunizations, medical and dental care,
- Improved school readiness skills through participation in pre-school activities,
- Infant and child health and physical development maintained or improved through adequate nutrition,
- Emergency food assistance, and
- Emergency temporary shelter.

# *Monongalia County*

## *Community Needs and Resources*

# MONONGALIA COUNTY

## History & Geography

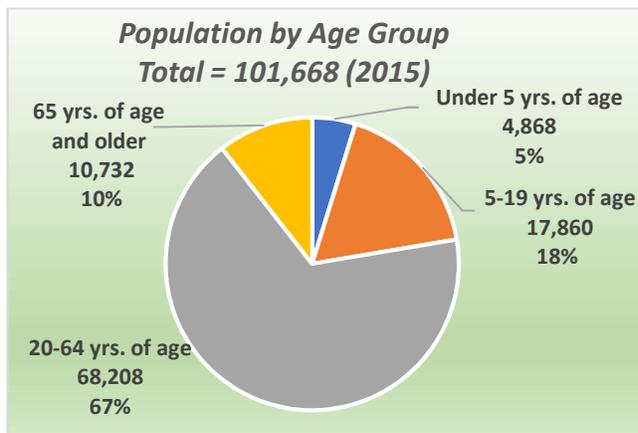

Monongalia County was formed in 1776 and is located in the north central section of the state. It covers an area of 417.85 square miles. West Virginia University is located in the city of Morgantown which is the state's third largest city. Two-thirds of the county's population resides in remote rural sections of the county.

The county is divided into three districts. The central district, which is one of the largest population areas, contains the city of Morgantown. There are also several small communities in this district that surround Morgantown.

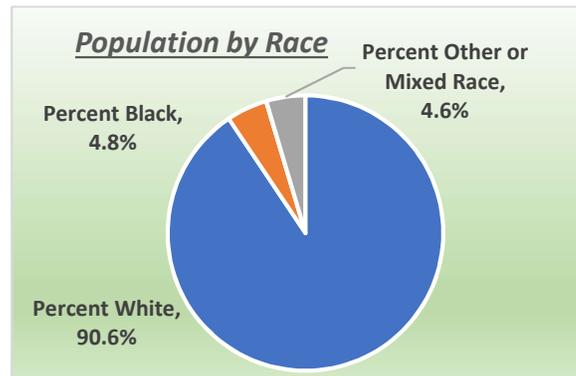

The western district is a rural, resource poor location, isolated and removed from Morgantown. This district is very mountainous near the Pennsylvania border and was heavily mined at one time.

## Demographic Characteristics

The total population of Monongalia County is 101,668 persons (ACS, 2015). 6% of the population is under five years of age and 18% is over the age of 65 yrs.

90.6% of the population is White and 4.8% is Black. The remaining 4.6% of Monongalia County residents are of mixed or other races.

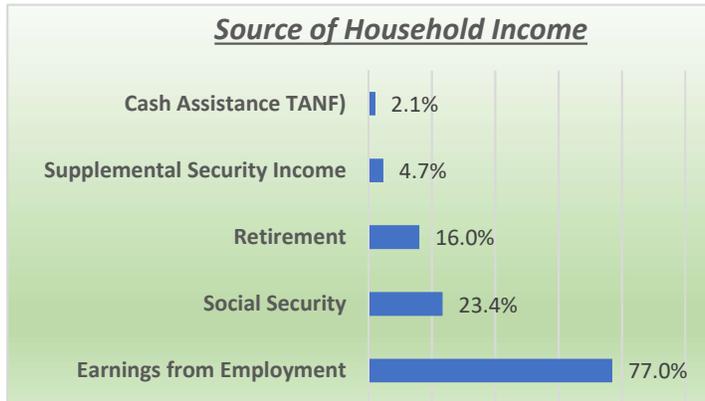

There are 37,035 households and 19,381 family households in the county. 8,631 or 23.3% of the total family households have children under 18 yrs. of age.

## Socio-Economic Characteristics

Monongalia County appears to have the most vibrant economy within the ten-county region served by NCWVCAA. Only 10.7% of Monongalia County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate more than doubles however to 22.8%. Well over half (62.1%) of all single female-headed families with all children under 5 yrs. of age have annual income below the FPL.

20.8% of households in the county have zero net worth, and one in three Monongalia County households have little liquid assets. The "Liquid Asset Poverty Rate" defined as a lack of sufficient liquid assets to subsist at the poverty level for three months in absence of income, is at 32.9% in the county (2014 Survey of Income and Program Participation, US Census Bureau).

Median household income in Monongalia County is \$47,060 which is above the state average of \$42,644 (ACS 2012-16).

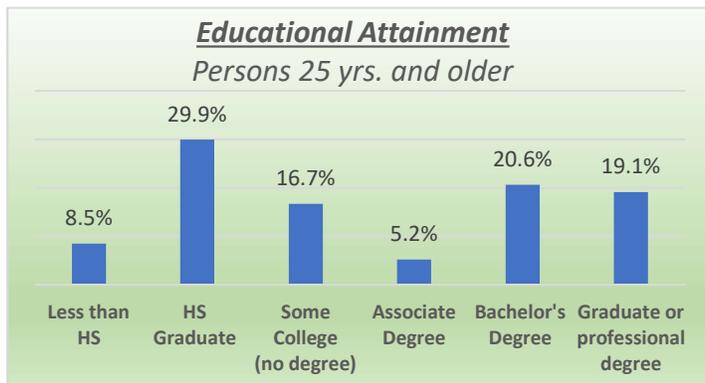

77.0% of the households in the county have income from employment and 2.1% receive cash assistance through the TANF program. 7.2% of households in the county receive food stamps to supplement their income (ACS 2015).

#### Causes of Poverty

Primary factors keeping people in poverty appear to include:

- A lack of access to jobs in rural parts of the county,
- Low levels of education and training needed for available employment opportunities among a segment of the population, and
- The relatively high cost of basic services such as housing, child care and health insurance.

The unemployment rate in Monongalia County declined by 0.5% between August of 2016 and August of 2017, and at 4.2% it is lower than the state average of 5.4%.

Monongalia County residents overall have much higher educational attainment than other counties in the region. 39.7% of those 25 yrs. of age and older hold a college degree. 38.4% of county residents, however, have no education beyond high school, and 8.5% have less than a high school education (ACS 2015). The research on secondary data sets documents the school dropout rate in Monongalia County at 6.4% (Kids Count 2015), and the 4-year cohort graduation rate is 92.2% (WVEIS 2016).

The 2016 college going rate in the county is at 66.0% of graduating high school seniors (WV Higher Education Policy Commission). 11<sup>th</sup> grade reading proficiency is at 52.6% and mathematics proficiency is lower at only 31.9% (WVEIS 2016-17).

The community discussion held in the county identified several factors contributing to poverty including:

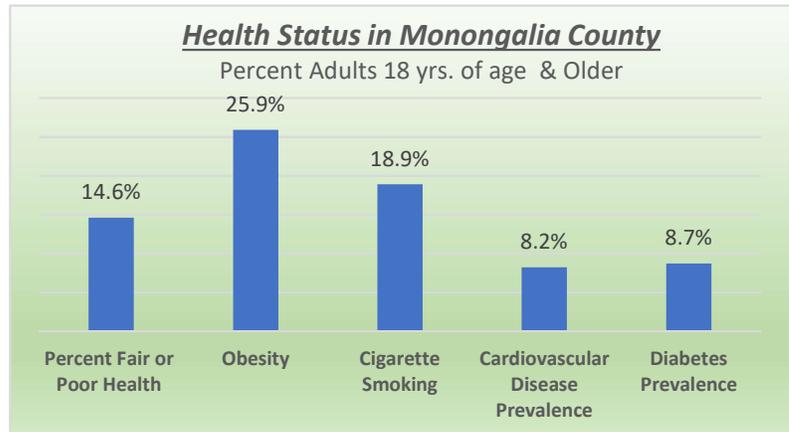

- Geographic poverty in more rural pockets of the county,
- Generational poverty including mindset of some and a lack of basic life skills, and
- Mental health and substance abuse issues affecting some families.

Although Monongalia County enjoys a lower rate of births to mothers with less than a high school education than in other counties, this secondary data indicator of potential generational poverty is at 7.2% (Kids Count 2015).

When asked to define poverty and the factors that keep people in poverty, community discussion participants identified: (1) changing employment opportunities and industries in the area requiring a higher level of education, (2) a lack of affordable housing, (3) student loan debt, and (4) substance abuse and mental health issues.

Health status of the population and access to healthcare, mental health services, and substance abuse treatment is one of the contributing factors of poverty for some in Monongalia County as in other counties within the region.

There were 36 overdose deaths in Monongalia County over the period 2013-15; an overdose mortality rate of 12 per 100,000 population during the period (*County Health Rankings, Robert Wood Johnson Foundation*).

Obesity rates, although lower than in some counties, are still at 25.9% of the overall adult population and 18.9% of the adult population in Monongalia County smoke. 14.6% of the population have generally fair or poor health. (*BRFS 2014*). In addition, 11.3% of the population is without any type of health insurance (*ACS 2015*).

The infant mortality rate in Monongalia County is 7.4 deaths per 1,000 live births. The rates of low birth weight babies and teen birth rate are somewhat better in the county than in most other counties in the region. 8.0% of babies born to county residents are low birth weight (less than 2500 grams) and the teen birth rate is at 13.3 births per 1,000 females (*Kids Count 2015*).

### Community Needs

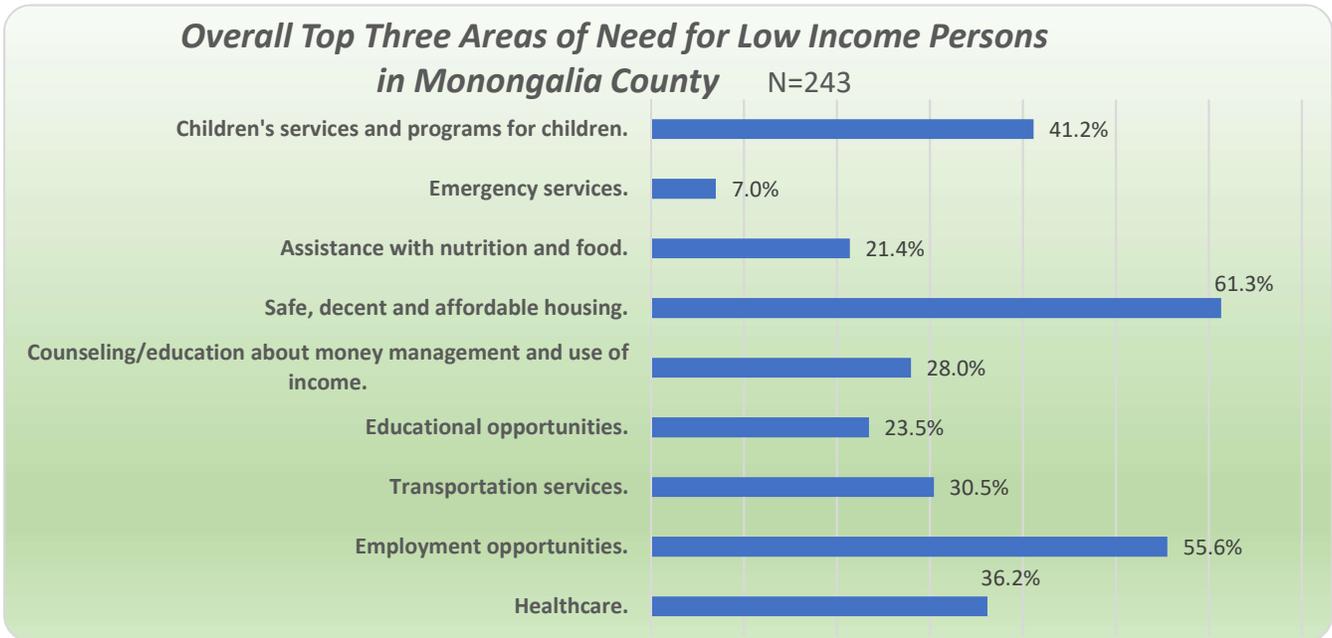

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

Monongalia County survey respondents were asked:

” *What do you think are the top three areas of need of low income people in Monongalia County?*”

Access to safe, decent and affordable housing options appears to be a major area of concern in Monongalia County. 61.3% of the survey respondents selected this domain as one of the top three areas of need in the county. Employment opportunities was also an area identified by a majority (55.6%) of key informants as a priority area of need in the county. Programs and services for children and healthcare services were identified as secondary priorities by the survey respondents.

Overall Needs and Priorities

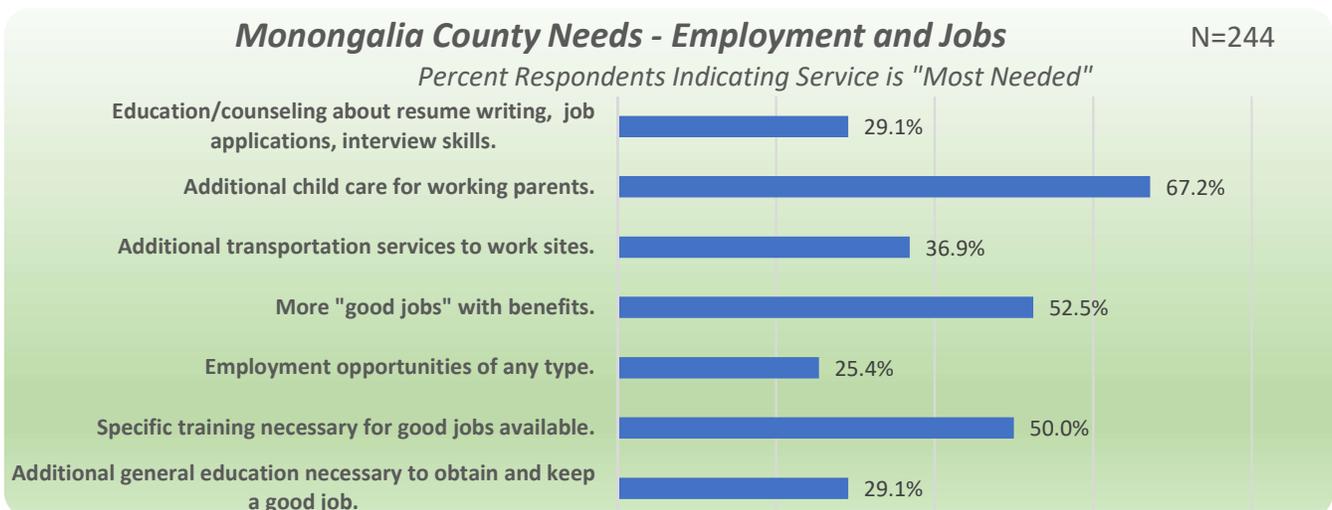

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

*Employment and Jobs:*

Two of every three (67.2%) people responding to the survey in Monongalia County prioritized a need for additional child care for working parents. Half of the survey respondents also identified the development of more jobs with benefits in the county and a need for specific training necessary for available jobs as areas that need to be addressed. Based on the survey responses, the top three priorities in Barbour County related to Employment and Jobs are:

- Child care for working parents,
- More good jobs with benefits, and
- Training programs focused on available jobs in the county.

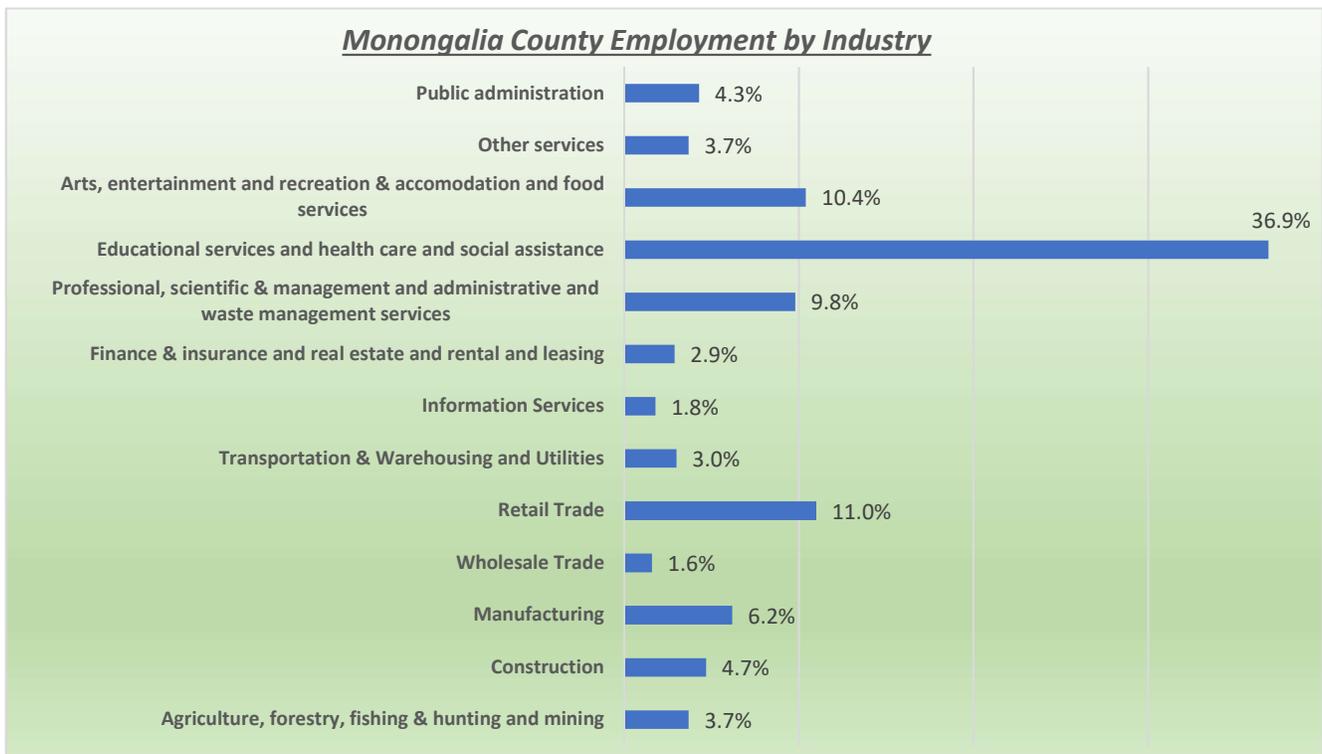

Current employment in Monongalia County is highest in the educational, healthcare, and social services sectors. West Virginia University and WVU Medicine are major employers in the county accounting for many jobs in these employment sectors.

Retail trade accounts for 11.0% of employment and jobs in related to the arts, entertainment, recreation, accomodations, and food services make up 10.4% of overall employment in the county. Manufacturing, primarily at Mylan Pharmaceuticals accounts for only 6.2% of current employment. (BLS 2015).

The largest employers in Monongalia County (in order of number of people employed) are:

- WVU Medicine,
- West Virginia University,
- Mylan Pharmaceuticals, and
- Monongalia County Board of Education.

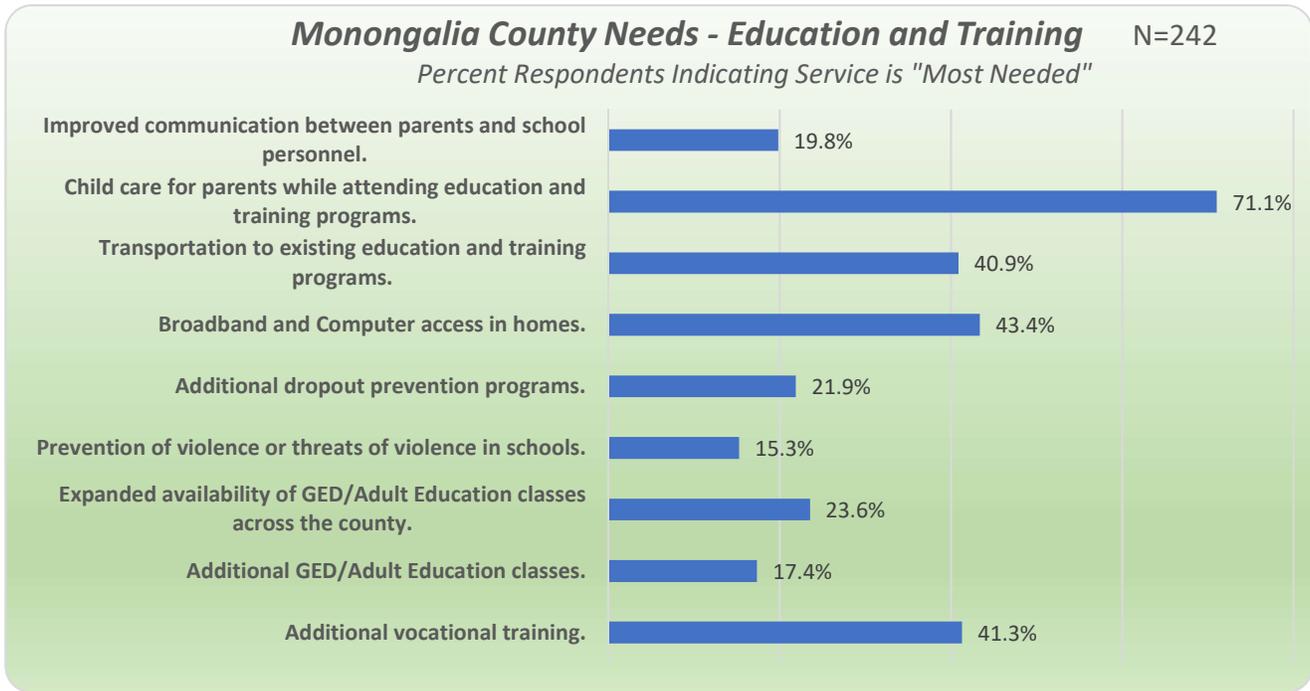

*Education and Training:*

Most people responding to the survey in Monongalia County (71.1%) focused on the need for child care for people attending education and training programs. Broadband access and computers in homes, additional vocational training programs and transportation to education and training programs were identified as secondary priorities within this domain by survey respondents; however, child care was the only priority selected by a majority.

Based on the survey responses, the top priorities in Monongalia County related to Education and Training are:

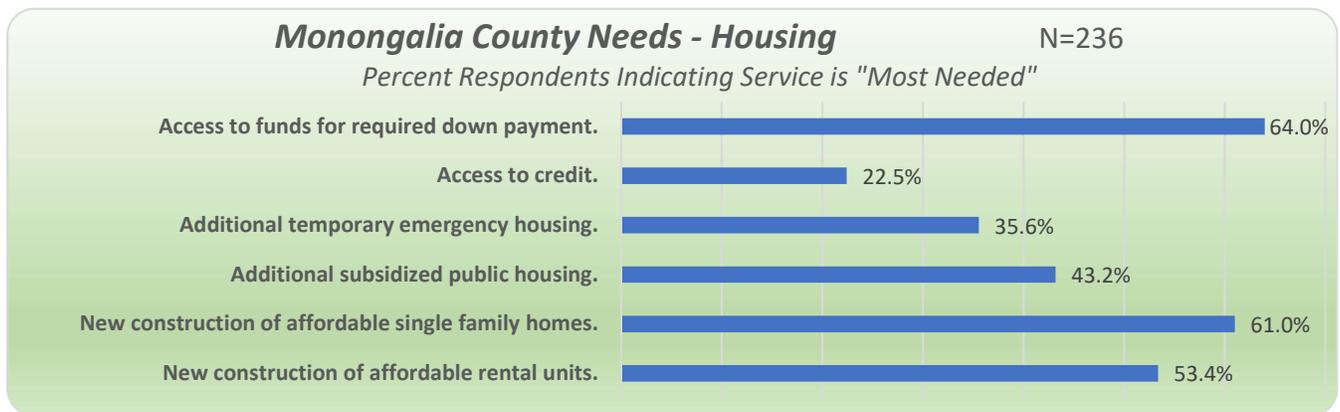

- Additional child care options for people attending education and training programs,
- Expansion of broadband Internet access,

- Additional vocational training programs, and
- Transportation services to existing education and training programs.

*Housing:*

64.0% of the people responding to the survey in Monongalia County identified access to funds for a required down payment as a priority need of many low-income families. Based on the survey responses,

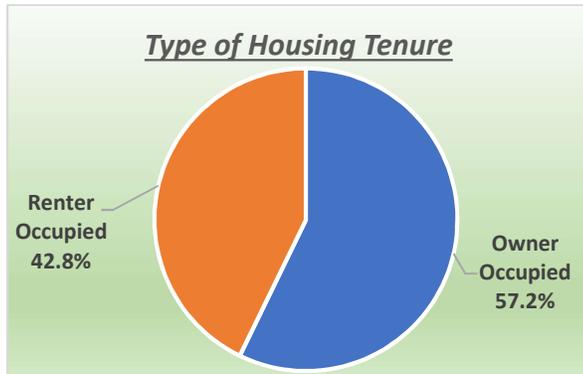

there is also a shortage of single family homes. 61.0% identified new construction of such homes as a priority. More than half (53.4%) of the survey respondents indicated a need for new construction of affordable rental units in Monongalia County as well.

Based on the survey responses, the top three priorities in Monongalia County related to Housing are:

- Access to funds for down payment on a home,
- New construction of affordable single-family homes, and

- New construction of affordable rental units.

Secondary data sets reviewed indicate a majority of Monongalia County residents are home owners (57.2%) which is a smaller portion of households than in other counties. The percentage of renter occupied housing in the county tends to be higher.

The median age of housing units in the county is 43 years; and 13.7% of existing homes were built prior to 1940. As of 2015, there were an estimated 146 occupied homes without plumbing in the county and 131 without complete kitchen facilities (ACS 2011-15).

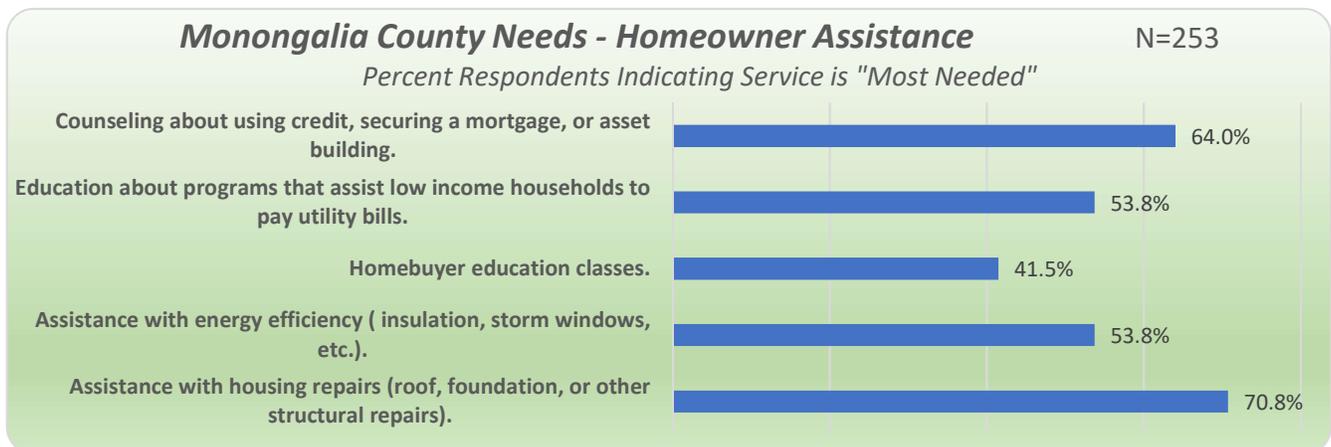

17.5% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income; however, more than half of all renters are cost burdened (54.8%) based on their gross rent exceeding 30% of the household income.

The median value of owner occupied housing in the county is \$167,600 and median monthly owner costs for those with a mortgage is \$1,184 (ACS 2011-15). The relatively high home values and monthly owner costs contribute to the inability of many lower income families to purchase a home.

*Homeowner Assistance:*

Most people responding to the survey in Monongalia County believe programs that assist low income homeowners with home repairs are the greatest need within this domain. 70.8% of all respondents prioritized home repairs as a major area of need. There also appears to be a need for counseling services for potential home buyers about using credit and securing a mortgage. Assistance with energy efficiency and paying utility bills are also seen as needs by a majority of the survey respondents. Survey responses indicate the top priorities in the county related to Homeowner Assistance for low-income households are:

- Housing repairs,
- Credit, mortgage, asset building counseling,
- Energy efficiency (insulation, storm windows, etc.), and
- Help paying utility bills.

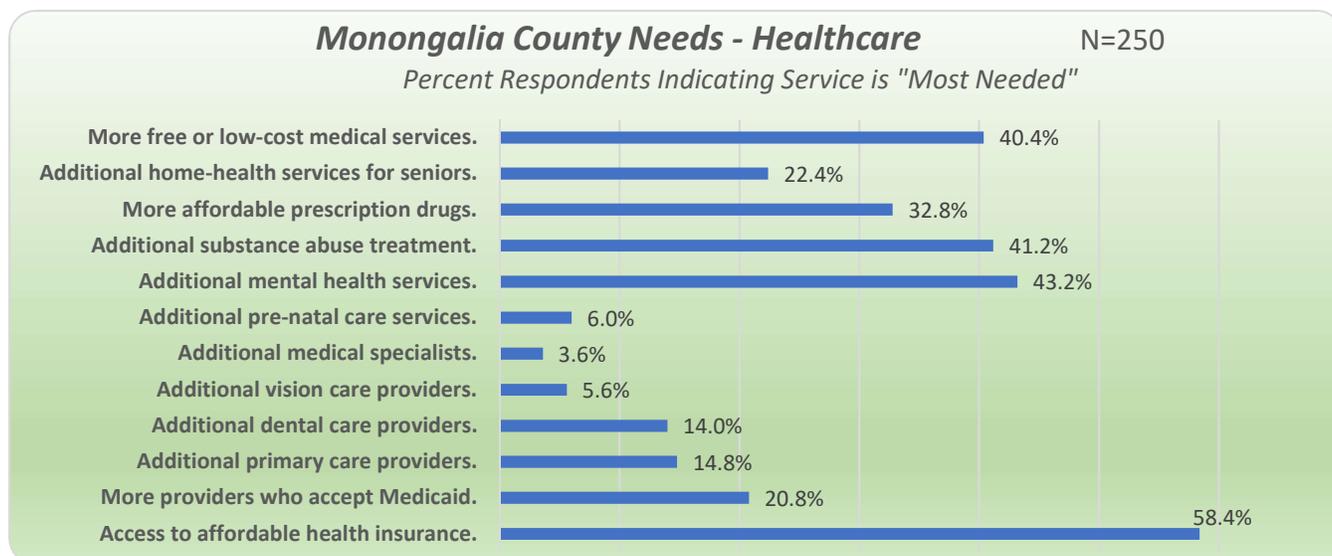

The community survey responses support the need for services currently offered by NCWVCAA. A majority of the respondents identified weatherization services and information about assistance with paying utility bills as priorities.

*Healthcare:*

Access to affordable health insurance is seen as a top priority within the healthcare domain by 58.4% of survey respondents. Additional mental health and substance abuse treatment services were identified as secondary priorities.

The most frequently cited needs in this area are:

- Access to affordable health insurance,
- Expanded availability of mental health services,
- Access to substance abuse treatment, and
- Free or reduced cost clinics.

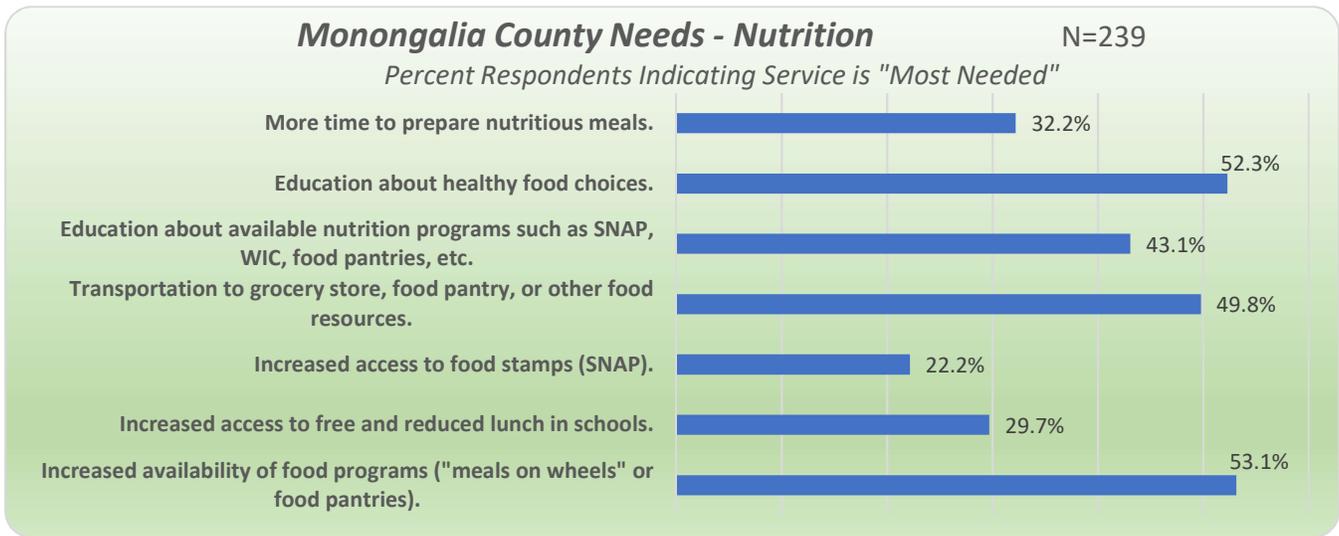

*Nutrition:*

When asked about community needs related to food and nutrition, Monongalia County survey respondents identified three priorities above other possible issues in order to address needs of low-income residents. Approximately half of the survey respondents identified increased availability of supplemental food programs education about healthy food choices, and transportation to grocery stores and food programs as the priorities in the county related to food and nutrition.

Survey respondents identified the following priorities related to food and nutrition:

- Increased availability of food programs (Senior meals, “meals on wheels”, food pantries),
- Education about healthy food choices and available food programs, and
- Transportation to grocery stores and supplemental food programs.

There are 21 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) currently serving the county (*WV Foodlink 2015*) and 7.2% of households in Monongalia County receive food stamps to supplement their food budgets. 1,595 families are enrolled in WIC through the WIC office serving the county; however, this is only 76.9% of the estimated number of families eligible to participate in the program. The *WV Foodlink* County Profile for the county documents 71 retail locations that accept food stamps and 12 locations accepting WIC (2015).

A relatively low number of school age youth participate in the free and reduced cost meals program at school. There are an estimated 4,191 school age children eligible for the program but only 59.0% of eligible students participate (*WV FoodLink*).

*Financial Literacy:*

Survey respondents prioritized educational services about money management including responsible use of credit, budgeting, using bank accounts, and other issues related to financial literacy as the most needed service within this domain. 70.5% of the key informants sharing their opinion think money management skills development is a high priority need in the county. Other types of education about financial literacy issues and access to information about available resources are secondary priorities based on the survey responses. 49% of the key informants selected education about building assets and education/counseling about using income responsibly as priority needs in the county.

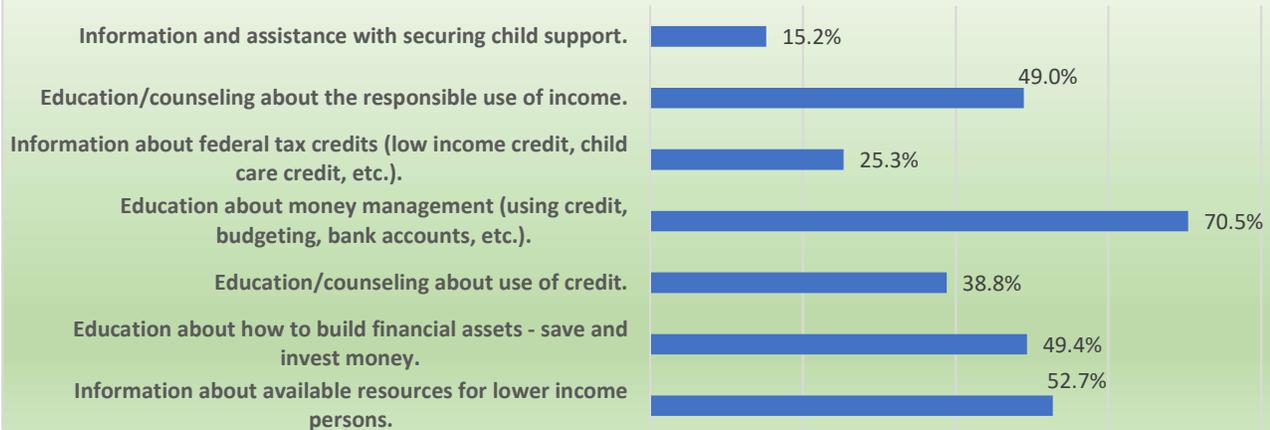

Persons completing the survey indicate the primary needs in the financial literacy area include:

- Education about money management.
- Information and education about how to build financial assets.
- Education/counseling about the responsible use of income.
- Access to information about available resources to assist low income persons.

### Monongalia County Needs - Financial Literacy and Use of Income

Percent Respondents Indicating Service is "Most Needed"

N=237

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 7.7% of Monongalia County households are “unbanked” (have no checking or savings accounts).

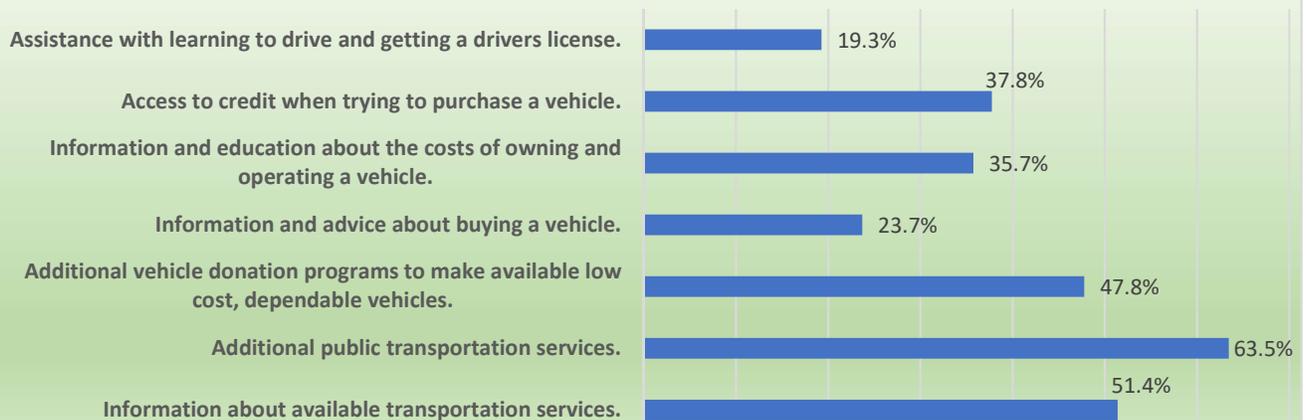

#### Transportation:

Additional public transportation services were identified as a priority need by the largest number of key informants responding. 63.5% selected development of expanded public transportation as a priority for the county. Better information about currently available transportation options, and vehicle donation programs are the priorities related to transportation services in Monongalia County are areas identified by about half of the survey respondents.

### Monongalia County Needs -Transportation

N=249

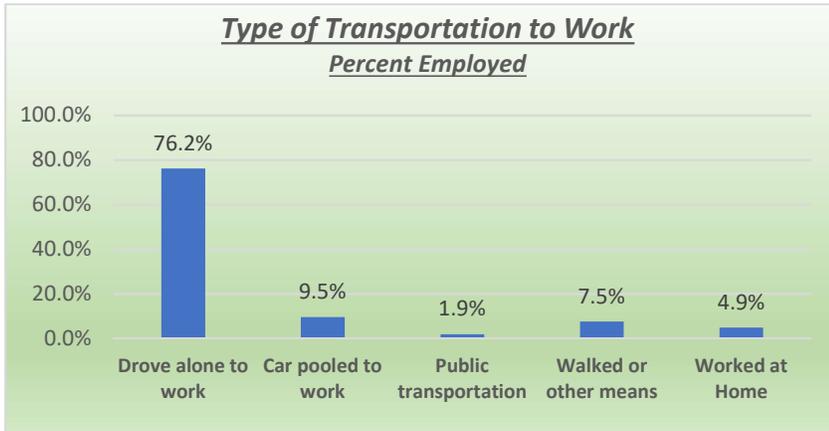

Percent Respondents Indicating Service is "Most Needed"

The highest areas of need related to transportation identified through the survey include:

- Additional public transportation services,
- Information about transportation services available, and

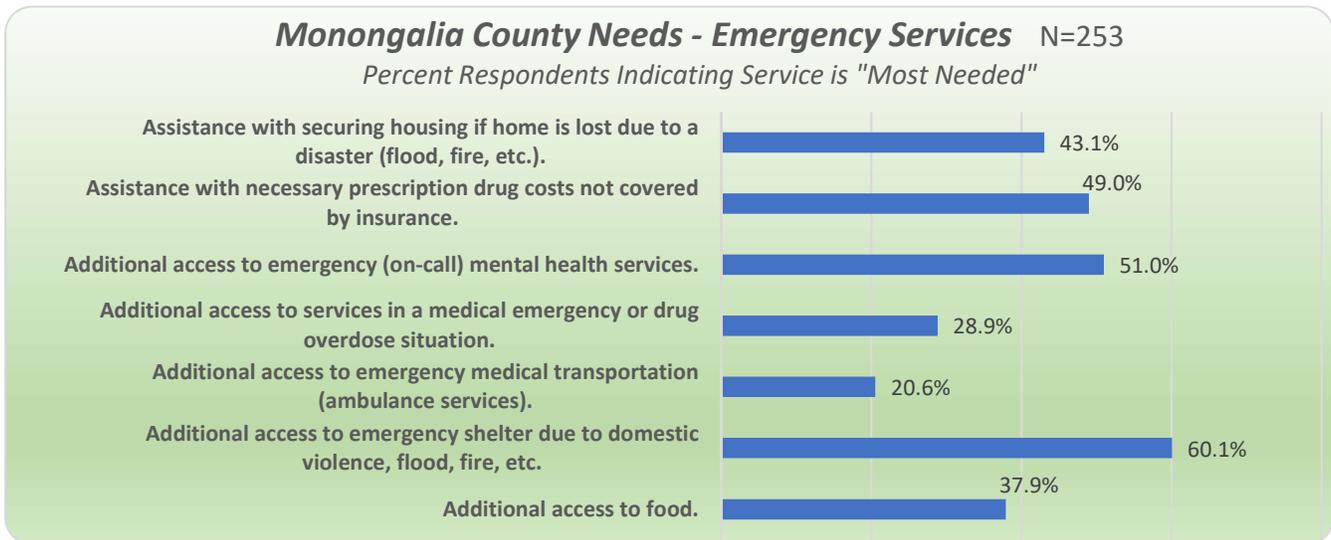

- Vehicle donation programs to make available low cost, dependable vehicles to low income persons.

A somewhat smaller percentage of persons employed in Monongalia County rely on a vehicle to get to work. 85.7% of all persons employed either drive alone or car pool to work but 7.5% walk to work and 4.9% work at home. The mean travel time to work for current workers is 20.6 minutes (ACS 2011-15).

*Emergency Services:*

Increased access to emergency shelter in times of crisis is the most frequently selected priority need by survey respondents. 60.1% of all respondents prioritized this need in the county. Secondary concerns were in areas related to “on-call” access to mental health services in a crisis situation and assistance with prescription drug costs in cases where needed drugs are not covered by insurance.

Priority areas of concern related to the emergency services domain include:

- Additional shelter facilities in cases of domestic violence, flood, fire, eviction or other emergencies,
- Access to emergency mental health service,
- Assistance with prescription drug costs, and
- Assistance in finding housing if is lost in a disaster.

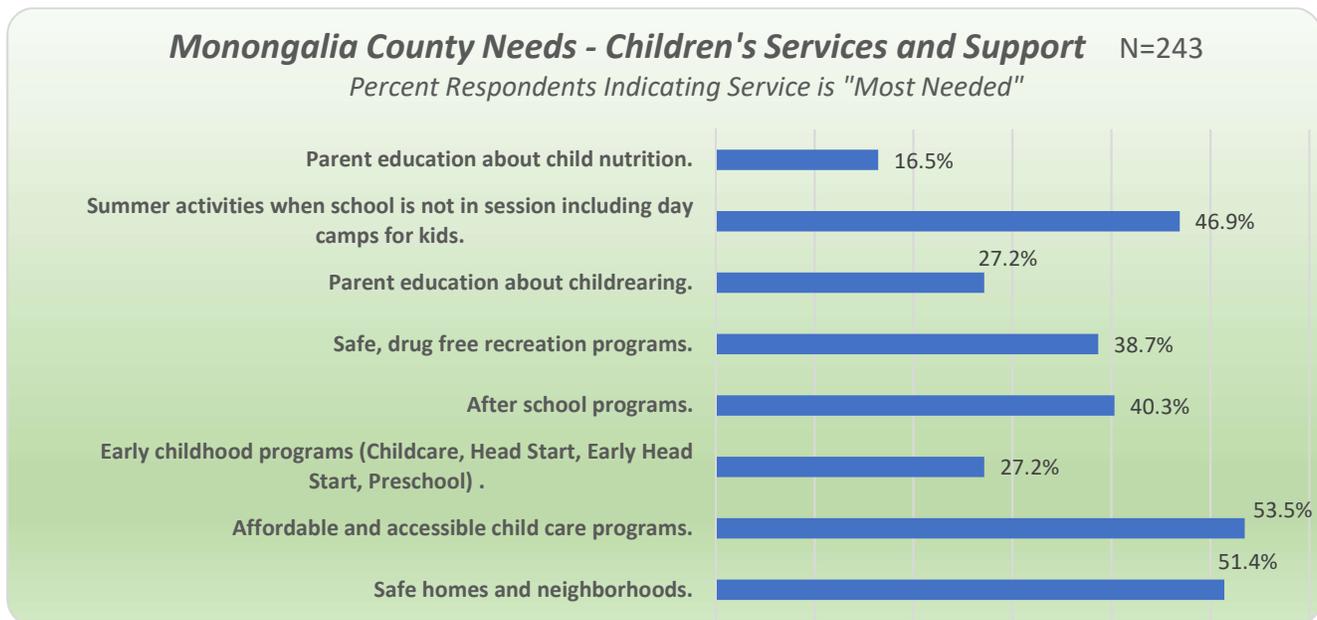

*Children’s Services and Supports:*

Three priorities within the children’s services domain were identified by survey respondents in

Monongalia County - child care, safety issues, and the need for summer programs were identified as areas of concern by close to half of all key informants responding.

Priorities for attention related to services and support for children include:

- Access to affordable and accessible child care programs,
- Safety in homes and neighborhoods, and
- Summer activities for children/youth including day camps.

After school programs are also seen by 40.3% of survey respondents as an area of need within the county.

The child abuse/neglect rate in Monongalia County was 17.9 per 1,000 children (Kids Count 2015) and the number of court filings for child abuse/neglect was only 5.8 per 1,000 children in 2016 (2016 circuit court case filings). There were 434 domestic violence cases filed in 2016 which is a rate of 22.4 filings per 1,000 family households (2016 family court case filings data).

#### Primary Strengths and Community Resources

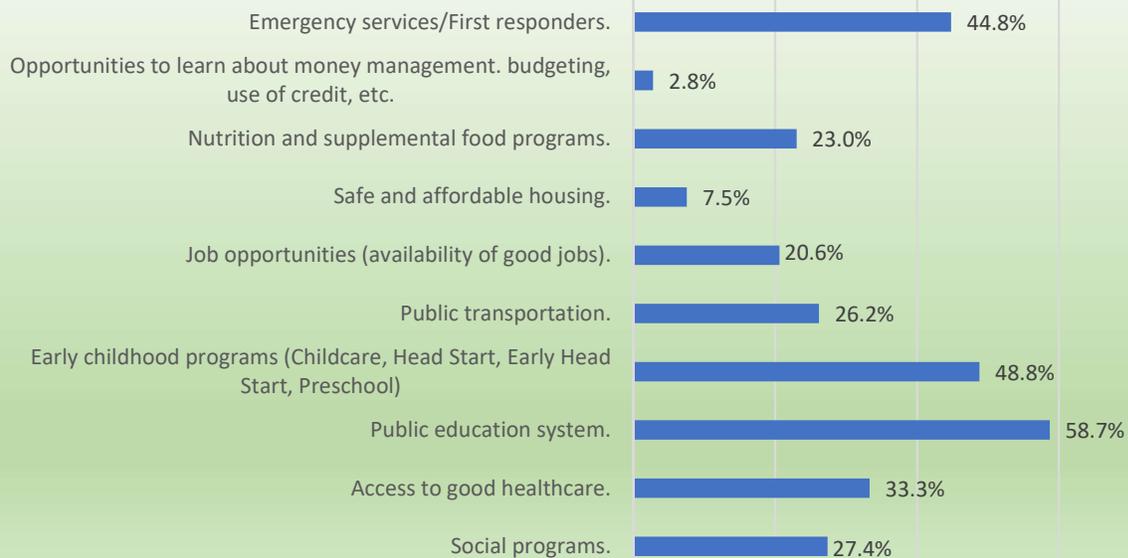

Survey respondents in Monongalia County were asked what they considered to be the greatest strengths in within the overall service system and they were asked to select all options they consider to be a “particular strength”.

Based on the responses, the public education system and early childhood programs including Head Start and Early Head Start are seen as two the greatest strengths within the service system. First responders providing emergency services are also perceived as a strong component of the overall services available to people in the county.

Other areas of the broad community services system were identified as particularly strong by less than one in three of those persons completing the survey.

### Perceived Strengths in Monongalia County N=252

Percent Respondents who see service area as a "Particular Strength"

When asked about the greatest strengths/assets of the community, persons participating in the community discussions identified:

- Economic growth,
- West Virginia University,
- The public transit system,
- Healthcare facilities,
- Relatively low taxes,
- A local airport,
- Educational opportunities,
- Good public education system,
- Recreational opportunities including rail trail,
- Access to larger cities (Pittsburgh and Washington DC),
- Entrepreneurship, and
- Collaborative relationships among social service providers.

Other resources that address the needs of low income families identified within Monongalia County include:

- A range of public health and mental health services, including 6 Federally Qualified Health Centers,
- Twenty-four institutional Medicare and Medicaid providers,
- Three hospitals,
- Four nursing facilities,
- Two federally qualified health centers,
- Public transportation services through Mountain Line Transit Authority,
- *Right from the Start* program for Medicaid eligible pregnant women and infants,

- 35 licensed child care centers,
- 17 family day care providers,
- Homeless shelter,
- Scotts Run Settlement House,
- The SHACK,
- Local office of the WV Department of Health and Human Resources,
- Monongalia County Family Resource Network,
- Fourteen fire departments/emergency responder locations throughout the county,
- Monongalia County Senior Center, and
- Twenty-one banking locations.

#### Head Start/ Early Head Start Needs and Resources

719 children were served through Public Pre-K programs during the 2016-17 school year and the Pre-K participation rate for 4-year-olds in Monongalia County was at 80%. (WV Dept. of Ed). These 4-year-olds were served through approved voluntary programs operated by Head Start, public schools, and other early childhood providers. 12 school-based Pre-K programs and 11 collaborative Pre-K programs are offered in Monongalia County.

For fiscal year 2017 (July 1, 2016-June 30, 2017) a total of 187 children received Head Start services and 136 (14 prenatally) received Early Head Start services in Monongalia County. 143 of the Head Start children were Caucasian, 11 were African American, 12 were Bi-racial, 5 were Asian, and 2 were native Hawaiian. Fourteen (14) children were Hispanic. The racial breakdown for Early Head Start services in Monongalia County reflects 117 Caucasian children, 16 African American, 10 Bi-racial, and 7 of other races. Four (4) Hispanic children were served through the Early Head Start program in the county.

There were 4 foster children served through Head Start programs in Monongalia County during the period July 2016 to June 2017 and 4 homeless children were served. 14 of the Early Head Start children were homeless and 11 EHS children were in foster care. English was the primary language spoken in the home for 166 Head Start enrollees and 13 speak another language. English was the primary language for 131 Early Head Start children, 2 children lived in homes where Spanish was spoken, and 17 homes spoke a language other than English or Spanish. During calendar year 2017, annual program attendance and enrollment totals in Monongalia County Head Start programs were at 99.85% of available program slots, and EHS enrollment was at 100%.

#### *Head Start Needs Projections for the 2018-19 program year*

There are 756 age eligible four-year olds and 43 age eligible three-year olds enrolled compared to seven hundred and five (705) four-year olds and thirty-eight (38) three-year olds enrolled during PY51 in the Monongalia County Schools Head Start/Pre-K Program. Monongalia County Schools Universal Pre-K program is in complete collaboration with Head Start, providing services to all four-year old children, three-year old children with IEP's, and three-year old children transitioning from Early Head Start. Due to this joint endeavor, Monongalia County Head Start has maintained full enrollment throughout the 2016-2017 school year, and thus far in 2017-2018.

According to WVEIS reports, there are 194 preschool age children (four-year olds and three-year olds with IEP's) who are enrolled in county funded classrooms. The above numbers indicate that approximately

277 preschool age children would be eligible for Head Start services according to income guidelines. This allows for an approximate “waitlist” of ninety-six 96 preschool age children that would be eligible for Head Start services; however, since all Head Start eligible children above the 181 funded enrollment requirement are placed in a Pre-K classroom until a Head Start spot becomes available; there is not a true waitlist of Head Start children.

Due to WV Universal Pre-K, all children are served in a preschool setting without a need for a waitlist. Head Start children are currently being served in thirty-four (34) classrooms. All classrooms are fully inclusive and there are no classrooms with only Head Start children in them. The following are classroom placements for 2016-2017 school year: Brookhaven (4); Cheat Lake (3); Eastwood (3); Mason Dixon (2); Mountainview (3); Mylan Park (3); MTEC (1); North (4); Ridgedale (3); Skyview (4); Suncrest (3); and Westover Annex (1). All classrooms have Head Start, WV Pre-K, and Preschool special needs children enrolled. All children with IEPs are enrolled and are receiving services in the least restrictive environment. Most preschool teachers in Monongalia County Schools have Preschool Special Needs (PSN) degrees, allowing them to serve the IEPs in their classroom without interrupting the child’s schedule. Teachers without PSN degrees have itinerant teachers that serve the IEPs in their classrooms.

With the passing of Senate Bill 186 which changes the date in which children must meet age requirements for enrollment into Pre-school, Monongalia County Schools will experience an impact on its Universal Pre-K enrollment during the 2018-2019 school year. Using available resources, Monongalia County Schools estimates that approximately 76 children will not be served due to the new age eligibility for Universal Pre-K.

#### *EHS Needs Projections for 2018-19*

Early Head Start provides services to 120 low income families with children who are zero up to three years of age as well as pregnant women, through a home-based option. Currently, Monongalia County Early Head Start has two socialization centers, Mt. View Early Head Start and Daybrook Early Head Start. Each center serves different areas of the community.

While serving 120 families, on occasion there may be drops from the program throughout the year for various reasons such as moving out of the county or out of the state. The program has been able to maintain an appropriate waitlist to fill all available spots within the thirty (30) day requirement. Both sites maintain an active waitlist that is ranked according to the current approved Selection Criteria. The current waitlist for the program is seventy-seven (77) children/pregnant mothers. Within the past several years, there has been an increase in the number of homeless families and families with zero income moving into the county. These families are referred to our program through other community agencies such as the Bartlett House, Department of Human Resources (DHHR), Rape and Domestic Violence Information Center (RDVIC), to name a few.

Based on the number of referrals received annually and the number of families qualifying for services, it is predicted that Monongalia County Early Head Start will continue to be at full enrollment of one hundred and twenty (120) and utilize the two socialization centers at Mountainview EHS and Daybrook EHS.

#### *Services Provided by NCWVCAA*

Current services provided by NCWVCAA in Monongalia County can provide guidance about the needs of low income people and the types of services that can be provided by the agency to meet those needs.

During the most recent calendar year completed (2017), data was collected for a total of 312 persons who received services from the agency in Monongalia County. 149 of the persons served were male and 163 were female. 82.6% of all persons receiving services were White, 10.0% were Black 5.5% were Multi-racial, and 1.9% were other races. Those persons of Hispanic ethnicity made up 1.3% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 24 to 44 yrs. age group and 34.6% of the persons served were under the age of 18 yrs.

75.0% of all families served have annual income below the federal poverty level. 1.6% of those served have no health insurance and 1.3% are disabled.

The most numerous types of outcomes achieved through services provided during 2017 include:

- Unspecified emergency assistance,
- Housing units preserved or improved through construction, weatherization, or rehabilitation,
- Information and referral services,
- Non-emergency energy assistance,
- Emergency car or home repairs, and
- Emergency rent or mortgage assistance.

# *Pocahontas County*

## *Community Needs and Resources*

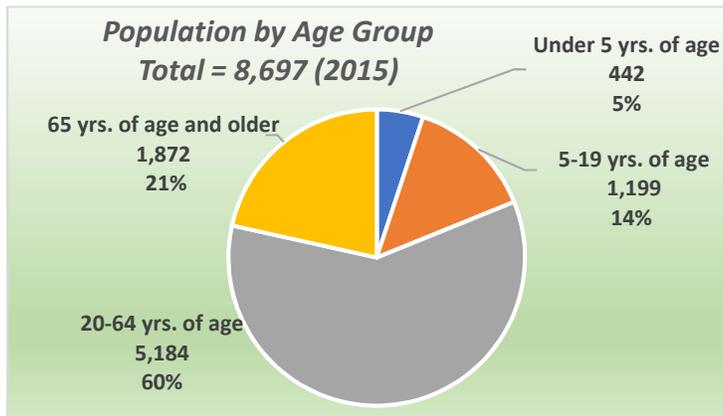

## POCAHONTAS COUNTY

### History & Geography

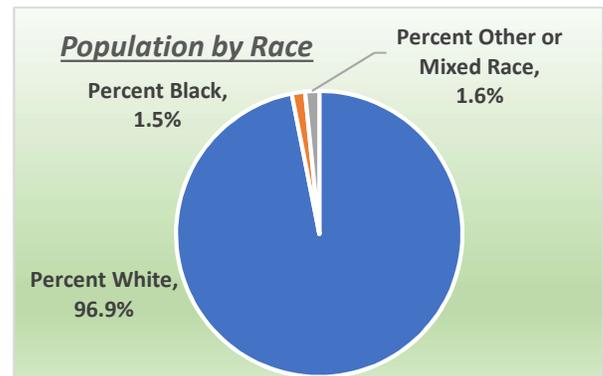

Pocahontas County, established in 1821, is the third largest county in West Virginia with 940 square miles. The county seat is Marlinton. Pocahontas County is the home to the National Radio Astronomy Observatory Green Bank Telescope. The highest point is believed to be Thorny Flat on Cheat Mountain in the northwestern part of the county. At an estimated 4,848 feet, it is the second-highest summit in West Virginia. Pocahontas County is mountainous and is prone to flooding in several low-lying areas. U.S. Routes 219 and 92, and WV Routes 39 serve as the major routes through Pocahontas County. None of these are four lane highways.

### Demographic Characteristics

The total population of Pocahontas County is 8,697 persons (ACS, 2015). 5% of the population is under five years of age and 21% is over the age of 65 yrs.

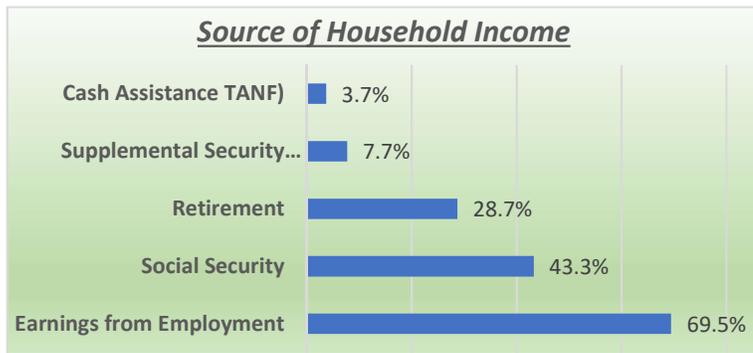

96.9% of the population is White and 1.5% is Black. The remaining 1.6% of Pocahontas County residents are other or mixed race.

There are 3,737 households and 2,365 family households in the county. 835 or 22.3% of the total family households have children under 18 yrs. of age.

### Socio-Economic Characteristics

10.2% of Pocahontas County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate doubles reaching 22.0%. The poverty rate for single, female-headed families with all children under 5 yrs. of age is extremely high in Pocahontas County. It is estimated that 100% of these single parent families with young children have annual income below the FPL (ACS 2011-15).

Median household income in Pocahontas County is \$36,026 which is well below the state average of \$42,644 (ACS 2012-16). 69.5% of the households in the county have income from employment and 3.7% receive cash assistance through the TANF program. 12.7% of households in the county receive food stamps to supplement their income (ACS 2015). 15.8% of the households in the county have zero net worth.

A high percentage of households in Pocahontas County have little or no liquid assets. The “Liquid Asset Poverty Rate” defined as a lack of sufficient liquid assets to subsist at poverty level for three months in absence of income, is at 42.1% in the county (2014 Survey of Income and Program Participation, US Census Bureau).

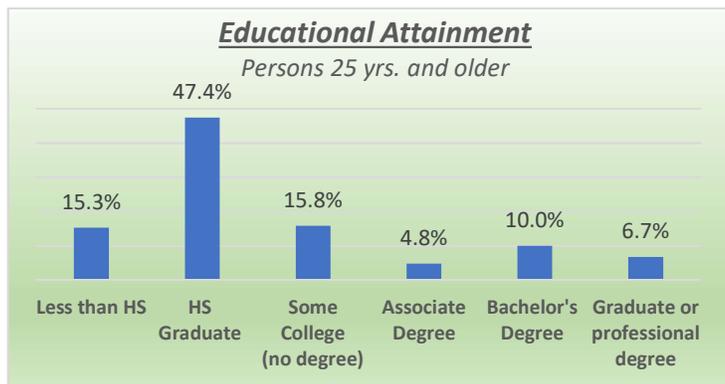

### Causes of Poverty

Primary causes of poverty in the county appear to include:

- An unemployment rate of 5.4% (August 2017),
- Lack of education beyond high school,
- Little or no access to “good jobs” paying a living wage.

Although the unemployment rate declined slightly (0.1%) between August of 2016 and August of 2017, it remains at the state average of 5.4%. The absence of economic diversity in the county appears to be a notable factor affecting poverty rates as many employment opportunities are seasonal service type jobs.

Educational attainment is relatively low among Pocahontas County residents. 16.7% of those 25 yrs. of age and older hold a college degree; however, nearly half of county residents have no education beyond high school, and 15.3% have less than a high school education (ACS 2015). The research on secondary data sets documents the school dropout rate in Pocahontas County at 12.7% (Kids Count 2015), and the 4-year cohort graduation rate is 79.5% (WVEIS 2016).

The 2016 college going rate in the county is at 62.3% of graduating high school seniors (WV Higher Education Policy Commission). 11<sup>th</sup> grade reading proficiency is at 42.0% and mathematics proficiency is at 37.7% (WVEIS 2016-17).

The community discussion held in the county identified several factors contributing to poverty in the county including:

- The need for more jobs,
- A lack of trained workforce,
- Substance abuse, and

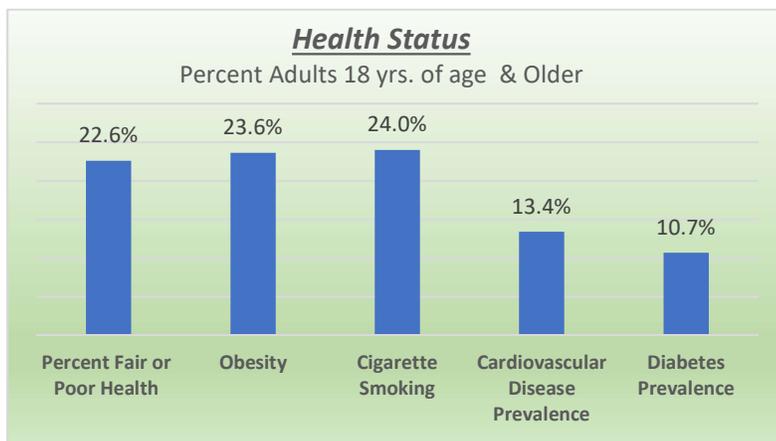

- Some residents do not have access to a means of transportation.

When asked to define poverty and the factors that keep people in poverty, community discussion participants identified:

- A lack of skilled labor and training beyond high school.
- A lack of work opportunities that pay a living wage,
- A sense of hopelessness among many residents of the community, and
- Generational poverty.

An indicator of generational poverty in the county is births to mothers with less than a high school education. This statistic is 12.0% of all births (*Kids Count 2015*).

Health status of the population and access to healthcare, mental health services, and substance abuse treatment are also contributing factors to poverty in Pocahontas County.

Obesity rates are at 23.6% among the adult population and 24.0% of the adult population smoke (*BRFS 2014*). Close to one-fourth of the adult population (22.6%) have fair or poor overall health. In addition, a high percentage (17.9%) of the population is without any type of health insurance (*ACS 2015*).

The infant mortality rate in Pocahontas County is high at 11.8 deaths per 1,000 live births and 8.3% of babies born to

county residents are low birth weight (less than 2500 grams). The teen birth rate is at 31.0 births per 1,000 females (*Kids Count 2015*).

### Community Needs

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

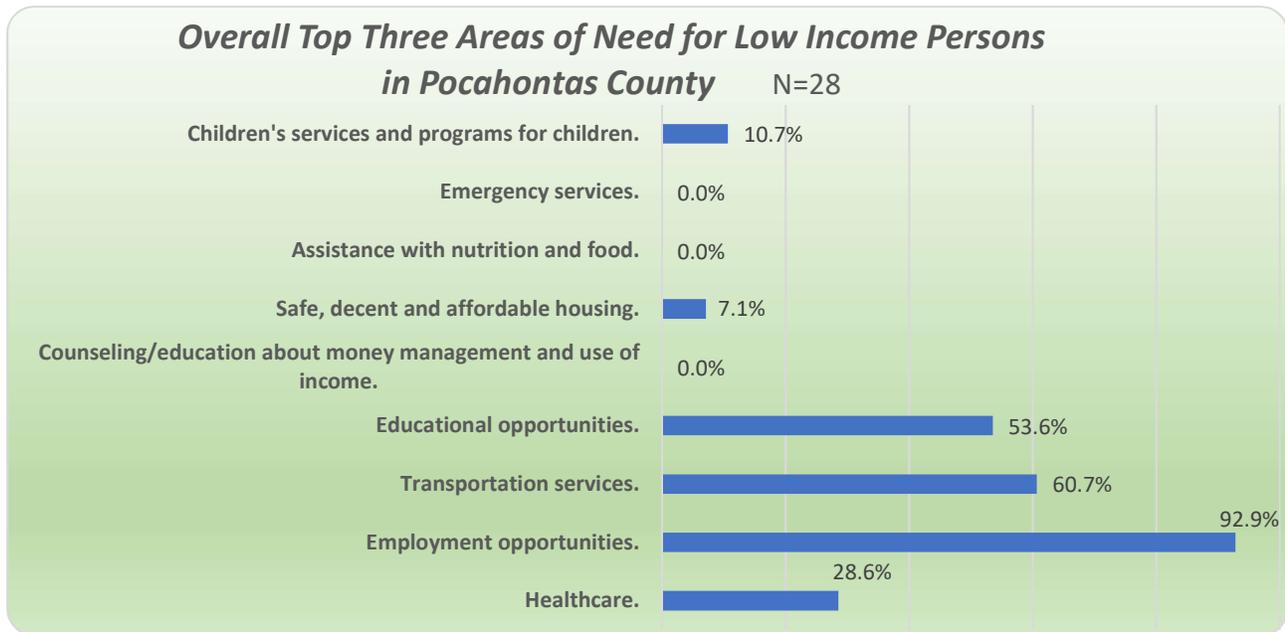

#### Overall Needs and Priorities

Pocahontas County survey respondents were asked:

” *What do you think are the top three areas of need of low income people in Pocahontas County?*”

Employment opportunities were, by far, the most frequently selected area of need with nearly all key informants (92.9%) prioritizing this domain. Transportation services and a lack of educational opportunities were identified as secondary priorities by survey respondents. 60.7% selected transportation

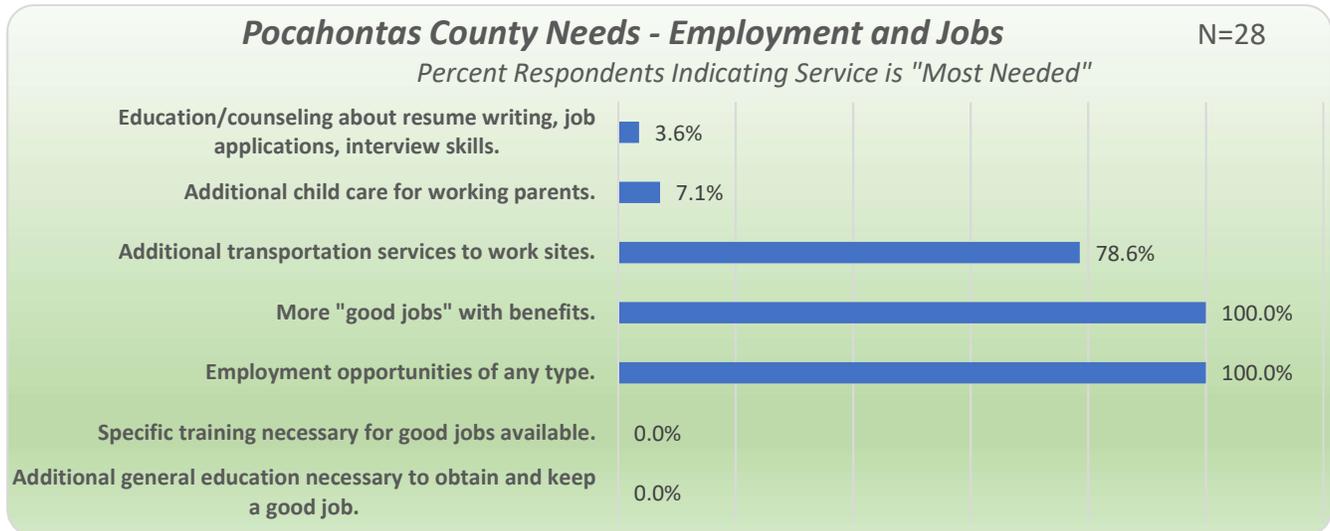

and 53.6% chose educational opportunity as priority areas of need for county residents.

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

*Employment and Jobs:*

Those persons responding to the survey identified three priorities related to employment and jobs and they were nearly unanimous in their opinion that additional employment opportunities are needed in the county.

Based on the survey responses, the top three priorities in Pocahontas County related to Employment and Jobs are:

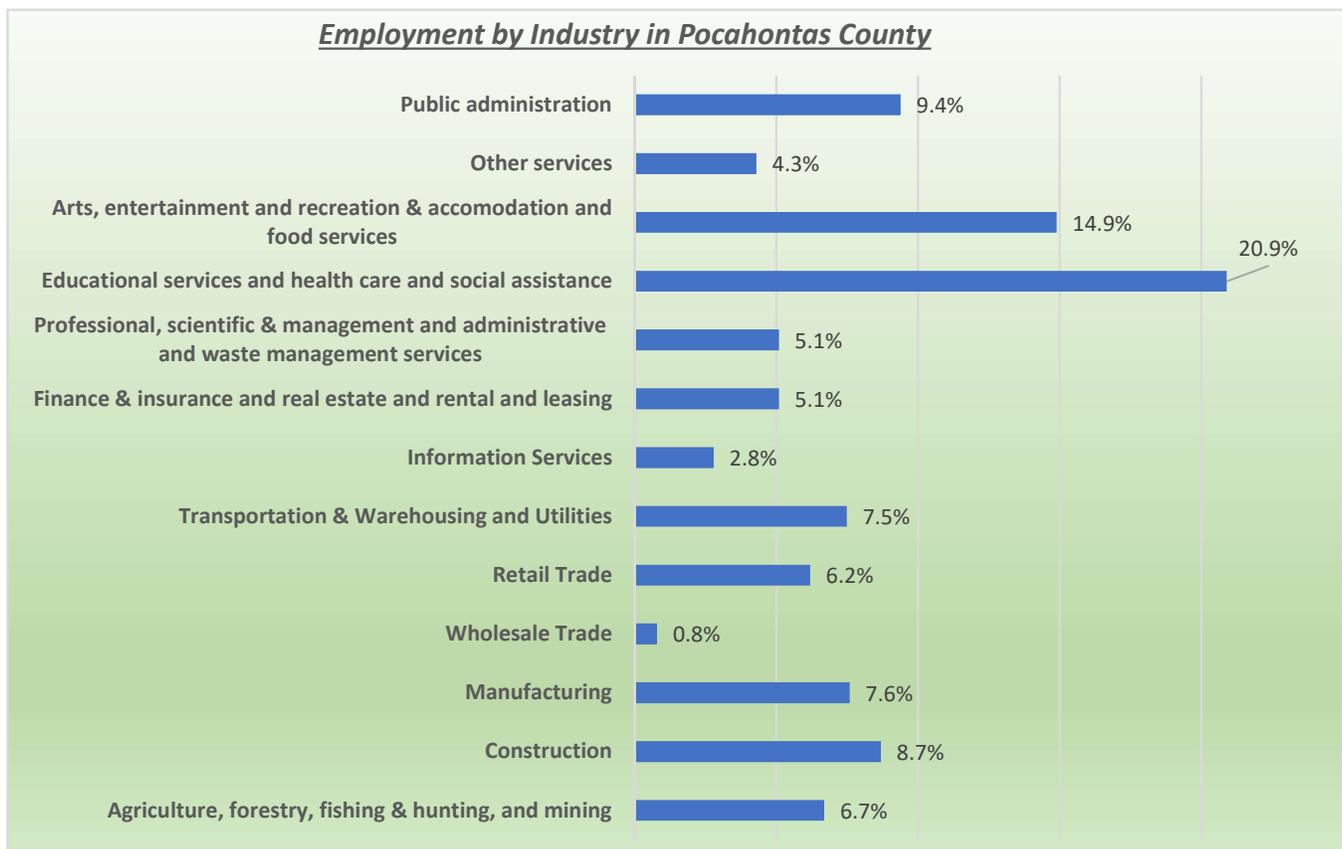

- Employment opportunities of any type,
- More good jobs with benefits, and
- Transportation services to work sites.

The highest percentage of persons employed work in the educational, healthcare, and social service sectors. This industry accounts for 20.9% of employment in the county

Snowshoe Resort employs a substantial number of people in the arts, entertainment, recreation, accommodations, and food services sectors. 14.9% of overall employment is in this industry. Other employment in the county is spread across the remaining industries. (BLS 2015).

The largest current employers in Pocahontas County (in order of number of people employed) are:

- Snowshoe Resort,
- Pocahontas County Board of Education,
- Pocahontas Memorial Hospital, and
- Interstate Hardwoods.

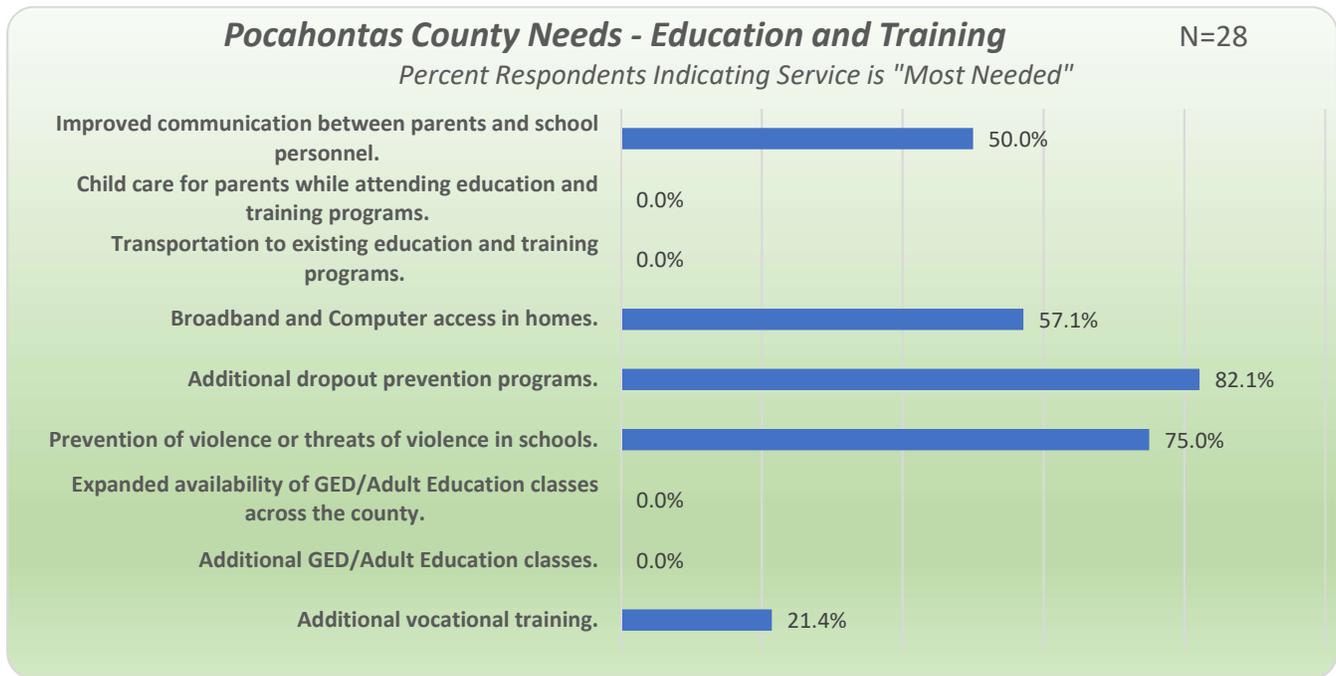

*Education and Training:*

Most people responding to the survey in Pocahontas County are most concerned about issues related to public education including school dropouts and violence in schools. 82.1% prioritize needs in dropout prevention and 75.0% selected prevention of violence or threats of violence in schools. Based on the survey responses, the top three priorities in Pocahontas County related to Education and Training are:

- Dropout prevention programs,
- Prevention of school violence, and
- Increased access to broadband computer services in homes.

Half of all survey respondents also indicated a need for improved communication between parents and school personnel.

Discussion participants in Pocahontas County also talked about needs related to education and training including:

- Access to high speed Internet in the county, and
- Vocational classes for out-of-school adults.

*Housing:*

When asked about needs related to housing, most people responding to the survey in Pocahontas County focused on the lack of financial resources people have to purchase a home. 89.3% prioritized general access to credit, and 85.7% indicated funds for any required down payment on a home was a major need in the county.

Based on the survey responses, the top priorities in Pocahontas County related to Housing are:

- Access to credit and
- Access to funds for required down payment on a home.
- New construction of affordable rental units was identified as a priority need by 28.6% of the key informants completing the survey.

The median age of housing units in the county is 32 years; and 13.4% of existing homes were built prior to 1940. As of 2015, there were an estimated 95 occupied homes without plumbing in the county (ACS 2011-15).

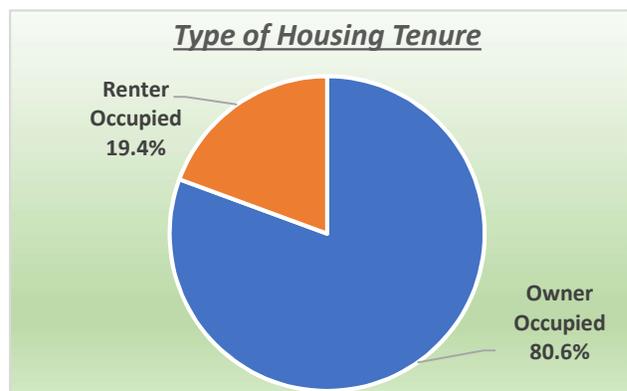

**Pocahontas County Needs - Housing** N=28  
*Percent Respondents Indicating Service is "Most Needed"*

Secondary data sets reviewed indicate most housing in the county is owner occupied. 80.6% of county residents are home owners while only 19.4% live in rental properties.

28.4% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income. 36.9% of renters are cost burdened based on their gross rent exceeding 30% of the household income.

The median value of owner occupied housing in the county is \$115,500 and median monthly owner costs for those with a mortgage is \$847 (ACS 2011-15).

*Homeowner Assistance:*

Most people responding to the survey in Pocahontas County believe education and counseling services for potential home buyers and assistance with home repairs are the priority needs in the county related to assisting low income homeowners and potential homeowners. The top three priorities in Pocahontas County related to Homeowner Assistance are:

- Credit, mortgage, asset building counseling,
- Homebuyer education classes, and
- Housing repairs.

**Pocahontas County Needs - Homeowner Assistance** N=28

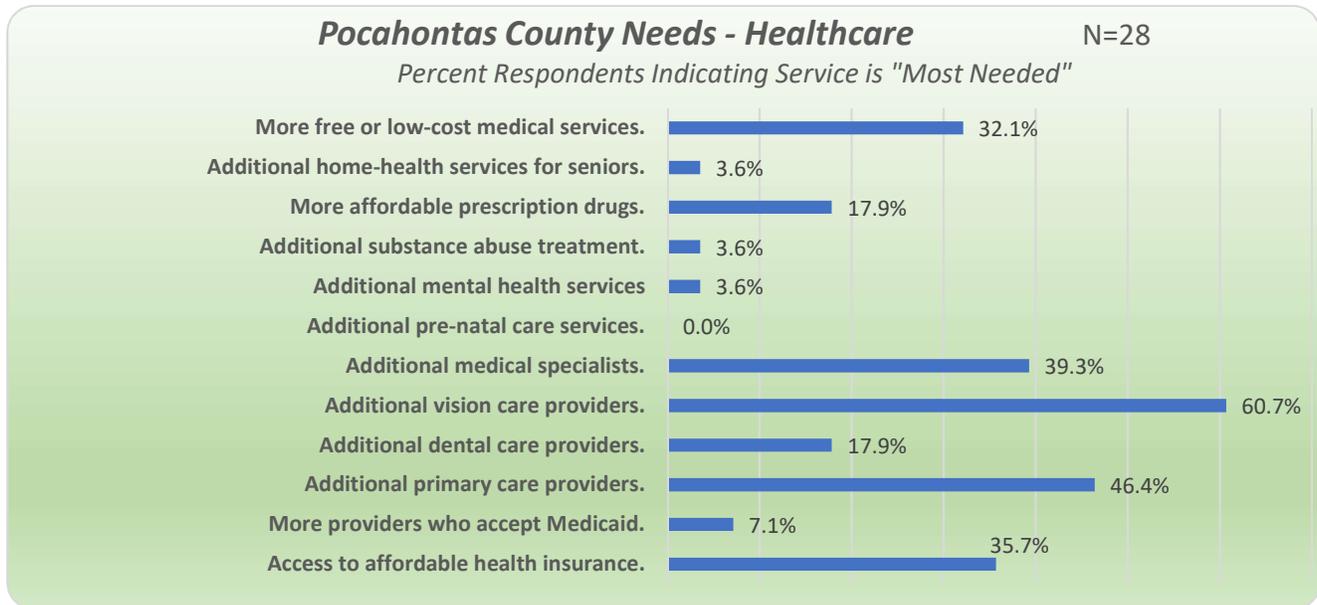

*Percent Respondents Indicating Service is "Most Needed"*

*Healthcare:*

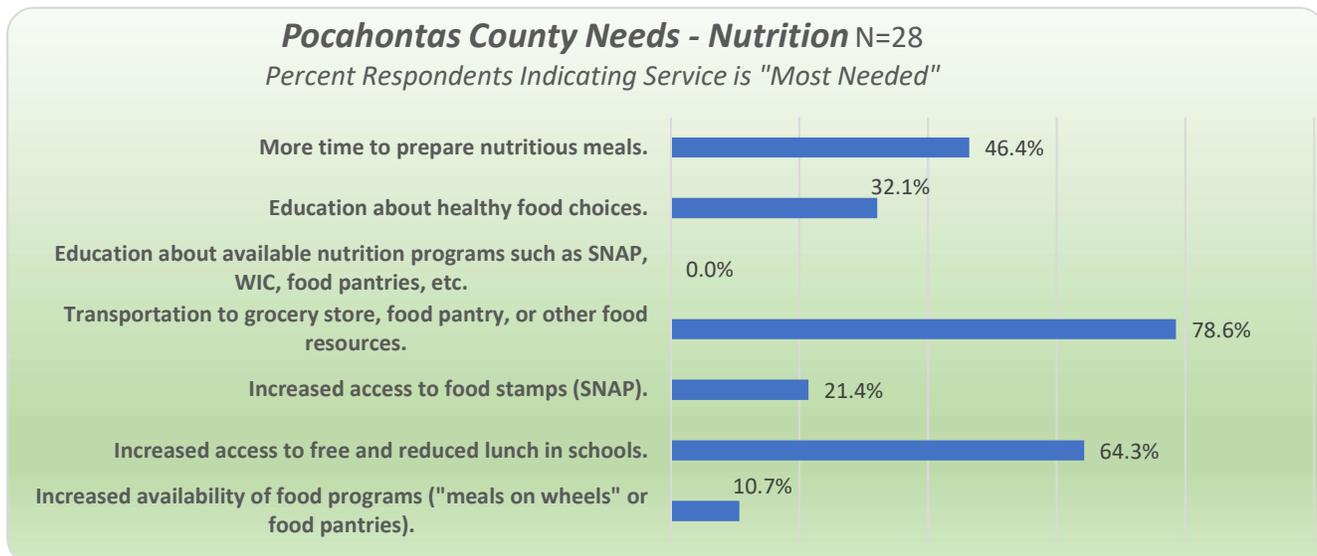

Survey responses in Pocahontas County tend to prioritize needs related to attracting additional healthcare providers to the county. 60.7% of respondents see a need for additional vision care providers and 46.4% prioritize additional primary care providers. Medical specialist also appears to be an area of concern as is access to affordable health insurance. The most frequently cited needs in this area are:

- Access to vision care providers,
- Access to primary care, and
- Access to medical specialists.

*Nutrition:*

When asked about community needs related to food and nutrition, Pocahontas County survey respondents focused on access to food resources.

78.6% identified a need for transportation services to grocery stores and supplemental food programs such as food pantries. Increased participation in the school lunch and breakfast program was also identified by 64.3% of those informants completing the survey.

Survey respondents identified the following priorities related to food and nutrition:

- Transportation to food outlets, and
- Increased access to the free and reduced school lunch program.

There are 5 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) serving the county (*WV Foodlink 2015*) and 12.7% of households in Pocahontas County receive food stamps to supplement their food budgets. 353 families are enrolled in WIC through the WIC office serving the county. The *WV Foodlink County Profile for Pocahontas County* documents 20 retail locations that accept food stamps and 3 locations accepting WIC (2015).

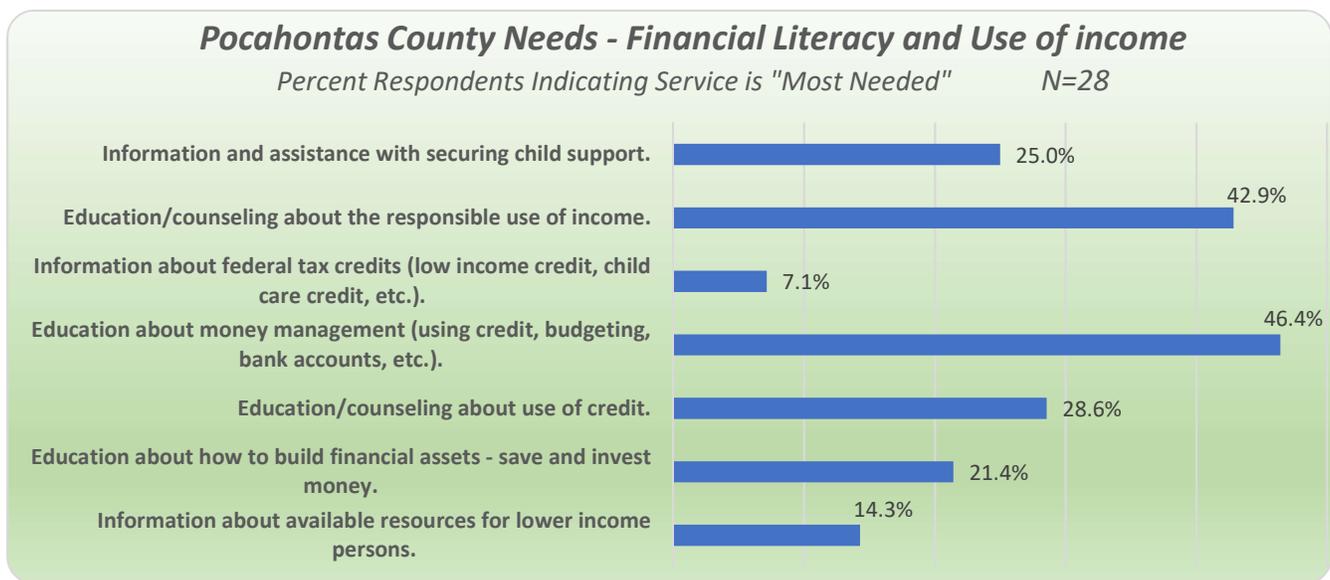

The secondary data reviewed reinforces the concern of survey respondents about participation in the school lunch program. 747 school-age children were eligible for free and reduced cost meals at school in 2015; however, data reflects only 68.0% of the eligible students participated in the program (*WV FoodLink*).

*Financial Literacy:*

Survey responses indicate a need for educational services about money management including responsible use of credit, budgeting, using bank accounts, and other issues related to financial literacy. Some type of education about these issues appears to be the highest priority need in the county based on survey responses.

Priorities related to financial literacy include:

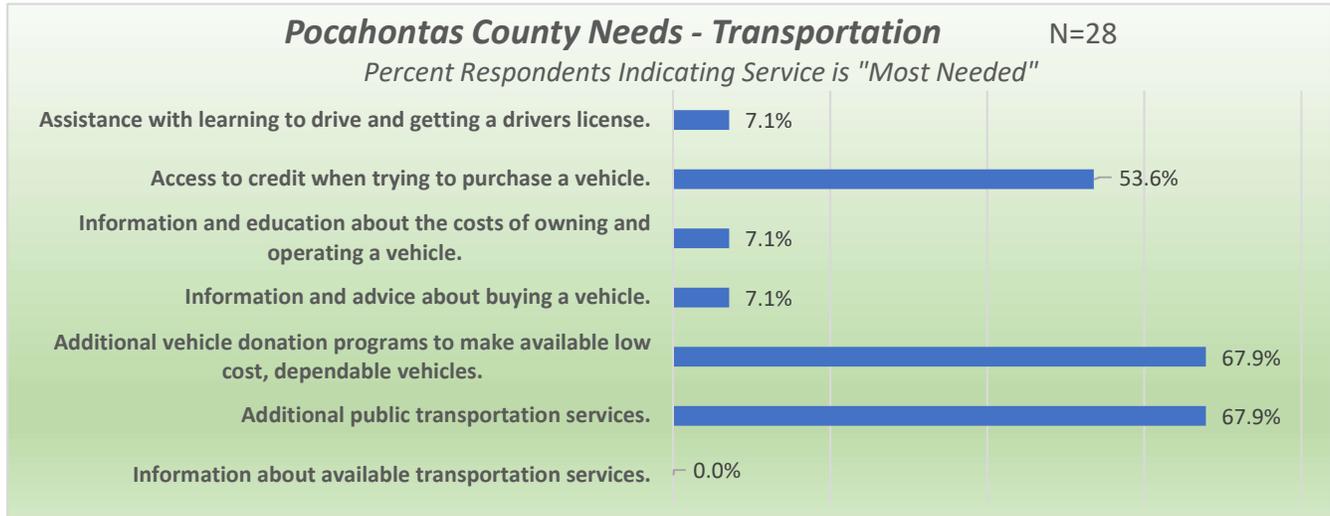

- Education about money management, and
- Education/counseling about the responsible use of income.

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 7.0% of Pocahontas County households are “unbanked” (have no checking or savings accounts).

*Transportation:*

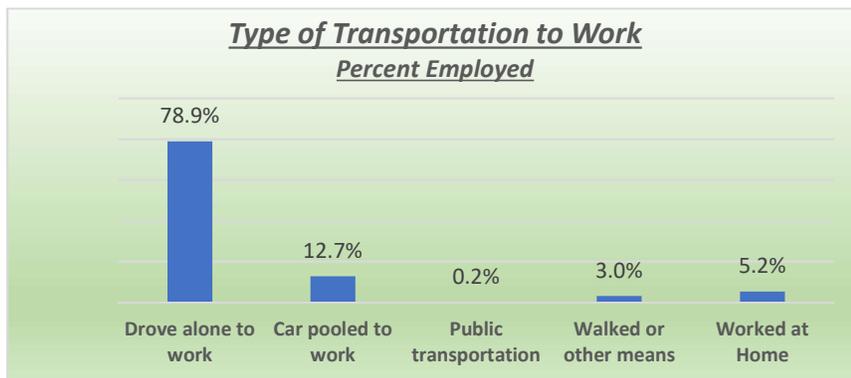

The survey respondents identified access to public transportation services and access to low cost dependable vehicles as the priority needs in Pocahontas County related to transportation.

The highest priorities identified by the informants completing the survey within the transportation domain include:

- Public transportation services,
- A vehicle donation programs to make available low cost, dependable vehicles to low income persons, and
- Access to credit to purchase a vehicle.

The mean travel time for people in the county to get to their place of work is 27.1 minutes.

Most workers in the county rely on private transportation to get from home to their work location. 91.6% of all persons employed either drive alone or car pool to work (ACS 2011-15).

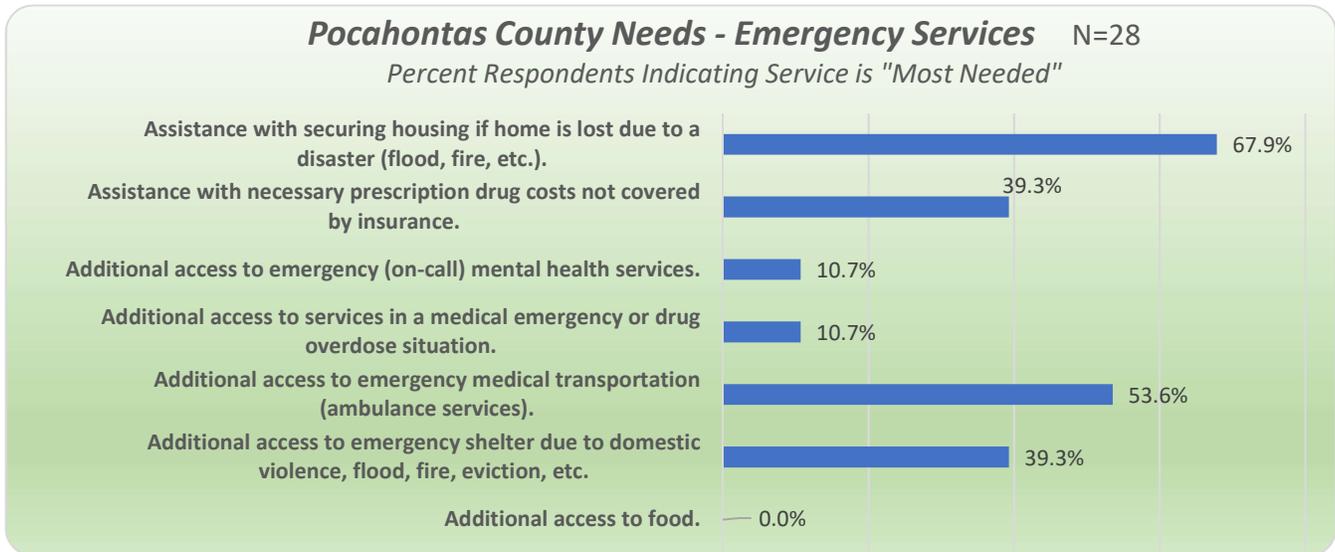

5.2% of persons employed in Pocahontas County work at home.

*Emergency Services:*

Assistance with obtaining housing if a home is lost in a disaster, and additional emergency medical transportation services are the priority areas needing attention identified by survey respondents.

Priority areas of concern related to the emergency services domain include:

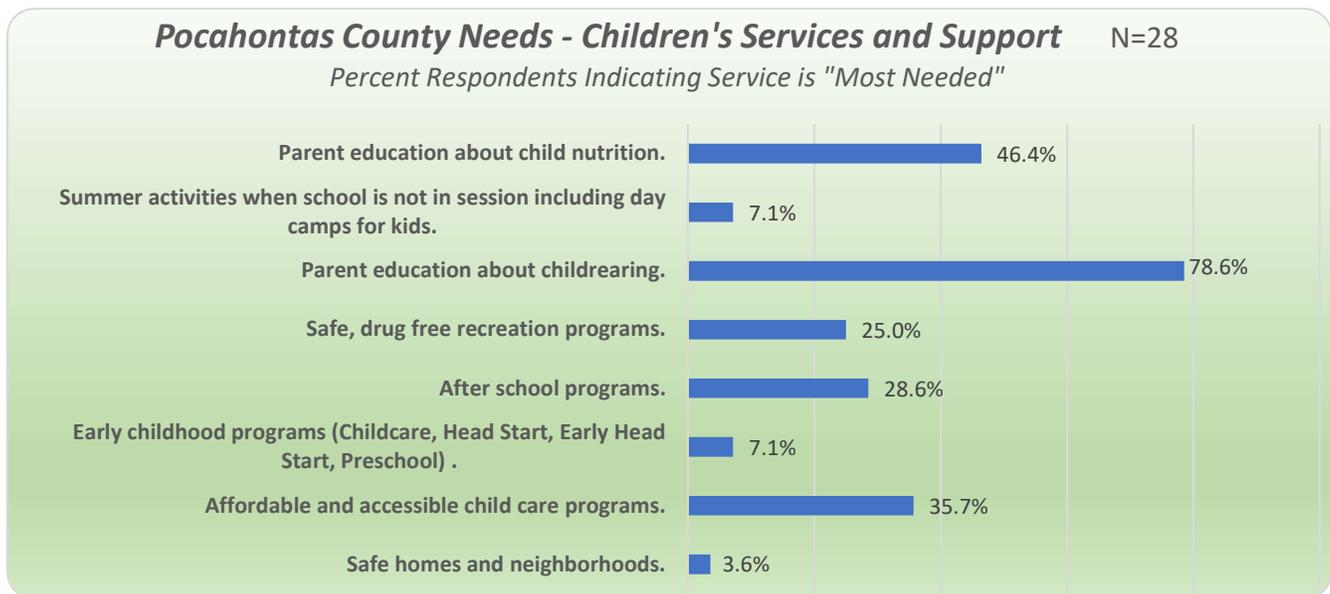

- Assistance with securing housing due to loss of home in a disaster, and
- Expanded medical transportation services.

Access to shelter facility due to domestic violence, flood, fire, eviction, etc. is also a priority for 39.3% of survey respondents and assistance with prescription drug costs was also identified as a priority by 39.3% of the community informants.

*Children's Services and Supports:*

Parent education about child rearing was the predominant need identified by most survey respondents in Pocahontas County. 78.6% of those persons completing the survey prioritized this need in the county. Close to half (46.4%) of the respondents indicated parent education about child nutrition was also a priority.

Priorities for attention related to services and support for children focused on parent education and include:

- Parent education about child rearing, and
- Parent education about child nutrition.

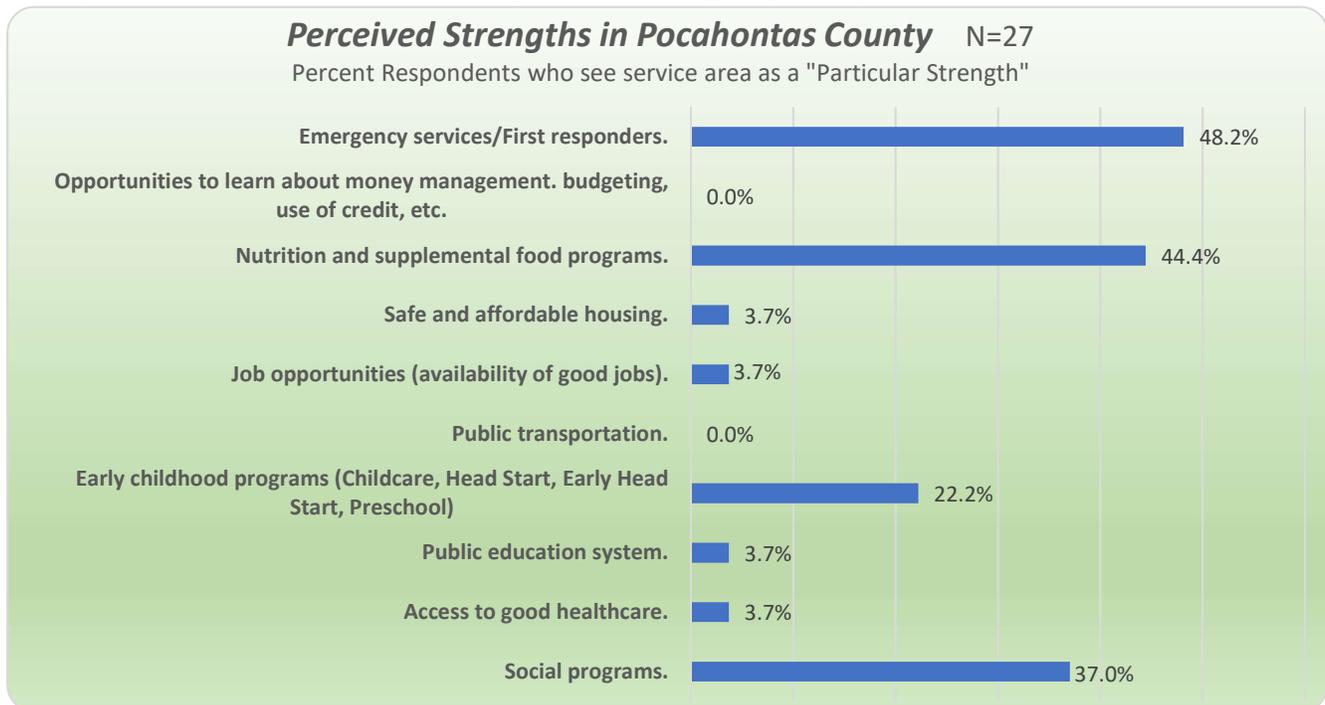

The concerns expressed through the survey also indicate a need for additional child care programs. 35.7% of respondents chose affordable and accessible child care as a priority in the county. After school programs and safe and drug free recreational outlets were acknowledged as needs by close to one in four of the survey participants

Addressing safety issues were not recognized by the limited number of survey respondents in Pocahontas County as a priority need; however, the quantitative data related to child and family safety suggests this may be an area of concern. The child abuse/neglect rate in the county was 37.3 per 1,000 children (Kids Count 2015). There were 22 court filings in the county for abuse/neglect in 2016 which is 14.2 filings per 1,000 children (*Circuit Court case filings data*). There were also 49 domestic violence cases filed in 2016 which is a rate of 20.7 filings per 1,000 family households (*Family Court case filings data*).

#### Primary Strengths and Community Resources

Survey respondents in Pocahontas County were asked what they considered to be the greatest areas of strength within the service system in Pocahontas County and they were asked to select all options they consider to be a particular strength.

None of the domains describing services and programs were identified as particularly strong by a majority of the informants responding. In the opinion of the survey participants, first responder emergency services and supplemental food programs are viewed as the strongest components of the service system in the county. These two areas were seen as a particular strength by nearly half of the informants.

Social programs are viewed as a strength by 37% and the early childhood programs were prioritized by 22.2%.

Other areas of the broad community services system were seen by very few people responding to the survey as areas of strength.

When asked to talk about the greatest strengths/assets in Pocahontas County, persons participating in the community discussion focused on natural resources, the resiliency of people living in the county, partnerships, relationships, and churches.

Some service domains were also mentioned during the discussion including:

- Volunteer fire and rescue departments,
- Food banks, and
- State parks and tourism industries.

Other resources that address the needs of low income families identified within Pocahontas County include:

- A range of public health services,
- Pocahontas Memorial Hospital,
- Nine Federally Qualified Health Center locations,
- Twelve institutional Medicaid and Medicare providers,
- Seneca Community Mental Health,
- Five banking locations,
- Six fire and rescue departments,
- Pocahontas County Family Resource Network,
- Pocahontas County Library,
- Two licensed child care centers,
- Seven family day care providers,
- Local office of the WV Department of Health and Human Resources,
- WVU Extension Service, and
- Pocahontas County Senior Center.

#### Head Start/ Early Head Start Needs and Resources

58 children were served by Public Pre-K programs during the 2016-17 school year and the Pre-K participation rate for 4-year-olds in Pocahontas County was at 86% (*WV Dept. of Ed*). These 4-year-olds were served through approved voluntary programs operated by Head Start, public schools, and other early childhood providers.

For fiscal year 2017 (July 1, 2016-June 30, 2017) a total of 26 children received Head Start services in Pocahontas County. All 26 Head Start children (100%) were Caucasian and 1 of the children was Hispanic. There was 1 foster child served through Head Start programs in Pocahontas County during the period July 2016 to June 2017 and 1 homeless child. English was the primary language spoken by all Head Start families. During calendar year 2017, annual program attendance and enrollment totals in Pocahontas County Head Start programs were at 135.6% of available program slots.

#### *Head Start Needs Projections for 2018-19 program year*

28 four-year old children and 20 three-year old children are projected to be potentially eligible for services within the communities of Hillsboro and Marlinton served by the Board of Education and School Days Childcare. There are 11 four-year-old and 10 three-year old children in Green Bank. Even though the proposed eligible children have decreased slightly, it can be concluded that the population of eligible children in Pocahontas County can still support the continuation of Head Start services in Hillsboro, Marlinton and possibly Green Bank during 2018-19.

The partnership between Head Start and School Days Child Care is evaluated annually as to whether this childcare agency will continue serving Head Start children. This will be based on the number of eligible families with three and four-year old children that select the School Days Child Care site as their Pre-K/childcare placement.

The agency will continue to provide Family and Community Engagement services to Head Start eligible children in Pocahontas County via an agency-employed Family Resource Coordinator that is housed out of the Randolph County office.

Effective for PY53, the West Virginia Legislature approved a change in the eligibility age for Universal Pre-K. Students must be 4 years old before July 1<sup>st</sup> of the year that are applying for Universal Pre-K services. Previously, the cut-off date was September 1<sup>st</sup>. In Pocahontas County, five (5) students/families will be affected by this legislative change.

#### *EHS Needs Projections for 2018-19*

Based on the most recent demographics from the West Virginia Department of Health and Human Resources (WVDHHR) list in projecting the number of eligible prenats, infants, and toddlers, Pocahontas County currently has fifty-nine (59) prenatal to one-year olds compared to twenty-nine (29) in PY52 as well as forty (40) two-year olds compared to ninety-one (91) in PY52 from a variety of communities within the county. Even though the projected number of eligible prenats, infants, and toddlers have decreased from ninety-nine (99) in PY53 compared to one-hundred and twenty (120) in PY52, it can be concluded that the population of eligible children in Pocahontas County could still support the potential addition of Early Head Start services.

#### *Services Provided by NCWVCAA*

The characteristics of clients served, and the types of services provided in Pocahontas County by NCWVCAA provides insight into eligible people and their needs. During the most recent calendar year completed (2017), data was collected for a total of 222 persons who received services from the agency in Pocahontas County. 100 of the persons served were male and 122 were female. 92.3% of all persons receiving services were White, 3.6% were Multi-racial, 0.9% were American Indian or Alaska Native, and 3.0% were other races. Those persons of Hispanic ethnicity made up 2.3% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 24 to 44 yrs. age group.

80.0% of all families served have annual income below the federal poverty level. 4.1% of those served have no health insurance and 5.4% are disabled.

The most numerous types of outcomes achieved through services provided include:

- Infants and children obtained age appropriate immunizations, medical and dental care,
- Infant and child health and physical development maintained or improved through adequate nutrition,
- Information and referral services provided,
- School readiness skills were improved through participation in pre-school activities, and
- Emergency food assistance was provided.

# *Preston County*

## *Community Needs and Resources*

## PRESTON COUNTY

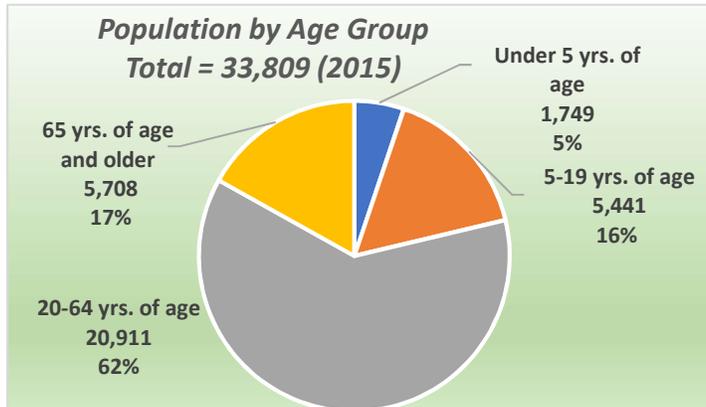

### History & Geography

Preston County has a land area of 648.37 square miles and is located in the northern part of the state, bordering Pennsylvania to the north and Maryland to the east. The county is mountainous and has no metropolitan regions. The County seat is in Kingwood. Cranesville Swamp is located northeast of Terra Alta and is one of the first National Natural Landmarks to be designated by the National Park Service in 1965. Another “unique” location is the Cheat River "narrows," just north of Rowlesburg. This is a popular spot for white water enthusiasts. The Cheat River Canyon, a virtually impenetrable canyon beginning at Albright and running to the northwest corner of Preston County, is said to hold some of the most challenging white water in the eastern United States.

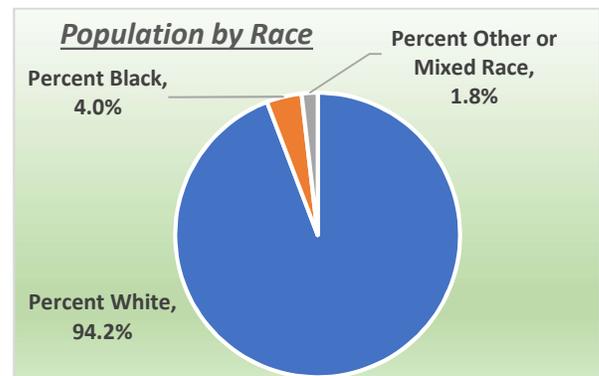

The county is mountainous and U.S. Route 50 and 92 are the major east west highways with Interstate 68 cutting across a small northern section of the county. State Route 7 and 26 are the counties only other major highways. The remainder of the county is accessed by secondary roads and can be extremely hazardous to travel in the winter months.

### Demographic Characteristics

The total population of Preston County is 33,809 persons (ACS, 2015). 5% of the population is under five years of age and 17% is over the age of 65 yrs.

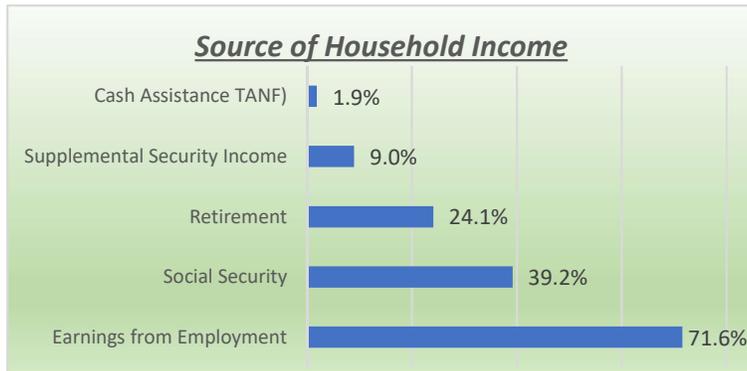

94.2% of the population is White and 4.0% is Black. The remaining 1.8% of Preston County residents are other or mixed race.

There are 12,472 households and 8,694 family households in the county. 3,414 or 27.4% of the total family households have children under 18 yrs. of age.

### Socio-Economic Characteristics

11.2% of Preston County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate increases to 14.0%. Nearly half (46.1%) of all single, female-headed

families with all children under 5 yrs. of age have annual income below the poverty level (*ACS 2011-15*).

Median household income in Preston County is \$45,221 which is above the state average of \$42,644 (*ACS 2012-16*). 71.6% of the households in the county have income from employment and 1.9% receive cash assistance through the TANF program. 15.7% of households in the county receive food stamps to supplement their income (*ACS 2015*). 13.6% of the households in the county have zero net worth.

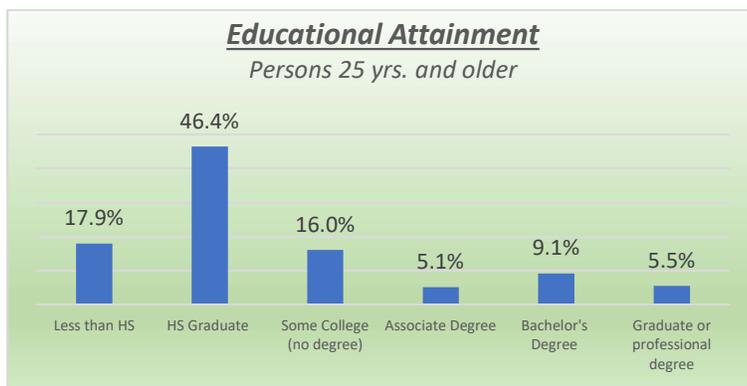

About 1 in 3 households in Preston County have little or no liquid assets. The “Liquid Asset Poverty Rate” defined as a lack of sufficient liquid assets to subsist at poverty level for three months in absence of income, is at 35.1% in the county (2014 Survey of Income and Program Participation, US Census Bureau).

### Causes of Poverty

Primary causes of poverty in the county appear to include:

- Incentives to stay in poverty including high cost of child care, fear of losing benefits,
- low paying jobs,
- lack of education beyond high school, and
- generational poverty – mind sets and culture within some families.

Although the unemployment rate declined slightly (0.4%) between August of 2016 and August of 2017 and was at 5.0% in August 2017, it remains just below the state average of 5.4%.

Educational attainment is relatively low among Preston County residents. 14.6% of those 25 yrs. of age and older hold a college degree; however, more than half of county residents have no education beyond high school, and 17.9% have less than a high school education (*ACS 2015*). The public-school dropout rate in Preston County is at 10.4% (*Kids Count 2015*), and the 4-year cohort graduation rate is 86.6% (*WVEIS 2016*).

The 2016 college going rate in the county is at 44.6% of graduating high school seniors (*WV Higher Education Policy Commission*). 11<sup>th</sup> grade reading proficiency is at 49.6% and mathematics proficiency is at only 14.9% (*WVEIS 2016-17*).

The community discussion held in the county identified several factors contributing to poverty in the county including:

- Loss of employment,

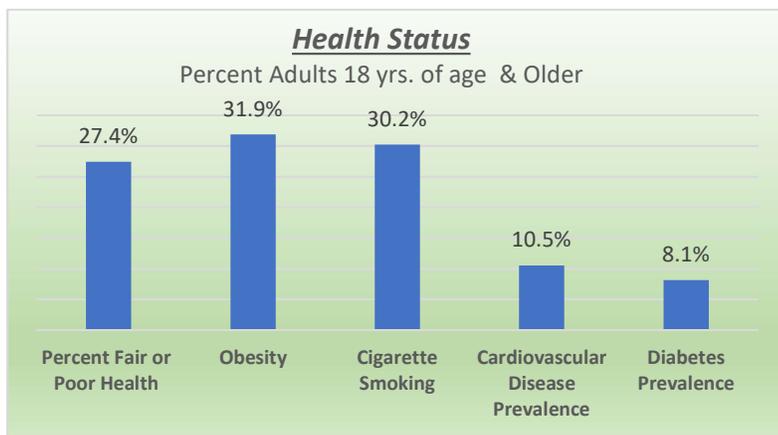

- Lack of child care options and cost of child care,
- Systemic drivers of poverty – no graduated assistance. Families either qualify for benefits or not, and
- An entitlement mentality about “using the system” in some families.

When asked to define poverty and the factors that keep people in poverty, community discussion participants identified:

- A lack of education beyond high school,
- Working families with low wage jobs living pay day to pay day,
- A lack of work opportunities,
- Substance abuse and addiction, and
- Poor decision making.

An indicator of generational poverty in the county is births to mothers with less than a high school education. This statistic is relatively high at 15.3% of all births (*Kids Count 2015*).

Substance use contributes to poverty in the county. There were 15 overdose deaths in Preston County over the period 2013-15; an overdose mortality rate of 15 per 100,000 population during the period (*County Health Rankings, Robert Wood Johnson Foundation*).

The overall health status of the population and access to healthcare, mental health services, and substance abuse treatment are also contributing factors to poverty in Preston County.

Obesity rates are at 31.9% among the adult population and 30.2% of the adult population smoke (*BRFS 2014*). More than one-fourth of the adult population (27.4%) have fair or poor overall health.

In addition, 11.8% of the population is without any type of health insurance (*ACS 2015*).

The infant mortality rate in Preston County is 8.0 deaths per 1,000 live births and 9.4% of babies born to county residents are low birth weight (less than 2500 grams). The teen birth rate is at 24.8 births per 1,000 females (*Kids Count 2015*).

### Community Needs

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

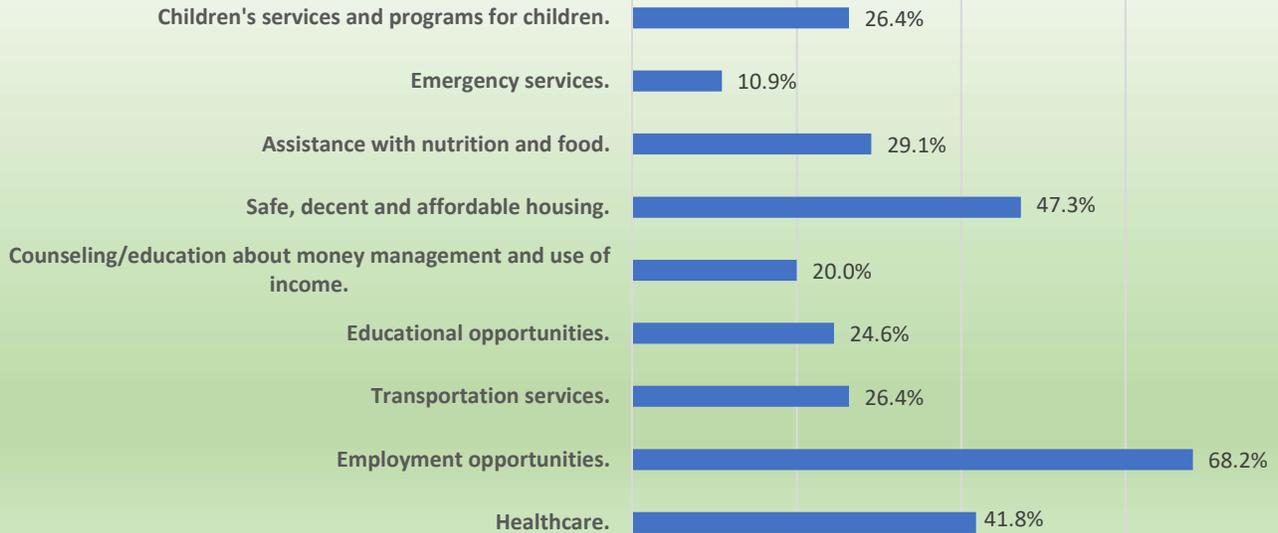

#### Overall Needs and Priorities

Preston County survey respondents were asked:

” *What do you think are the top three areas of need of low income people in Preston County?*”

**Overall Top Three Areas of Need for Low Income Persons  
in Preston County**

N=110

Employment opportunities was the most frequently selected area of need with 68.2% of the key informants prioritizing this domain. Housing was prioritized by nearly half of the respondents (47.3%), and healthcare was selected as an area needing attention by 41.8% of the informants completing the survey.

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

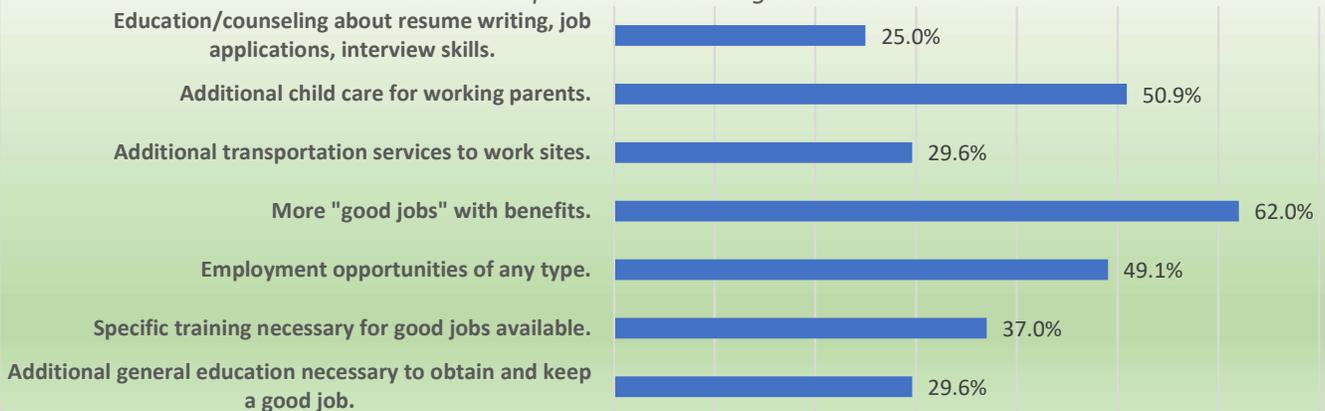

*Employment and Jobs:*

Preston County survey respondents indicated employment opportunities (good jobs with benefits) and child care are the highest priority needs in the county within this domain.

**Preston County Needs - Employment and Jobs**

N=108

*Percent Respondents Indicating Service is "Most Needed"*

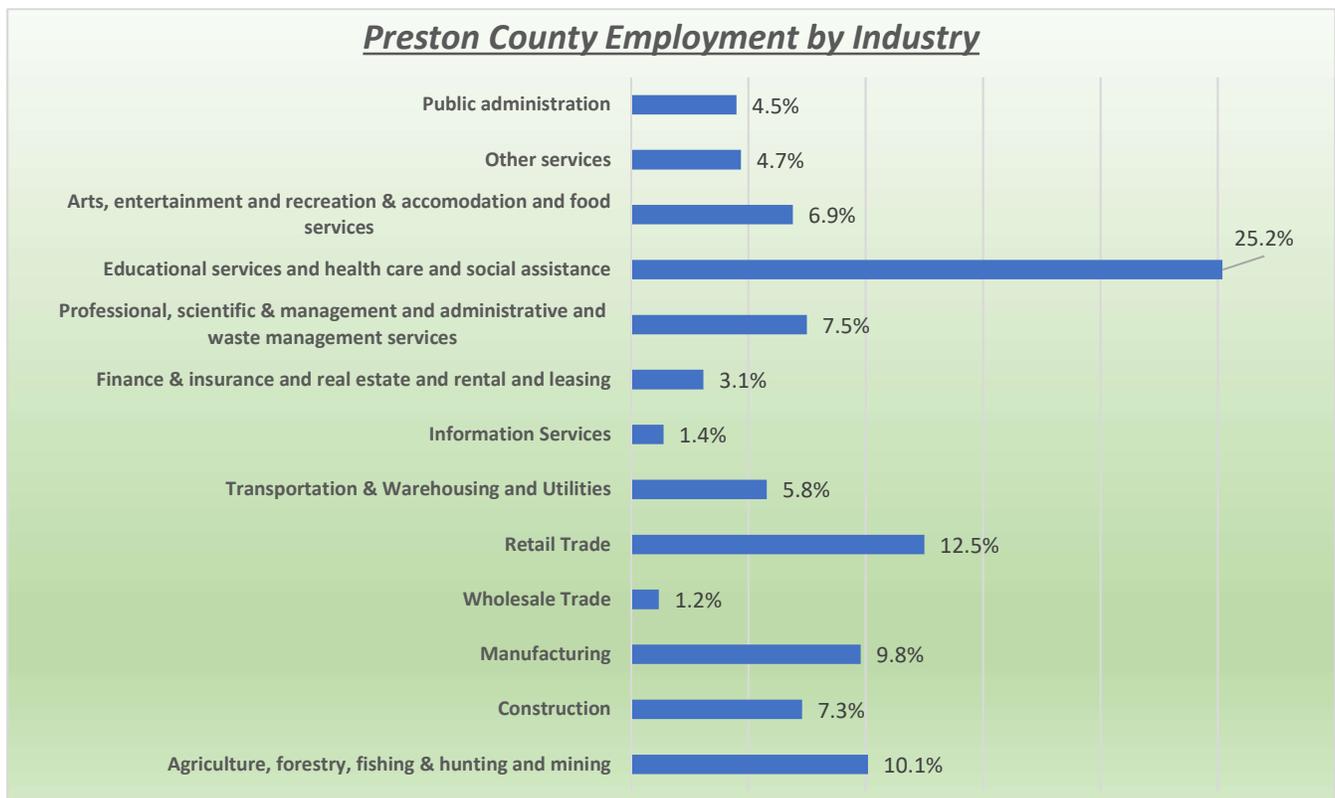

Based on the survey responses, the top three priorities in Preston County related to Employment and Jobs are:

- More good jobs with benefits,
- Employment opportunities of any type, and
- Child care for working parents.

Community discussion participants talked about a need to encourage entrepreneurship and encourage development of home businesses. Access to capital was also recognized as a need in the county by the discussion participants.

As in most counties of the state, the highest percentage of persons employed in Preston County work in the educational, healthcare, and social service sectors. This industry accounts for 25.2% of employment in the county

Other areas of employment in the county are spread across many industries with the most significant being retail trade (12.5%), the agriculture, forestry, hunting & fishing, and mining sectors (10.1% and manufacturing (9.8%) (BLS 2015).

The largest current employers in Preston County (in order of number of people employed) are:

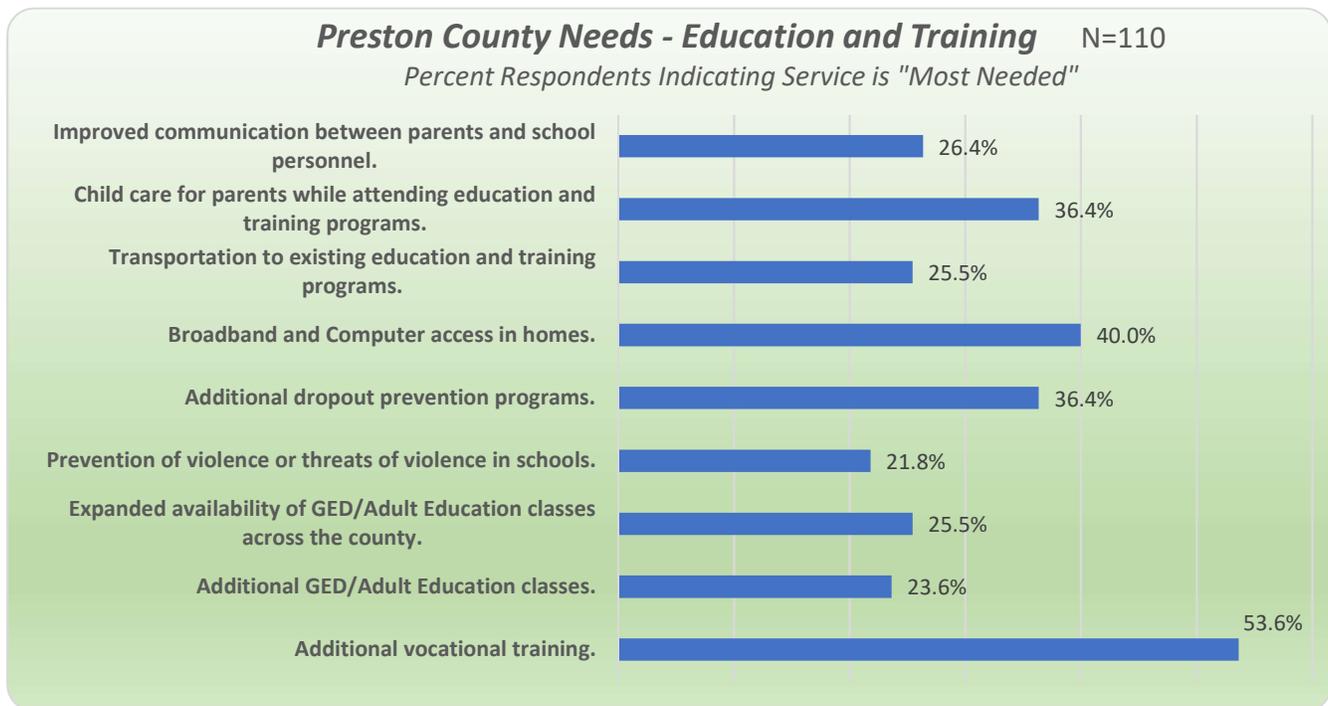

- Federal Prison System,
- Preston County Board of Education,
- Preston Memorial Hospital, and
- Wal-Mart.

*Education and Training:*

A majority of people responding to the survey in Preston County are concerned about issues related to vocational training programs. 53.6% of the key informants indicated additional vocational training programs are needed in the county. There was more diversity of opinion about other priorities related to education and training needs. 40.0% of respondents prioritized expanded access to broadband and computers in homes. Additional child care programs and dropout prevention programs were seen as a priority by 36.4% of those completing the survey.

Based on the survey responses, the top three priorities in Preston County related to Education and Training are:

- Vocational training,
- Increased access to broadband computer services in homes,
- Dropout prevention programs, and
- Child care during hours training programs are offered.

Discussion participants in Preston County also talked about needs related to education and training including:

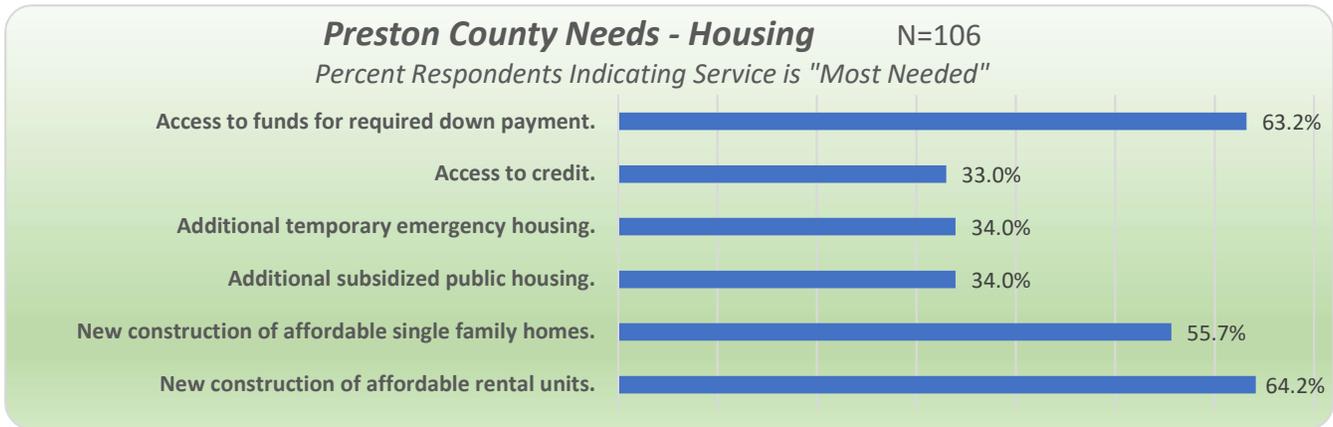

- A lack of high speed Internet in the county, and
- Education about entrepreneurship and home businesses.

*Housing:*

When asked about needs related to housing, a majority people responding to the survey in Preston County focused on the need to improve housing stocks including both single family homes and rental units. Access to funds for a down payment on a home was also recognized as an issue by these informants.

Based on the survey responses, the top priorities in Pocahontas County related to Housing are:

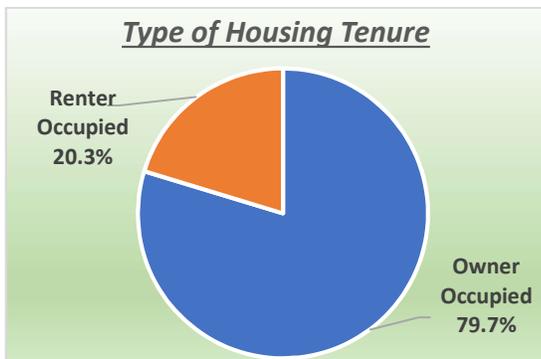

- New construction of affordable single-family home and rental units, and
- Access to funds for required down payment on a home.

The median age of housing units in Preston County is 37 years; and 21.9% of existing homes were built prior to 1940. As of 2015, there were an estimated 107 occupied homes without plumbing in the county (ACS 2011-15).

Secondary data sets reviewed indicate most housing in the county is owner occupied. 79.7% of county residents are home owners while only 20.3% live in rental properties.

20.7% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income. Close to half of all renters (43.2%) are cost burdened based on their gross rent exceeding 30% of the household income. This statistic reinforces the survey findings about the need for affordable rental units.

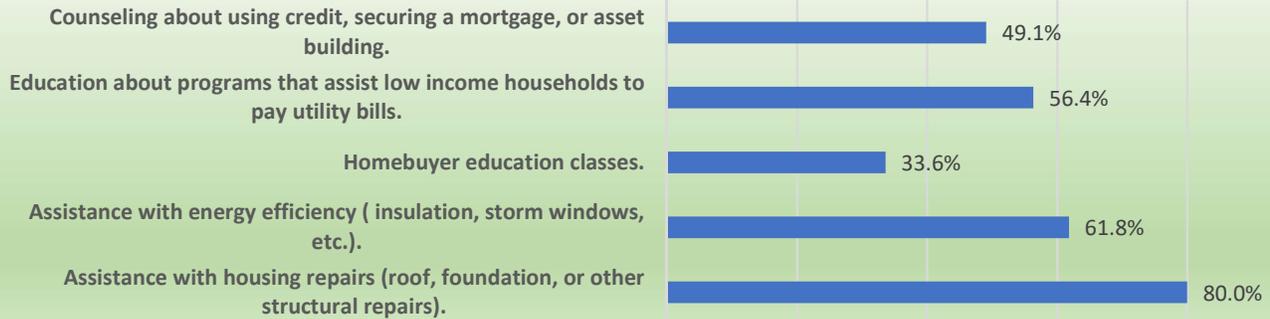

The median value of owner occupied housing in the county is \$107,100 and median monthly owner costs for those with a mortgage is \$949 (ACS 2011-15).

*Homeowner Assistance:*

Most people responding to the survey in Preston County (80.0%) prioritized housing repairs as the most needed service within this domain. Assistance with improving energy efficiency of existing homes and education about programs to assist with utility bills are also seen as priorities by more than half of the survey respondents. Nearly half (49.1%) of the informants see counseling about the use of credit, securing a mortgage, and asset building as something needed in the county as well.

### Preston County Needs - Homeowner Assistance N=110

Percent Respondents Indicating Service is "Most Needed"

The top three priorities in Preston County related to Homeowner Assistance are:

- Housing repairs,
- Improvements to make homes more energy efficient, and
- Education about programs that assist low income homeowners with utility bills.

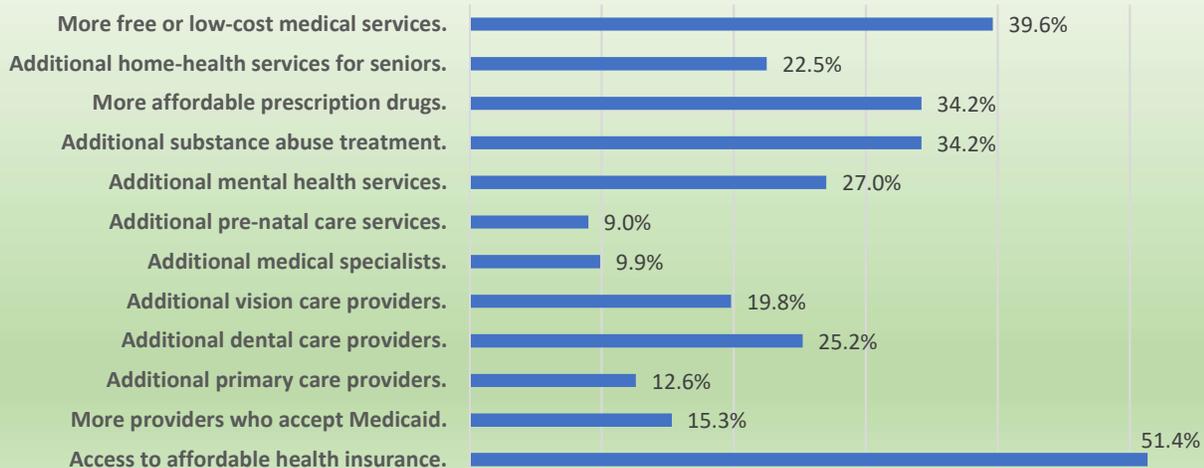

#### Healthcare:

Access to affordable health insurance is the highest priority within the healthcare domain based on the survey responses in Preston County. More than half of all respondents (51.4%) see this as a priority. Free or reduced cost healthcare services, help with the cost of prescription drugs, and substance abuse treatment are also identified as priorities in the healthcare area. The most frequently cited needs in this area are:

- Access to affordable health insurance coverage,
- access to free or reduced cost medical services,
- Affordable prescription drugs, and
- Substance abuse treatment programs.

### Preston County Needs - Healthcare N=111

Percent Respondents Indicating Service is "Most Needed"

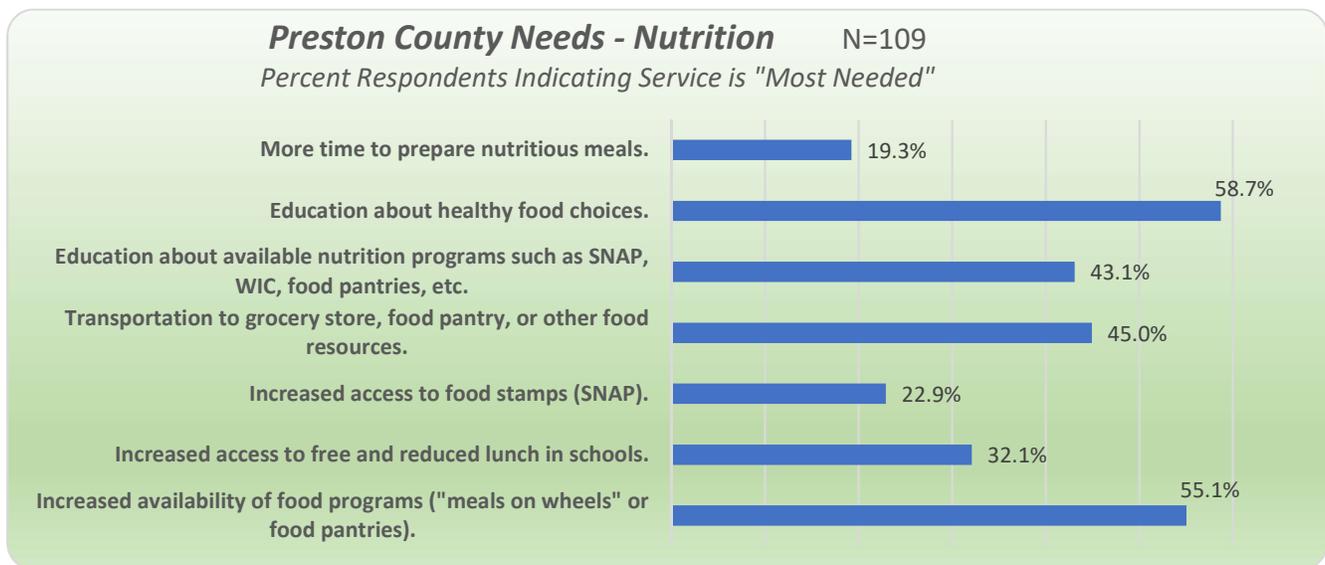

*Nutrition:*

When asked about community needs related to food and nutrition, Preston County survey respondents chose education about healthy food choices and increased availability of supplemental food programs such as food pantries as the highest priorities in the county. 58.7% of the key informants completing the survey chose education about healthy food choices as one of the highest priorities in the county to address the needs of low income residents. 55.8% also indicated additional food programs (food pantries, meals on wheels, or other programs that provide meals to low income people) are a priority.

Survey respondents identified the following priorities related to food and nutrition:

- Education about nutrition and healthy food choices.
- Additional food assistance programs.
- Transportation to grocery stores and/or supplemental food outlets.
- More education about available nutrition programs such as SNAP, WIC, food pantries, etc.

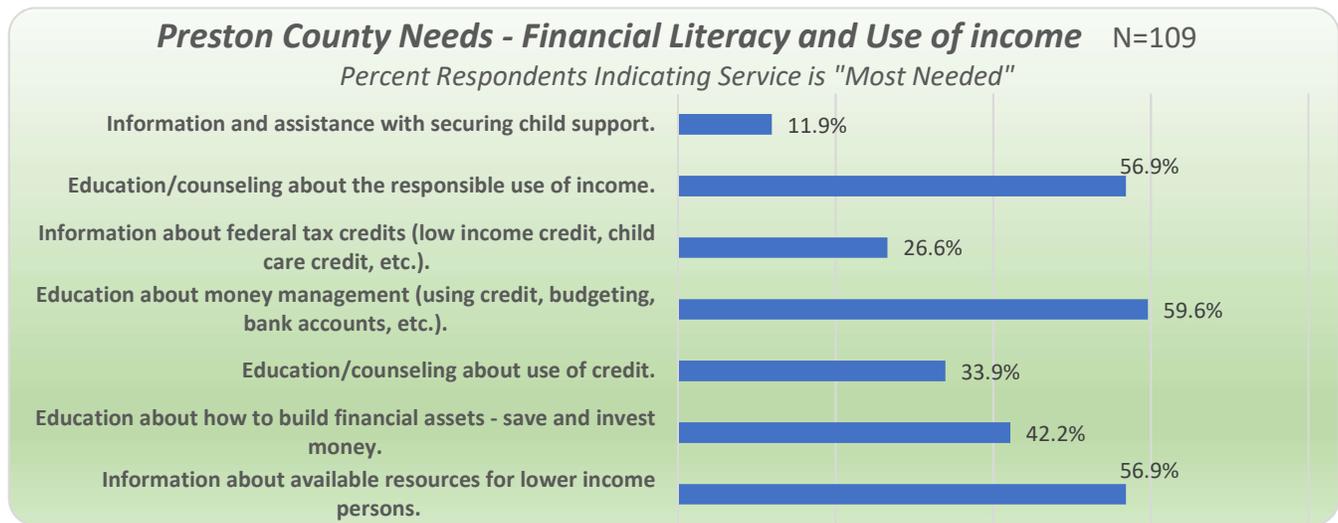

There are 10 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) serving the county (*WV Foodlink 2015*) and 15.7% of households in Preston County receive food stamps to supplement their food budgets. 682 families are enrolled in WIC through the WIC office serving the county. The *WV Foodlink* County Profile for Preston County documents 37 retail locations that accept food stamps and 6 locations accepting WIC (2015).

The secondary data reviewed indicates participation in the school lunch program is low compared to the number of eligible students. 2,748 school-age were eligible for free and reduced cost meals at school in 2015; however, data reflects only about half (52.0%) of the eligible students participated in the program (*WV FoodLink*).

*Financial Literacy:*

Survey responses indicate a need for information and education about money management including responsible use of credit, budgeting, using bank accounts, and responsible use of income.

Information about resources to assist low income people is also seen as a priority in the county.

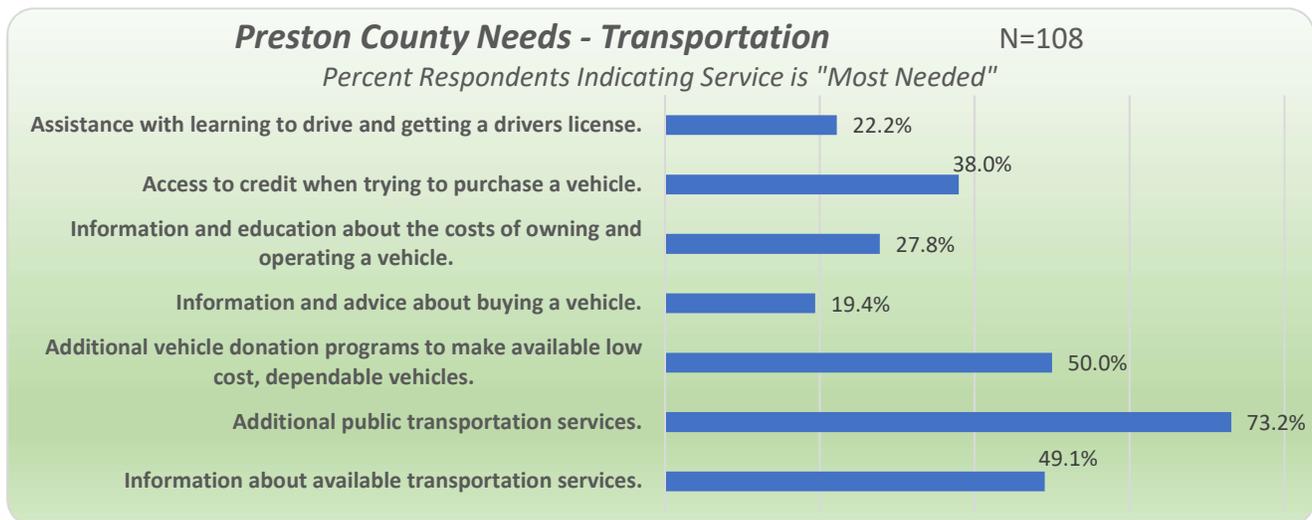

Priorities related to financial literacy include:

- Education about money management,
- Education/counseling about the responsible use of income, and
- Information about available resources for lower income persons.

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 6.2% of Preston County households are “unbanked” (have no checking or savings accounts).

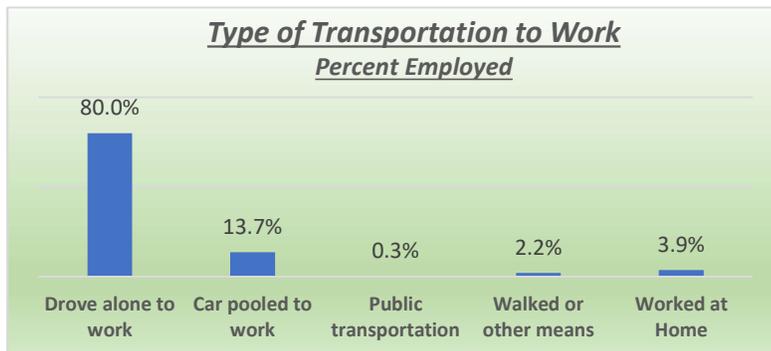

*Transportation:*

73.2% of the key informants identified access to public transportation services as one of the highest priorities for the county. Other priorities identified by half of the survey respondents include access to low cost dependable vehicles and information about transportation services that are available.

The highest priorities identified by the informants completing the survey within the transportation domain include:

- Public transportation services,
- Better information about what types of transportation options may already be available, and
- A vehicle donation programs to make available low cost, dependable vehicles to low income persons.

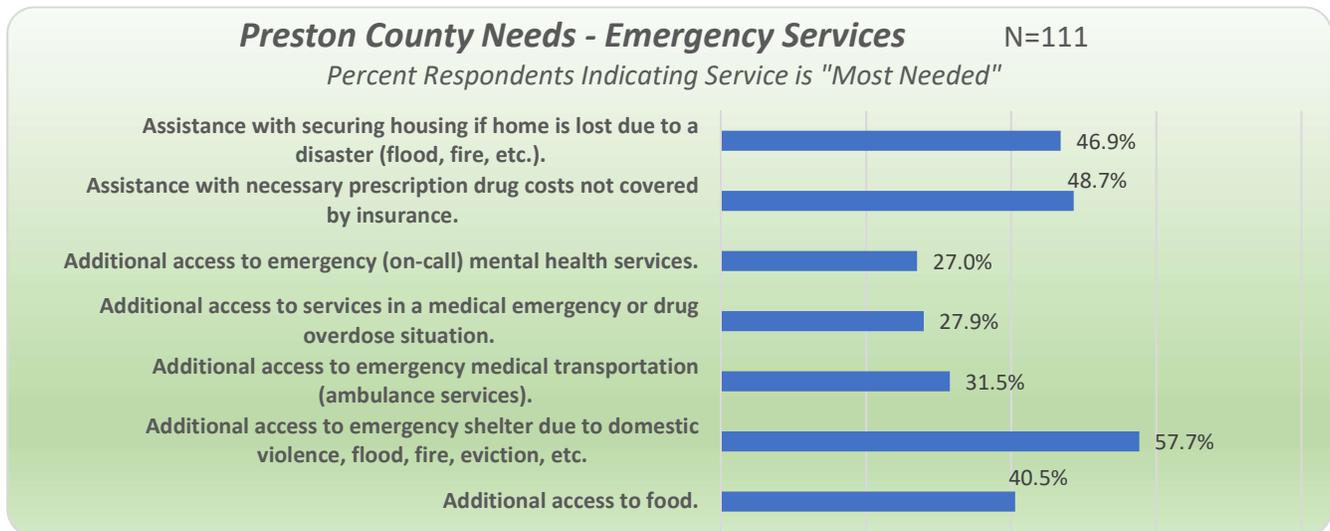

The mean travel time for people in the county to get to their place of work is 30.5 minutes.

Almost all workers in the county rely on private transportation to get from home to their work location. 93.7% of all persons employed either drive alone or car pool to work (ACS 2011-15).

3.9% of persons employed in Preston County work at home.

*Emergency Services:*

Access to emergency shelter, assistance with prescription drug costs, and assistance with obtaining housing if a home is lost in a disaster are the highest priority areas needing attention identified by Preston County survey respondents within the emergency services domain.

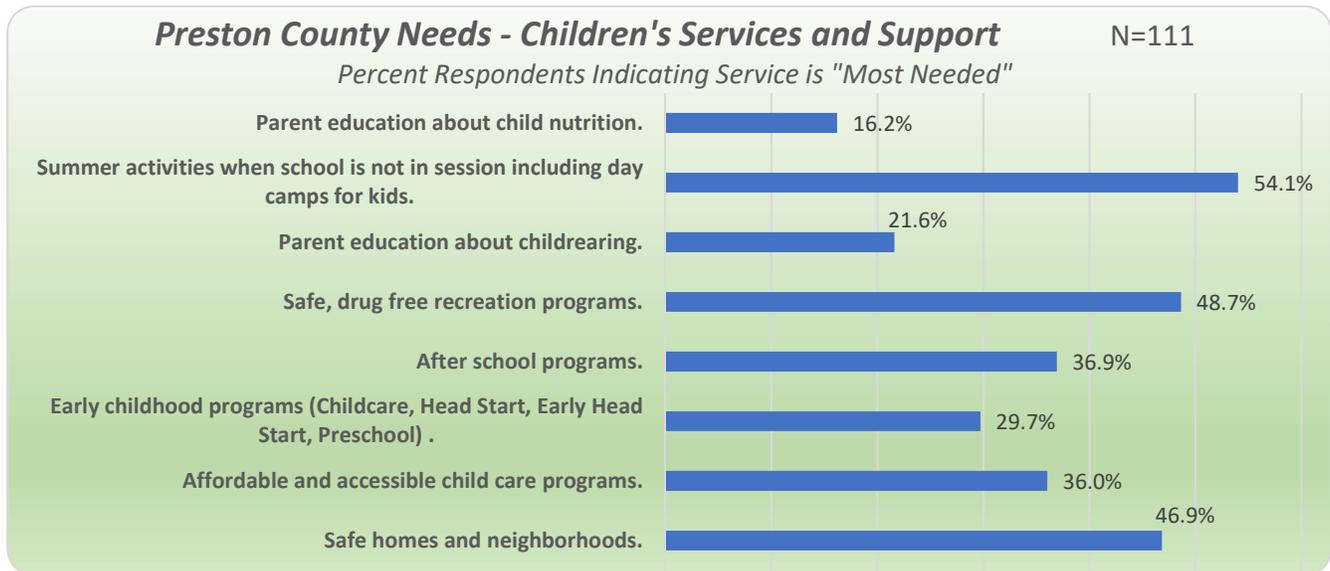

Priority areas of concern related to the emergency services domain include:

- Access to emergency shelter due to domestic violence, flood, fire, eviction or other circumstances.
- Assistance with prescription costs not covered by insurance.
- Assistance with securing housing due to loss of home in a disaster.

Additional access to emergency medical transportation is also identified as a priority by 31.5% of survey respondents.

*Children's Services and Supports:*

Summer activities for kids, safe, drug free recreational opportunities, and attention to safety in homes and neighborhoods are seen as priorities by survey respondents in Preston County.

Close to half of all respondents prioritized these three areas within the domain of programs and services for children. After school programs and affordable and accessible child care programs are also seen by more than one-third of the key informants as priorities for the county.

The major priorities identified through the survey for attention related to services and support for children focused on parent education and include:

- Summer activities when school is not in session including day camps for kids,
- Safe and drug free recreational programs, and
- Safe homes and neighborhoods.

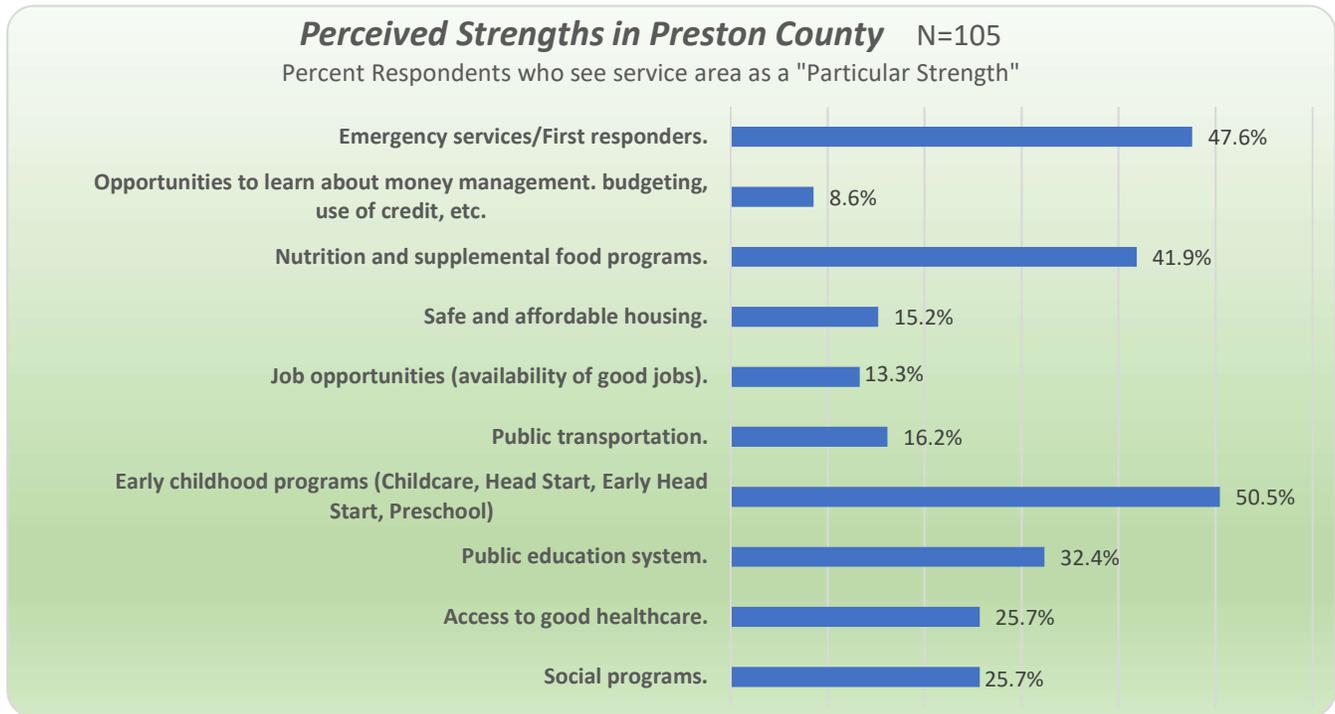

The child abuse/neglect rate in the county was 15.4 per 1,000 children (Kids Count 2015) and there were 90 court filings in the county for abuse/neglect in 2016 which is 13.7 filings per 1,000 children (*Circuit Court case filings data*). There were also 271 domestic violence cases filed in 2016 which is a rate of 31.2 filings per 1,000 family households (*Family Court case filings data*).

*Primary Strengths and Community Resources*

Survey respondents in Preston County were asked what they considered to be the greatest areas of strength within the county service system and they were asked to select all options they consider to be a particular strength.

The only domain describing services and programs identified as particularly strong by at least half (50.5%) of the informants was early childhood programs including child care, head start, early head start, and pre-K programs. In the opinion of the survey participants, first responder emergency services and supplemental food programs are seen as secondary areas of strength within the service system in the county. These areas were seen as a particular strength by nearly half of the informants.

Other domains making up the service system in Preston County were seen by relatively few people responding to the survey as areas of strength.

When asked to talk about the greatest strengths/assets in Preston County, persons participating in the community discussion focused on the beauty of the area (natural resources and scenic areas), people helping people including communities of faith, and a free dental program for kids (the *Have a Smile* program). Discussion participants talked about having good people in the county who are hard-working, prideful and caring. The discussion also included suggestions for how to use some available resources better including:

- Market the area to tourists and take advantage of the scenic beauty,
- Utilize public school facilities when school is not in session – night classes, education about home-based businesses, entrepreneurial training, etc.),
- Assistance with legacy planning to benefit the area

Other resources that address the needs of low income families identified within Preston County include:

- A range of public health services,
- Three Federally Qualified Health Centers,
- Ten institutional Medicare and Medicaid providers,
- Preston Memorial Hospital,
- *Right From the Start* program for Medicaid eligible pregnant women and infants,
- *Parents As Teachers* program,
- Community mental health services,
- Eight banking locations,
- Eleven fire and rescue departments,
- Preston County Family Resource Network,
- Seven licensed child care centers,

- Eighteen family day care providers,
- Starting Points early childhood services,
- Local office of the WV Department of Health and Human Resources,
- WVU Extension Service, and
- Preston County Senior Center.

#### Head Start Needs and Resources

249 children were enrolled in Public Pre-K programs during the 2016-17 school year and the Pre-K participation rate for 4-year-olds in Preston County was at 72% (*WV Dept. of Ed*). These 4-year-olds were served through approved voluntary programs operated by Head Start, public schools, and other early childhood providers.

For fiscal year 2017 (July 1, 2016-June 30, 2017) a total of 81 children received Head Start services in Preston County. 80 of the Head Start children were Caucasian and 1 of the children was Bi-racial. One (1) child was Hispanic.

There were 6 foster children served through Head Start programs in Preston County during the period July 2016 to June 2017 and 7 homeless children. English was the primary language spoken by all Head Start families in Preston County. During calendar year 2017, annual program attendance and enrollment totals in Preston County Head Start programs were at 96.6% of available program slots.

#### Head Start Needs Projections for 2018-19 program year

162 four-year olds and 147 three-year olds are projected to be eligible for Head Start services for PY53 (2018-19). The Preston County Board of Education (PCBOE) will not be taking any Universal Pre-K applications for three-year olds without IEPs this year. There were ten (10) three-year olds with IEPs served in Pre-K classrooms in PY52. Because of the change of age eligibility for preschool from September 1<sup>st</sup> to July 1<sup>st</sup> for the 2018-2019 school year, Preston County will lose twenty-nine (29) Universal Pre-K students. According to the demographic maps, the number of eligible four-year old children in Preston County has dropped by eighteen (18) students between PY52 and PY53.

With the number of four-year old eligible children somewhat decreased for PY53, it can be concluded that the population of eligible children in Preston County can support the continuation of Head Start services in all of the following classrooms for the 2018-2019 school year for PY53: Aurora, Bruceton I, Bruceton II, Bruceton III, Kingwood I, Kingwood II, Kingwood III\*, South Preston I, South Preston II\*, Terra Alta I, West Preston I\* (previously called Valley I that moved into the West Preston Elementary School in January 2017 and renamed West Preston I), West Preston II, and West Preston III. The West Preston classrooms were previously known as Valley I, II, and III. The Bruceton III BOE operated classroom was added during PY52 due to the increase in numbers of preschool children in the Bruceton community while the Terra Alta II BOE operated classroom was closed because of the drop-in numbers in the Terra Alta area.

#### EHS Needs Projections for 2018-19

According to the most current demographic maps, there are two hundred ninety-five (295) prenatal to one-year olds projected eligible in PY53 compared to two hundred and seventy-one (271) in PY52 and one hundred fifty-eight (158) eligible two-year olds in PY53 and one hundred and sixty-two (162) two-year

olds in PY52 in Preston County. Therefore, it can be concluded that the population of eligible children in Preston County could support Early Head Start services in the county. However, during PY51 the EHS program was removed from the county because a qualified Family Educator could not be hired and/or retained over the past several years. The Preston County Board of Education has not expressed an interest to partner to offer an EHS center-based option at the high school that could serve expectant students. The program will continue to evaluate how and if EHS services could be returned to the county.

#### Services Provided by NCWVCAA

The characteristics of clients served, and the types of services provided in Preston County by NCWVCAA provides insight into eligible people and their needs. During the most recent calendar year completed (2017), data was collected for a total of 1,261 persons who received services from the agency in Preston County. 565 of the persons served were male and 696 were female. 96.3% of all persons receiving services were White, 1.6% were Multi-racial, 1.2% were African American, and 0.9% were other races. Those persons of Hispanic ethnicity made up 1.4% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 24 to 44 yrs. age group.

80.2% of all families served have annual income below the federal poverty level. None of those persons served for whom data was captured lacked health insurance and 9.6% are disabled.

The most numerous types of outcomes achieved through services provided in Preston County include:

- Emergency food assistance was provided.
- Emergency fuel or utility payments were funded by LIEAP or other sources.
- Assistance with tax preparation was provided.
- Emergency rent or mortgage assistance was provided.

# *Randolph County*

## *Community Needs and Resources*

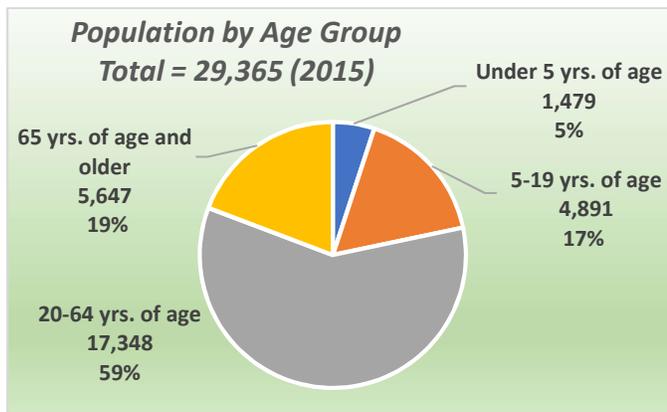

## RANDOLPH COUNTY

### History & Geography

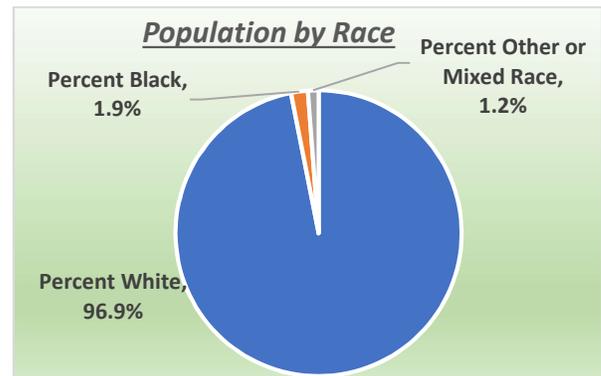

Randolph County, the state's largest county, was created by an act of the Virginia General Assembly in October 1786 from Harrison County. Randolph County is a mountainous rural county that has a land area of 1,046 square miles. U.S. Routes 33, 219, 250 and WV 92 and 32 serve Randolph County as main arteries into the county. Sections of Corridor H have been completed and the eventual connection of Interstate 79 and Interstate 81 in Virginia could be a great stimulus to business growth in the county. None of the rivers in the county are navigable. Elkins is the largest city in the county and is home Davis and Elkins College and the regional office of the U. S. Forest Service.

### Demographic Characteristics

The total population of Randolph County is 29,365 persons (ACS, 2015). 5% of the population is under five years of age and 19% is over the age of 65 yrs.

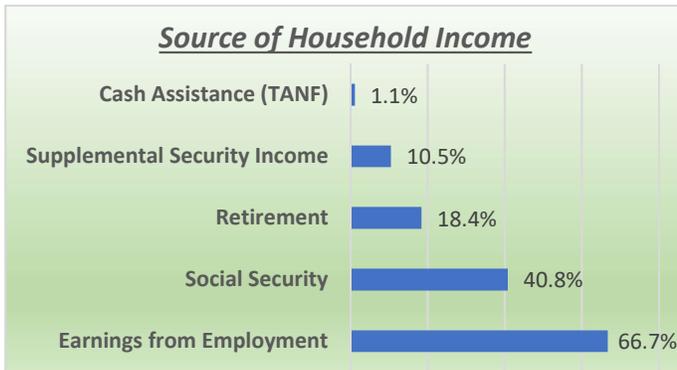

96.9% of the population is White and 4.0% is Black. The remaining 1.8% of Randolph County residents are other or mixed race. There are 11,563 households and 7,738 family households in the county. 2,849 or 24.6% of the total family households have children under 18 yrs. of age.

### Socio-Economic Characteristics

13.0% of Randolph County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate more than doubles to 30.4%. Nearly three-quarters (71.8%) of all single, female-headed families with all children under 5 yrs. of age have annual income below the poverty level (ACS 2011-15).

Median household income in Randolph County is \$40,308 which is below the state average of \$42,644 (ACS 2012-16). 66.7% of the households in the county have income from employment, 40.8% have social security income, 18.4% have retirement income, and only 1.1% receive cash assistance through the TANF program.

15.7% of households in the county receive food stamps to supplement their income (*ACS 2015*). 15.3% of the households in the county have zero net worth.

A substantial number of Randolph County households have little or no liquid assets. The “Liquid Asset Poverty Rate” defined as a lack of sufficient liquid assets to subsist at poverty level for three months in absence of income, is at 37.9% in the county (2014 Survey of Income and

Program Participation, US Census Bureau).

### Causes of Poverty

Primary causes of poverty in the county appear to include:

- Lack of education beyond high school,
- Low paying jobs, and
- Health status of the population including addiction.

The community discussion held in the county identified several factors contributing to poverty in the county including:

- Loss of emergency assistance,
- Homelessness,
- Lack of training opportunities targeted at available jobs in the area.

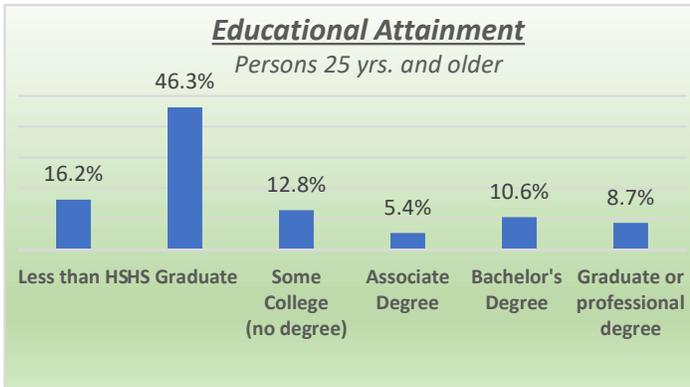

When asked to define poverty and the factors that keep people in poverty, community discussion participants identified:

- Jobs that don’t pay enough to make ends meet,
- Physical illness, substance abuse and addiction,
- Stigma and fear of being judged, and  
Generational and situational poverty.

Persons participating in the local discussion also expressed concern about the working poor who may have enough income to be above the poverty level but still struggle with basic needs.

An indicator of generational poverty in the county is births to mothers with less than a high school education. Kids Count data indicates one in five (19.8%) of the births to Randolph County were to women with less than a high school education (*Kids Count 2015*).

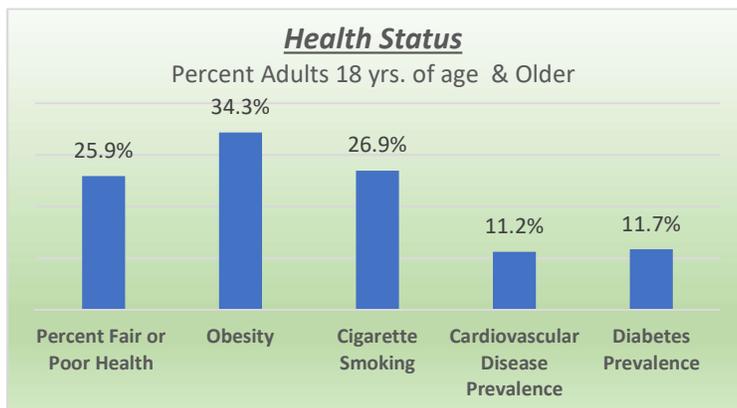

The unemployment rate in the county declined slightly (0.1%) between August of 2016 and August of 2017 to 5.4% in As of August 2017, the unemployment rate in Randolph County was at the state average.

(WVEIS 2016).

Nearly half of the young people finishing high school in recent years entered a college or university. The 2016 college going rate in the county is most recently at 48.3% of graduating high school seniors (WV Higher Education Policy Commission). 11<sup>th</sup> grade reading proficiency is at 49.1% and mathematics proficiency is 20.7% (WVEIS 2016-17).

The overall health status of the population and access to healthcare, mental health services, and substance abuse treatment are also contributing factors to poverty in Randolph County. There were 14 overdose deaths in Randolph County over the period 2013-15; an overdose mortality rate of 16 per 100,000 population during the period (County Health Rankings, Robert Wood Johnson Foundation).

The community discussion identified a need for a drug-free workforce and increased options for substance abuse treatment in order to reach the discussion participants “ideal vision” for the future of the county. Obesity rates are at 34.3% among the adult population and 26.9% of the adult population smoke (BRFS 2014). More than one-fourth of the adult population (25.9%) have fair or poor overall health. In addition, 12.7% of the population is without any type of health insurance (ACS 2015).

The infant mortality rate in Randolph County is 9.6 deaths per 1,000 live births and 10.1% of babies born to county residents are low birth weight (less than 2500 grams). The teen birth rate is at 57.5 births per 1,000 females (Kids Count 2015).

### Community Needs

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

### Overall Needs and Priorities

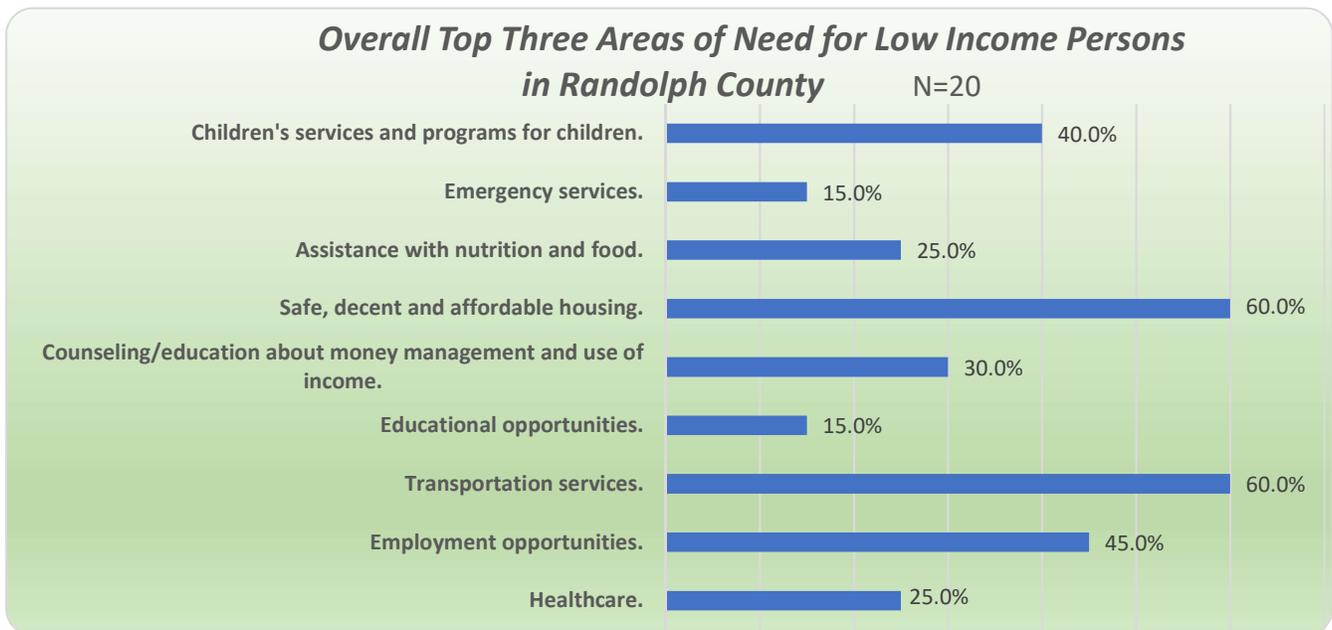

In addition to the implications derived from secondary data sets about needs of low income people in

Randolph County, a total of 20 key informants completed the community survey. Survey results are presented here; however, the low number of survey participants in the county should be considered in drawing conclusions from the opinions expressed.

Randolph County survey respondents were asked:

” *What do you think are the top three areas of need of low income people in Randolph County?*”

Safe, decent and affordable housing and improved transportation services were the most frequently selected areas of need. 60.0% of the key informants prioritized these two domains. Expanded employment opportunities was a priority for 45.0% of the key informants and improved services and programs for children was a priority for 40%.

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

*Employment and Jobs:*

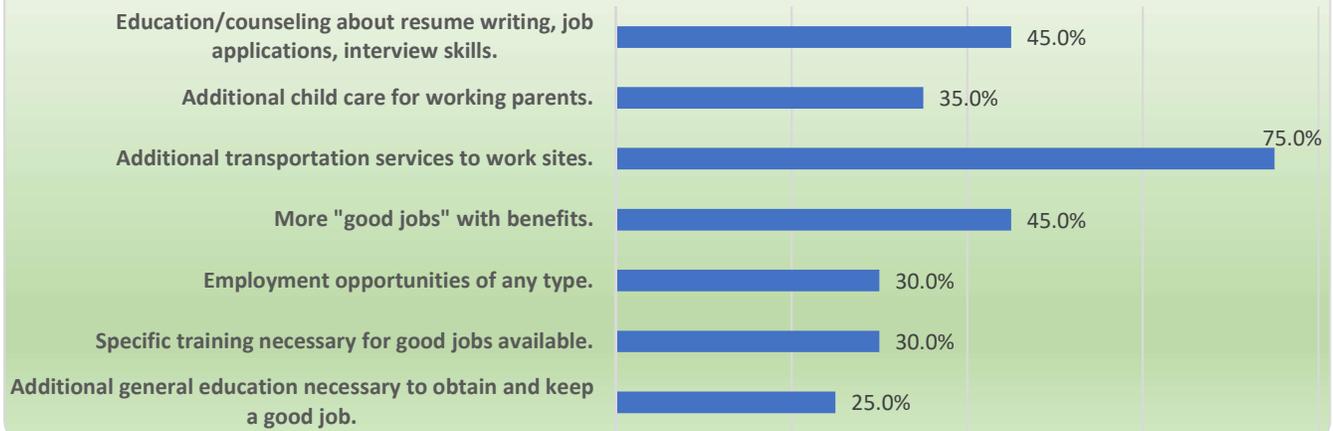

Randolph County survey respondents indicated additional transportation to work locations was the highest priority need related to employment and jobs. 75.0% of the respondents prioritized transportation services to work sites.

Based on the survey responses, the top three priorities in Randolph County related to Employment and Jobs are:

1. Additional transportation services to job sites,
2. More good jobs with benefits, and
3. Education and counseling about preparing a resume, completing job applications, and interviewing for a job.

### Randolph County Needs - Employment and Jobs N=20

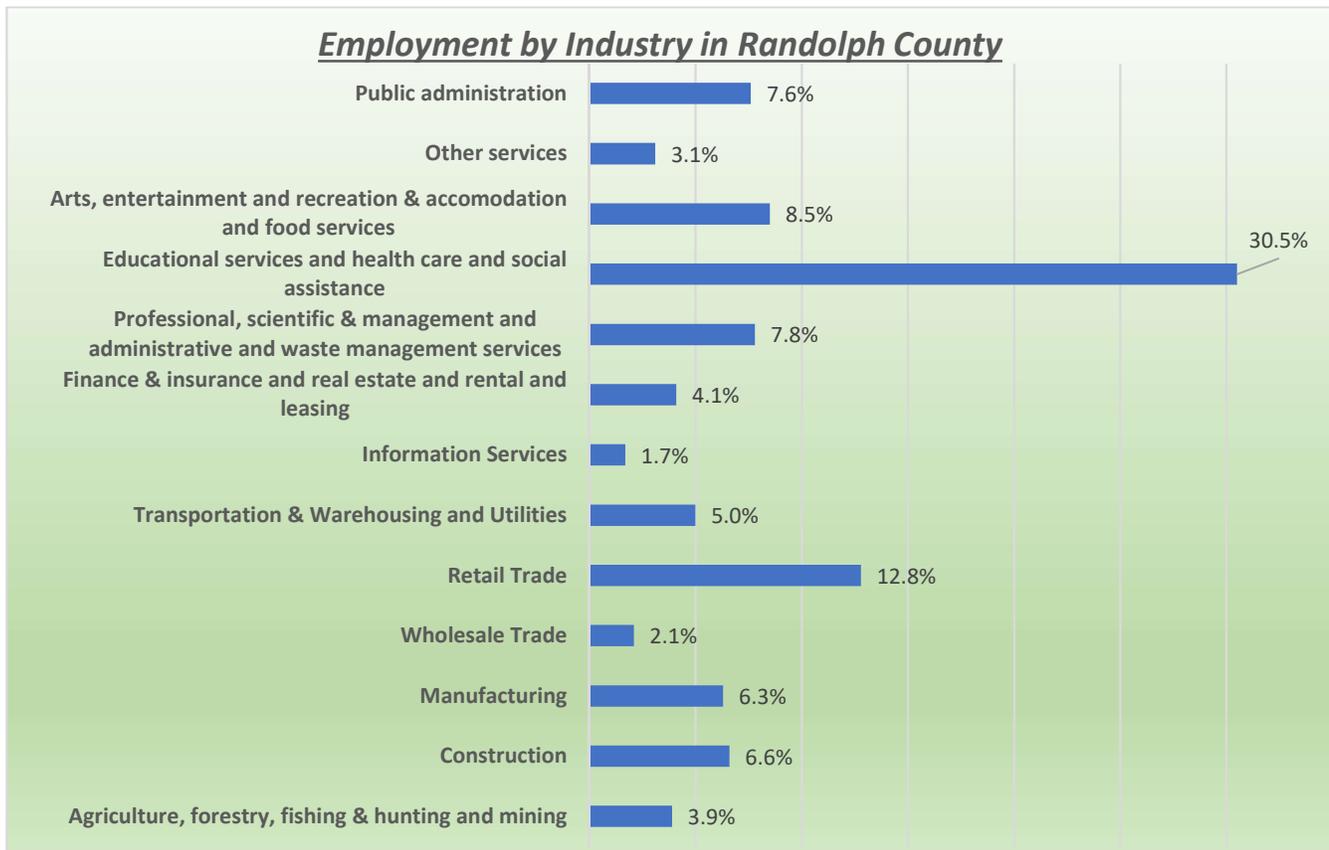

Percent Respondents Indicating Service is "Most Needed"

Community discussion participants also talked about a need for reliable transportation as well as additional vocational training. The discussion also included views that there needs to be more flexibility within the education system.

Like nearly all more rural counties of the state, the highest percentage of persons employed in Randolph County work in the educational, healthcare, and social service sectors. This industry accounts for 30.5%

### Employment by Industry in Randolph County

of employment in the county which a higher portion than in most counties of the state.

Other jobs in the county are distributed across many other industries with the most significant being retail trade (12.8%); and the arts, entertainment, recreation, accommodations, and food sectors (8.5%). Manufacturing accounts for 6.3% of employment and is primarily found at a hardwood flooring plant located south of Elkins (BLS 2015).

The largest current employers in Randolph County (in order of number of people employed) are:

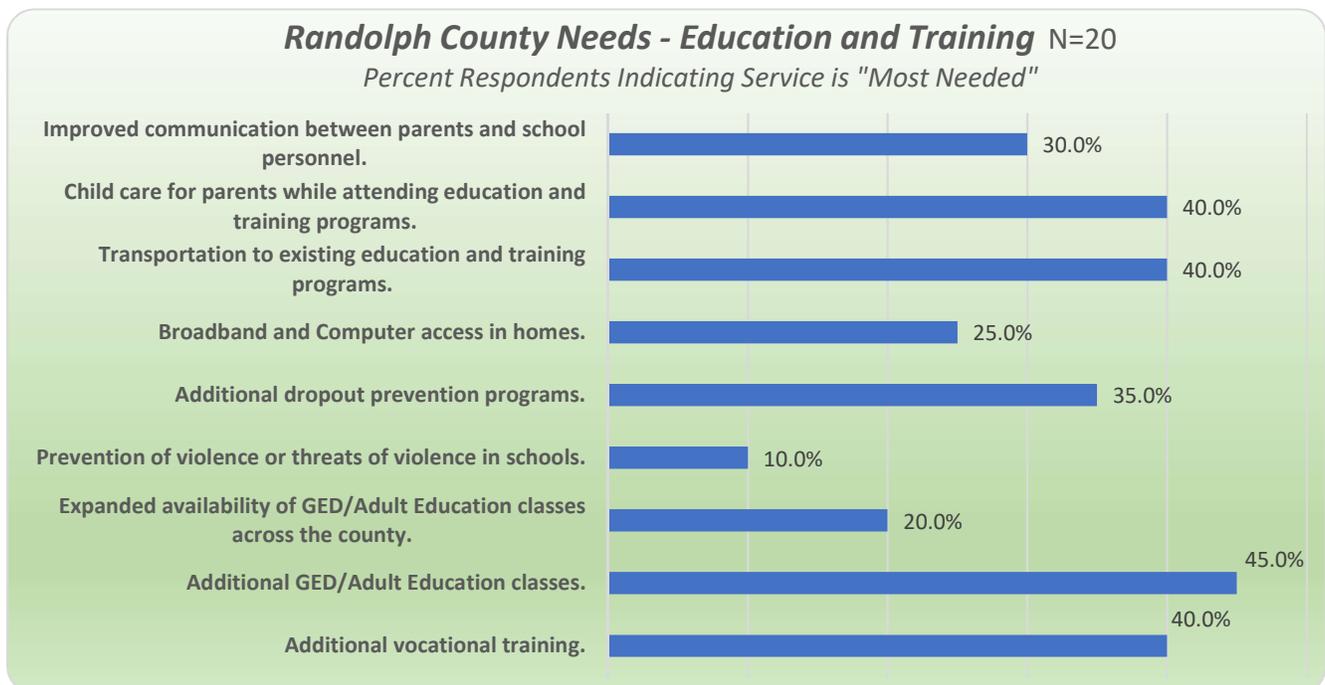

- Davis Memorial Hospital,
- Randolph County Board of Education,
- Armstrong Hardwood Flooring, and
- Wal-Mart.

*Education and Training:*

People responding to the survey in Randolph County are concerned about a number of issues related to education and training and there is no clear consensus on top priorities within this domain. Expanded GED/Adult Education classes was prioritized by the largest percentage of the survey respondents (45.0%); however, additional vocational training programs, child care for parents while attending education and training programs, and transportation to these programs were all seen as priorities by 40% of the key informants in the county.

Based on the survey responses, the top three priorities in Randolph County related to Education and Training are:

- Additional GED/Adult Education classes,
- Vocational training,
- Child care during hours training programs are offered, and
- Transportation to existing education and training programs.

Discussion participants in Randolph County also talked about a need for vocational training in the county including expansion of the *Youth Build* program that provides training in home construction. A need for better access to training programs focused on the local job market was also referenced in the community discussion.

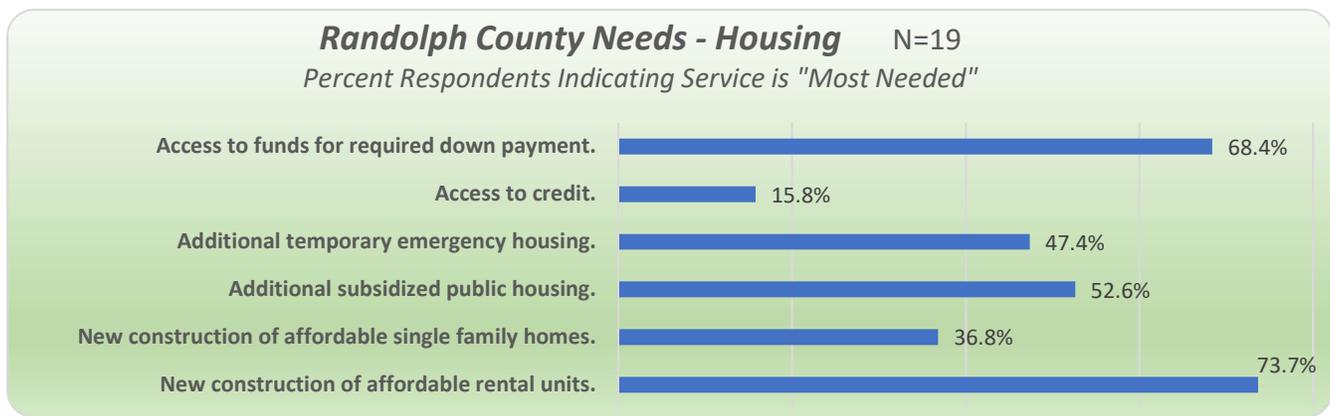

*Housing:*

When asked about needs related to housing, survey respondents in Randolph County focused on the need for construction of new affordable rental units (73.7% of respondents) and access to funds for a down payment on a home (68.4%).

Based on the survey responses, the top priorities in Randolph County related to Housing are:

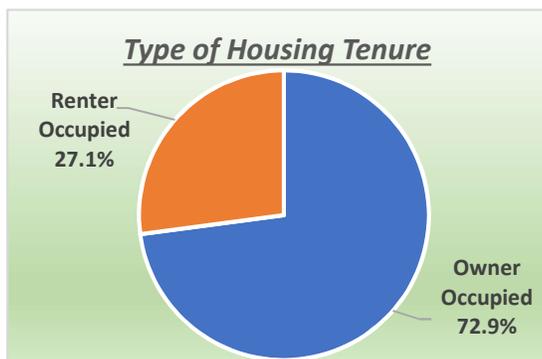

- New construction of affordable rental units, and
- Access to funds for required down payment on a home.

Secondary priorities related to housing include additional subsidized public housing and additional emergency housing.

The median age of housing units in Randolph County is 40 years; and 16.0% of existing homes were built prior to 1940. As of 2015, there were an estimated 162 occupied homes without plumbing in the county (ACS 2011-15).

Data sets reviewed indicate 72.9% of housing in the county is owner occupied, and 27.1% of county residents live in rental properties.

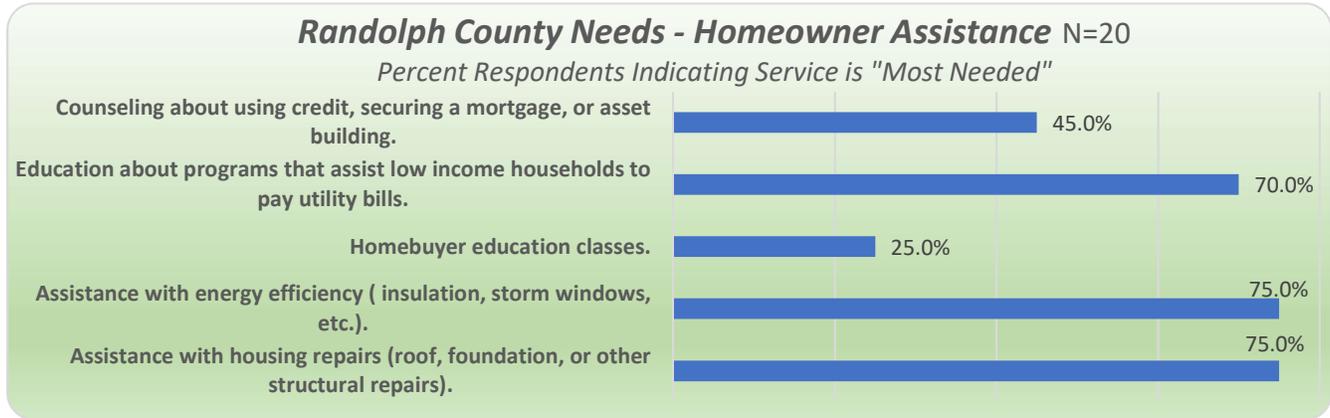

24.6% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income. Close to half of all renters (47.7%) are cost burdened based on their gross rent exceeding 30% of the household income. The relatively high percentage of renters who are cost burdened supports survey findings about the need for additional affordable rental units in the county.

The median value of owner occupied housing in the county is \$101,200 and median monthly owner costs for those with a mortgage is \$851 (ACS 2011-15).

*Homeowner Assistance:*

People responding to the survey in Randolph County identified three priorities related to homeowner assistance. 75.0% of the respondents indicated programs to provide housing repairs and assistance with improving energy efficiency of existing homes was needed in the county. 70.0% of the respondents indicated education about assistance with utility bills was a priority. Nearly half (45.0%) of the informants see counseling about the use of credit, securing a mortgage, and asset building as a service that is also needed in the county.

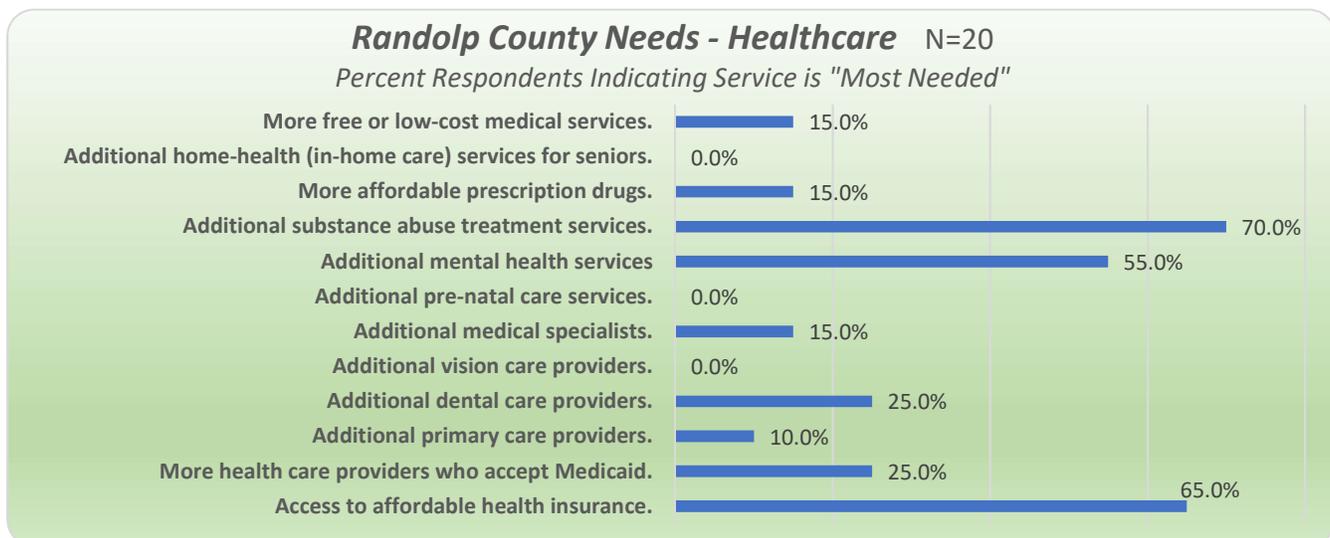

The top three priorities in Randolph County related to Homeowner Assistance are:

- Housing repairs,
- Improvements to make homes more energy efficient, and
- Education about programs that assist low income homeowners with utility bills.

*Healthcare:*

Substance abuse treatment programs and access to affordable health insurance are the highest priorities identified by Randolph County survey respondents within the healthcare domain. 70% of those persons completing the survey prioritized substance abuse treatment and 65% said access to affordable health insurance was a high priority for low-income county residents. Additional mental health services were also seen by more than half (55.0%) of the key informants in Randolph County as a high priority.

The most frequently cited needs within the healthcare domain are:

- Substance abuse treatment programs,
- Access to affordable health insurance coverage, and
- Additional mental health services.

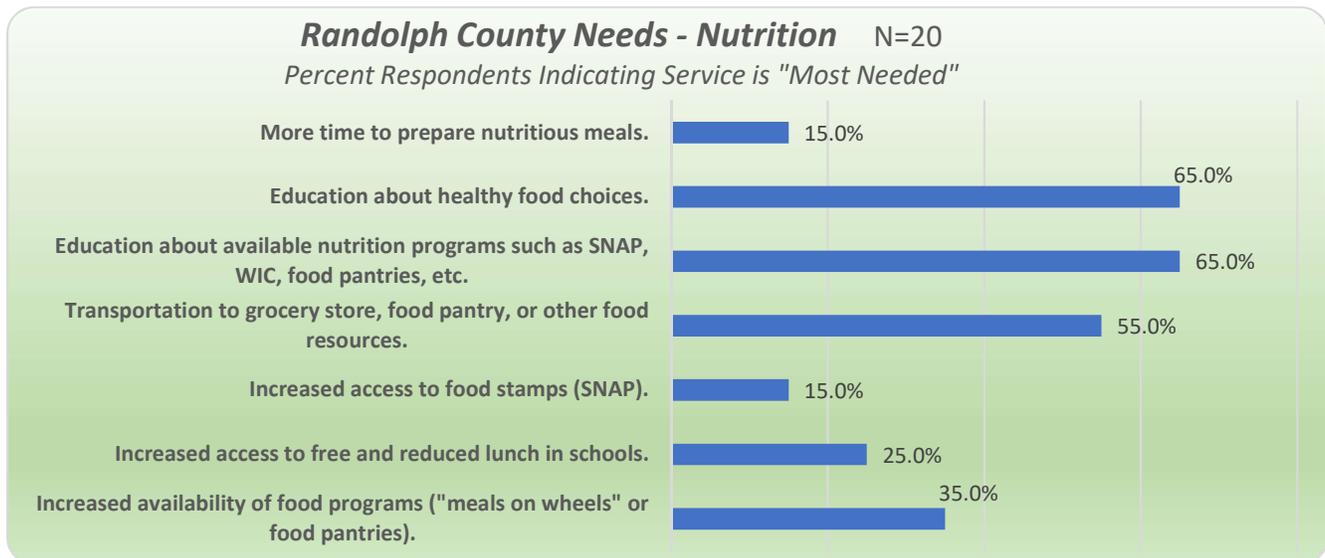

Community discussion participants also brought up the need for substance abuse, addiction, and mental health services as areas that need to be addressed to assist people in getting out of poverty.

*Nutrition:*

When asked about community needs related to food and nutrition, Randolph County survey respondents chose education about healthy food choices and education about available nutrition and food programs as the highest priorities. 65.0% of the key informants completing the survey chose these two areas as one of their top priority needs related to food and nutrition. More than half (55.0%) also indicated transportation to grocery stores and/or food pantries or other supplemental food outlets was a priority in the county.

Survey respondents identified three clear priorities related to food and nutrition:

- Education about nutrition and healthy food choices,
- Education about nutrition programs such as SNAP, WIC, food pantries, and other types of assistance to help low income families put food on the table, and
- Transportation to grocery stores food pantries, or other food resources.

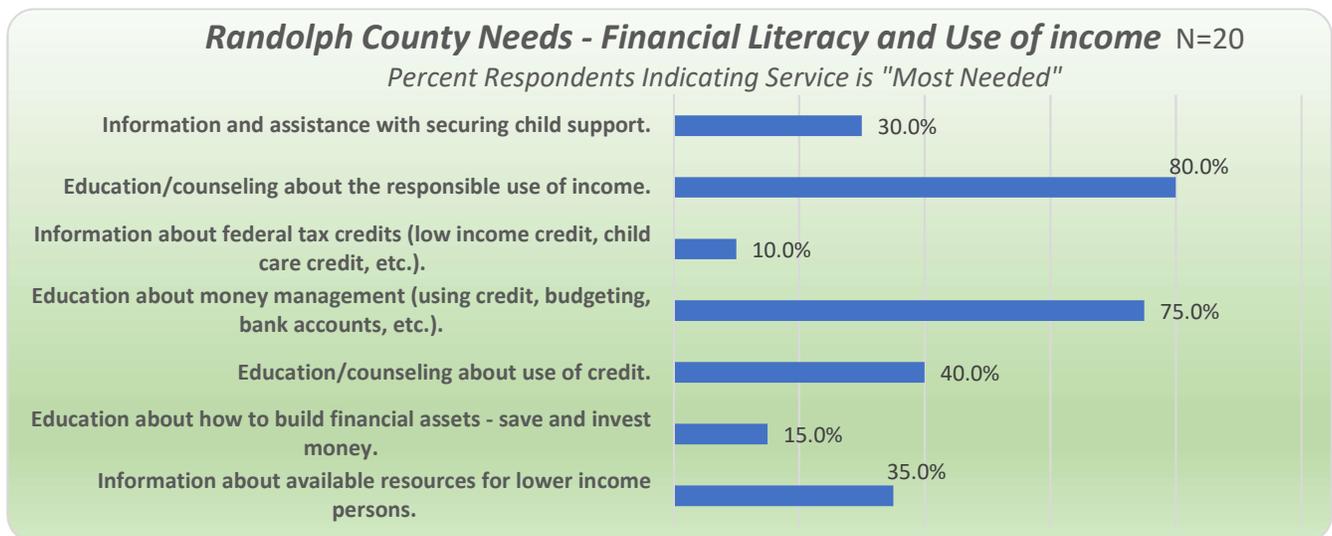

There are 10 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) serving the county (*WV Foodlink 2015*) and 15.2% of households in Randolph County receive food stamps to supplement their food budgets. The average number of families receiving WIC during 2013 was 801. The *WV Foodlink County Profile for Randolph County* documents 41 retail locations that accept food stamps and 5 locations accepting WIC (2015).

The secondary data reviewed indicates 2,592 school-age were eligible for free and reduced cost meals at school in 2015; however, only 75.0% of the eligible children and youth participate in the program (*WV FoodLink*).

*Financial Literacy:*

Two priority areas of need were identified through the survey related to financial literacy and use of income. 80% of the informants responding to the survey think education and counseling about using income responsibly is needed, and 75.0% prioritized education about money management to include information about the responsible use of credit, budgeting, using bank accounts, and other financial literacy issues.

Priorities related to financial literacy and use of income include:

- Education about money management, and
- Education/counseling about the responsible use of income.

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 7.5% of Randolph County households are “unbanked” (have no checking or savings accounts).

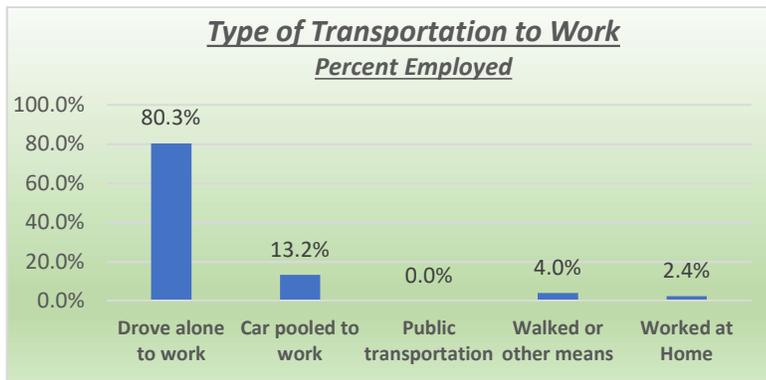

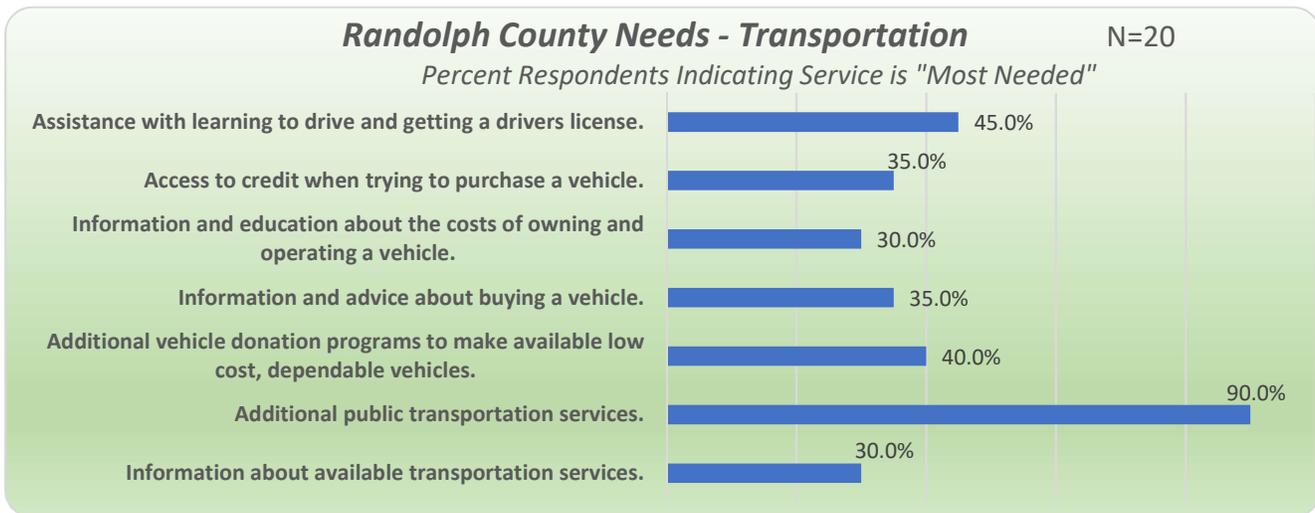

*Transportation:*

Development of public transportation services in Randolph County was the clear priority identified by survey respondents. Opinion about this area was nearly unanimous with 90.0% of the key informants recognizing public transportation as a priority need in the county. Opinions about other priorities related to transportation were less clear based on the survey responses. 45% indicated assistance with learning to drive and getting a driver’s license was a priority and 40% said a vehicle donation program to make dependable vehicles available at low cost was important.

The highest priorities identified by the informants completing the survey within the transportation domain include:

- Public transportation services.
- Assistance in learning to drive and obtaining a driver’s license, and

- A program to restore and make available donated vehicles to low income residents.

The mean travel time to work in Randolph County is 21.0 minutes, and almost all workers in the county rely on private transportation to get from home to their work location. 93.5% of all persons employed either drive alone or car pool to work (ACS 2011-15).

4.0% of persons employed in Randolph County walk to work and 2.4% work at home.

Community discussion participants identified the limited transportation options as a barrier to achieving a more positive vision for the future of Randolph County.

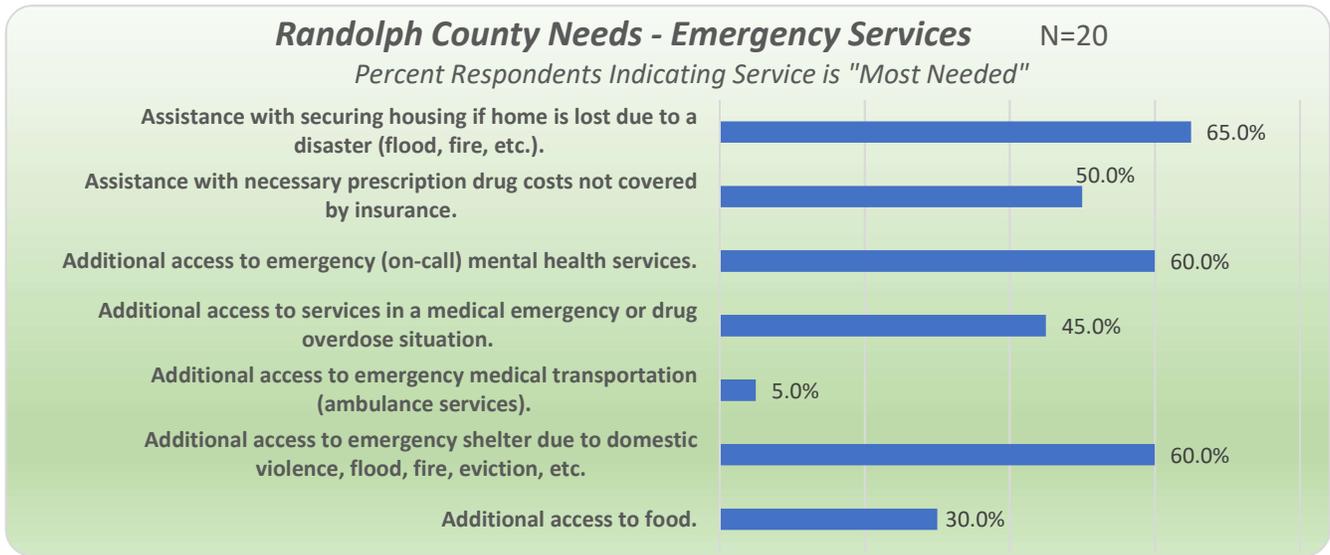

*Emergency Services:*

Several priorities were identified through the survey within the emergency services domain. Assistance with securing housing if a home is lost due to a disaster was selected as a priority by the greatest number of key informants (65.0%). Other services selected as a priority area of need include emergency “on call” mental health services, emergency in cases of domestic violence, eviction, or a natural disaster, and assistance with prescription drug costs.

Based on the survey responses, the highest priority areas needing attention in Randolph County are:

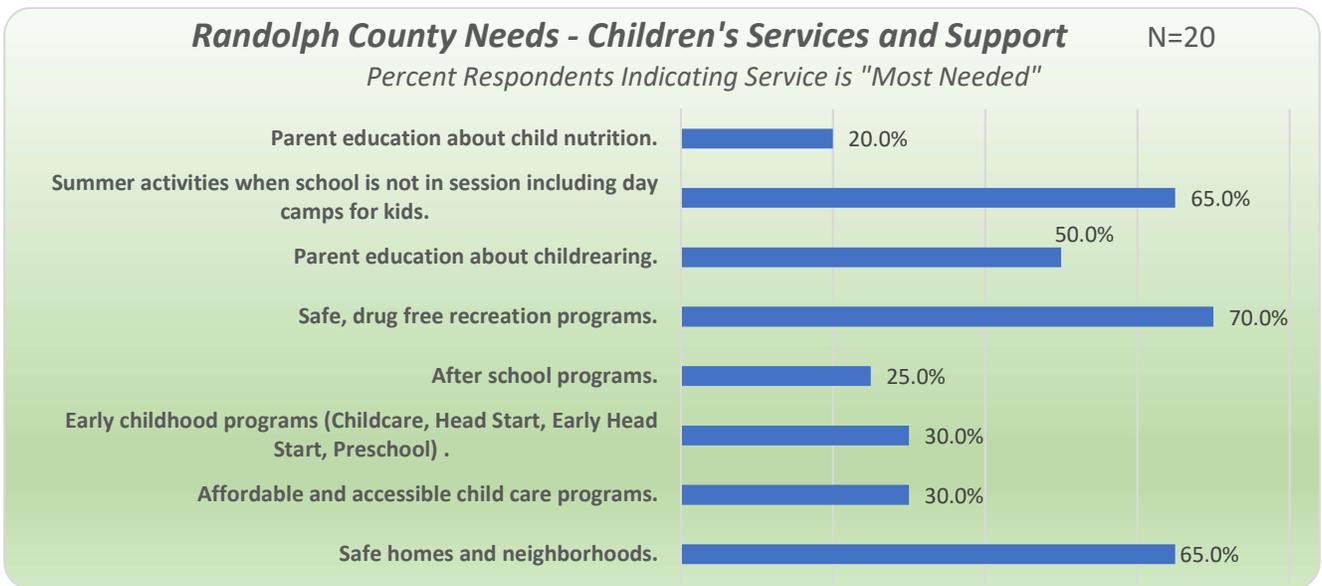

- Assistance with securing housing due to loss of home in a disaster,
- On call mental health services,
- Access to emergency shelter due to domestic violence, flood, fire, eviction or other circumstances, and

- Assistance with prescription costs not covered by insurance.

*Children's Services and Supports:*

Safe, drug free recreational opportunities, summer activities for kids, and attention to safety in homes and neighborhoods are seen as priorities by survey respondents in Randolph County. 65% to 70% of all respondents prioritized these three areas within the domain of programs and services for children. Increasing parent education about child rearing was seen as a priority by half of the informants.

The major priorities identified in the area of services and support for children include:

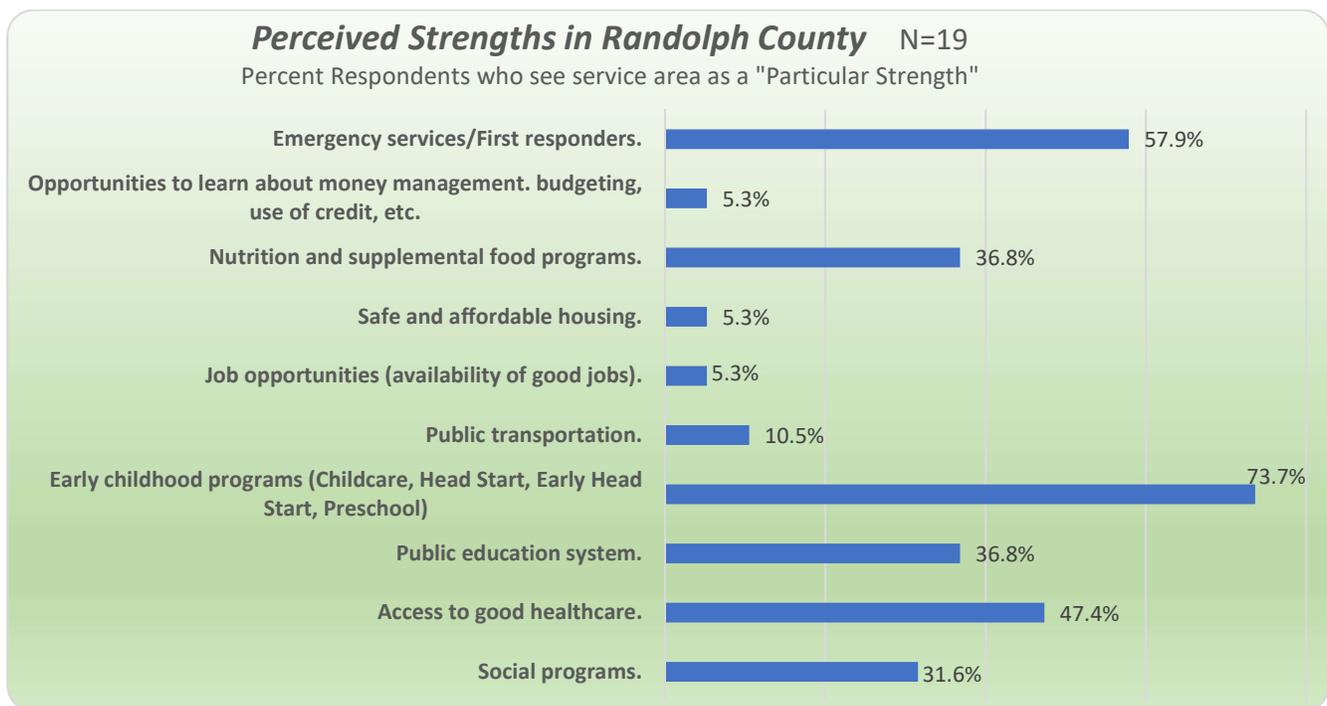

- Safe and drug free recreational programs,
- Safe homes and neighborhoods, and
- Summer activities when school is not in session including day camps for kids.

The child abuse/neglect rate in the county was 23.6 per 1,000 children (Kids Count 2015) and there were 111 court filings in the county for abuse/neglect in 2016 which is 19.6 filings per 1,000 children (*Circuit Court case filings data*). There were also 251 domestic violence cases filed in 2016 which is a rate of 32.4 filings per 1,000 family households (*Family Court case filings data*).

### Primary Strengths and Community Resources

Survey respondents in Randolph County were asked what they considered to be the greatest areas of strength within the county service system and they were asked to select all options they consider to be a “particular strength”.

Based on the opinion of the key informants, early childhood services are seen as the strongest component of the overall services system. 73.7% indicated they thought early childhood programs including child care, head start, early head start, and pre-K programs was a “particular strength” within the county. In the opinion of 57.9% of the survey participants, first responder emergency services are also seen as an area of strength within the county service system.

Most other domains making up the service system in Randolph County are not viewed by as many respondents as areas of strength; however, healthcare services are seen as an area of strength by nearly half of those completing the survey.

When asked to talk about the greatest strengths/assets in Randolph County, persons participating in the community discussion identified natural resources and tourism, good community organizations, Davis and Elkins College, and shops and restaurants in downtown Elkins as areas of strength. Discussion participants also talked about having valuing diversity, caring people in the community, and local churches.

Other resources that address the needs of low income families identified within Randolph County include:

- A range of public health services,
- Davis Memorial Hospital,
- Appalachian Community Mental Health Center,
- Fourteen Federally Qualified Health Center locations,
- Twenty institutional Medicare and Medicaid providers,
- Three nursing care facilities,
- *Youth Health Services, Inc*
- AA and NA support groups,
- Country Roads Transit providing public transportation services with two scheduled routes in the city of Elkins.
- Randolph County Senior Center,
- Transportation services operated by the Senior Center,

- Local office of the WV Department of Health and Human Resources,
- Catholic Charities,
- Helping Hand Clearing House,
- Tyrand Cooperative Ministries,
- WVU Extension Service, and

#### Head Start/Early Head Start Needs and Resources

228 children were enrolled in Public Pre-K programs during the 2016-17 school year and the Pre-K participation rate for 4-year-olds in Randolph County was at 77% (*WV Dept. of Ed*). These 4-year-olds were served through approved voluntary programs operated by Head Start, public schools, and other early childhood providers.

For fiscal year 2017 (July 1, 2016-June 30, 2017) a total of 129 children received Head Start services and 18 (2 prenatally) received Early Head Start services in Randolph County. 123 of the Head Start children were Caucasian, 3 were African American, and 3 were Bi-racial. Two (2) children were Hispanic. The racial breakdown for Early Head Start services in Randolph County reflects 19 Caucasian children and 1 Bi-racial. No Hispanic children were served through the Early Head Start program in Randolph County.

There were 12 foster children served through Head Start programs in Randolph County during the period July 2016 to June 2017 and 7 homeless children were served. 2 of the Early Head Start children were homeless and 3 EHS children were in foster care. English was the primary language spoken in the home of all Head Start and Early Head Start enrollees. During calendar year 2017, annual program attendance and enrollment totals in Randolph County Head Start programs were at 103.4% of available program slots, and EHS enrollment was at 100%.

#### *Head Start Needs Projections for 2018-19 program year*

Randolph County currently has one hundred and sixty-eight (168) four-year olds and one hundred and sixty-three (163) three-year olds eligible for Head Start. Based on these numbers, it can be assumed that the population of eligible children will likely support the continuation of Head Start services in Randolph County for PY53.

The composition of Pre-K sites changed for Randolph County in PY52. Due to structural damage at Homestead Elementary, the HS operated Homestead Pre-K classroom was moved temporarily to Beverly and named Homestead/Beverly. In December 2017, the Randolph County Board of Education (RCBOE) voted to close Homestead. The Homestead/Beverly classroom will remain at Beverly and will be renamed Beverly II for PY53.

For PY53, NCWVCAA and the RCBOE will offer Universal Pre-K services at the Head Start-operated classrooms consisting of Beverly II\* (previously Homestead/Beverly), Midland I\*, and Third Ward II\* and the RCBOE-operated classrooms consisting of Beverly I, Coalton, George Ward I, George Ward II, Harman, Jennings Randolph, Midland II, North, and Third Ward II.

Beginning with the 2018-2019 school year, the West Virginia Legislature approved a change in the eligibility age for Pre-K. Students must be 4 years old before July 1<sup>st</sup> of the year they are applying for Pre-K services vs. the previous September 1<sup>st</sup> cut-off date. In Randolph County, twenty-eight (28) students/families will be affected by this legislative change.

#### *EHS Needs Projections for 2018-19*

Randolph County currently has one hundred and ninety (190) eligible prenatal to one-year olds projected to be eligible for Early Head Start in PY53 and one hundred and thirty-five (135) eligible two-year olds within the service area for Early Head Start. A total of three hundred and twenty-five (325) potential eligible families are indicated by the demographic assessment for PY53 as compared to two hundred and thirty-three (233) families from PY52. These numbers support the continuation and possible expansion of the Early Head Start services in Randolph County for PY53.

Previous discussions with the Randolph County Board of Education regarding the need for a Center-based program at Elkins High School to serve primarily expectant students concluded that the demographic need did not support this option.

#### *Services Provided by NCWVCAA*

The characteristics of clients served, and the types of services provided in Randolph County by NCWVCAA provides insight into eligible people and their needs. During the most recent calendar year completed (2017), data was collected for a total of 2,084 persons who received services from the agency in Randolph County. 945 of the persons served were male and 1,139 were female. 96.1% of all persons receiving services were White, 1.9% were African American, 1.2% were Multi-racial, and 0.8% were other races. Those persons of Hispanic ethnicity made up 2.7% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 24 to 44 yrs. age group.

72.7% of all families where income data was collected have annual income below the federal poverty level. 1.2% of those persons served for whom data was captured lacked health insurance and 6.3% are disabled.

The most numerous types of outcomes achieved through services provided in Randolph County include:

- Infants and children obtained age appropriate immunizations.
- Infant and child health and physical development was maintained or improved.
- Children participated in preschool activities to develop school readiness skills.
- Assistance with tax preparation was provided.
- Emergency food assistance was provided.
- Emergency temporary shelter was provided.
- Emergency fuel or utility payments were funded by LIEAP or other sources.

# *Taylor County*

## *Community Needs and Resources*

## TAYLOR COUNTY

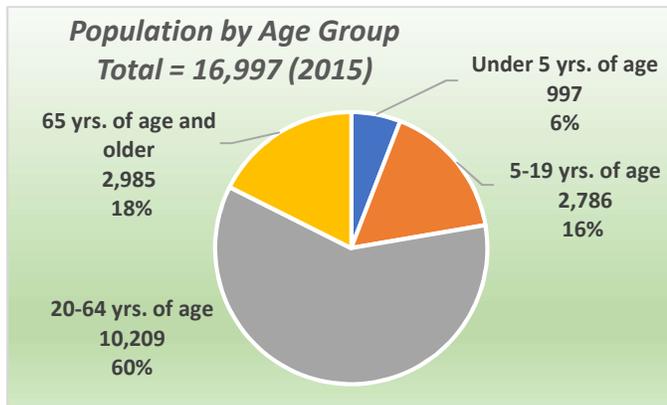

### History & Geography

Taylor County consists of 173 square miles and is located in north central West Virginia. The county was formed in 1844 and was named for Senator John Taylor of Caroline. The county seat is Grafton. Pruntytown is the oldest community in present-day Taylor County. It was settled during the mid-1770s and was initially called Cross Roads because it was located at the intersection of the Washington Post Road and the Fairmont-Booths Ferry Pike (Genealogy Trails History Group, 2011).

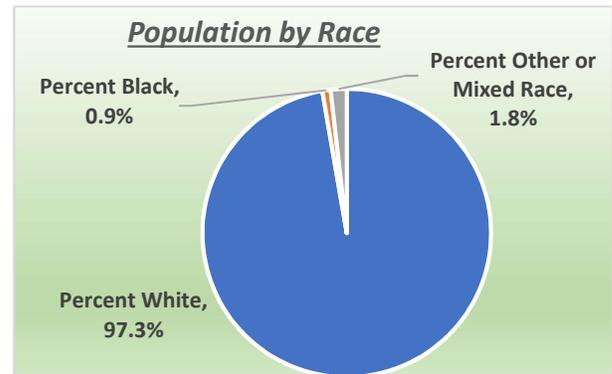

The eastern portion of the county is quite mountainous, and the lower areas are prone to flooding despite the Tygart Dam, the largest cement flood control dam east of the Mississippi River. U.S. Routes 250, 119, and 50 and W.V. Routes 310 and 76 serve Taylor County as the main arteries into Taylor County.

### Demographic Characteristics

The total population of Taylor County is 16,997 persons (ACS, 2015). 6% of the population is under five years of age and 18% is over the age of 65 yrs.

97.3% of the population is White and 0.9% is Black. The remaining 1.8% of Taylor County residents are other or mixed race.

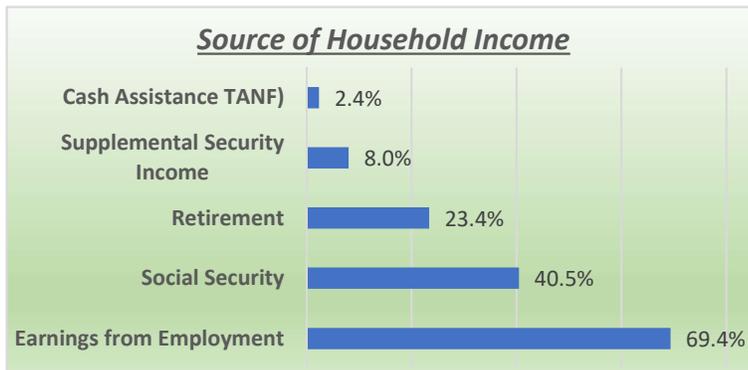

There are 6,732 households and 4,609 family households in the county. 1,876 or 27.9% of the total family households have children under 18 yrs. of age.

### Socio-Economic Characteristics

13.8% of Taylor County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate is much higher at 29.0%. 42.2% of all single, female-headed families with all children under 5 yrs. of age have annual income below the poverty level (ACS 2011-15).

Median household income in Taylor County is \$44,371 which is above the state average of \$42,644 (ACS 2012-16). 69.4% of the households in the county have income from employment, 40.5% have social security income, 23.4% have retirement income, and only 2.4% receive cash assistance through the TANF

program. 16.8% of households in the county receive food stamps to supplement their income (ACS 2015).

14.0% of the households in the county have zero net worth, and a substantial number of Taylor County households have little or no liquid assets. The “Liquid Asset Poverty Rate” defined as a lack of sufficient liquid assets to subsist at poverty level for three months in absence of income, is at 35.3% in the county (2014 Survey of Income and Program Participation, US Census Bureau).

### Causes of Poverty

Primary causes of poverty in the county appear to include:

- (1) Lack of education beyond high school,
- (2) Substance abuse, and
- (3) Overall health status of the population including addiction.

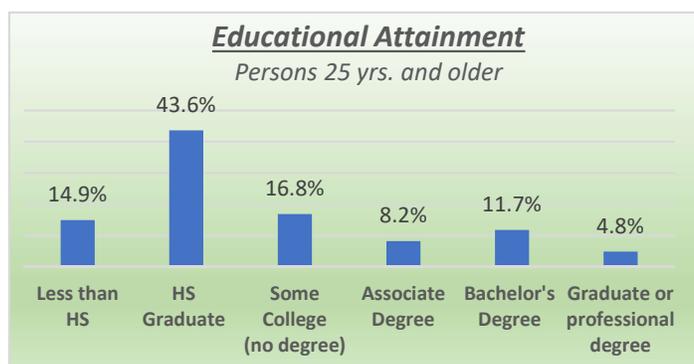

The community discussion held in the county identified several factors contributing to poverty in the county including:

- Lack of employment opportunities,
- Lack of affordable housing, and
- Substance abuse.

When asked to define poverty and the factors that keep people in poverty, community discussion participants identified:

- Programs to assist those in poverty do not provide for gradual transition from poverty to self-sufficiency,
- A lack of training and education, and
- Physical illness, substance abuse and addiction.

An indicator of generational poverty in the county is births to mothers with less than a high school education. Kids Count data indicates 13.7% of the births to Taylor County were to women with less than a high school education (Kids Count 2015).

The unemployment rate in the county declined by 0.7% between August of 2016 and August of 2017. The 4.7% unemployment rate in August 2017 was below the state average of 5.4%.

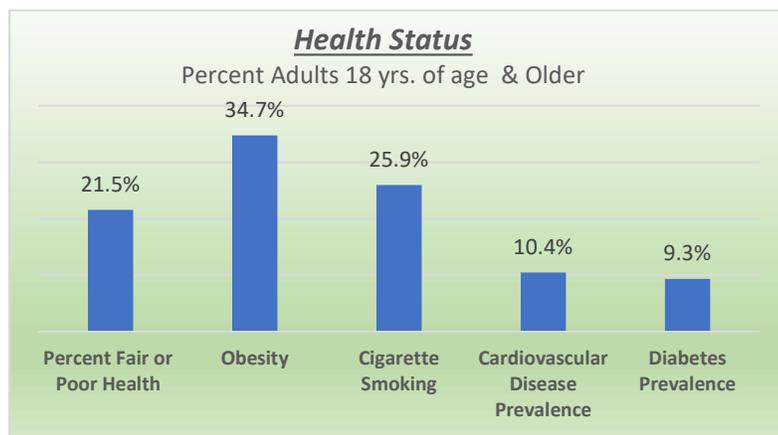

A notable percentage of Taylor County residents 25 yrs. of age and older have no education beyond high school. 16.5% of those 25 yrs. of age and older hold a college degree; however, a

high percentage of county residents (43.6%) have only a high school education and 14.9% have less than

a high school education (*ACS 2015*). Educational attainment in the county is improving. The recent public-school dropout rate in Taylor County is at 7.0% (*Kids Count 2015*), and the 4-year cohort graduation rate is at 86.1% (*WVEIS 2016*).

Many more young people finishing high school are seeking higher education than was the case in the past. The 2016 college going rate in the county is most recently at 45.7% of graduating high school seniors (*WV Higher Education Policy Commission*). 11<sup>th</sup> grade reading proficiency is at 46.2% and mathematics proficiency is 25.0% (*WVEIS 2016-17*).

The overall health status of the population and access to healthcare, mental health services, and substance abuse treatment are also contributing factors to poverty in Taylor County. During 2015 and 2016, there were an average of 1.5 opioid-related overdose deaths in Taylor County; an overdose mortality rate of 0.86 per 10,000 population during the period (*WV health Statistics Center*). The community discussion participants recognize addiction as a problem in the county and identified a need for a substance abuse treatment to assist people toward self-sufficiency.

Obesity rates are at 34.7% among the adult population and 25.9% of the adult population smoke (*BRFS 2014*). 21.5% of the adult population have fair or poor overall health.

In addition, 10.7% of the total population in Taylor County is without any type of health insurance (*ACS 2015*).

The infant mortality rate in Taylor County is 9.0 deaths per 1,000 live births and 7.2%

of babies born to county residents are low birth weight (less than 2500 grams). The teen birth rate is at 29 births per 1,000 females (*Kids Count 2015*).

### Community Needs

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

#### Overall Needs and Priorities

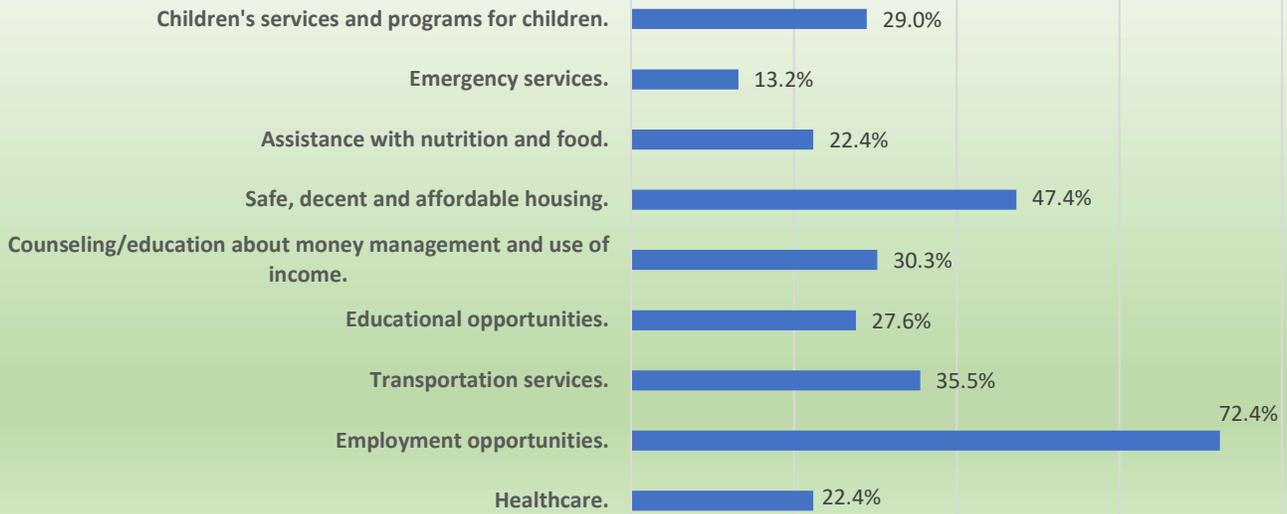

Taylor County survey respondents were asked:

” *What do you think are the top three areas of need of low income people in Taylor County?*”

Employment opportunities and safe, decent and affordable housing were the most frequently selected areas of need. 72.4% of all key informants prioritized employment and jobs as one the top three areas of need in the county, and housing was a high priority for 47.4% of the key informants. Transportation was identified as an area of concern by 35.5% of the key informants. Other domains within the overall service system were seen as a high priority by less than one-third of the total survey respondents.

### Overall Top Three Areas of Need for Low Income Persons in Taylor County

N=76

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

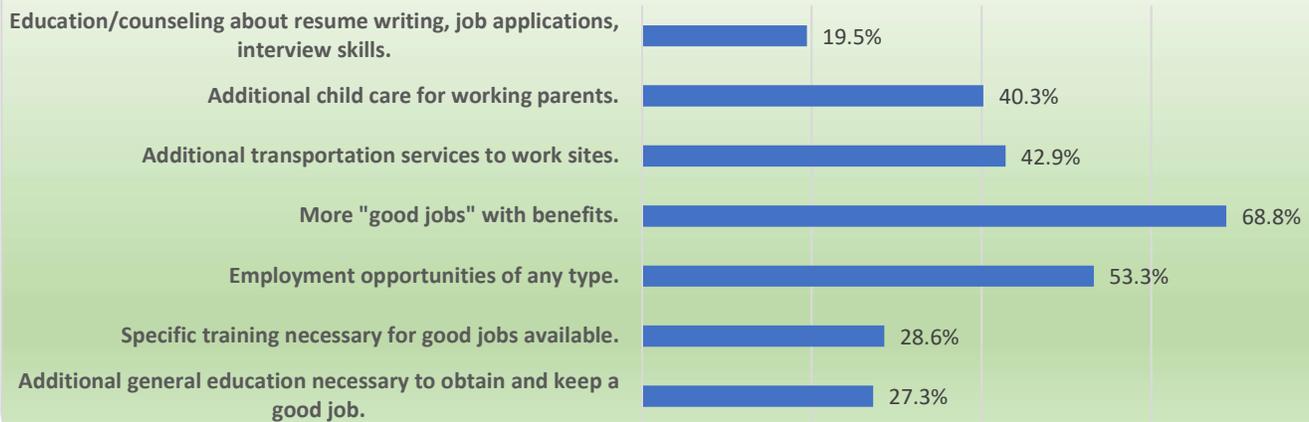

#### Employment and Jobs:

Taylor County survey respondents indicated additional employment options in the county was the greatest need. 68.8% prioritized more good jobs with benefits, and 53.3% indicated employment opportunities of any type were needed. Transportation to work locations and child care for working parents are priority areas of concern for about 2 in 5 of the key informants.

### Taylor County Needs - Employment and Jobs

N=77

Percent Respondents Indicating Service is "Most Needed"

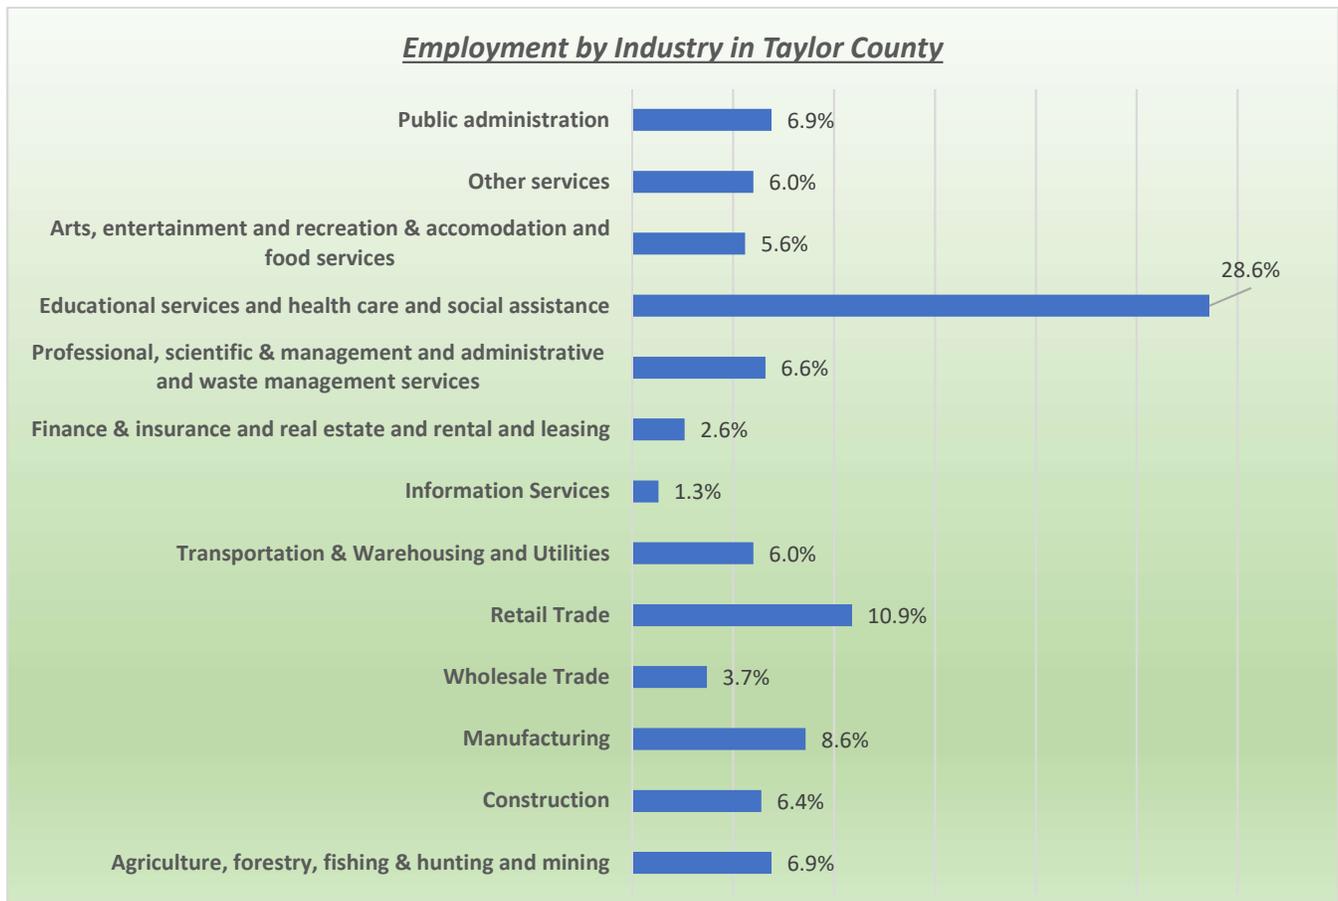

Based on the survey responses, the top three priorities in Taylor County related to Employment and Jobs are:

- More good jobs with benefits,

- Employment opportunities of any type, and
- Additional transportation services to job sites.

When asked about their vision for the future of Taylor County, community discussion participants talked about the need for job development and also accessible and affordable transportation services in the county. Discussion participants also mentioned the difficulty people with a criminal record have in seeking any type of gainful employment.

The highest percentage of persons employed in Taylor County work in the educational, healthcare, and social service sectors. This industry accounts for 28.6% of employment in the county.

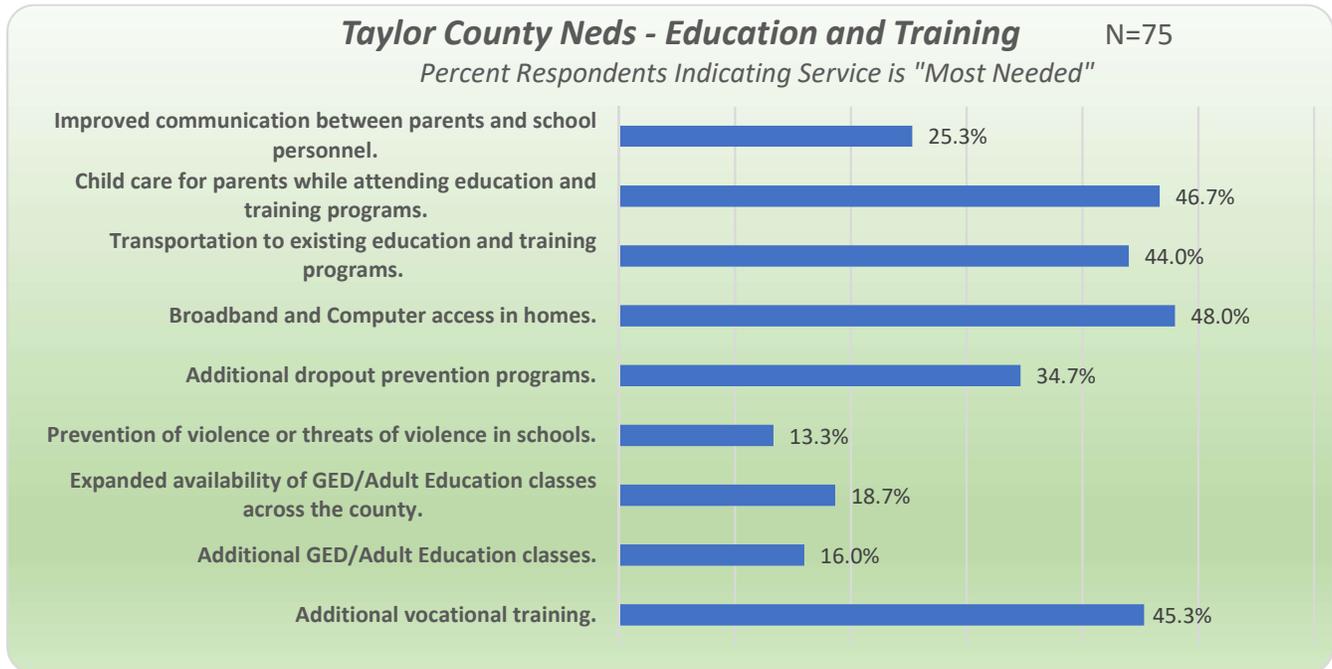

Employment in other industries is distributed across other sectors with the most significant being retail trade (10.9%), manufacturing (8.6%), and mining (*BLS 2015*).

The largest current employers in Taylor County (in order of number of people employed) are:

- Arch Coal,
- Taylor County Board of Education,
- Grafton City Hospital, and
- Wal-Mart.

*Education and Training:*

People responding to the survey in Taylor County appear to be most concerned about four issues related to education and training and there is no clear consensus on top priorities within this domain. Expanded Broadband development, additional vocational training programs, child care for parents while attending education and training programs, and transportation to these programs were all seen as priorities by 44% to 48% of the key informants in the county.

Based on the survey responses, the top priorities in Taylor County related to Education and Training are:

- Broadband and Computer access in homes,
- Vocational training,
- Child care during hours training programs are offered, and
- Transportation to existing education and training programs.

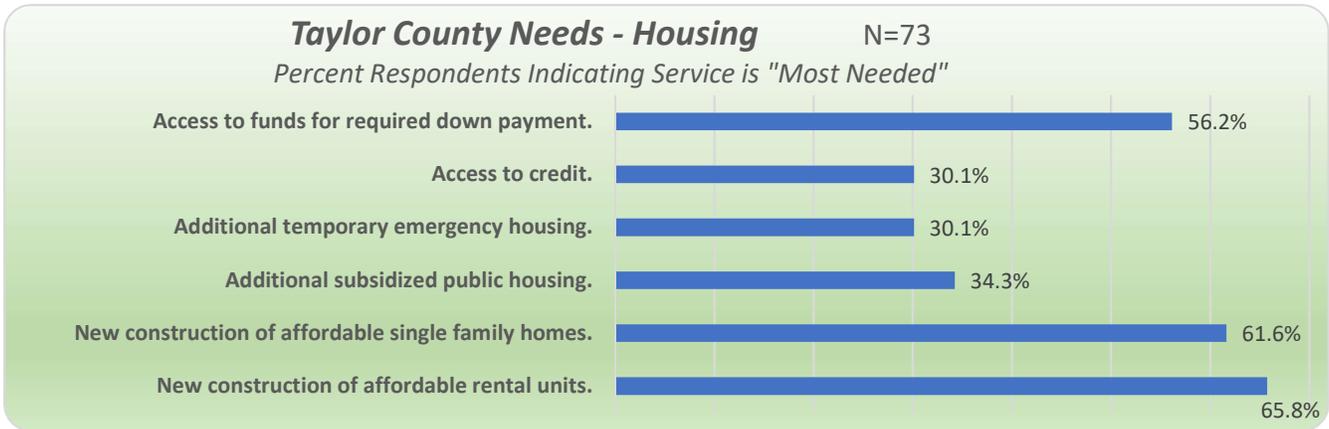

Discussion participants in Taylor County talked about a systemic issue related to a lack of training and education among county residents that contributes to an unskilled workforce.

*Housing:*

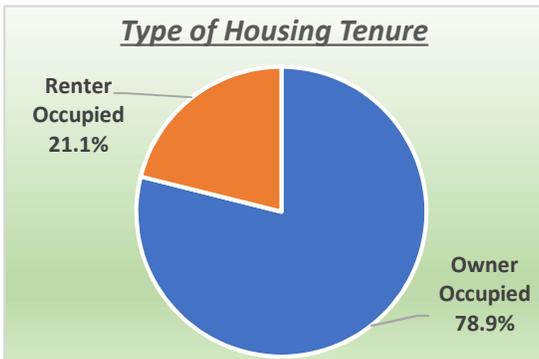

When asked about needs related to housing, 65.8% survey respondents in Taylor County focused on the need for new construction of rental units and 61.6% prioritized construction of affordable single-family homes. Access to funds for a down payment on a home was also seen by a majority (56.2%) as an issue that prevents low income people from buying a home.

Based on the survey responses, the top priorities in Taylor County related to Housing are:

- New construction of affordable rental units,
- New construction of single-family homes, and
- Access to funds for required down payment on a home.

The median age of housing units in Taylor County is 40 years; and 25.7% of existing homes were built prior to 1940. As of 2015, there were an estimated 24 occupied homes without plumbing in the county (ACS 2011-15).

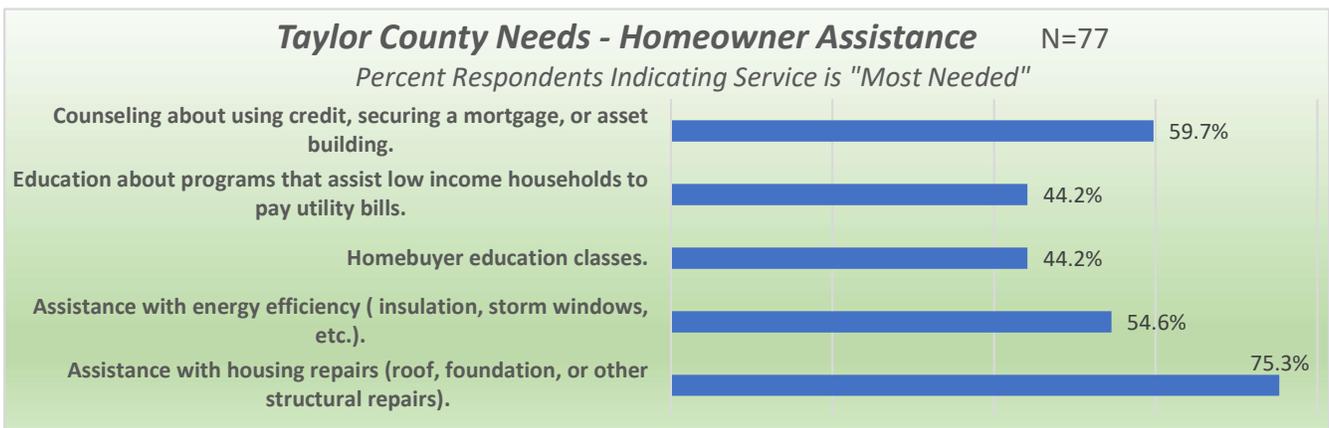

Secondary data sets reviewed indicate 78.9% of housing in the county is owner occupied, and 21.1% of county residents live in rental properties.

22.2% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income. Close to one-third of renters (32.2%) are cost burdened based on their gross rent exceeding 30% of the household income.

The median value of owner occupied housing in the county is relatively low at \$88,800 and median monthly owner costs for those with a mortgage is \$920 (ACS 2011-15).

*Homeowner Assistance:*

People responding to the survey in Taylor County identified a clear priority related to homeowner assistance in the area of home repairs. 75.3% of the respondents indicated programs to provide housing repairs was a high priority in the county. Counseling about the use of credit, securing a mortgage, and asset building is a service that was prioritized by 59.7% of the key informants, and assistance with improving energy efficiency of existing homes is an area of high need according to 54.6% of respondents.

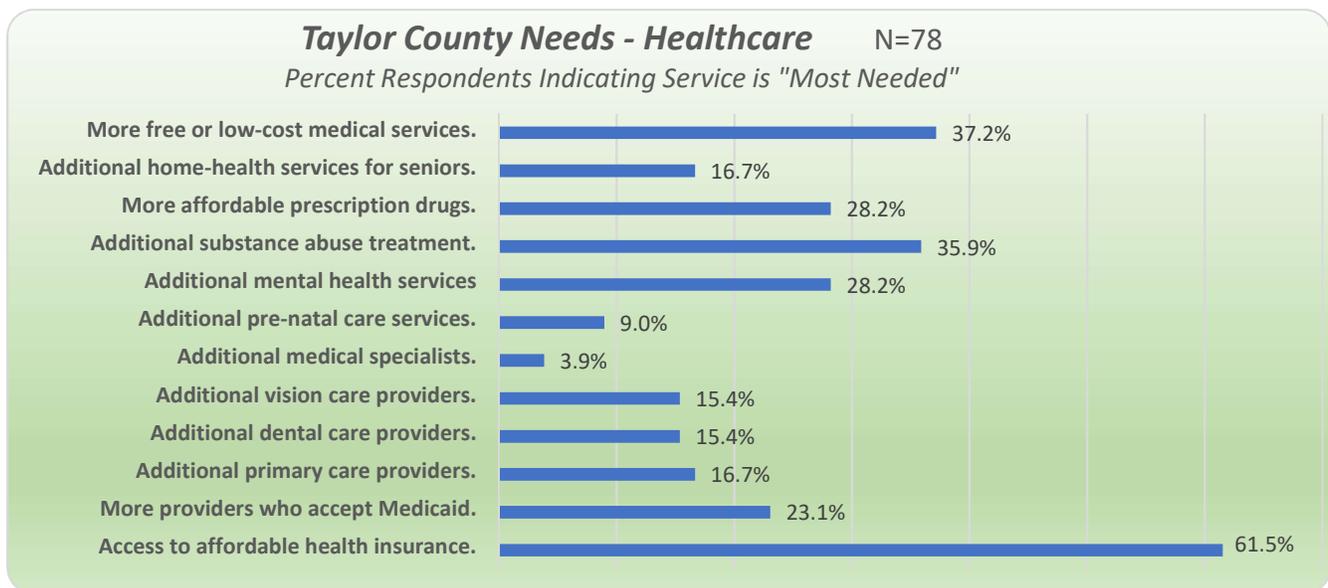

The top three priorities in Taylor County related to Homeowner Assistance are:

- Housing repairs,
- Counseling about using credit, securing a mortgage, and asset building, and
- Assistance with improving energy efficiency of existing homes.

*Healthcare:*

Access to affordable health insurance is a clear priority in Taylor County based on the responses from key informants. 61.5% of the survey respondents chose improved access to affordable insurance as a top priority. Secondary priorities identified by the informants include more free or low-cost medical services (37.2%), and substance abuse treatment programs (35.9%).

The most frequently cited needs within the healthcare domain are:

- Access to affordable health insurance coverage
- Free or low-cost clinics or other medical services, and
- Substance abuse treatment programs.

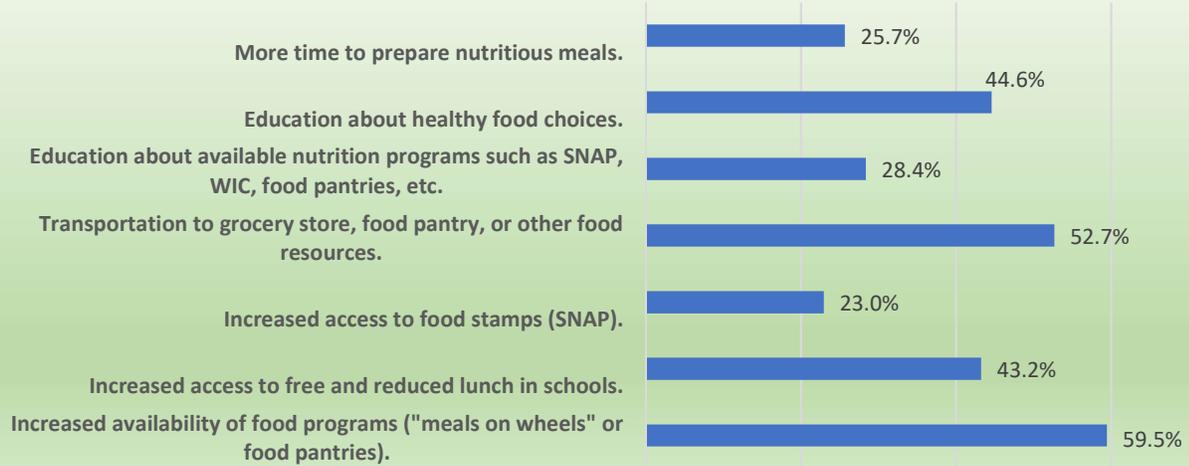

Community discussion participants also talked about drug abuse as a factor that keeps people in poverty in the county and the need for substance abuse outreach programs, drug courts, and education about drug abuse as areas that need to be addressed in order to reach their vision for the county’s future.

*Nutrition:*

When asked about community needs related to food and nutrition, 59.5% of Taylor County survey respondents indicated there was a need for more food programs such as food pantries, meals on wheels, etc. in the county. A majority (52.7%) also prioritized transportation services to grocery stores and existing food programs as a need in Taylor County.

Education about healthy food choices and increased participation in the school lunch program were also seen as priority areas of concern by just under half of the key informants.

**Taylor County Needs - Nutrition** N=74  
 Percent Respondents Indicating Service is "Most Needed"

Survey respondents identified several priorities related to food and nutrition including:

- Increased availability of food assistance programs,
- Transportation to grocery stores food pantries, or other food resources,
- Education about nutrition and healthy food choices, and
- Improving participation in the free and reduced cost meals program in schools.

There are 8 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) serving the county (*WV Foodlink 2015*) and 16.8% of households in Taylor County receive food stamps to supplement their food budgets. The average number of families participating in WIC during 2013 was 381. The *WV Foodlink* County Profile for Taylor County documents 17 retail locations that accept food stamps but only 1 location accepting WIC (2015).

The secondary data reviewed indicates 1,391 school-age were eligible for free and reduced cost meals at school in 2015; however, only 63.0% of the eligible children and youth participate in the program (*WV FoodLink*).

*Financial Literacy:*

Priority areas of need identified through the survey focus on counseling and education related to building financial literacy and better using available income by people in Taylor County. 69.3% of the informants responding to the survey think education and counseling about money management to include information about the responsible use of credit, budgeting, using bank accounts, and other financial literacy issues is a priority. 61.3% see education about building financial assets related to saving and investing as a priority need, and 50.7% prioritized education/counseling about the responsible use of household income.

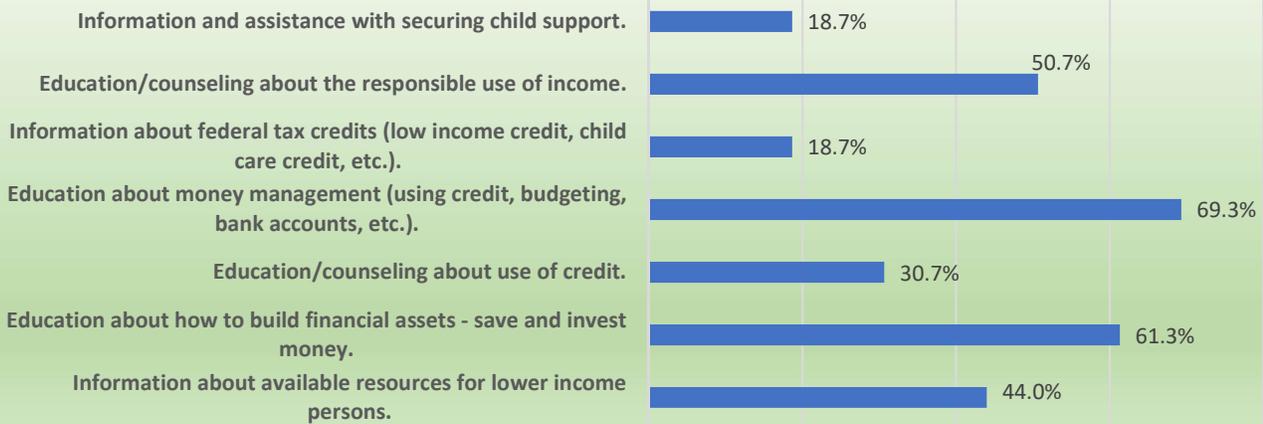

Priorities related to financial literacy and use of income include:

- Education about money management,
- Education about building financial assets, and
- Education/counseling about the responsible use of income.

### Taylor County Needs - Financial Literacy and Use of income

N=75

Percent Respondents Indicating Service is "Most Needed"

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 6.4% of Taylor County households are “unbanked” (have no checking or savings accounts)

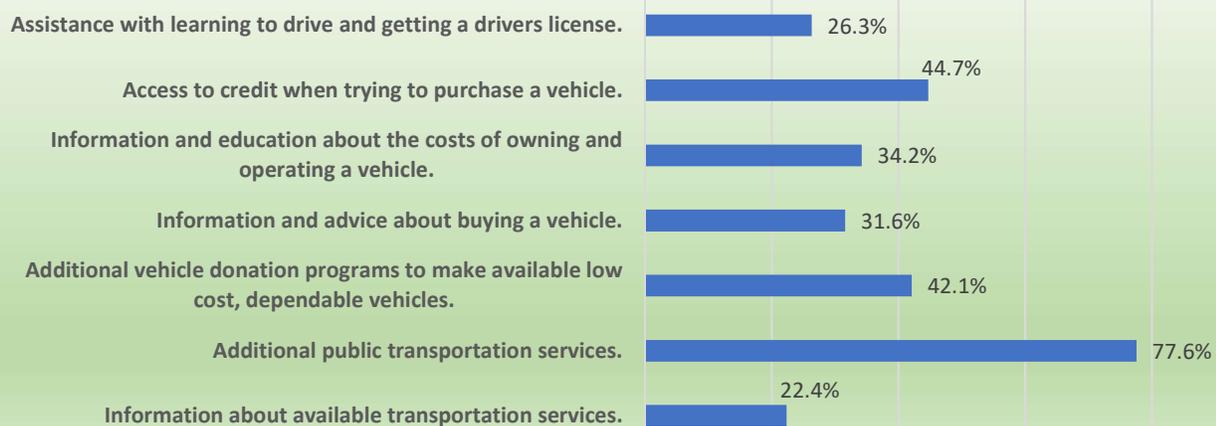

#### Transportation:

Development of additional public transportation services in Taylor County was the clear priority identified by the key informants responding to the survey. 77.6% of all key informants identified additional public transportation services as a priority need in the county. 44.7% of survey respondents prioritized access to credit when trying to purchase a vehicle as a high priority, and 42.1% indicated a vehicle donation program to make dependable vehicles available at low cost was important.

### Taylor County Needs - Transportation

N=76

Percent Respondents Indicating Service is "Most Needed"

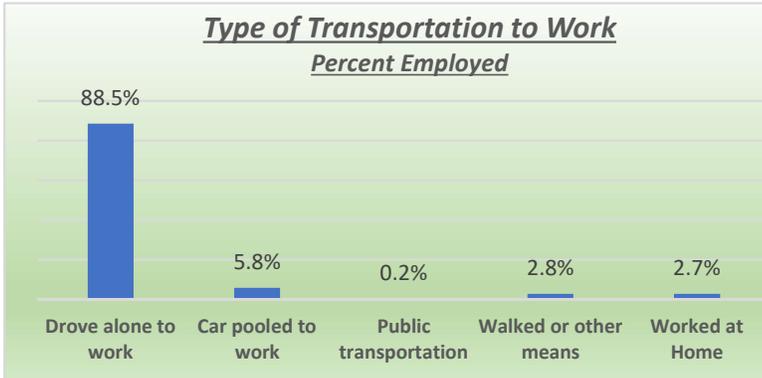

The highest priorities identified by the informants completing the survey within the transportation domain include:

- Public transportation services,
- Access to credit to purchase a vehicle, and

- A program to restore and make available donated vehicles to low income residents.

The mean travel time to work in Taylor County is 29.2 minutes, and nearly all workers in the county rely on private transportation to get from home to their work location. 94.3% of all persons employed either drive alone or car pool to work (ACS 2011-15).

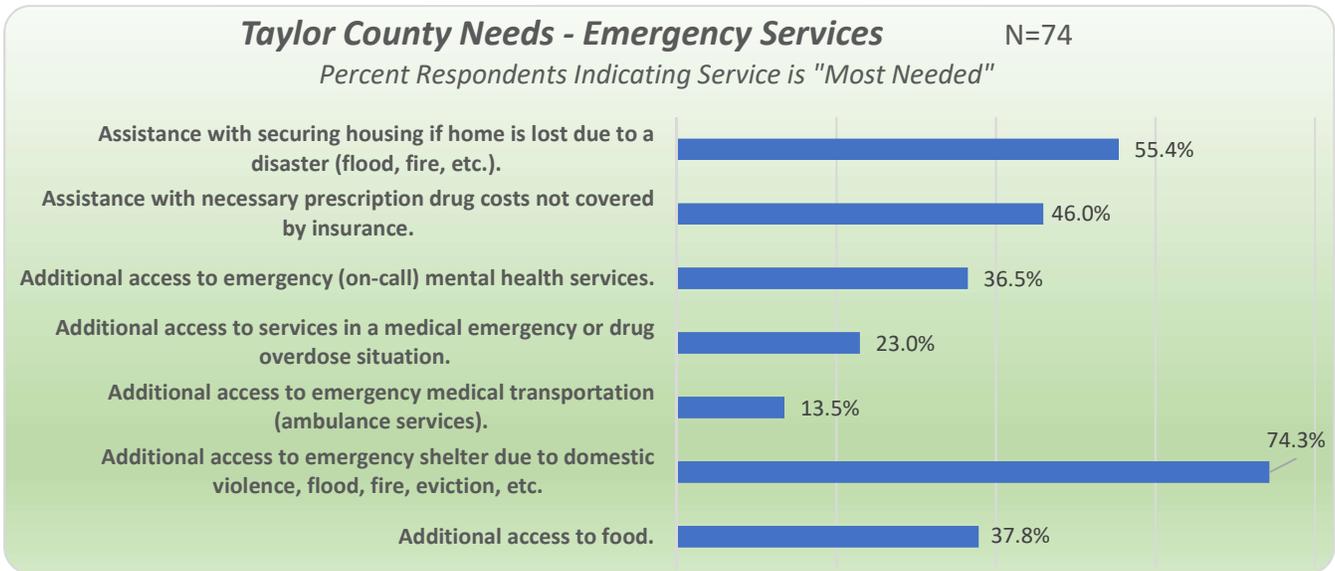

2.8% of persons employed in Taylor County are able to walk to work and 2.7% work at home.

Community discussion participants talked about the limited transportation options as a factor that keeps people in poverty and limits their access to basic needs such as food and health care.

*Emergency Services:*

The most notable priority related to emergency services in Taylor County is access to emergency shelter in cases of domestic violence, eviction, or a natural disaster. 74.3% of the key informants prioritized the development of additional emergency shelter facilities as a priority need. 55.4% also see assistance with securing housing if a home is lost due to a disaster as a need in the county requiring attention. Assistance with prescription drug costs was also selected by 46.0% of survey respondents as an area of high need.

Based on the survey responses, the highest priority areas needing attention in Taylor County are:

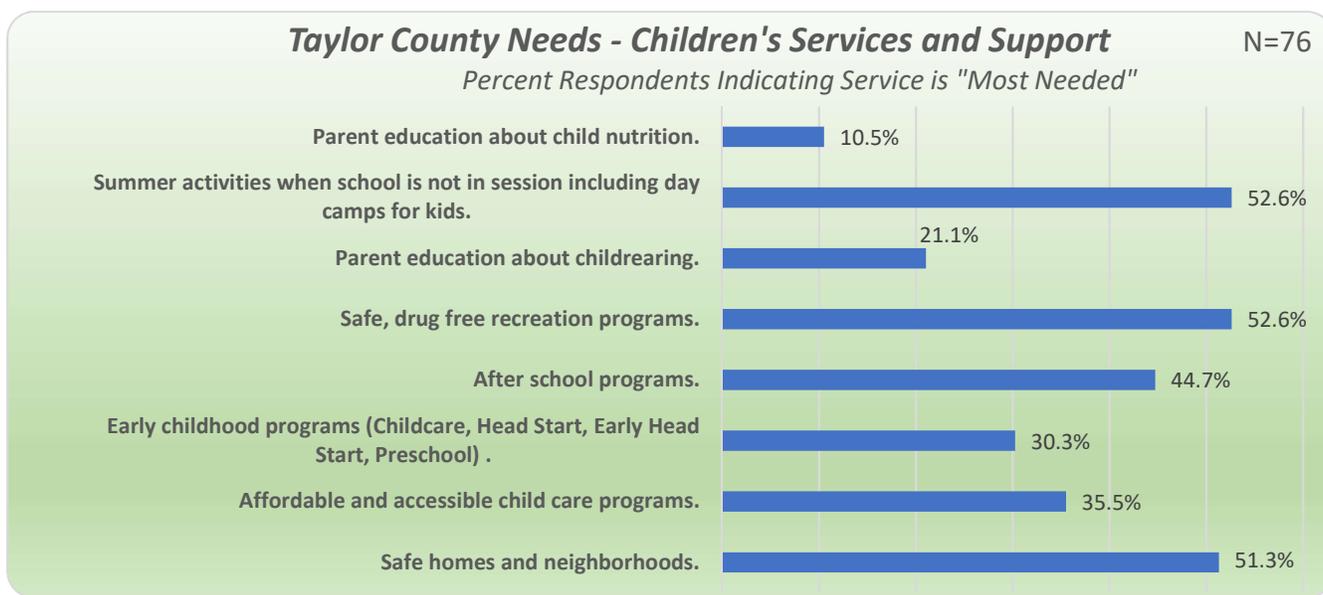

- Access to emergency shelter due to domestic violence, flood, fire, eviction or other circumstances,
- Assistance with securing housing due to loss of home in a disaster, and
- Assistance with prescription costs not covered by insurance.

*Children's Services and Supports:*

Safe, drug free recreational opportunities, summer activities for kids, and attention to safety in homes and neighborhoods are seen as the highest priority needs related services and programs for children by the survey respondents in Taylor County. Just over half of all respondents prioritized these three areas within this domain. Additional after school programs was seen as a priority by 44.7% of the informants.

The major priorities identified in the area of services and support for children include:

- Safe and drug free recreational programs,
- Summer activities when school is not in session including day camps for kids, and
- Safe homes and neighborhoods.

The child abuse/neglect rate in the county was 16.1 per 1,000 children (Kids Count 2015) and there were 112 court filings in the county for abuse/neglect in 2016 which is 32.0 filings per 1,000 children (*Circuit Court case filings data*). There were also 50 domestic violence cases filed in 2016 which is a rate of 10.8 filings per 1,000 family households (*Family Court case filings data*).

**Primary Strengths and Community Resources**

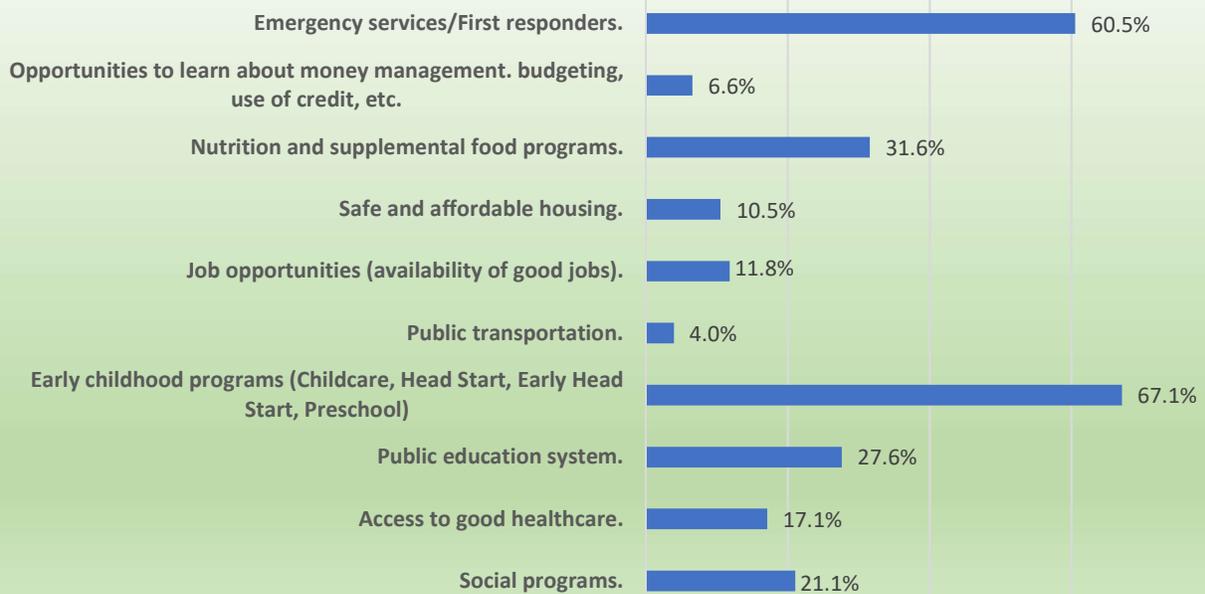

Survey respondents in Taylor County were asked what they considered to be the greatest areas of strength within the county service system and they were asked to select all options they consider to be a “particular strength”.

Based on the opinion of the key informants, early childhood services and emergency first responders are seen as the strongest components of the overall services system. 67.1% of the key informants indicated they thought early childhood programs including child care, head start, early head start, and pre-K programs was a “particular strength” within the county. 60.5% of the survey participants identified first responder emergency services as an area of strength within the county service system.

Other domains making up the service system in Taylor County are not viewed by many respondents as particular areas of strength.

### Perceived Strengths in Taylor County N=76

Percent Respondents who see service area as a "Particular Strength"

When asked to talk about the greatest strengths/assets in Taylor County, persons participating in the community discussion identified a community sense of family support, church sponsored programs for children and youth, and festivals held in the area. Local attractions and organizations were also referenced by community discussion participants including: Tygart Lake State Park, The Mother's Day Shrine and Anna Jarvis House, the Arts Council (*All Aboard Grafton*), the local Historical Society, and Bread of life Mission.

Other resources that address the needs of low income families identified within Taylor County include:

- A range of public health services,
- Grafton City Hospital,
- Medical Center of Taylor County,
- United Summit Center - Taylor County office (community mental health services),
- Five nursing/long term care facilities,
- Alcoholics Anonymous,
- One Federally Qualified Health Center location,
- Eight institutional Medicare and Medicaid providers,
- Taylor County Senior Center,
- Transportation services operated by the Senior Center,
- *Right From the Start* program for Medicaid eligible pregnant women and infants,
- *Birth to three* program,
- Three banking locations within city of Grafton,
- Five fire and rescue departments,
- Taylor County Family Resource Network,

- Three licensed child care centers,
- Eight family day care providers,
- Local office of the WV Department of Health and Human Resources, and
- Catholic Charities,
- Church of the Good Shepard
- Taylor County Starting Points Center
- Flemington Starting Points Center
- Nine food banks,
- WVU Extension Service.

#### Head Start/Early Head Start Needs and Resources

149 children were enrolled in Public Pre-K programs during the 2016-17 school year and the Pre-K participation rate for 4-year-olds in Randolph County was at 71% (*WV Dept. of Ed*). These 4-year-olds were served through approved voluntary programs operated by Head Start, public schools, and other early childhood providers.

For fiscal year 2017 (July 1, 2016-June 30, 2017) a total of 99 children received Head Start services and 25 (4 prenatally) received Early Head Start services in Taylor County. 96 of the Head Start children were Caucasian, and 3 were Bi-racial. None of the Head Start children were Hispanic. All children served through Early Head Start in Taylor County were Caucasian, and no Hispanic children were served through the Early Head Start program in the county.

There were 6 foster children served through Head Start programs in Taylor County during the period July 2016 to June 2017 and 1 homeless child was served. 3 of the Early Head Start children were homeless and 2 EHS children were in foster care. English was the primary language spoken in the home of all Head Start and Early Head Start enrollees. During calendar year 2017, annual program attendance and enrollment totals in Taylor County Head Start programs were at 101.1% of available program slots, and EHS enrollment was at 100% at Taylor I and 75% at Taylor II.

#### Head Start Needs Projections for 2018-19 program year

There are 148 four year old children projected to be eligible for Head Start services and 129 three year children during the 2018-19 school year (PY53) . The number of children for both ages have decreased by five 5 four-year olds and 5 three-year olds compared to the previous year. There are 13 children that will be four years of age between July 1<sup>st</sup> and September 1<sup>st</sup> that will not be served due to the new age eligibility for Universal Pre-K starting this upcoming Fall 2018-2019 school year. However, estimated numbers still suggest the population of eligible children in Taylor County will support the continuation of HS services in Lucretia and the following HS/Taylor County Board of Education (TCBOE) collaborative classrooms in PY53: Anna Jarvis I, Anna Jarvis II, Anna Jarvis III, Anna Jarvis IV, Flemington, Webster, and West Taylor Elementary.

The Taylor County BOE also has continued partnership with Little Feet Daycare to provide a Universal Pre-K classroom. Head Start children are not part of this partnership so children are not counted at this location. Also, TCBOE has formally announced they will be providing a second Universal Pre-K classroom at West Taylor due to the influx of families moving into this western section of Taylor County. It has not yet been determined if Head Start children will be counted at this location.

All of the above Head Start operated classrooms are considered Universal Pre-K Collaborations between NCWVCAA HS and the Taylor County BOE, except the Lucretia classroom that serves primarily three-year old HS eligible children.

#### EHS Needs Projections for 2018-19

Taylor County currently has identified 9 eligible prenatal to one-year of age children for PY53 and 99 eligible two-year olds for PY53. In comparison to last year's data at this time (January 2018), the population of income eligible children has decreased by 57 in the prenatal to age one range and has decreased by 16 in the two year of age group. The county's demographic map indicates sufficient numbers of children age two and under to support the continuation of at least 24 slots or more in the Early Head Start Home-based option or possibly Center-based at Webster Center for PY53. Preliminary discussions have occurred with the Taylor County Board of Education and they are supportive and interested in partnering to serve expectant teens in an EHS center-based option.

#### Services Provided by NCWVCAA

The characteristics of clients served, and the types of services previously provided in Taylor County by NCWVCAA provides insight into eligible people and their needs. During the most recent calendar year completed (2017), data was collected for a total of 1,849 persons who received services from the agency in Taylor County. 869 of the persons served were male and 980 were female. 94.6% of all persons receiving services were White, 0.8% were African American, 2.4% were Multi-racial, and 2.2% were other races. Those persons of Hispanic ethnicity made up 0.9% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 24 to 44 yrs. age group.

87.0% of all families where income data was collected have annual income below the federal poverty level. 2.4% of those persons served for whom data was captured lacked health insurance and 8.7% are disabled.

The most numerous types of outcomes achieved through services provided in Taylor County include:

- Employment support services.
- Assistance with tax preparation was provided.
- Infant and child health and physical development was maintained or improved.
- Children participated in preschool activities to develop school readiness skills.
- Infants and children obtained age appropriate immunizations.
- Emergency food assistance was provided.
- Other emergency services were provided.

# *Tucker County*

## *Community Needs and Resources*

# TUCKER COUNTY

## History & Geography

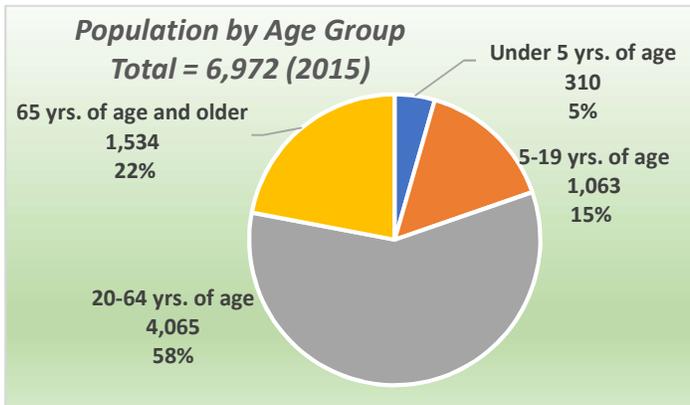

Tucker County was created in 1856 from a part of Randolph County, then part of Virginia. In 1871, a small part of Barbour County, West Virginia, was transferred to Tucker County. The county was named after Henry St. George Tucker, Sr., a judge and Congressman from Williamsburg, Virginia (Wikipedia, 2011).

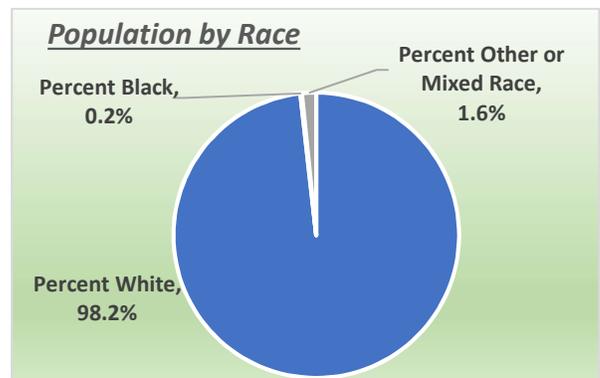

While it is popular for winter sports, the cold snowy winters at higher elevations make life difficult for those who must travel the roads in all extreme weather conditions. Over 50% of Tucker County is national forest, federal wilderness, fish, and wildlife refuge and state park lands. Additional tourist attractions include: Timberline Four Seasons

Resort and Canaan Valley National Wildlife Refuge. Nearly 900,000 acres of the Monongahela National Forest and parts of Dolly Sods Wilderness and Otter Creek Wilderness lie within the county. There are few retail stores and those that do exist are many miles apart and a great distance from several populated centers in the county. Social service agencies are primarily located in the county seat of Parsons making transportation to services a problem as well.

## Demographic Characteristics

The total population of Tucker County is 6,972 persons (ACS, 2015). 5% of the population is under five years of age and 22% is over the age of 65 yrs.

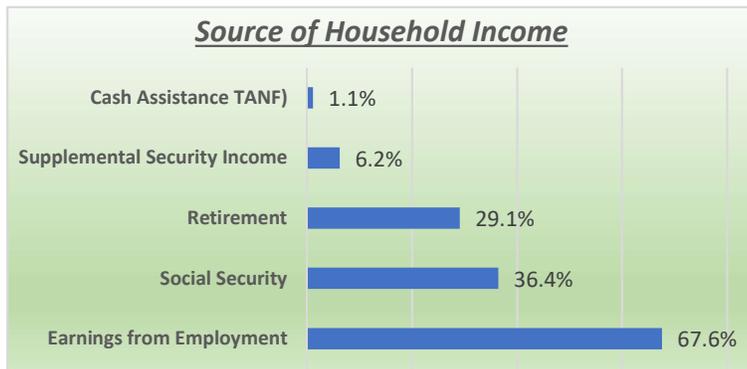

98.2% of the population is White and 0.2% is Black. The remaining 1.6% of Tucker County residents are other or mixed race.

There are 3,010 households and 2,034 family households in the county. 826 or 27.4% of the total family households have children under 18 yrs. of age.

## Socio-Economic Characteristics

10.8% of Tucker County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate nearly triples to 29.5%. 100% of all single, female-headed families in the county with all children under 5 yrs. of age are estimated to have annual income below the poverty level

(ACS 2011-15). Median household income in Tucker County is \$43,529 which is a little more than the state average of \$42,644 (ACS 2012-16).

67.6% of the households in the county have income from employment, 36.4% have social security income, 29.1% have retirement income, and only 1.1% receive cash assistance through the TANF program. 13.4% of households in the county receive food stamps to supplement their income (ACS 2015).

16.3% of the households in the county have zero net worth, and a substantial number of Tucker County households have little or no liquid assets. The “Liquid Asset Poverty Rate” defined as a lack of sufficient liquid assets to subsist at poverty level for three months in absence of income, is at 41.0% in the county (2014 Survey of Income and Program Participation, US Census Bureau).

### Causes of Poverty

Primary causes of poverty in the county appear to include:

- (1) Substance abuse and addiction,
- (2) Lack of education beyond high school,
- (3) Limited employment opportunities, and
- (4) Limited access to healthcare services.

The community discussion held in the county identified several factors contributing to poverty in the county including:

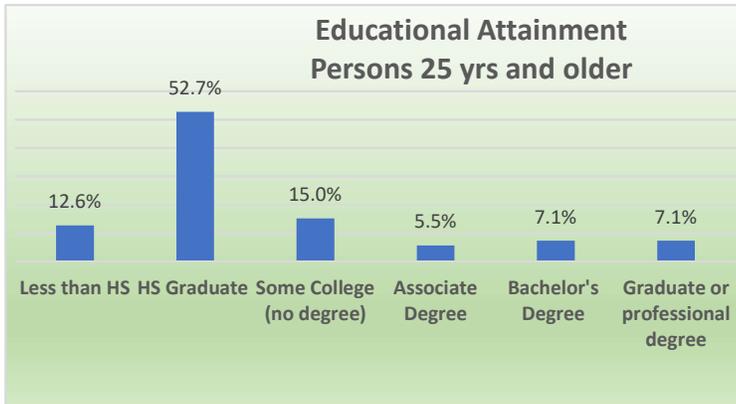

- Access to healthcare,
- Lack of affordable housing for lower income families, and
- Lack of jobs and employment opportunities that offer a living wage.

When asked to define poverty and the factors that keep people in poverty, community discussion participants identified:

- Poor choices that do not allow some to meet basic needs,
- Addiction to alcohol or drugs, and
- Dependency on the “welfare system”.

An indicator of generational poverty in the county is births to mothers with less than a high school education. Kids Count data indicates 10.3% of the births to Tucker County women were to those with less than a high school education (Kids Count 2015).

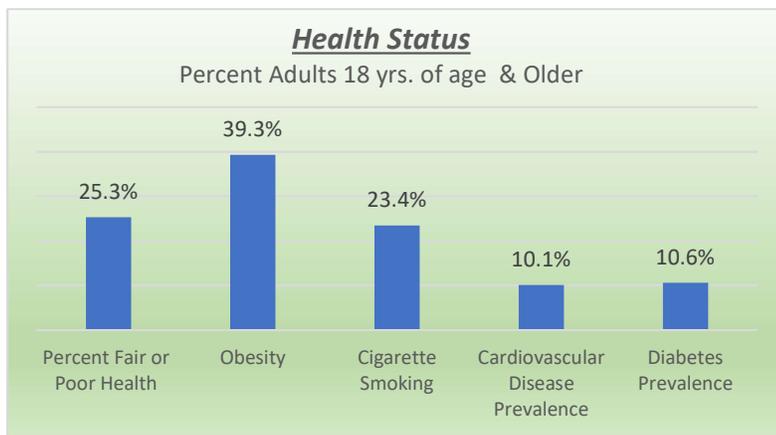

The unemployment rate in the county declined slightly (0.1%) between August of 2016 and August of 2017 to 4.9% in August 2017, the unemployment rate in Tucker County was below the state average of 5.4%.

A notable percentage of Tucker County residents 25 yrs. of age and older have no education beyond high school. More than half (52.7%) have only a high school education and 12.6% have less than a high school education. 14.2% of those 25 yrs. of age and older hold a college degree (ACS 2015).

Educational attainment in the county has been much better in recent years, although the public-school dropout rate is still relatively high at 10.6% (Kids Count 2015), and the 4-year cohort graduation rate is at 92.9% (WVEIS 2016).

Many more young people are also enrolling in higher education than was the case in the past. The 2016 college going rate in the county is most recently at 55.8% of graduating high school seniors (WV Higher Education Policy Commission). 11<sup>th</sup> grade reading proficiency is at 54.9% and mathematics proficiency is 12.2% (WVEIS 2016-17).

The overall health status of the population and access to healthcare, mental health services, and substance abuse treatment also appear to be contributing factors to poverty in Tucker County. Obesity rates are at 39.3% among the adult population and 23.4% of the adult population smoke (BRFS 2014). 25.3% of the adult population have fair or poor overall health.

In addition, 9.8% of the total population in Tucker County is without any type of health insurance (ACS 2015).

The community discussion participants talked about a lack of access to healthcare and emergency room services in the county as well as a need to expand on available ambulance services.

The infant mortality rate in Tucker County is relatively high at 12.1 deaths per 1,000 live births and 6.8% of babies born to county residents are low birth weight (less than 2500 grams). The teen birth rate is at 33.2 births per 1,000 females (Kids Count 2015).

### Community Needs

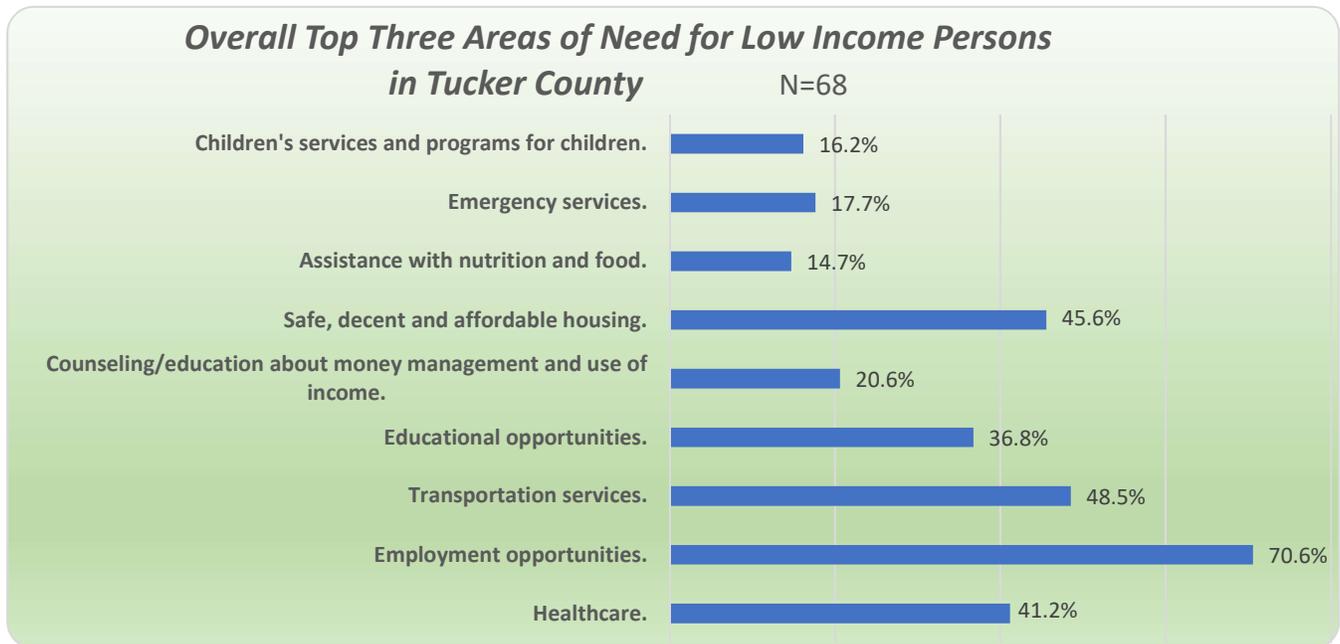

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

#### Overall Needs and Priorities

Tucker County survey respondents were asked:

” What do you think are the top three areas of need of low income people in Tucker County?”

Employment opportunities transportation services, and safe, decent and affordable housing were the most frequently selected areas of need. 70.6% of the key informants prioritized employment and jobs as one the top three areas of need in the county, transportation issues were a priority concern for 48.5%, and affordable housing was a high priority for 45.4% of the key informants. Educational opportunity was a priority selected by 36.8% of the survey respondents. Other domains within the overall service system were identified as a high priority by far fewer of those key informants completing the survey.

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

*Employment and Jobs:*

Tucker County survey respondents indicated additional employment options in the county was the greatest need. 62.7% prioritized more good jobs with benefits, and 59.7% indicated employment opportunities of any type were needed. Specific training necessary for available jobs, and child care for working parents are priority areas of concern for 44.8% of the key informants.

Based on the survey responses, the top priorities in Tucker County related to Employment and Jobs are:

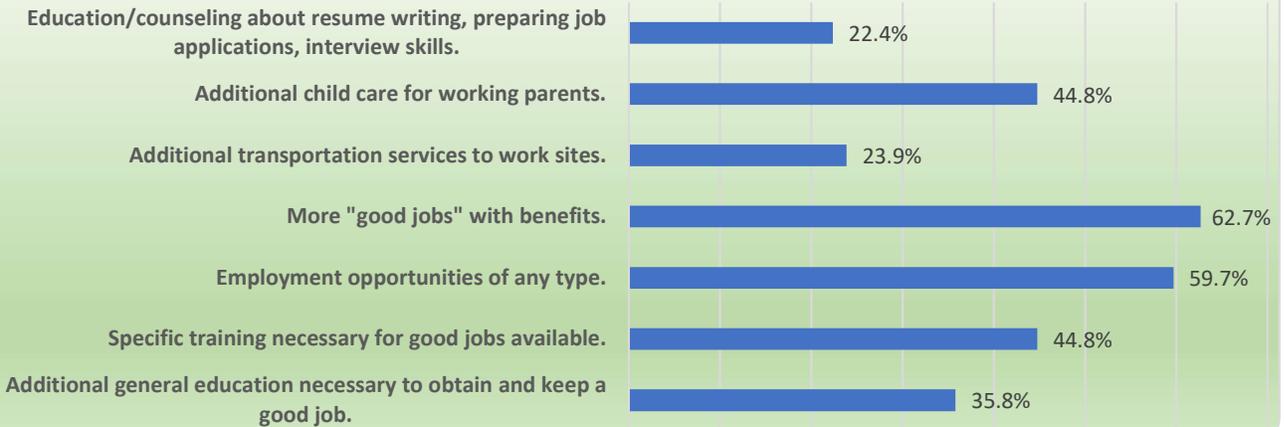

- More good jobs with benefits,
- Employment opportunities of any type,
- Specific training necessary for good jobs that are available, and
- Child care for working parents.

Community discussion participants talked about the need for jobs in the county, transportation services, and quality child care when asked to discuss what the priority needs are to achieve their “ideal vision” for Tucker County.

### Tucker County Needs - Employment and Jobs

N=67

Percent Respondents Indicating Service is "Most Needed"

The highest percentage of persons employed in Tucker County work in the educational, healthcare, and social service sectors. This industry accounts for 24.8% of all employment in the county.

### Employment by Industry in Tucker County

There is also a notable number of jobs in the arts, entertainment and recreation, accommodations, and food services sectors in the county. 14.0% of employment is found in these sectors and this employment is driven by state parks, ski areas, restaurants, arts and crafts outlets and other similar enterprises found in the county particularly in the Davis-Thomas area. Employment in other industries is distributed across other sectors with the most significant being construction (10.5%), public administration (9.4%) and the

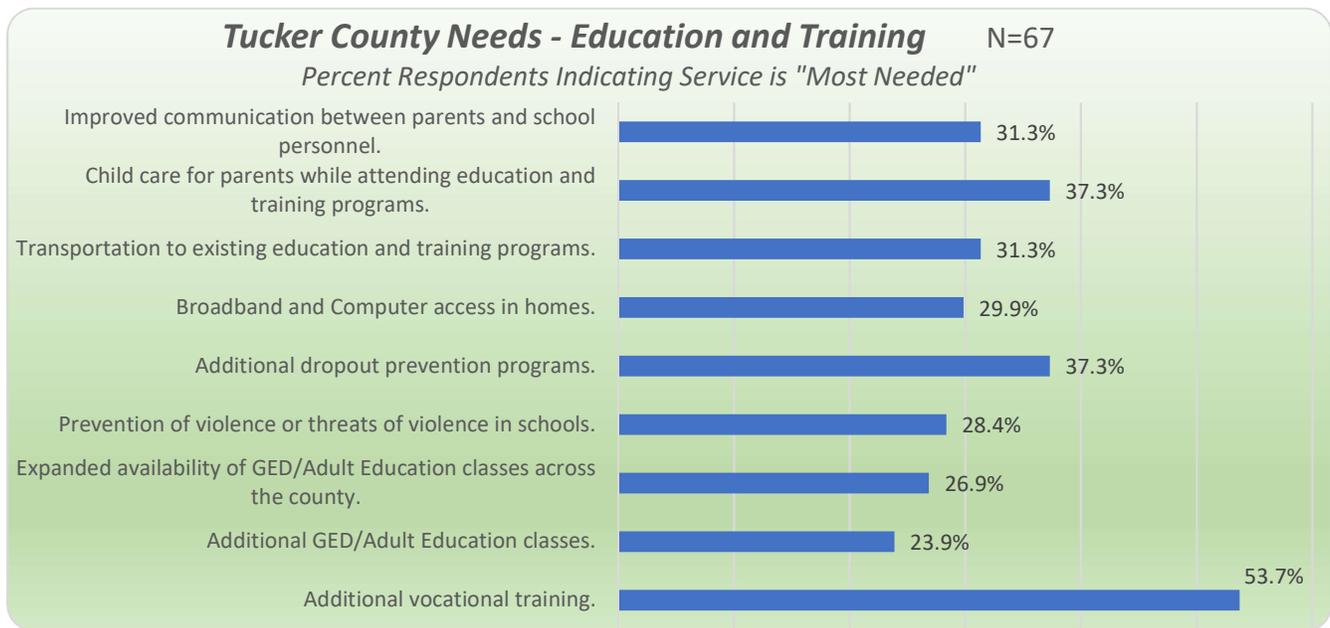

agriculture forestry, fishing & hunting, and mining sectors (8.0%) (BLS 2015).

The largest employers in Tucker County (in order of number of people employed) are:

- Tucker County Board of Education,
- Mettiki Coal,
- Regency West Virginia Ventures, and
- Kingsford Manufacturing.

*Education and Training:*

People responding to the survey in Tucker County identified several issues related to education and training needs and the only area prioritized as “most needed” by a majority of the key informants (53.7%) was additional vocational training. Expanded Broadband development, drop-out prevention programs and child care for parents while attending education and training programs were seen as priorities by 37.3% of the survey respondents.

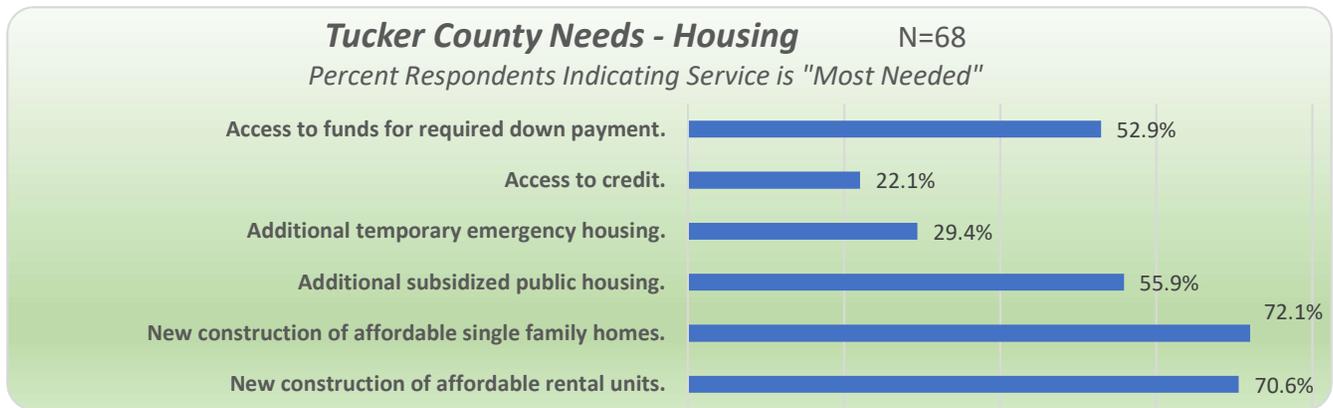

Based on the survey responses, the top priorities in Tucker County related to Education and Training are:

- Vocational training,
- Child care during hours training programs are offered, and
- Drop-out prevention programs.

*Housing:*

When asked about needs related to housing, new construction of affordable housing units was the recognized area of greatest need. 72.1% survey respondents in Tucker County focused on the need for new construction of affordable single-family homes and 70.6% prioritized construction of rental units.

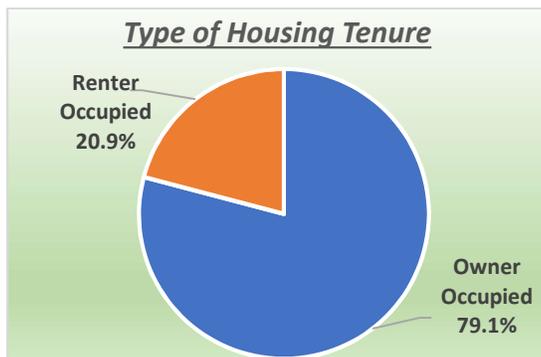

A lack of subsidized housing units and access to funds for a down payment on a home were areas within this domain that were seen by a majority of the key informants as issues that prevent low income people from securing housing.

Based on the survey responses, the top priorities in Tucker County related to Housing are:

- New construction of single-family homes,
- New construction of affordable rental units,
- Access to funds for required down payment on a home, and
- Public housing that is subsidized.

The median age of housing units in Tucker County is 36 years; however, 21.8% of existing homes were built prior to 1940. As of 2015, there were an estimated 24 occupied homes without plumbing in the county (ACS 2011-15).

Secondary data sets reviewed indicate 79.1% of housing in the county is owner occupied, and 20.9% of county residents live in rental properties.

27.5% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income. More than one-third of renters (38.3%) are cost burdened based on their gross rent exceeding 30% of the household income.

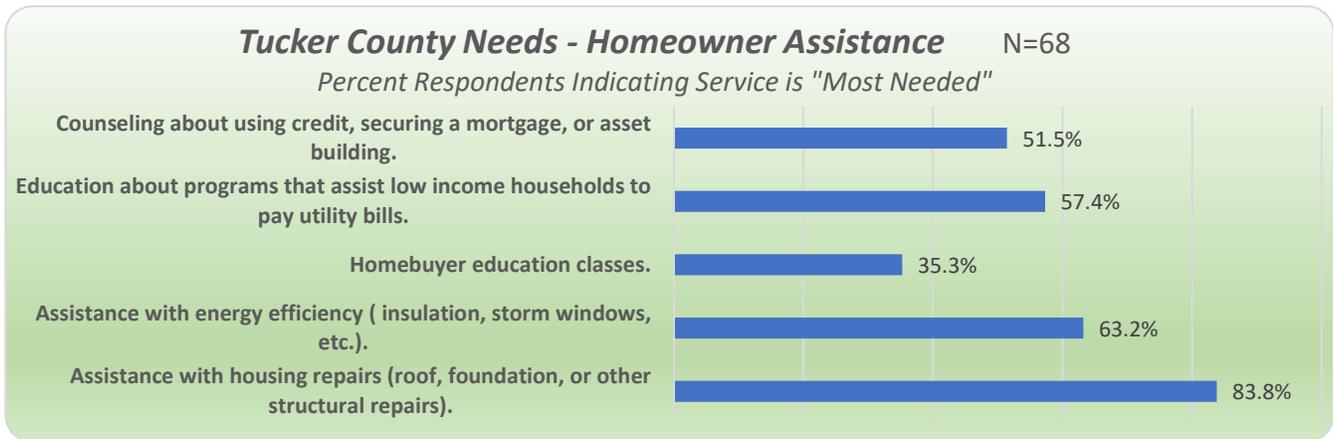

The median value of owner occupied housing in the county is \$104,000 and median monthly owner costs for those with a mortgage is \$883 (ACS 2011-15).

Affordable housing and home ownership programs were both cited as areas that need to be addressed when community discussion participants talked about their vision for the future of the county.

**Homeowner Assistance:**

People responding to the survey in Tucker County identified assistance with home repairs and assistance with modification to existing home to make them more energy efficient as priorities within the homeowner assistance domain. Almost all of the key informants (83.3%) indicated programs to provide housing repairs was a high priority in the county.

Education about programs to assist with utility bills, and counseling about the use of credit, securing a mortgage, and asset building are services that were prioritized by over half of the key informants.

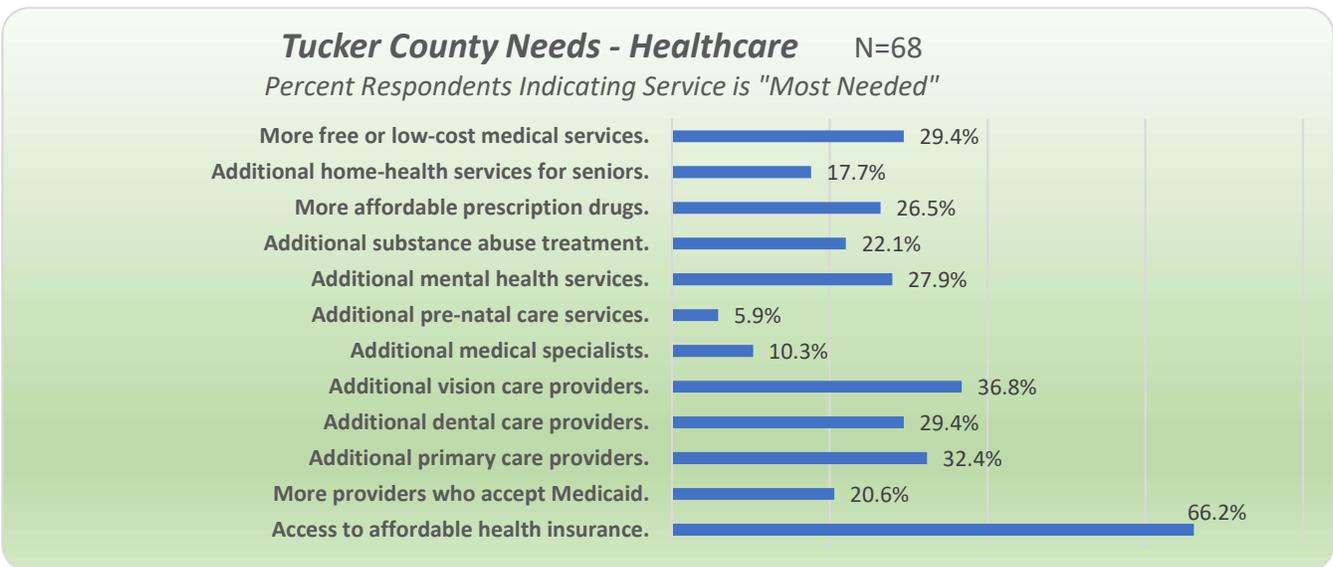

The top priorities in Tucker County related to Homeowner Assistance are:

- Housing repairs,
- Assistance with improving energy efficiency of existing homes,
- Information and education about available programs to assist low income households with paying utility bills, and
- Counseling about using credit, securing a mortgage, and asset building.

*Healthcare:*

Affordable health insurance is the only a clear priority identified by those persons completing the survey in Tucker County. 66.2% of all survey respondents chose access to affordable insurance as one of their top priorities. A range of secondary priorities were identified by the informants include additional healthcare providers (vision, dental, and primary care) and access to free or low-cost medical services. Mental health services are also seen as a priority by more than one in four of the key informants.

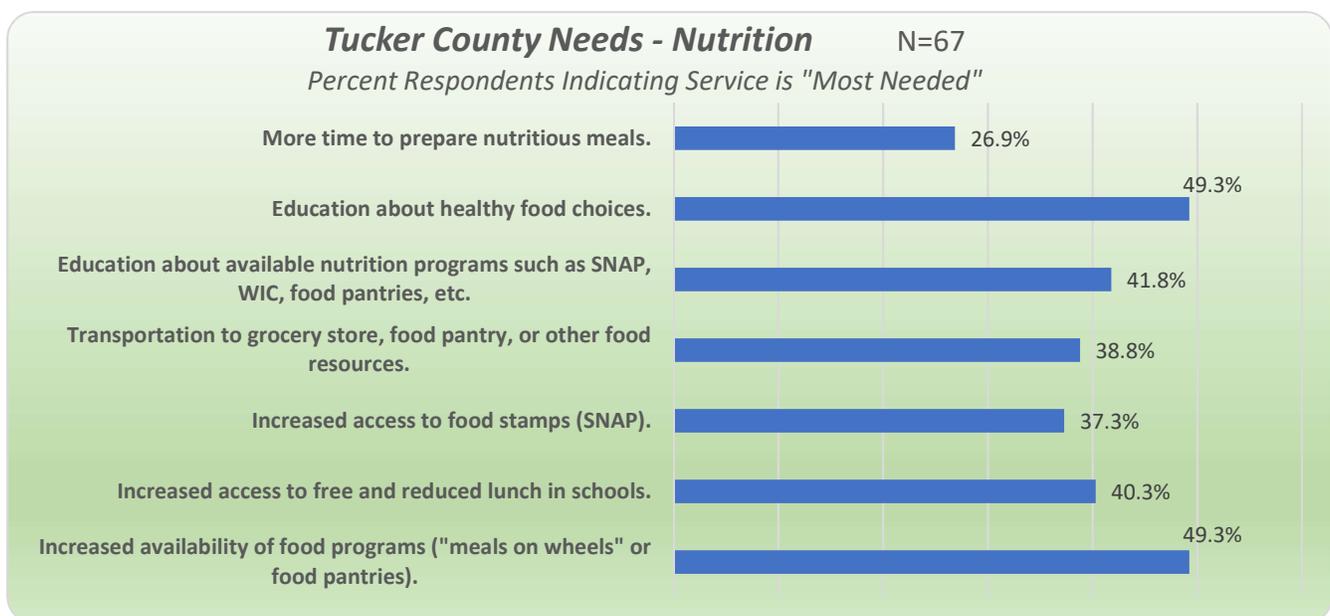

The most frequently cited need within the healthcare domain is:

- Access to affordable health insurance coverage.

Community discussion participants also identified access to a range of health care services as a priority need in the county and also talked about how substance abuse and addiction as well as a lack of mental health services contribute to keeping people in poverty.

*Nutrition:*

When asked about community needs related to food and nutrition there was no clear consensus of opinion about what the most needed services or programs in Tucker County were. Half of the key informants (49.3%) prioritized education about healthy food choices and increased availability of food programs such as food pantries, meals on wheels, etc. in the county. Approximately 40% of the survey respondents identified a number of other needs related to food and nutrition as a priorities for attention.

The greatest number of key informants indicated the areas of greatest need within this domain are:

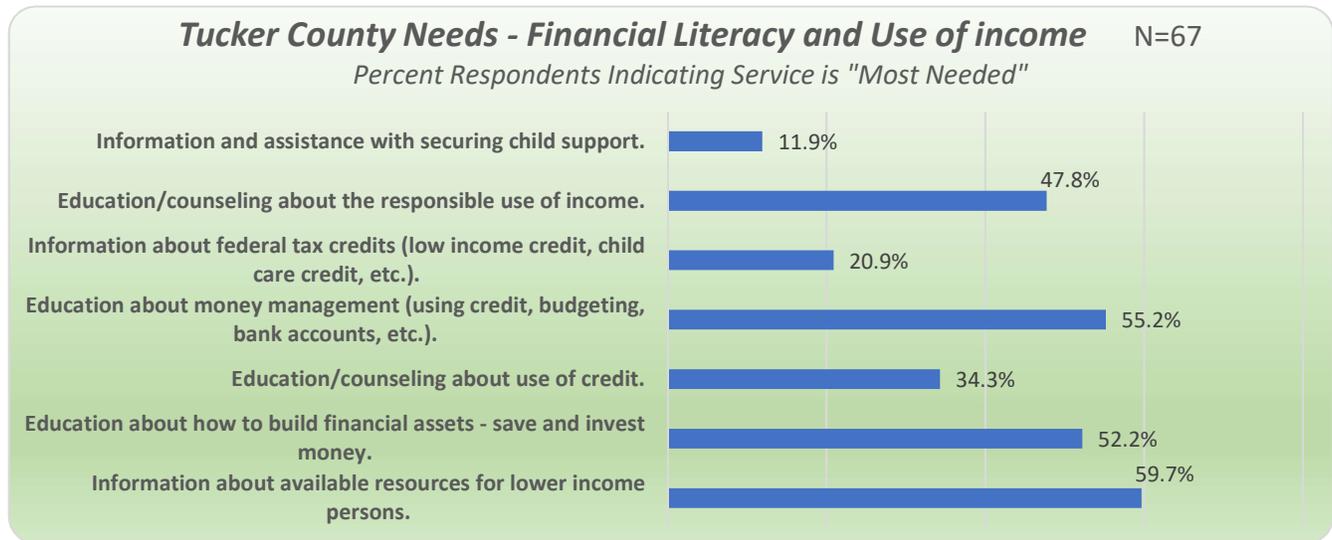

- Education about nutrition and healthy food choices, and
- Increased availability of food assistance programs,

There are 7 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) serving Tucker County (*WV Foodlink 2015*) and 13.4% of households in the county receive food stamps to supplement their food budgets. The average number of families participating in WIC during 2013 was 191. The *WV Foodlink* County Profile for Tucker County documents 16 retail locations that accept food stamps but only 2 locations accepting WIC (2015).

The secondary data reviewed confirms a need to increase participation in the school lunch program. 591 school-age children were eligible for free and reduced cost meals at school in 2015; however, only 64.0% of the eligible children and youth participate in the program (*WV FoodLink*).

*Financial Literacy:*

Key informants in Tucker County prioritized four areas within the financial literacy domain that they think need attention. 59.7% of the survey respondents said people in the county need better information about what programs are available to assist low income households, and 55.2% indicated people need to be better educated about basic money management such as using credit, family budgets, opening and using a bank account, and related issues. Education about using what income is available in a responsible way and building assets through saving and investing so as to become more self-sufficient were also prioritized by those persons responding to the survey.

Priorities related to financial literacy and use of income include:

- Access to available resources for lower income people,
- Education about money management,
- Education about building financial assets, and
- Education/counseling about the responsible use of income.

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 5.1% of Tucker County households are “unbanked” (have no checking or savings accounts).

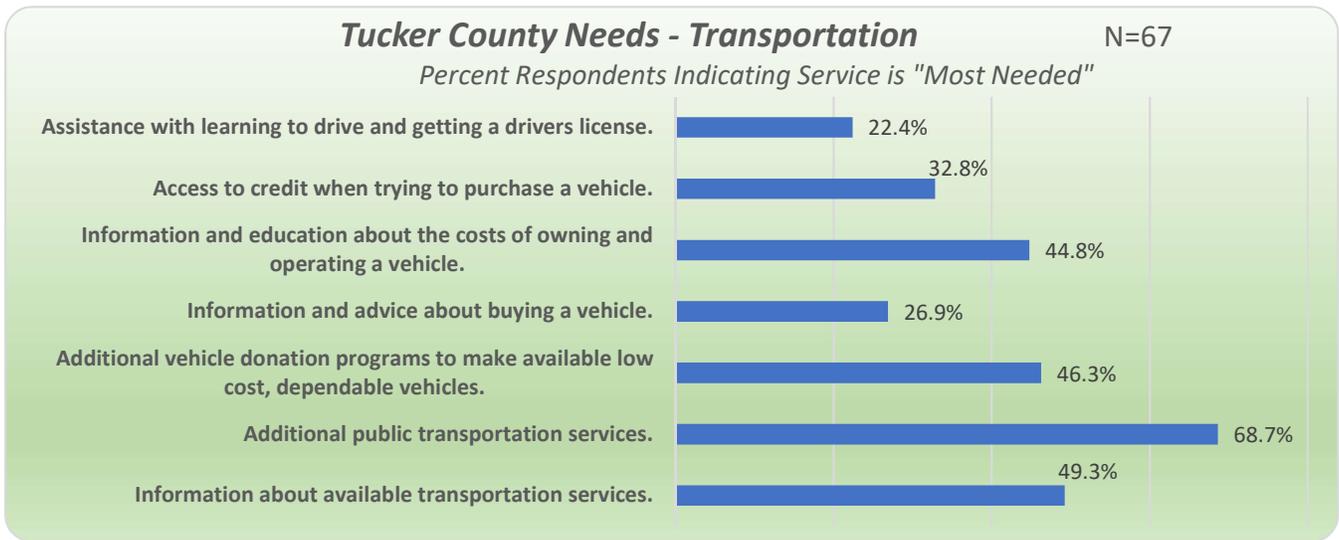

*Transportation:*

Development of additional public transportation services in Tucker County was the most frequently cited priority by the key informants responding to the survey. 68.7% of all key informants identified additional public transportation services as a priority need in the county. 49.3% of survey respondents also see access to better information about currently available transportation services as something needed, and 46.3% indicated a vehicle donation program to make dependable vehicles available at low cost was important.

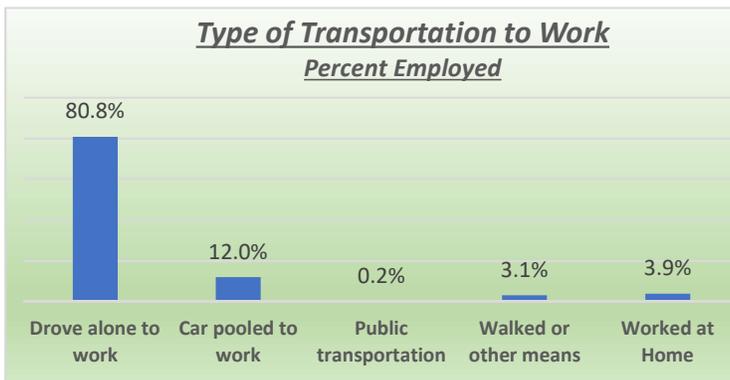

The highest priorities identified by the informants completing the survey within the transportation domain include:

- Development of public transportation services,
- Ways to better inform people about existing transportation services, and

- A program to restore and make available donated vehicles to low income residents.

The mean travel time to work in Tucker County is 27.7 minutes, and most workers in the county rely on private transportation to get from home to their work location. 92.8% of all persons employed either drive alone or car pool to work. 3.9% work at home and 3.1% walk to work. (ACS 2011-15).

Community discussion participants talked extensively about the limited transportation options in the county as both something that needs to be addressed to reach their vision for the county and also as a factor that keeps people in poverty and limits access to basic services.

There is currently no public transit program serving Tucker County and it is extremely

difficult for low income people with no access to private transportation to access needed services and supports. Many of the healthcare and mental health services needed by Tucker county residents are not available locally and people often have to travel to Elkins or Morgantown to access care.

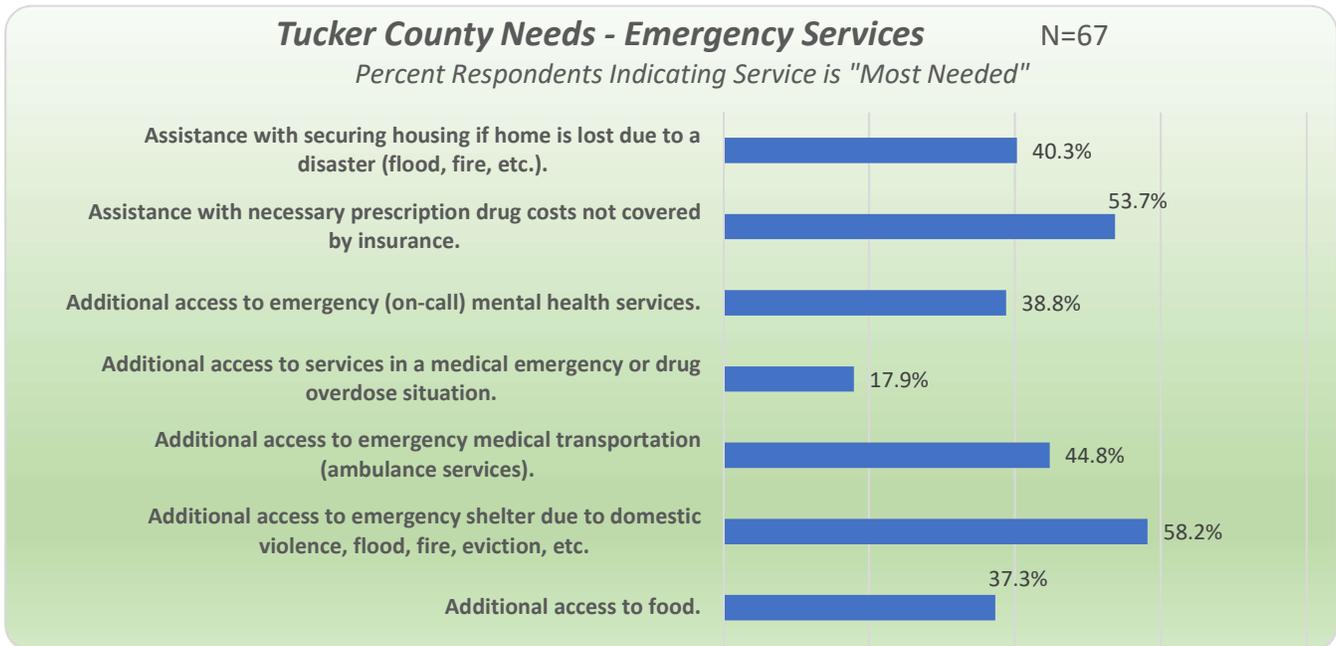

*Emergency Services:*

The most frequently mentioned priorities for improving services related to emergency situations are a need for access to shelter due to domestic violence or a natural disaster, and assistance with prescription drug costs. A majority of the key informants prioritized these two areas as “most needed”. Additional emergency ambulance services are also seen as a priority by 44.8% of the survey respondents in Tucker County

Based on the survey responses, the highest priority areas needing attention in Tucker County are:

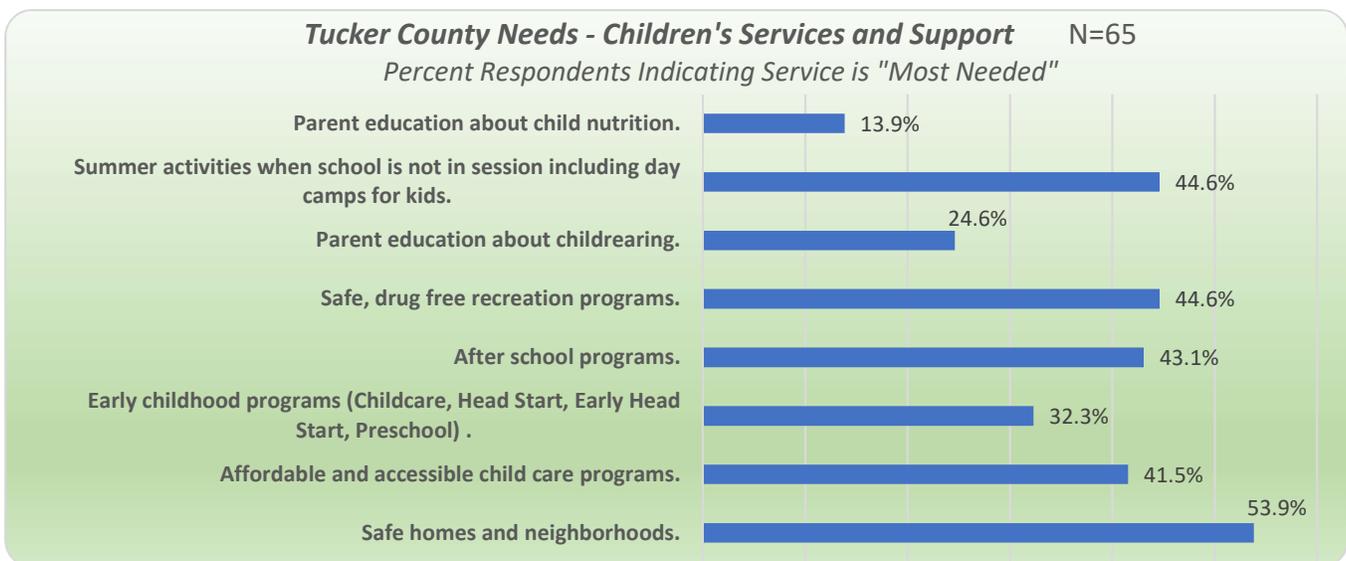

- Access to emergency shelter due to domestic violence, flood, fire, eviction or other circumstances,
- Assistance with prescription costs not covered by insurance,

- Access to emergency medical transportation, and
- Assistance with securing housing due to loss of home in a disaster (flood, fire, etc.)

*Children's Services and Supports:*

Key informants appear to be concerned about the safety of children in their homes and neighborhoods as this was the only area prioritized by at least a majority of the informants (53.9%). A range of other needs were identified through the survey as secondary priorities including: summer activities when school is not in session, safe, drug-free recreational opportunities, after school programs, and a need for additional child care programs.

The priorities identified in the area of services and support for children include:

- Safe homes and neighborhoods,

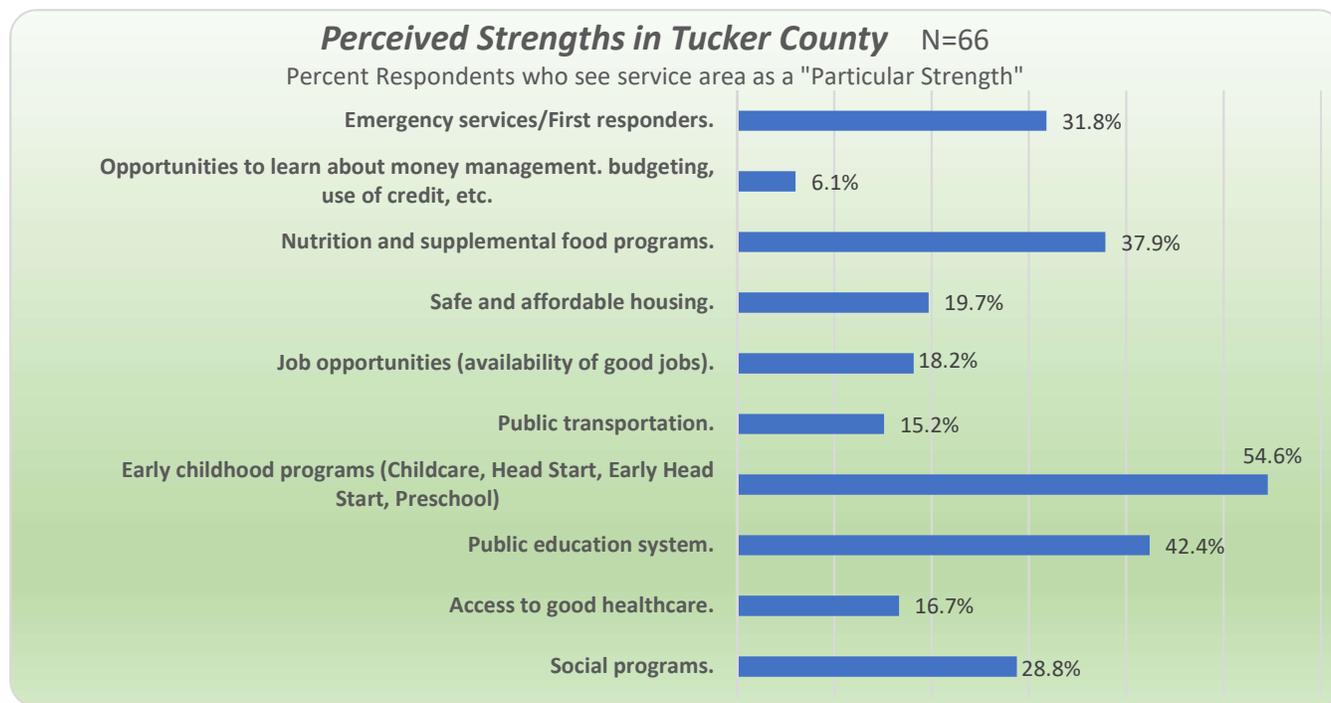

- Safe and drug free recreational programs,
- Summer activities when school is not in session including day camps for kids, and
- After school programs.

The child abuse/neglect rate in the county was 13.9 per 1,000 children (Kids Count 2015) but Circuit Court records indicate there were only 2 court filings in the county for abuse/neglect in 2016 which is 1.6 filings per 1,000 children (*Circuit Court case filings data*). There were 23 domestic violence cases filed in 2016 which is a rate of 11.3 filings per 1,000 family households (*Family Court case filings data*).

#### Primary Strengths and Community Resources

Survey respondents in Tucker County were asked what they considered to be the greatest areas of strength within the county service system and they were asked to select all options they consider to be a “particular strength”.

Based on the opinion of the key informants, early childhood services and the public education system are seen as the strongest components of the overall services system. 54.6% of the key informants indicated they thought early childhood programs including child care, head start, early head start, and pre-K programs was a “particular strength” within the county. 42.4% of the survey participants identified public schools as an area of strength within the county service system.

Nutrition and food programs and first responders are seen as “strong” components of the service system in the county by about one in three key informants. Other domains making up the service system in Tucker County are viewed by relatively few respondents as particular areas of strength.

When asked to talk about the greatest strengths/assets in Tucker County, persons participating in the community discussion identified:

- Local people and their work ethic,
- Skilled workers,
- Scenic beauty of the area and tourism potential,
- Collaborative spirit among local agencies,
- Natural resources,
- Hiking trails, and
- The local emergency planning committee.

Other resources that address the needs of low income families identified within Tucker County include:

- A range of public health services,
- Two Federally Qualified Health Center locations,
- Three institutional Medicare and Medicaid providers,
- Limited behavioral health services – one day per week,
- Tucker County Senior Center,
- Transportation services operated by the Senior Center,
- *Right From the Start* program for Medicaid eligible pregnant women and infants,
- *Birth to three* program,
- Four banking locations,
- Four fire and rescue departments,
- Tucker County Family Resource Network,
- Tucker County Starting Points Center,
- Three licensed child care centers,
- Seventeen family day care providers,
- Local office of the WV Department of Health and Human Resources, and
- Nine food banks,
- WVU Extension Service.

#### Early Head Start Needs and Resources

55 children were enrolled in Public Pre-K programs during the 2016-17 school year and the Pre-K participation rate for 4-year-olds in Tucker County was at 98% (*WV Dept. of Ed*). These 4-year-olds were served through approved voluntary programs operated by Head Start, public schools, and other early childhood providers.

For fiscal year 2017 (July 1, 2016-June 30, 2017) 4 children received Early Head Start services in Tucker County. All children served through Early Head Start in Tucker County were Caucasian, and no Hispanic children were served through the Early Head Start program in the county.

One (1) of the Early Head Start children was homeless and none were in foster care. English was the primary language spoken in the home of all Early Head Start enrollees. During calendar year 2017, annual program attendance and enrollment totals in the Tucker County Early Head Start program was at 130.5% of available program slots.

#### Head Start Needs Projections for 2018-19 program year

There are 39 four-year old children and 47 three-year old children projected to be eligible for HS services.

The number of four-year olds has substantially decreased this year with the majority of those children living in the Parsons area. These four-year olds can be served by the Board of Education Pre-K Program at the Tucker Valley Annex Pre-School and the Davis/Thomas Elementary School. Numbers do not support the return of Head Start Home-based services to this county since the majority of families prefer center-based while preschool aged children are served by the Tucker County Board of Education. However, if financial supports for staff, space, and transportation were available for a center-based option, the number of three-year olds still suggests enough children for a classroom.

The new legislature law requiring children to be 4 years of age by July 1 instead of September 1 will leave a lapse of 5 children turning 4 in those two months that will not be age eligible for Universal Pre-K this upcoming school year.

Information for the demographic maps were gathered from existing family information, recruitment cards, birth announcements in newspaper, referrals from Birth to Three, family response that have saw posters in community, and families who have obtained contact from intranet.

#### EHS Needs Projections for 2018-19

There are 71 eligible prenatal to one-year old children and 38 two-year olds projected to be eligible for Early Head Start. Potential numbers show that the populations of eligible children for prenatal as well as one and two-year old children have increased in Tucker County. These numbers continue to support the current Early Head Start Home-based option that provides services to three 3 prenatal, infants, and toddlers, and their families. With these estimated projections, it appears that more prenatal, infants, and toddlers could be served but there is another successful home visiting program, “Parents As Teachers,” in the county that also serves children in these age ranges.

#### Services Provided by NCWVCAA

The characteristics of clients served, and the types of services previously provided in Tucker County by NCWVCAA provides insight into eligible people and their needs. During the most recent calendar year completed (2017), data was collected for a total of 437 persons who received services from the agency in Tucker County. 208 of the persons served were male and 229 were female. 97.0% of all persons receiving services were White, 2.1% were Native Hawaiian or Pacific Islander, and 0.9% were Multi-racial. Those persons of Hispanic ethnicity made up 0.5% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 24 to 44 yrs. age group.

61.5% of all families where income data was collected have annual income below the federal poverty level. 3.2% of those persons served for whom data was captured lacked health insurance and 10.1% are disabled.

The most numerous types of outcomes achieved through services provided in Tucker County include:

- Emergency food assistance was provided,
- Emergency fuel or utility payments assistance,
- Assistance with tax preparation was provided, and
- Emergency car or home repairs.

# *Webster County*

## *Community Needs and Resources*

## WEBSTER COUNTY

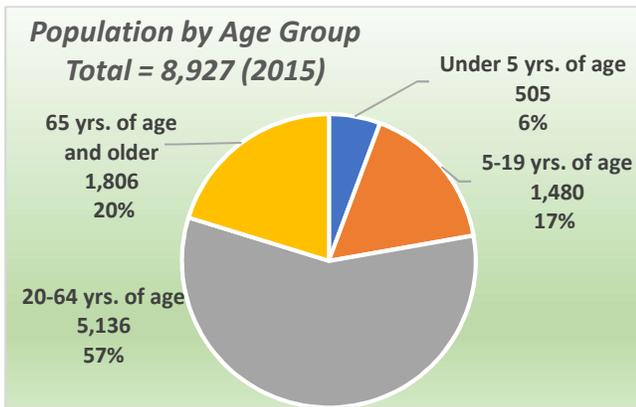

*Note: NCWVCAA provides only Head Start services in Webster County.*

### History & Geography

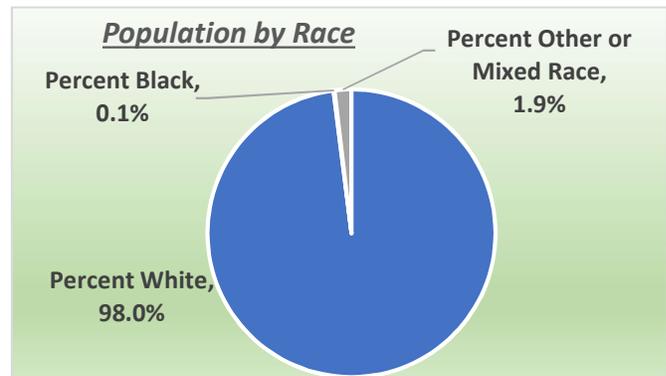

Formed in 1860, Webster County is a remote, rural area in West Virginia approximately 556.1 square miles in size. Webster County was created by an act of the Virginia General Assembly on January 10, 1860 from parts of Braxton, Nicholas and Randolph counties. Because of its isolation and the lack of main roads connecting it to other communities, Webster County was one of the last counties in the state to be settled (SHG Resources, 2011). A large portion of the county is unoccupied, held by large forestry companies for their vast timber resources.

### Demographic Characteristics

The total population of Webster County is 8,927 persons (ACS, 2015). 6% of the population is under five years of age and 20% is over the age of 65 yrs.

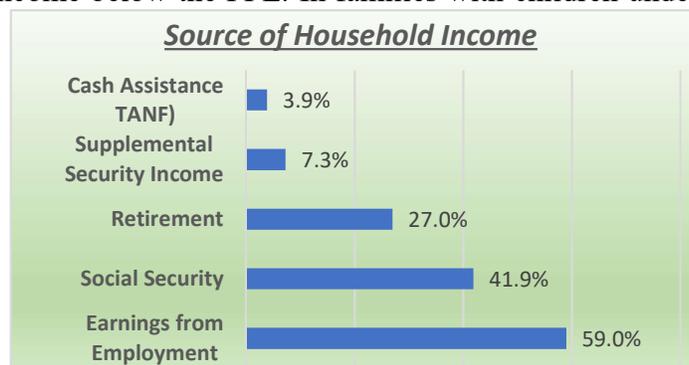

98.0% of the population is White and 0.1% is Black. The remaining 1.9% of Webster County residents are other or mixed race.

There are 3,887 households and 2,632 family households in the county. 1,111 or 28.6% of the total family households have children under 18 yrs. of age.

### Socio-Economic Characteristics

21.5% of Webster County families have annual income below the FPL. In families with children under the age of 5 only, the poverty rate more than doubles to 44.8%. 70.5% of all single, female-headed families with all children under 5 yrs. of age are estimated to have annual income below the poverty level (ACS 2011-15). Median household income in Webster County is \$29,086 which is well below the state average of \$42,644 (ACS 2012-16).

59.0% of the households in the county have

income from employment, 41.9% have social security income, 7.35 have SSI due to disability, 27.0% have retirement income, and 3.9% receive cash assistance through the TANF program. 13.4% of households in the county receive food stamps to supplement their income (*ACS 2015*).

18.0% of the households in the county have zero net worth, and a substantial number of Webster County households have little or no liquid assets. The “Liquid Asset Poverty Rate” defined as a lack of sufficient liquid assets to subsist at poverty level for three months in absence of income, is at 48.0% in the county (*2014 Survey of Income and Program Participation, US Census Bureau*).

### Causes of Poverty

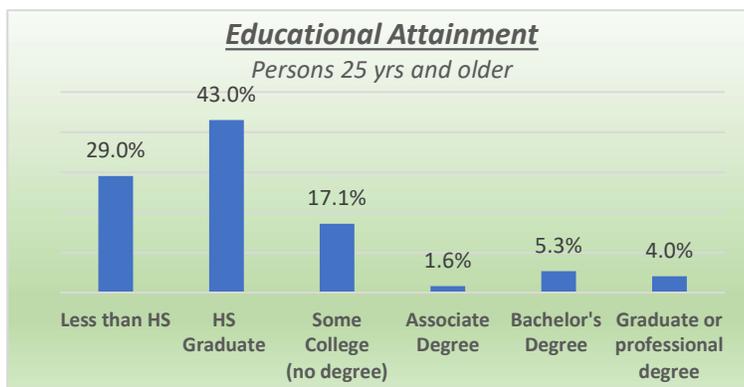

The available secondary data indicates primary causes of poverty in the county include:

- Lack of education,
- Poor economic conditions and lack of jobs paying a living wage,
- Lack of access to healthcare services,
- Generational poverty, and
- Substance abuse and addiction.

An indicator of generational poverty in the county is births to mothers with less than a high school education. Kids Count data indicates 15.5% of all births to Webster County residents were to women with less than a high school education (*Kids Count 2015*).

There were no attendees at the community discussion scheduled in Webster County; therefore, the secondary data cannot be further informed by the opinions of local residents from a local discussion that would have otherwise been available.

The unemployment rate in the county declined notably (3.3%) between August of 2016 and August of 2017 to 5.7% in August 2017, however, it is still above the state average of 5.4%.

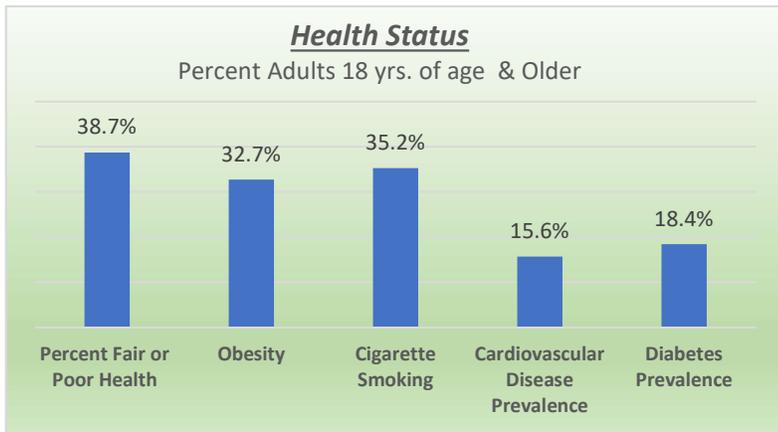

A very high percentage of Webster County residents 25 yrs. of age and older have no education beyond high school. 43.0% have only a high school education and 29.0% have less than a high school education. Only 9.3% of those 25 yrs. of age and older hold a college degree (*ACS 2015*).

Recent high school graduation rates in Webster County are comparable to other counties. The public-school dropout rate in

2015 was at 8.4% (*Kids Count 2015*), and the most recent 4-year cohort graduation rate is at 93.8% (*WVEIS 2016*).

Many more young people are also enrolling in higher education than was the case in the past. The 2016 college going rate in the county is most recently at 50.0% of graduating high school seniors (*WV Higher Education Policy Commission*); however, 11<sup>th</sup> grade reading proficiency is quite low at 35.1% and mathematics proficiency is 9.3% (*WVEIS 2016-17*).

The overall health status of the population and access to healthcare, mental health services, and substance abuse treatment also appear to be contributing factors to poverty in Webster County. 14.9% of the total population in Webster County is without any type of health insurance (ACS 2015). Obesity rates are at 32.7% among the adult population and more than one in three adults (35.2%) smoke (BRFS 2014). A high percentage of the adults 18 yrs. of age and older (38.7%) have fair or poor overall health.

There were 3 opioid-related overdose deaths in the county during 2015 & 2016, a rate of 3.5 deaths per 10,000 population (WV Health Statistics Center).

There were no infant deaths in the county during the most recent year when data is available (2014 Vital Statistics report); however, 10.0% of babies born to county residents are low birth weight (less than 2500 grams). The teen birth rate is high at 55.0 births per 1,000 females (Kids Count 2015).

### Community Needs

The survey was designed to identify overall areas of need in each county as well as the priority needs within each of the ten domains assessed.

#### Overall Needs and Priorities

In addition to the implications derived from secondary data sets about needs of low income people in Webster County, a total of 13 key informants completed the community survey. Survey results are presented here; however, the low number of survey participants in the county should be considered in drawing conclusions from the opinions expressed.

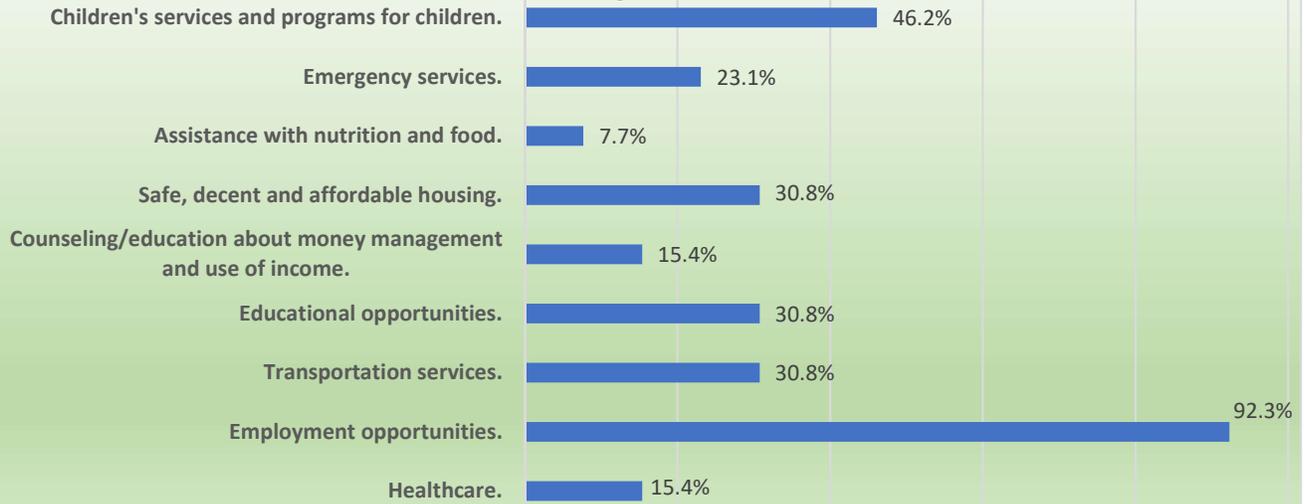

Webster County survey respondents were asked:

” What do you think are the top three areas of need of low income people in Webster County? ”

Employment opportunities was, by far, the most frequently selected area of need in Webster County. 92.3% of the key informants prioritized employment and jobs as one the greatest area of need in the county. Services and programs for children was identified as a secondary area of concern with 46.2% of the respondents indicating this domain is a high priority. Close to one in three of the limited number of informants also see educational opportunity, housing, and transportation services as priority areas of need for the county.

Given the isolation of the county, high rates of poverty, low incomes, and lack of “god jobs” in Webster County, there are few, if any, domains within the service system that are not areas of significant need.

**Overall Top Three Areas of Need for Low Income Persons  
in Webster County** N=13

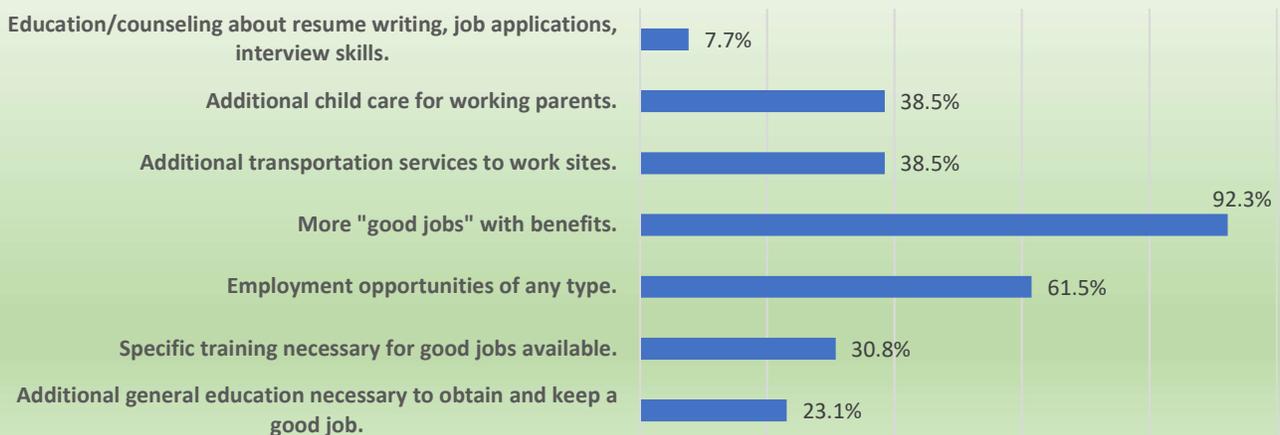

Respondents were also asked to identify what they considered to be the top three priorities within each of the assessment domains examined for the Community Needs Assessment.

*Employment and Jobs:*

Webster County survey respondents focused on development of employment options in the county as the greatest need related to employment and jobs. 92.3% prioritized more good jobs with benefits, and 61.5% indicated employment opportunities of any type were needed. Additional child care for working parents and transportation to work sites are priority areas of concern for 38.5% of the key informants.

**Webster County Needs - Employment and Jobs** N=13  
Percent Respondents Indicating Service is "Most Needed"

Based on the survey responses, the top priorities in Webster County related to Employment and Jobs are:

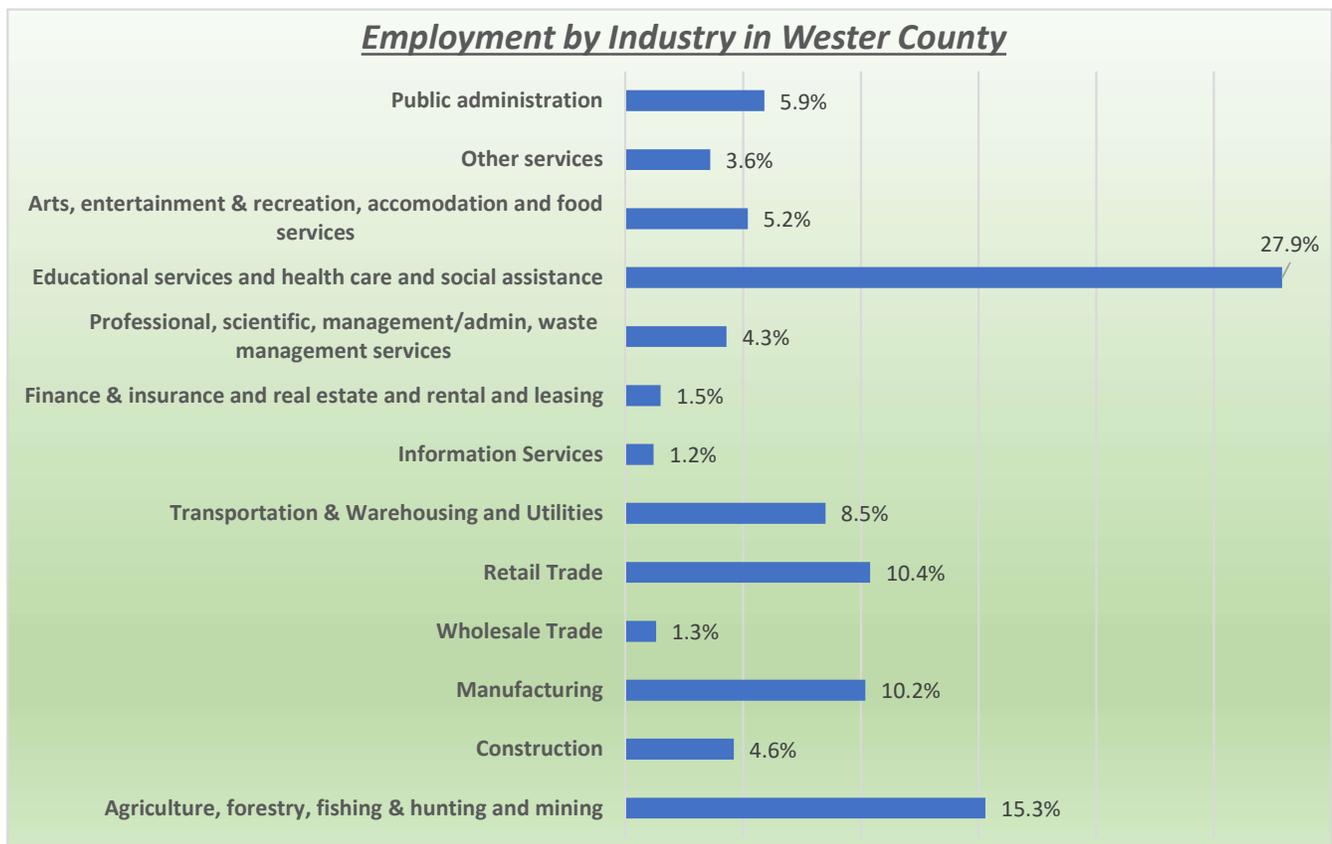

- More good jobs with benefits, and

- Employment opportunities of any type,

The highest percentage of persons employed in Webster County work in the educational, healthcare, and social service sectors. This industry accounts for 27.9% of all employment in the county. There are also a notable number of jobs in the agriculture forestry, fishing & hunting, and mining sectors where 15.3% of workers are employed (*BLS 2015*). 10.4% of employment in the county is found in the retail trade industry and 10.2% in manufacturing.

The largest employers in Webster County (in order of number of people employed) are:

- Webster County Board of Education,
- Webster Memorial Hospital,
- Brooks Run Mining, and
- Jim C. Harner Company.

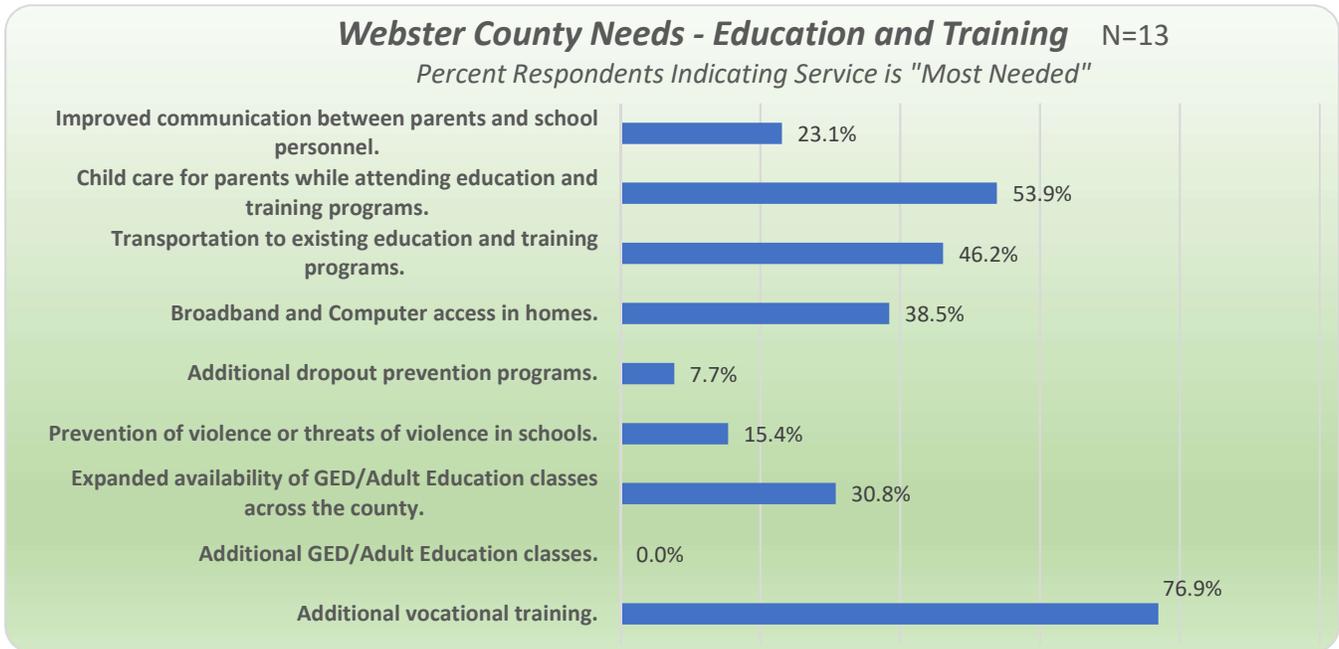

*Education and Training:*

People responding to the survey in Webster County identified vocational training as the most needed area within this domain. Most of the key informants (76.9%) indicated additional vocational training programs is a priority need in the county. Child care for parents while attending education and training programs was also seen by a majority (53.9%) of the key informants as a priority, and transportation to existing education and training programs was a priority for 46.2% of the survey respondents.

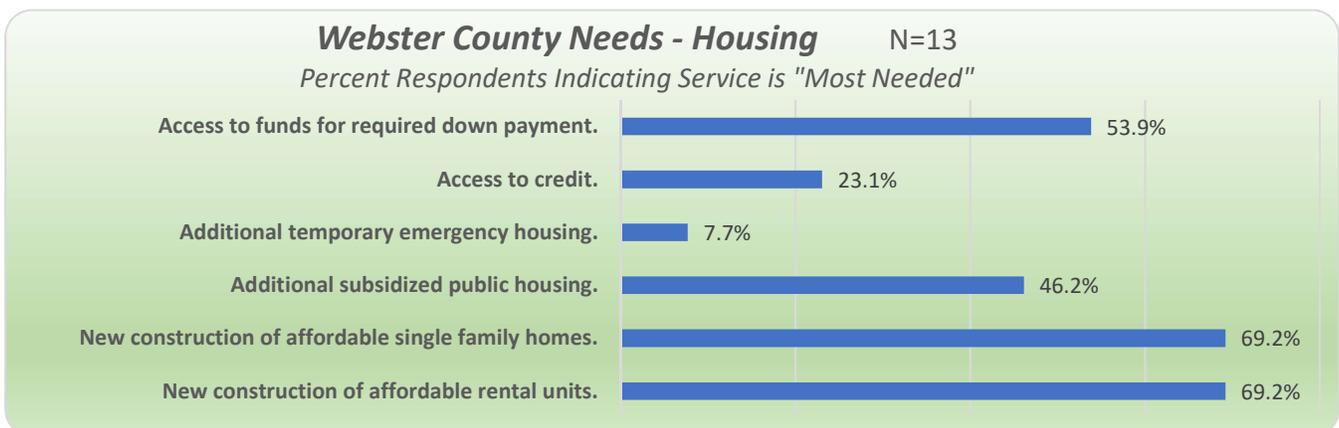

Based on the survey responses, the top priorities in Webster County related to Education and Training are:

- Vocational training programs,
- Child care during hours training programs are offered, and
- Transportation to education and training programs.

*Housing:*

When asked about needs related to housing, Webster County key informants prioritized new construction of affordable housing units. New construction of affordable single-family homes and new construction of rental units were both identified as areas that are a high priority within the housing domain. 69.2% of key informants see construction of single family home and rental units as one of the highest priorities related to housing.

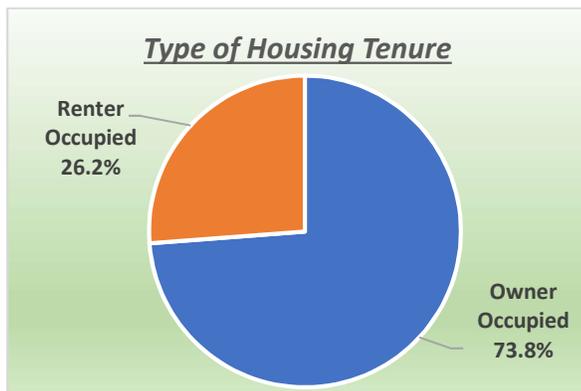

Access to funds for a down payment on a home was also prioritized by a majority (53.9%) and additional subsidized housing units was identified by 46.2% of the key informants as needed to assist low income people in obtaining housing.

Based on the survey responses, the top priorities in Webster County related to Housing are:

- New construction of single-family homes,
- New construction of affordable rental units,
- Access to funds for required down payment on a home, and
- Public housing that is subsidized.

The median age of housing units in Webster County is 42 years; and 14.2% of existing homes were built prior to 1940. As of 2015, there were an estimated 21 occupied homes without plumbing in the county (ACS 2011-15).

Secondary data sets reviewed indicate 73.8% of housing in the county is owner occupied, and 26.2% of county residents live in rental properties.

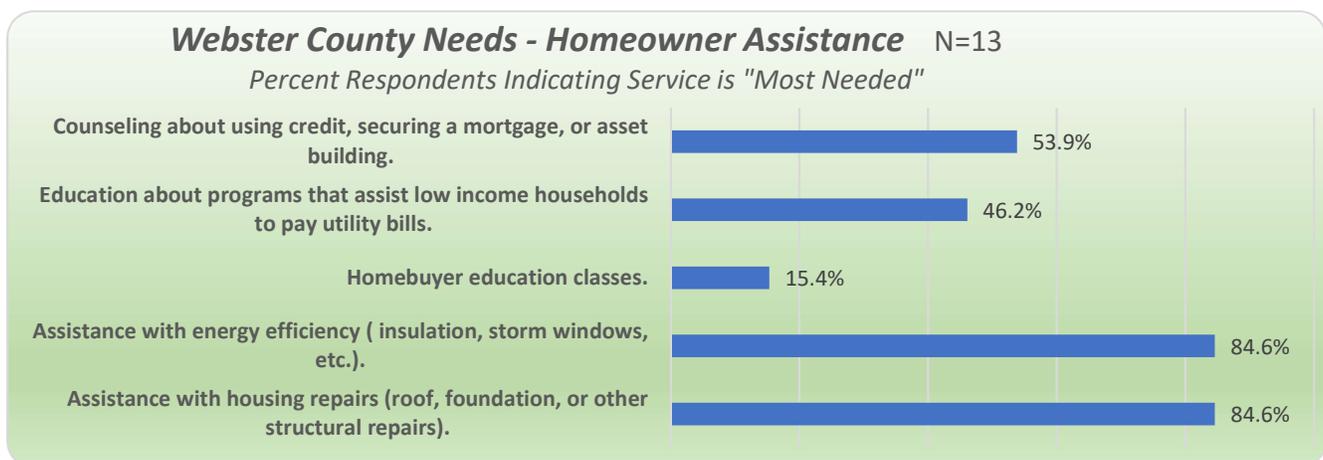

28.8% of homeowners are “cost burdened” with monthly housing costs exceeding 30% of income. Close to two-thirds of renters (63.3%) are cost burdened based on their gross rent exceeding 30% of the household income.

The median value of owner occupied housing in the county is quite low at \$64,000 and median monthly owner costs for those with a mortgage is \$697 (ACS 2011-15).

**Homeowner Assistance:**

People responding to the survey in Webster County identified assistance with home repairs and assistance with modification to existing homes to make them more energy efficient as the highest priorities within the homeowner assistance domain. 84.6% of the respondents indicated both home repairs and energy efficiency were high priorities in the county.

Counseling about the use of credit, securing a mortgage, and asset building are services that were prioritized by over half (53.9%) of the key informants as well.

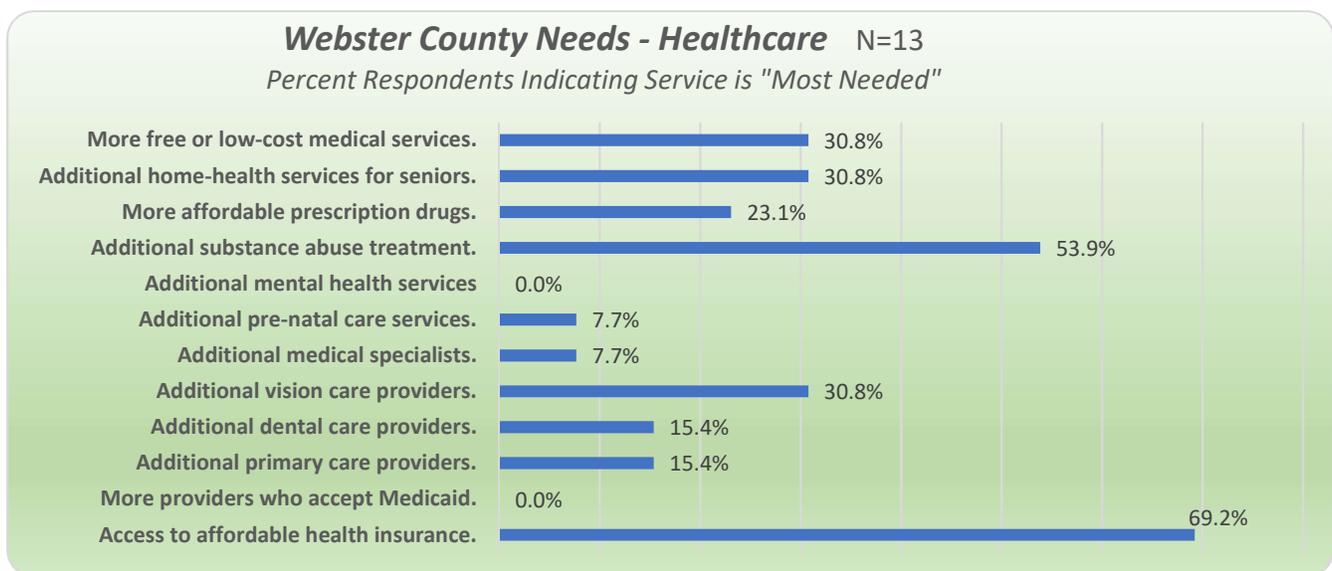

The top priorities in Webster County related to Homeowner Assistance are:

- Housing repairs,
- Assistance with improving energy efficiency of existing homes,
- Counseling about using credit, securing a mortgage, and asset building, and
- Information and education about available programs to assist low income households with paying utility bills.

*Healthcare:*

Affordable health insurance was identified as a clear priority by the key informants in Webster County. 69.2% of all survey respondents chose access to affordable insurance as one of their top three priorities. The second most identified priority by the informants was additional substance abuse treatment (53.9%). Additional vision care providers, home-health services for seniors, and access to free or low-cost medical services were seen as priority areas that need attention by 30.8% of the key informants.

The most frequently cited needs within the healthcare domain are:

- Access to affordable health insurance coverage, and
- Substance abuse treatment services.

*Nutrition:*

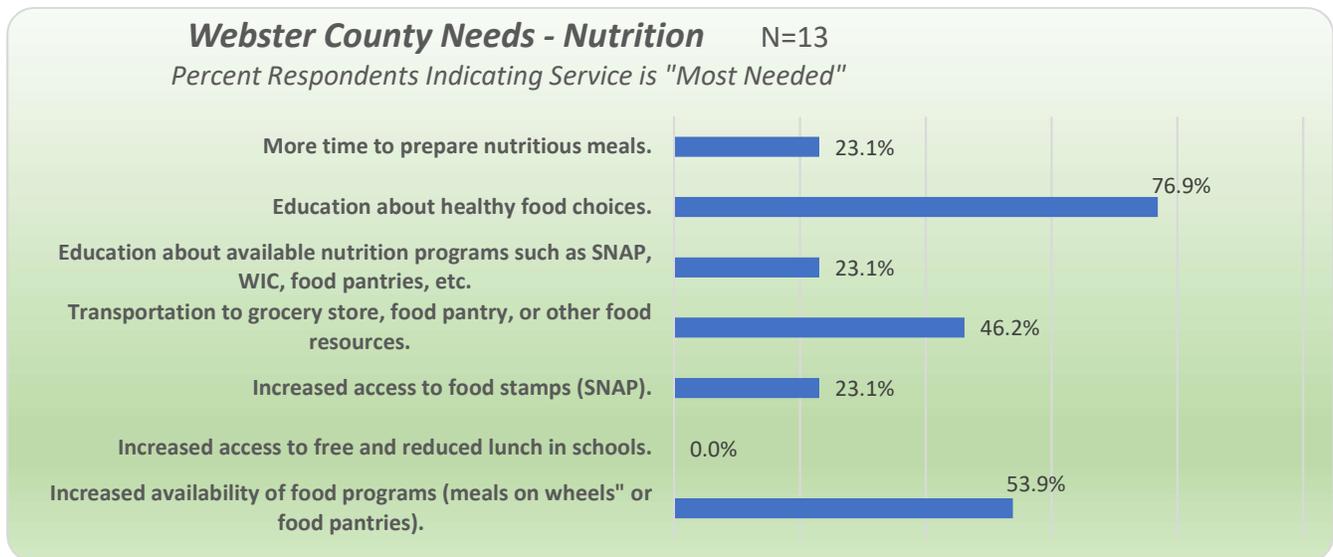

When asked about community needs related to food and nutrition, Webster County informants prioritized education about healthy food choices as most needed. 76.9% of the survey respondents chose this as one of their top priorities. A majority (53.9%) indicated there needs to be increased availability of food programs such as food pantries, meals on wheels or other programs to assist people in need of food.

The greatest number of key informants indicated the priorities within this domain are:

- Education about nutrition and healthy food choices,
- Increased availability of food assistance programs, and
- Transportation to grocery stores and/or supplemental food programs.

There are 4 supplemental food programs (food pantries, hot meal programs, backpack programs, meal delivery, etc.) serving Webster County (*WV Foodlink 2015*) and a high percentage (29.1%) of households

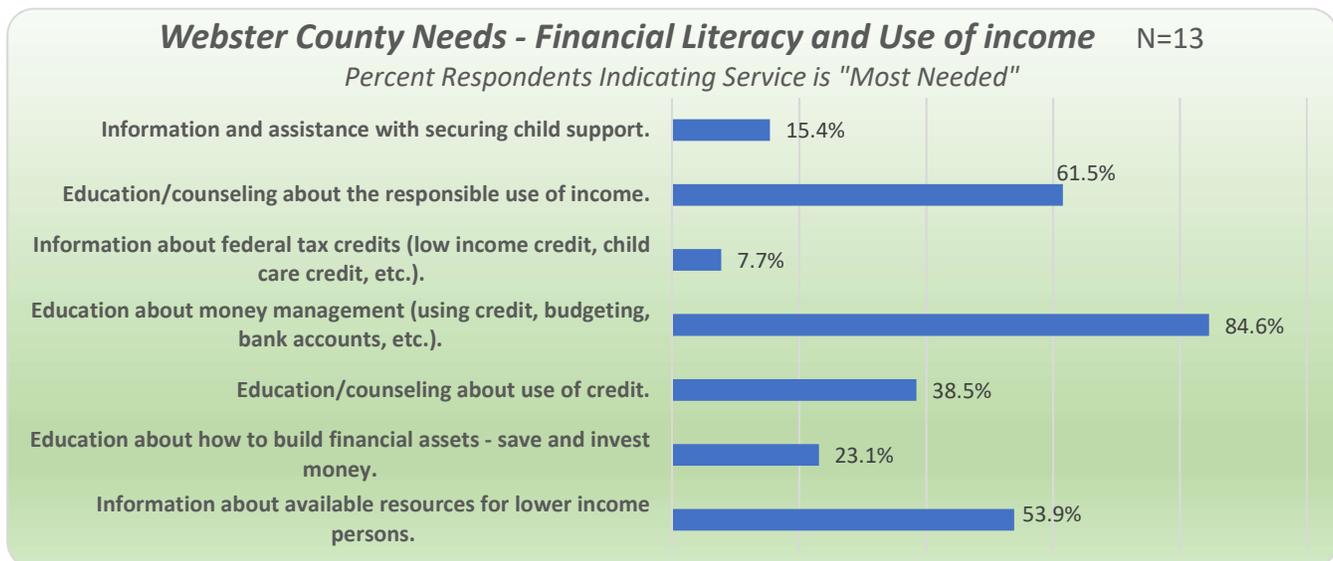

in the county receive food stamps to supplement their food budgets. The average number of families participating in WIC during 2013 was 260. The *WV Foodlink* County Profile for Webster County documents 13 retail locations that accept food stamps and 4 locations accepting WIC (2015).

The secondary data reviewed indicates nearly all school-age children were eligible for free and reduced cost meals at school in 2015. 1006 students were eligible and 71.0% of the eligible children and youth participate in the program (*WV FoodLink*).

*Financial Literacy:*

Key informants in Webster County prioritized three areas within the financial literacy domain that they think need attention. 84.6% indicated people in the county need to be better educated about basic money management such as using credit, family budgets, and opening and using a bank account. 61.5% of the survey respondents said people in the county need to be better educated about using what income is available in a responsible way, and 53.9% think county residents need better information about what programs are available to assist low income households.

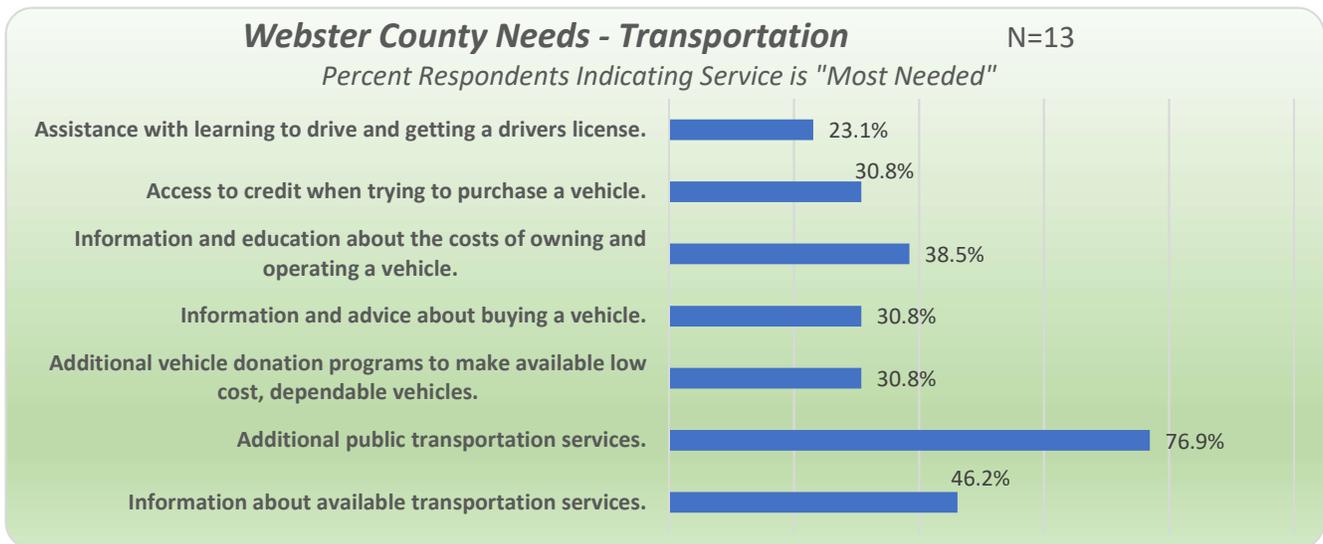

Priorities related to financial literacy and use of income include:

- Education about money management,
- Education/counseling about the responsible use of income, and
- Access to information about available resources for lower income people.

Available data from the 2015 FDIC Survey of Unbanked and Underbanked households indicates 7.3% of Webster County households are “unbanked” (have no checking or savings accounts).

*Transportation:*

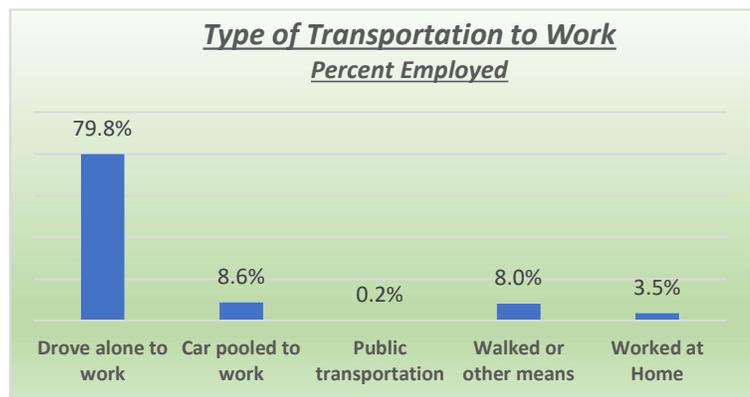

Development of additional public transportation services in Webster County was the most frequently cited priority by the key informants responding to the survey. 76.9% of all key informants identified additional public transportation services as a priority need in the county. Other areas related to transportation services the key informants said were most needed include better information about currently available transportation services (46.2% of respondents) and information and education about the cost of owning and operation a vehicle.

The highest priorities identified by the informants completing the survey within the transportation domain include:

- Development of additional public transportation services,
- Ways to better inform people about existing transportation services, and
- Education people about the costs of owning and operating a vehicle.

The mean travel time to work in Webster County is 27.0 minutes, and 88.4% of workers rely on private transportation to get from home to their work location.

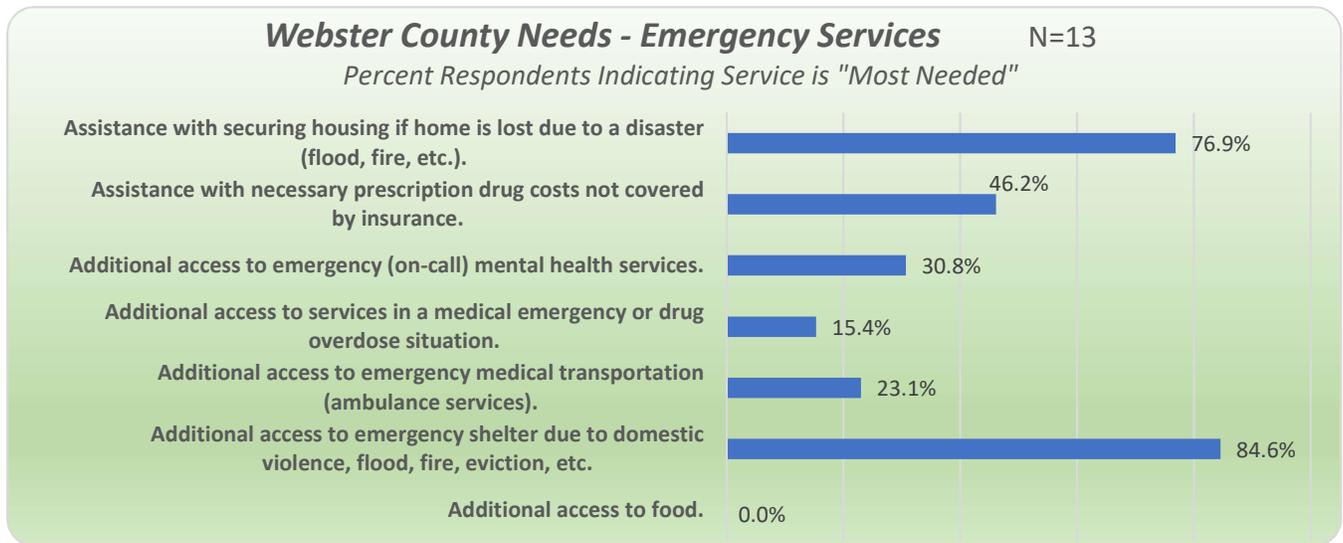

These workers either drive alone or car pool to work. 8.0% walk to work and 3.5% work at home. (ACS 2011-15).

Mountain Transit Authority provides transportation services in Webster County between Webster Springs, Diana, and Hacker Valley; and MTA also provides services that link Summersville, Craigsville, Camden, Circle Brook, and Cowen.

*Emergency Services:*

The most frequently mentioned priorities for needed services related to emergency situations include a need for access to shelter due to domestic violence, disaster, or eviction and assistance securing housing if a home is lost due to flood or fire. Most of the key informants prioritized these two areas as “most needed”. 84.6% of the key informants indicated access to shelter in domestic violence situations, eviction, or a disaster was needed in the county and 76.9% prioritized assistance with housing when a home is lost due to a flood or fire.

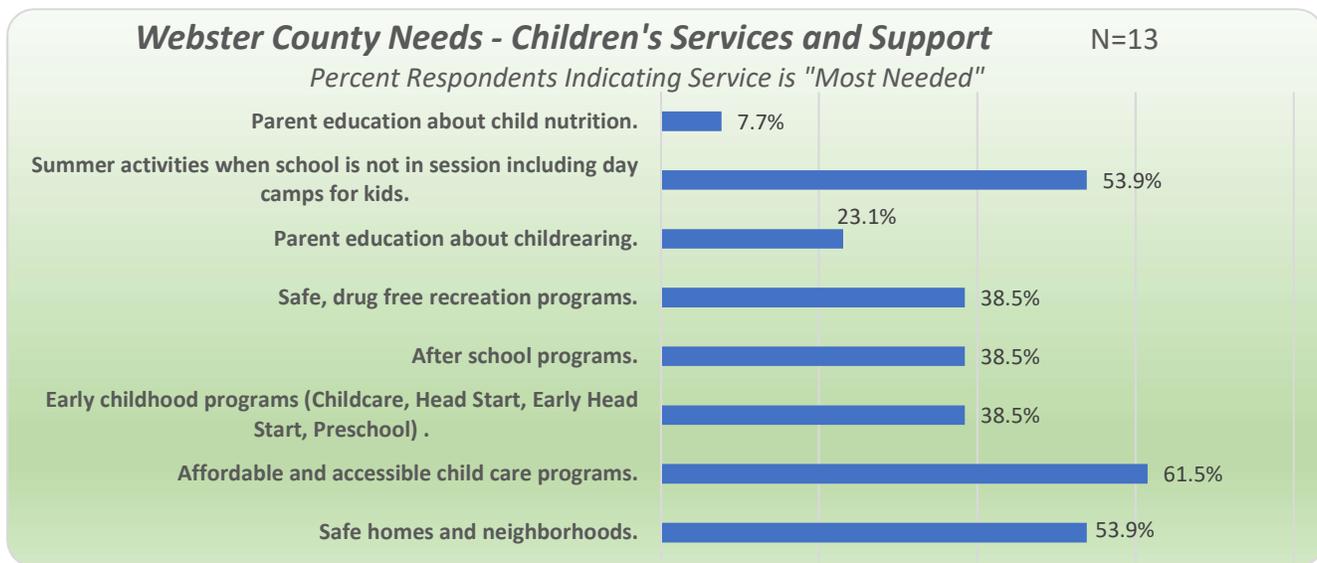

Based on the survey responses, two major priorities are identified in Webster County:

- Access to emergency shelter due to domestic violence, flood, fire, eviction or other circumstances, and
- Assistance with securing housing due to loss of home in a disaster (flood, fire, etc.).

Six (6) of the 13 key informants also indicated assistance with the cost of prescription drugs was a high priority need.

*Children's Services and Supports:*

Key informants selected affordable and accessible child care as the top priority need in the county – 61.5% prioritized this service with the domain related to programs and services for children.

Other priorities identified by just over a majority of key informants include the safety of children in their homes and neighborhoods, and summer activities when school is not in session.

The priorities identified in the area of services and support for children include:

- Child care,
- Safe homes and neighborhoods, and
- Summer activities when school is not in session including day camps for kids.

The child abuse rate in Webster County is quite high. The 2015 child abuse/neglect rate in the county was 65.7 per 1,000 children (Kids Count 2015) and there were 103 court filings in the county for abuse/neglect in 2016 which is 56.6 filings per 1,000 children (*Circuit Court case filings data*).

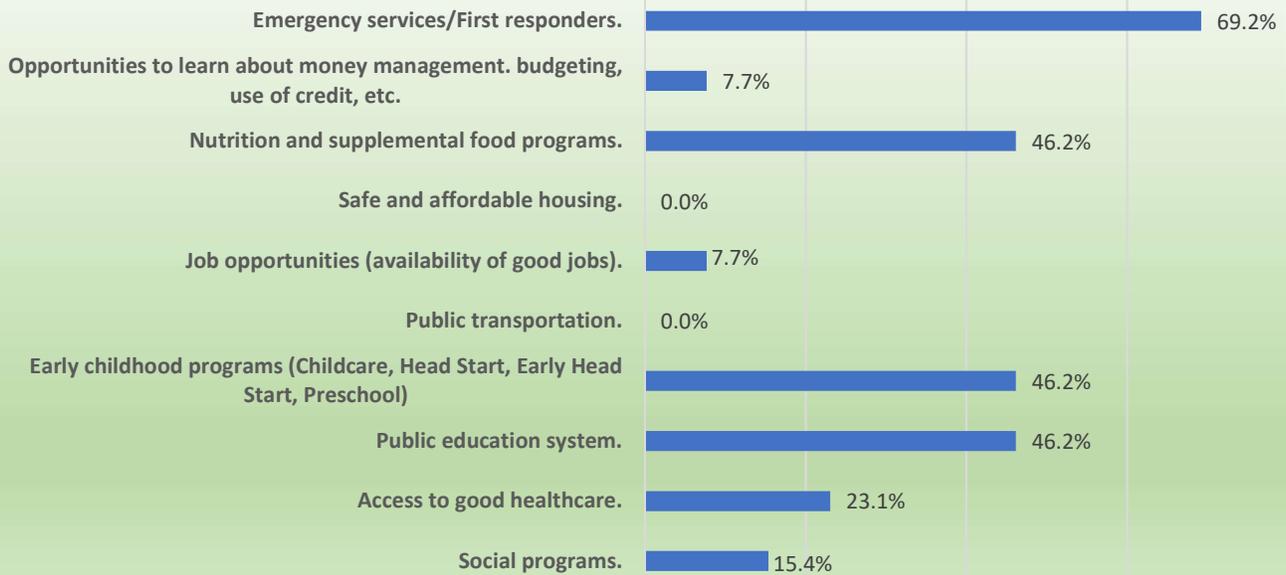

*Primary Strengths and Community Resources*

Survey respondents in Webster County were asked what they considered to be the greatest areas of strength within the county service system and they were asked to select all options they consider to be a “particular strength”.

Based on the opinion of the key informants, emergency first responder services are seen as the strongest component of the overall service system. 69.2% of the key informants indicated they thought emergency services/first responders was a “particular strength in the county. Close to half (46.2%) of the respondents to the survey also appear to feel early childhood programs including child care, head start, early head start, and pre-K programs; public education, and nutrition and food programs are relatively strong as compared to other service domains.

### Perceived Strengths in Webster County N=13

Percent Respondents who see service area as a "Particular Strength"

Other resources that address the needs of low income families identified within Webster County include:

- A range of public health services,
- Webster Memorial Hospital,
- Three Federally Qualified Health Center locations,
- Six institutional Medicare and Medicaid providers,
- Seneca Health services (behavioral health),
- Halfway house for persons in substance abuse treatment,
- Webster County Senior Center,
- *Right From the Start* program for Medicaid eligible pregnant women and infants,
- *Birth to three* program,
- *Parents As Teachers* program,
- Four banking locations,
- Three fire and rescue departments,
- Webster County Family Resource Network,
- Catholic Community Services,
- Three licensed child care centers,
- Webster County Starting Points Child Development Center,
- Local office of the WV Department of Health and Human Resources, and
- WVU Extension Service.

#### Head Start/Early Head Start Needs and Resources

91 children were enrolled in Public Pre-K programs during the 2016-17 school year and the Pre-K participation rate for 4-year-olds in Webster County was at 92% (*WV Dept. of Ed*). These 4-year-olds were served through approved voluntary programs operated by Head Start, public schools, and other early childhood providers.

For fiscal year 2017 (July 1, 2016-June 30, 2017) 58 children received Head Start services in Webster County. All children served through Head Start in Webster County were Caucasian, and no Hispanic children were served through the Head Start program in the county.

Two (2) of the Head Start children were in foster care and 1 child was homeless. English was the primary language spoken in the home of all Head Start enrollees. During calendar year 2017, annual program attendance and enrollment totals in the Tucker County Early Head Start program was at 106.4% of available program slots.

Early Head Start services only began to be provided late in 2017.

#### Head Start Needs Projections for 2018-19 program year

There are 71 four-year old children and 69 three-year old children projected to be eligible for Head start services with the largest numbers located in the Cowen area. The number of eligible children continues to decline; however, the number of eligible children projected for the county would likely support the continuation of Webster Springs I and II Pre-K and Glade Elementary I Pre-K, 3 classrooms operated by the Webster County Board of Education (WCBOE) and Glade Elementary II Pre-K operated by NCWVCAA Head Start.

The Webster County BOE operates another Pre-K classroom at Hacker Valley Elementary School which is a combined Pre-K and Kindergarten classroom. Head Start children are not counted at this site. The Starting Points Child Care Development Center, located in the Glade Elementary School, chose not to partner with the WCBOE to serve Universal Pre-K children in PY52 due to the sparse number of children that the childcare would have served. No announcement has been made as of date (January 2018) about the future of this partnership for PY53.

A new (WV) legislature law requiring children to be 4 by July 1 instead of September 1 will leave a lapse of nineteen (19) children turning 4 in those two months that will not be age eligible for Universal Pre-K this upcoming school year. Of the nineteen, six (6) children are in the Webster Springs area, two (2) in Hacker Valley, and eleven (11) are in the Cowen area that will be impacted by this age eligibility date change.

Information for the demographic maps were also gathered from existing family information, recruitment cards, birth announcements in newspaper, referrals from the BOE for Birth to Three, family response that have seen posters in community, and families who have obtained contact through the Internet.

#### EHS Needs Projections for 2018-19

Webster County has 78 prenatal to one-year and 52 two-year old children projected to be eligible for Early Head Start. Even though these numbers show a slight decrease of children two-years of age and under including prenatal, the number of eligible children projected in the county suggests continuing support of the current Early Head Start Home-based program located in Cowen where the largest number of children are located. With the availability of the NCWVCAA HS/EHS owned modular unit in the Cowen area, these numbers also support the consideration of a center-based option.

### Services Provided by NCWVCAA

The characteristics of clients served, and the types of services previously provided in Webster County by NCWVCAA provides insight into eligible people and their needs. Only Head Start and Early Head Start services are provided by NCWVCAA in Webster County. When all families served are considered, data was collected for a total of 564 persons during calendar year 2017. 273 of the persons served were male and 291 were female. 98.2% of all persons receiving services were White, 1.1% were Black, 0.4% were Multi-racial and the remaining 0.3% were of other races. Those persons of Hispanic ethnicity made up 2.1% of the persons served in 2017. The median age of all persons receiving services from NCWVCAA was within the 6 to 11 yrs. age group.

64.7% of all families where income data was collected have annual income below the federal poverty level. One (1) person for whom data was captured lacked health insurance and 14 (2.5%) are disabled.

The most numerous types of outcomes achieved through services provided in Webster County include:

- Infant child health and physical development maintained or improved,
- Infants and children obtained immunizations, medical and dental care,
- Children participate in preschool activities to develop school readiness, and
- Children are developmentally ready to enter kindergarten or first grade.

<b><u>Open Ended Comments - Barbour County</u></b>
<b><u>Employment &amp; Jobs</u></b>
Perhaps more affordable child care options for lower working class is more appropriate than selecting just 'additional'.
Focus on training for trade jobs, i.e. masonry, welding, plumbing, electricians, etc.
Drug and alcohol addiction help.
<b><u>Education &amp; Training</u></b>
More teachers---above the state minimum!!!
<b><u>Homeowner Assistance</u></b>
Assistance with refinancing and mortgages
<b><u>Healthcare</u></b>
More evening hours clinics for working people
Closer and better hours of medical service.
<b><u>Greatest Needs</u></b>
Drug prevention

<b>Greenbrier County</b>

<b><u>Open Ended Comments - Webster County</u></b>		
<b><u>Housing</u></b>		
Increased availability of existing dwellings. Many sit empty due to being for sale or other reasons.		
Jobs to have funds to buy a home		
<b><u>Nutrition</u></b>		
Increased access to affordable healthy choices		
Increased snap benefits in order to afford nutritional foods		

More programs like WIC, which is a program that promotes the purchase of healthy foods. Also, educational classes on how to make wiser, healthier food choices and educational classes on how to make food dollars go further by buying foods such as potatoes, beans, eggs, etc.
Healthier and more varied food choices available at competitive prices in local grocery stores.
All these could be accessed, if there were more employment opportunities.
<b><u>Transportation</u></b>
Education about the repercussions of drinking and driving.
<b><u>Strengths</u></b>
Caring people, community agencies

## Appendix B – Summary of Community Discussions by County

### Barbour County Community Discussion Responses

#### Question #1: What is your vision for the ideal future of your County?

- Drug abuse under control or non-issue
- We would have a homeless shelter
- More job opportunities
- Competitive pricing for county businesses
- Better infrastructure-better roads
- Options and better restaurants; we don't have enough people to attract large chains
- Entertainment & activity options
- Aesthetics; more storefront and downtown improvements
- More family friendly areas; if someone could monitor our recreational areas such as Audra, Arden, etc.
- Large event; craft show, etc. to draw folks in
- There would be more media

#### Question #2: What are the priority needs for your County to achieve this ideal vision?

- Money, funding, grants
- For someone to own or take responsibility of the problem
- A politician or leadership level “champion”
- We need a larger company or chain to take a chance on our county
- Jobs that provide living wages
- Technology needs to improve
- The infrastructure needs to improve; broad band, roads, etc.
- A platform (media or print) to showcase what we do have and do offer here
- More education and rehabilitation programming; short and long term
- Transitional housing; sober living homes
- Localized higher-level health care
- More support for mental illness

#### Question #3: What are the greatest strengths/assets of your County?

- The community; the people
- Diverse and accepting people
- Natural beauty; river
- History
- Blue and Gray Festival; 1<sup>st</sup> Land Battle
- The college; educational options
- Agricultural programming
- Easy to get to larger cities
- We have here and there transit
- Plans to improve airport
- County leadership improved
- Community organizations work together

- World Vision Appalachia is located in the county; they hire local and help families and churches

**Question #4: How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...**

- Not having enough to make “ends meet”
- Not able to meet all of their own basic needs
- Having to ask for help on a reoccurring basis
- Our education system does not prepare kids to succeed without leaving the area
- Lack of gainful employment opportunities
- Addiction stigma; inability to escape or move forward
- Judgement and stigma
- Mental health needs; consistency in management
- Learned or generational dependency

**Question #5: What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?**

- More awareness and participation of inter-agency meetings
- More encouragement to get or be involved
- The community hold elected officials accountable
- Invite the news to attend meetings to raise awareness
- Transparency
- We could dispense or delegate responsibilities with group accountability built-in
- Other folks or critics need to actually engage in being a part of a solution
- Call instead of email; folk can’t claim ignorance
- Post or create an agency Facebook page or post minutes or attendees of the inter-agency meetings

**Greenbrier County Community Discussion Responses**

**Question #1: What is your vision for the ideal future of your County?**

More of:

- Job opportunities especially for college graduates
- Sense of community
- Walkable communities, recreation opportunities
- Sustainable social programs
- Traditions kept alive-festivals, folklore, etc.

Less of:

- Opioid epidemic
- Health concerns
- Inaccessible healthcare
- Inaccessible healthy food options

**Question #2: What are the priority needs for your County to achieve this ideal vision?**

- Broadband access
- Affordable housing
- Intergenerational learning/teaching opportunities
- Transportation
- Agricultural development
- Communications strategy for resources
- Affordable healthcare
- Health insurance policy review
- Improving health literacy

**Question #3: What are the greatest strengths/assets of your County?**

- People who care
- Natural beauty
- Arts & humanities
- Tourism destinations
- Outdoor pursuits (caves, trails, fishing)
- Proximity to metropolitan areas
- Airport/train
- Culinary scene
- Ecumenical community
- Nonprofit community-executive directors meeting
- WVSOM/NRCTC
- VA clinic
- Head start/pre-k
- WVNPA
- GVCVB
- Mega business expo

**Question #4: How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...**

Poverty is...

- Hidden
- Widespread
- Generational
- Systemic/cyclical
- A way of life

Contributing Factors

- Low financial literacy
- Family dynamics
- Lack of experience/worldview
- Addiction & surrounding stigma
- Mental healthcare stigma
- Lack of education

- Poverty mindset

**Question #5: What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?**

- Communication in order to leverage resources
- Annual community strategic planning initiative; make a smart plan; set goals
- Accountability (breaking the silos)
- Collaboration
- Mindset change-service above self
- Simplify barriers to resources
- Centralized distribution point for info (Greenbrier County Health Alliance?)

<b>Marion County Community Discussion Responses</b>
---

  - HEMP resources
  - Recruit industry
- Cultural change
  - Attitudes; don’t compete with Morgantown
  - Attract younger group
  - Civic involvement
- Focus on county as a whole not just Fairmont
  - Police/fire Metro County
- Transportation
  - Outlying areas
- Leadership
  - More involvement
  - Diversity
  - Peoples Academy

**Question #3: What are the greatest strengths/assets of your County?**

- Head Start
- Church support (street store)
- Food pantries (soup Apra)
- Homeless shelters (Mission and Scott’s Place)
- Emergency assistance
- Potential for Red Cross to come into the area

- Higher education
- Variety of restaurants
- Empty houses
- Connector from the interstate
- Assisted living opportunities
- Fairmont Regional Hospital
- Dentist/doctors available
- Airport accessible (affordable)
- Wave Tech (community pool)
- Parks for children
- Morris Park (Christmas Lights)
- Land-waterfront area
- Connector-walking area
- Topography
- People can \*organize/interest
- University/Technical college - Students
- Active Main street
- Active Coalitions
- Council
- Education/schools; Vo-Tech Center
- Small business development
- Parks/REC
- Trails system
- Prickets Fort
- Access to health care
- Sustained population

**Question #4: How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...**

- Hardships (health) put people in poverty (situational poverty)
- Lack of opportunities
- Higher education is expensive; leads to poverty
- Entitlement of making more hourly than available leads to denying employment and living in poverty
- Different levels of poverty
- Mindset/lack of life skills
- Natural disasters lead to poverty
- Generational poverty (learned)
- Homeless shelters (similarities0drug use)
- Life choices lead to homelessness/poverty (some people do not want to be substance free)
- Dying communities with no opportunities
- Generational
  - System assistance cut off when participants get low wage
    - Knowledge to get out

- Disability; doesn't cover living expenses
- Situational
  - Drugs
  - Transportation
  - Child care
- Access to health care (birth control)
- high premiums
- Employment
  - convictions; backgrounds; drug use;
  - low paying jobs
- Lack of support system
- Student loan debt
- Access to higher education from outlying counties
- Reduced grants
- Money management skills
- Credit rating (separate medical debt) interest loans

**Question #5: What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?**

- Detailed guide on emergency assistance explaining what is needed at each place
- Open referral system
- Centralized intake
- Better knowledge of resources within the area
- Community resources working better together
- More compassion; less judgmental with homeless
- Common sense exceptions
- Knowledge to know
- Communication
- Education
- Maturation to better themselves/others
- Less talk; more action
- Less restrictions on paperwork for federal funding to allow time to do what benefits the community
- Central referral one stop shop
- Related services housed together
- Continuity of services
- Stronger network system
- Church
- Comprehensive road map (flow chart)
- Small business
- Offer discount day
- Offer employment
- Public leadership

- Funding
- Sell me value of coming together
- Go to the funding source
- Collaborate

## Monongalia County Community Discussion Responses

### **Question #1: What is your vision for the ideal future of your County?**

- Continue growth within the county
- Good housing
- Better infrastructure; bike lanes, walkable communities, city boundaries that make sense, less volunteer fire department
- More integration to western end of county
- More family friendly downtown
- More use of waterfront downtown
- Affordable family activities
- Youth activities; affordable
- More activities for children with disabilities
- Better transportation; public; later/extended hours
- More homeless shelters
- Better collaboration with WVU in regards to affordable family participation (WVE games)
- Childcare-affordable; more centers, infant care
- Separate student housing and family housing
- Traffic/road congestion; collaboration with DOH, County, WVU
- Decrease substance abuse/accessibility

### **Question #2: What are the priority needs for your County to achieve this ideal vision?**

- Money/funding
- Collaboration; money will go further; how do you get people involved; educate the community
- Substance abuse facilities; treatment options; more mental health facilities; less stigma
- Buy-in from elected officials
- Collaborate with social services
- Better engagement within the community
- Better engagement with law enforcement
- More transportation; accessibility; affordability
- Long distance transportation needs
- Tax/financial incentives for organizations who tackle social services.

### **Question #3: What are the greatest strengths/assets of your County?**

- Economic growth
- Diverse population
- WVU
- Healthcare facilities; hospitals; future Children's Hospital
- Giving community

- Rail trails
- Public transit system
- Strong BOE; positive education system
- Location; accessibility/proximity to larger cities
- Safe communities
- Active neighborhood association
- Social service collaboration
- Strong Chamber of Commerce
- Industry jobs; entrepreneurship
- Low taxes compare to other areas
- Local airport
- Education opportunities
- Large talent pool; replenish talent pool

**Question #4: How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...**

- Income
- Inability to meet basic needs without help from social services
- Situational
- Rural
- Not always obvious; visible
- Working poor; systemic; lose benefits if income increases
- General public poverty is hidden
- Pockets of poverty
- Lack of affordable housing
- Substance abuse
- Affordable child care
- Generational poverty
- Health care
- Divorce/family separation
- Change in industry
- Job loss
- Mental health
- Death/illness
- Education/student loans
- Poverty mindset
- Bad/poor choices; instant gratifications; chronic stress
- Mental health

**Question #5: What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?**

- Community forums
- Food accessibility; more discussion around food insecurity
- Better collaboration among agencies

- How do people focus on problem solutions
- All players come to the table and give up credit
- Shift in city officials/council
- Difficult for agencies to collaborate because of restrictions within their agencies
- Need for common sense presumptions
- Who's riding the regulations??
- Strategic plan; sector base
- Coalition of homelessness; strong collaboration and evolving
- Collaboration without ego
- Ongoing reflection and evolution

## Pocahontas County Community Discussion Responses

### Question #1: What is your vision for the ideal future of your County?

- Activities for kids
- Education
- Parent use/child use-break cycle-drugs

- Vocational classes for out of school/adults in county
- School-career education-\*community needs to know provided
- Additional opportunities & better decision making
- No transportation to any available jobs such as at Snowshoe
- Internet access, high speed
- More action, less talk

**Question #3: What are the greatest strengths/assets of your County?**

- People
- Resilient
- Hard working people; certain generations
- Natural resources
- Tourism
- Volunteer fire & rescue depts.
- Food banks
- North Central Community Actions
- Partnerships
- Schools are willing to allow speakers to come in talk to children
- Churches helping community
- State parks in county
- Retirement community
- The people
- Tourism- but this doesn't provide jobs to our local residents
- Timber
- Lack of keeping an open mind of opportunities

**Question #4: How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...**

- Job lacks
- Lack of skilled labor/training
- Motivation
- Cultural shift within the county
- \*hopelessness (“is there anything here in this community for me”)
- Lack to believe we \*can do it
- Get confidence back
- People want to stay in the system- cycle continues through generations
- Nothing in the community to do like bowling alley/movie theater
- Communication needed through community & kids
- Lack of money, lack of resources
- Not being able to work/lack of opportunities
- Lack of jobs
- Lack of transportation
- Living beyond your means
- Parents living on SSDI

- Lack of knowledge

**Question #5: What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?**

- More communications between all entities to let the county/community know what's provided
- Some organizations don't want to share
- Create a community group-open discussion; no right or wrong answers
- Lack of accountability when questions about program
- Community meetings
- Transparency meetings
- The voices of the common person are not being heard
- Lack of accountability

**Preston County Community Discussion Responses**

**Question #1: What is your vision for the ideal future of your County?**

- More opportunity for prosperity for citizens
- Services; transportation, affordable childcare
- Treatment center
- Homeless shelter
- Living wage employment opportunities with benefits
- Change of mindset in the county
- Lack of infrastructure and opportunities
- Lack of options for youth; lack of programs
- Recreational activities that don't cost to participate and lack of transportation to get them to and from; cost of transportation (mileage), food, lodging
- Issues with nutrition in county; need more healthy food
- Change mindset of how to get kids healthy and active
- Need more parent involvement
- Give kids more potential opportunities to achieve
- Need life skills
- Needs Boys and Girls Club for county; opportunity for development
- Patch Program is a great model for youth program
- Address drug situation; need mentoring and support groups
- Need more than 30 day programs for drug and alcohol treatment
- Other counties have used yoga and mindfulness for treatment and non-prescription related treatment; mind, body, and soul
- Incorporate yoga into school system
- Big business and corporations don't come to the county; we need a better way to start home business and to think differently and educate the community on what micro businesses are available. Mindset change

**Question #2: What are the priority needs for your County to achieve this ideal vision?**

- Get past the sectionalism

- Get more transportation options; that is easy to access
- Home business; educate to be an Uber driver to improve quality of community
- Lack of high speed internet
- Longer library hours to access information; computers, internet, Wi-Fi
- New mindset (elders)
- Market ourselves; more marketing
- Water access is an issue; infrastructure
- New hospital lost beds from old building to service
- Funding; financial capacity
- Community leadership to assist in getting things for the county
- Community outreach mindset
- Political care more about the dollars; certain mindset about why people are living in poverty
- Stereotypes of rural counties (opioid crisis, obesity, etc.)
- What can we do for our future; move forward, don't live in past
- Leadership of state government to improve; make good changes
- Career closet
- Free haircuts, etc
- More reasonable rent/leasing agreements
- Need more dental care programs and services
- Community Bank micro loan program
- Barter system- to take you must give something back
- Sweat equity
- Empowerment
- Budgeting class

**Question #3: What are the greatest strengths/assets of your County?**

- Beautiful! More parks/rec areas; utilize natural beauty/scenic
- Good people; hard working, prideful peopling, caring
- Schools in communities only used during school days; need to utilize the “night shift”—home based business 24 hour use
- Senior citizens; educational opportunity to utilize those in each community
- Night classes at schools to further education; youth CTE program in school; teach already to cook
- Tucker Community Foundation Reports; elderly need to find places to leave estates to due to lack of family; could assist with legacy planning
- Career Closet-to \*market need
- Networking to provide services and resources
- Lots of building that can be utilized
- Have Smile Program that goes to schools to provide dental care to kids; Wilson Martin provides services, too
- Churches spending a lot of money to assist families with utilities, etc.

**Question #4: How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...**

- Poor decisions
- Inability to survive
- Generational mentality; all they have known; family culture
- Medical issues; situational poverty
- Some don't value education
- Some family encourage kids to do poorly on assessment tests to get more money for showing lower IQ; poverty mindset
- Systemic drivers to poverty; over a few dollars and don't qualify then
- Keeping people in poverty; welfare pays too good
- Incentivizing poverty
- Don't utilize medical to prevent and sue benefits properly; overuse of ERs instead of family provider
- Don't education and no way to penalize for misuse of medical
- Lack of accountability
- Lack of resources
- Lack of jobs
- Stereotypes; due to last name, etc.
- Keep "clans" together; not a goal to do better; clan mentality
- Cultural conformism
- Lack of child care and too expensive
- Addictions
- DVs; abuse
- One person can make a difference
- Loss of employment
- Death
- Divorce
- Weather conditions
- Unexpected bills and expenses
- Working families living pay day to pay day
- Utilities; can't or don't pay and expect other to pay for them
- Entitlement mentality; use the system
- What are we teaching; need to educate to do better
- Lack of culture; something to aspire to

**Question #5: What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?**

- Get all them in same room-show up!
- Commonality
- Interagency collaboration-one location to share information and resources accessible to all
- County wide calendar for events, etc.
- Resource fairs for county; interactive to share resources to spread to different areas of the county; good outreach
- Work with school journalism classes to promote and provide good information and resources
- Focus on outcomes and not outputs

- Shorter timelines to accomplish; SMART goals
- Expanding education; internet
- Public leadership to help achieve goals to expand progress and achievements
- Apprenticeship and Internships; paid or unpaid or stipend to help build a resume to empower and skill build
- Research to see what is available

## Randolph County Community Discussion Responses

### Question #1: What is your vision for the ideal future of your County?

- An industry that does not have a negative impact on the environment
- A safe community with less drug use/substance abuse
- Employers with livable wages
- Progressive school environment
- Better early childhood options (before pre-k)
- Activities for youth with no cost
- Scholarship knowledge
- More widely known resources
- Limited transportation is a barrier
- Positive mentoring; Big Brother, Big Sister to come back
- Childcare with flexible hours
- Upgrade to Uber
- Programs having lower barriers to entry and being able to dig deeper
- Guided tours to the natural environment
- Welcoming to everyone in faith based organizations; accepting non-judgmental community
- Increased participation in faith based
- Centralized intake

### Question #2: What are the priority needs for your County to achieve this ideal vision?

- Funding
- Grant writers
- Cooperation
- Drug free work force
- Broken silos
- Government officials who are serving the people
- Vocational training
- Treatment center for substance abuse
- Expand on Youth Build
- Reliable/flexible transportation
- Livable wage
- Educational system needs more flexibility to address community needs
- More collaboration and opportunities
- Improved healthcare opportunities
- Emergency assistance increase

- Silos to pull resources

**Question #3: What are the greatest strengths/assets of your County?**

- Caring community
- Elkins Make It Shine Program
- Ability to be a part of a community
- Natural resources
- Garden Club (good community organizations)
- Local churches
- Faith community present but could be stronger
- A lot of tourism (Warner Brothers Train, aka Polar Express)
- Unique downtown area
- Restaurant (mom & pop, wide variety)
- D & E (higher education available)
- Diverse
- Private air strip

**Question #4: How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...**

- Levels of poverty (working poor vs. very poor)
- People that make too much for assistance but not enough to survive
- People that are working and not making a livable wage
- Basic needs are not being met
- Emergency assistance cuts are difficult
- Homeless population
- Substance abuse, addiction, and mental health
- Distrust of system
- Functional poor (those how know how to work the system)
- Stigmas
- Pride and fear of judgement
- Physical illness
- Accessible training for local job opportunities
- Learned/generational/situational poverty
- Poverty mindset (why try?)
- Systematic issues (lack of common sense)

**Question #5: What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?**

- Nonjudgmental mindset
- More family centered agencies
- You “can’t do that” because of funding issues
- Honesty and transparency
- More action, less talk
- Sharing of resources among silos

- Creativity
- Prioritizing
- Red tape needs removed
- Resources not well known
- Clear expectations of what is needed at each agency
- Create centralized intake
- Accepting referrals (open referrals)
- Setting realistic expectations

## Taylor County Community Discussion Responses

### Question #1: What is your vision for the ideal future of your County?

- Drug free
- Lessen the abuse and neglect
- Revitalize the downtown
- Transportation; public accessible and affordable
- Housing
- Develop jobs
- Make the rural areas more sustainable and accessible
- More parental support and training
- More community events for families
- Restore historical buildings
- More free gardens that are accessible
- Invested community
- Adult training
- Shelter and programs for homelessness
- Less/no crime

### Question #2: What are the priority needs for your County to achieve this ideal vision?

- Money
- Community support
- Volunteers
- Shift in mindset
- Habits vs. wisdom
- Elected officials involved in day to day stuff
- Adjusted priorities
- Transparency with officials
- County leadership including Board of Ed
- Drug court and drug education
- Mental health awareness, education and support
- Diversity
- Substance abuse outreach program
- Effective advertising
- Marketing plan; strategic plan

- Self-sustaining to keep activities going

**Question #3: What are the greatest strengths/assets of your County?**

- Sense of family-supports
- SEC room
- State park; lake, boating, camping, swimming
- Mother’s Day Shrine and Anna Garvis House
- National cemeteries and Memorial Day Parade
- Flemington Elementary School-gets awards
- Library resources
- Senior center
- Sporting areas/equipment
- Many festivals
- Arts Council; All Aboard Grafton
- Helping Agencies; Community Action, Catholic Charities, Salvation Army, etc.
- Central to 3 developed employment areas
- Land
- The unused building
- Historical Society
- Swimming pool
- Update parks for kids
- Food pantries
- Leer Mine
- Groups willing to do fundraising
- Churches; many children and youth programs
- Bread of Life Mission provides hot food 1 time a day

**Question #4: How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...**

- Cannot meet basic needs; housing, transportation, food, education, employment
- Lack of employment opportunities
- No housing that is affordable
- Born-physical and mental abilities, substance abuse, generational
- Lack of affordable transportation; no safety net
- Lost job, trauma, divorce, death, natural disasters, injury
- Systemic; lack of training, education and tutoring
- Lack of facilities for what is needed
- Drugs; substance abuse
- Criminal record
- Personalized education
- Juggling services to not lose benefits they have
- Unrealistic policies that do not allow them to gradually transition off services while slowly decreasing services

**Question #5: What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?**

- Policy updates to match reality
- Public and county leadership more engaged
- Genuinely care
- Personal investment
- Not confusing activity with achievement
- De-systematize
- Re-visioning

**Tucker County Community Discussion Responses**

**Question #1: What is your vision for the ideal future of your County?**

- Jobs with livable salaries
- Completion of corridor H
- Healthcare and insurance for all
- Affordable housing (both purchase and rental) for locals and people coming in –also ADA accessible
- More cultural events
- Better internet access
- Better shopping opportunities
- Better utilization of natural resources/places
- More stuff for kids
- Transportation services
- Buildings restored in town and business
- Public pool
- Homeless shelter
- Emergency shelter
- Employment home-ownership program
- Community team to clean up property/make repairs (veterans?)
- Rehab home for adults
- Habitat for humanity

**Question #2: What are the priority needs for your County to achieve this ideal vision?**

- Infrastructure for future growth
- Broadband access
- Healthcare access-we have no hospital or ER or weekend coverage
- Better ambulance service (paramedic level or higher)
- Quality childcare
- Jobs
- Housing (homeless shelter)
- Emergency shelter
- ATV-trails-money maker
- Host bike trail rides

- Expand on parks (pulp mill bottom), softball fields
- Transportation-policy exchange

**Question #3: What are the greatest strengths/assets of your County?**

- People-work ethic
- Scenic beauty of the area; we are now considered to be a destination
- Local emergency planning committee/state road/law enforcement/EMS/911
- Collaboration between agencies
- Natural resources; trails
- Skilled workers
- We will not give up; we want to see our town grow

**Question #4: How do you define poverty (including what keeps people in poverty)? Poverty in your county looks like...**

- Inability to meet basic needs
- Making poor choices-keep social status over meeting basic needs
- Drug issues-can make you lose everything
- People that are co-dependent on welfare system; there is a crack in the system; guidelines need to be changed
- Addiction
- Mental health
- Alcoholism

**Question #5: What are some specific ways that organizations, industry, small business, the faith community, public leadership and community leaders can work together in service to the County?**

- Expand collaboration
- Community service directory
- Volunteer
- Interagency Tucker County collaborative meetings

## Appendix G – NCWVCAA HS/EHS Program Data

### NCWVCAA HS/EHS Historical Demographic Data

#### **Head Start, West Virginia Pre-K and Childcare**

West Virginia is a leader in early childhood education and Head Start is the key to its success. In an end of a legislative session move in 2002, the West Virginia lawmakers passed an education provision requiring all four-year-old children have access to Pre-K by the 2012-2013 school year. The law mixed existing Pre-K funds into the state public school funding formula and required county school systems to coordinate Pre-K contracts and programs. At least half of all Pre-K classrooms must be in community-based settings by the fall of 2012 unless there are insufficient providers that meet the Pre-K standards. (Pre-K Now, 2009)

According to Policy 2525, West Virginia Universal Access to a Quality Early Education System, each county Board of Education must have an approved county plan on file at the West Virginia Department of Education (WVDE), which has been approved by the Secretary of West Virginia Department of Health and Human Resources (WVDHHR) and West Virginia Department of Education (WVDE) prior to 2012-2013.

Proposed changes to collaborative Pre-K classrooms must be approved by the local county Pre-K Core team with, at a minimum, includes representation from the county school system preschool program, the county school system preschool special needs program, a licensed community childcare program in that county not operated by the county school system, and the Head Start program in that county. A representative from the local DHHR and/or child care resource and referral agency shall be included in the Core Team when there is no licensed community child care representative. The licensed childcare programs in the county will elect a representative to serve on the county collaborative Early Childhood Core team.

All changes to collaborative Pre-K classrooms after 2012-2013 must be submitted as an addendum to the WVDE with signatures of all the required county collaborative early childhood Core Team members for review and approval 30 days prior to the implementation of the changes. Changes could include but not limited to classroom locations, operation, curriculum, staffing, and resources. Such proposed changes also require an Impact Study completed by the Core Team to determine effect on other community childcare programs such as significant business loss or closure, decrease in enrollment and wait list, loss of funds, and/or loss of jobs. Failure to submit changes may result in the non-approval of the change.

WVDE, in collaboration with WVDHHR, has the responsibility of convening a committee, designated as the WV Pre-K Steering Team, to review the quality and content of the changes. This team is comprised of representatives from the WVDE, WVDHHR, and West Virginia Head Start State Collaboration Office.

All the North Central Head Start counties (Barbour, Marion, Monongalia-Delegate, Pocahontas, Preston, Randolph, Taylor, Tucker, and Webster) were designated as meeting Universal Pre-K status by the West Virginia Pre-K Steering Committee as of the spring of 2012. This achievement in each county demonstrated that the WVDE Policy 2525 requirements were met in that all four-year-old children and three-year-old children with Individualized Education Plans (IEPs) have access to quality early childhood preschool classrooms for those parents that voluntarily want their children to attend.

Policy 2525 revisions in July 2012 now require the WVDE Office of Early Learning, in collaboration with WVDHHR and the West Virginia Head Start State Collaboration Office, to conduct program reviews once every three years in each county. These reviews ensure alignment to policy and assist with continuous quality improvement with the comprehensive collaborative model. A desktop audit, site visits, and county collaborative team interviews are part of these program reviews and are scheduled for NCWVCAA county service areas as follows:

- 2017-2018 Barbour, Marion, Preston, and Randolph
- 2018-2019 Taylor and Tucker
- 2019-2020 Monongalia, Pocahontas, and Webster

According to the West Virginia Department of Education (WVDE), Office of Early Learning, Overview of West Virginia Universal Pre-K, WVBE Policy 2525-West Virginia’s Universal Access to a Quality Early Education System 2017 Annual Report:

- The total enrollment for Pre-K children (4 year olds and 3 year olds with an IEP) during 2014-2015 was 15,256 children; 15,113 in 2015-2016; compared to **14,940 children in 2016-2017**.
- 79% of WV Universal Pre-K classrooms were in partnerships with Head Start and/or childcare in 2014-2015; 81% in 2015-2016; and **82% in 2016-2017**.
- FY2015 and **FY2016** Total State Aid funding generated by WV Universal Pre-K was **over 91 million** dollars (in addition to Federal Head Start and Childcare funding).
- West Virginia is **one of six states in the nation** to meet all 10 benchmarks for quality Pre-K programming, as determined by the National Institute for Early Education Research (NIEER).
- West Virginia is **one of six states in the nation** serving between 61%-80% of the state’s four-year-old population, serving **76% in 2016**.

**WV Board of Education 2525 – WV’s Universal Access**

 2 -5 year olds by September 1st, 2014 - 2nd month Enrollment Counted for State Aid Funding  
 3 -Percent Participation is the comparison between the 5 yr. old kindergarten enrollment and the 4 yr. old population enrolled in pre-k from the previous year. This is used as a rough estimate for participation and needs.  
 4 -Total pre-k Enrollment based on 2<sup>nd</sup> month 2014.

In addition to Senate Bill (SB) 247, Policy 2525, West Virginia’s Universal Access to Early Education System, which impacts early childhood programs across the state, WV State Legislatures passed Senate Bill 359 on March 22, 2013. This bill required, “Beginning no later than the school year 2016-2017, and continuing thereafter, early childhood education programs that are full day and five days per week shall be available to all children meeting the age requirement set forth.”

"The program may be for fewer than five days per week and may be less than full day based on family need if a sufficient number of families request such programs and the county board finds that such programs are in the best interest of the requesting families and students: Provided, that the ability of families to request programs that are fewer than five days a week or less than a full day does not relieve the county of the obligation to provide all resident children with the opportunity to enroll in a full-day program."

Senate Bill 19 was introduced in the 2015 Legislature that required early childhood programs to operate a minimum of 4 days per week, 1200 instructional minutes per week, and a minimum of 146 instructional days per year but was vetoed by the Governor on April 1, 2015. Therefore, according to WVDE Policy 2525 and Senate Bill 247, "Beginning with the school year 2016-2017, programs shall provide an instructional day of 300 minutes for WV Pre-K, inclusive of all required elements of the daily schedule, five days per week. The WV Pre-K school calendar shall be offered no less than 160 instructional days per year. The WV Pre-K school calendar must be approved by the county Board of Education annually."

During the 2016 Legislative session, Senate Bill 146 that established new instructional standards for Early Childhood Education was passed by the WV House and Senate on February 23, 2016 and signed by the Governor on March 2, 2016. This bill replaced the previous state code that required the instructional days of 300 minutes daily/five days a week. Effective July 1, 2016, as per SB 146, WV Universal Pre-K Programs must provide at least forty-eight thousand minutes annually and no less than fifteen hundred minutes of instruction per week."

As of PY51 or 2016-2017 school year, all of the NCWVCAA Delegate's thirty-three classrooms and its Grantee's fifty-eight (58) HS operated and collaborative partners' classrooms operated on a full day, 4 days per week schedule. As per the WVDE, Office of Early Learning 2017 Annual Report, 67% of the WV Universal Pre-K classrooms operated on a four day per week schedule while 33% operated on a 5 day per week schedule during the 2016-2017 school year. The Grantee submitted a Duration Supplemental Application that was approved by the Office of Head Start that provided additional financial resources to enable all Marion County Head Start operated Pre-K classrooms beginning the 2017-2018 school year to offer the 1,020 instruction hours per year (5 days per week) as per new Head Start Performance Standards. The NCWVCAA Head Start Program will continue to evaluate on a year to year basis based upon cost to implement such instructional schedules in the other county service areas.

WV Senate Bill 186 that passed during the 2017 legislative session adjusted the date upon which children become eligible for certain school programs and school attendance requirements. The bill changed the kindergarten age attainment requirement from age five prior to September 1, to age five prior to July 1 effective the 2019-2020 school year; the early childhood education program (Universal Pre-K) age attainment date requirement was also changed from age four prior to September 1, to age four prior to July 1 starting with the 2018-2019 school year; and this bill also changed the age for which compulsory attendance begins to those who attain age six by July 1, of each year. There are concerns that this age eligibility change to July 1<sup>st</sup> for Universal Pre-K will have an impact on Head Start and Pre-K enrollment in WV for the 2018-2019 school year.

### **Teaching Staff Credentials**

During the 2013 Legislative session, Senate Bill 359 was passed that changed WVDE Kindergarten Assistant Teacher requirements, which also affected Assistant Teacher requirements for Pre-K Assistant Teachers in WV Universal Pre-K Programs.

As per West Virginia Department of Education (WVDE), an excerpt from State Code 5202 Section §126-136-12 requires, "Beginning July 1, 2014, any person previously employed as an aide in a Pre-

K or kindergarten program on and after that date and any new person employed in that capacity in a Pre-K or kindergarten program on and after that date shall hold the position of (1) Early Childhood Classroom Assistant Teacher Temporary Authorization; (2) Early Childhood Classroom Assistant Teacher Permanent Authorization; or (3) Early Childhood Classroom Assistant Teacher Permanent Authorization and Permanent Paraprofessional. Any person employed as an aide in a Pre-K or Kindergarten program on or before July 1, 2014 and is eligible for full retirement benefits before July 1, 2020, may remain employed as an aide in that position and upon application, shall be granted an Early Childhood Assistant Teacher II, Permanent Authorization by the State Superintendent pursuant to section §12-2a-3." Policy 2525 16.2.e. states: "Any Early Childhood Classroom Assistant Teacher employed in a collaborative setting with Head Start must complete coursework required to obtain permanent authorization in accordance with Head Start regulations."

Assistant Teachers must be in pursuit of one of the options available for the Early Childhood Classroom Assistant Teacher credential. Pathways include Child Development Associate (CDA), West Virginia Apprenticeship for Child Development Specialists (ACDS), or West Virginia approved coursework. For those that possess an Early Childhood Associates Degree, he or she is also required to obtain one of the aforementioned pathways. He or she must submit commitment verifying the applicant's agreement to complete coursework, approved by the WVDE, in the areas of preschool special education, child development, and early childhood language and literacy.

While the employee is enrolled in coursework and making progress toward completion of the requirements for the Permanent Authorization, he or she will be issued a Temporary Authorization. Upon completion of a program the Permanent Authorization will be awarded.

Teachers who have been hired after August 1, 2013 and work in a community program in collaboration between the Board of Education and Head Start must have an initial Community Program Authorization to include:

- a. Bachelor's Degree in Child Development, Early Childhood, or Occupational Development with emphasis in Child Development;
- b. One year, minimum, early education teaching experience;
- c. Submission of course work or professional development in the areas specified by the WVDE Office of Early Learning;
- d. Recommendation of the county superintendent or the community program's director;
- e. Community Program Authorization Renewal requires 6 semester hours of WVDE approved coursework or equivalent professional development are required for each renewal, as defined and approved by the WVDE Office of Early Learning, until all requirements have been met for permanent authorization.

The process for Teachers and Assistant Teachers established by the West Virginia Department of Education for collaborative classrooms aligns with the Head Start Performance Standards and Head Start Act for Head Start Center-based Teacher and Assistant Teacher qualification requirements.

### **Demographic Analysis for Head Start and Early Head Start**

The following charts for the NCWVCAA Head Start and Early Head Start Grantee Program were compiled based upon the most current information from its client tracking system, DBA FACS Pro, from July 1, 2016 through December 31, 2016 (PY51) timeframe, ChildPlus, from July 1, 2017 through December 31, 2017, and data from the PY51 Program Information Report (PIR) from July 1, 2016 through June 30, 2017 unless noted otherwise.

The Monongalia County Board of Education, Delegate for Head Start and Grantee for the Early Head Start Program, data is based upon its client tracking system, PSTEPS, and data also from the Program

Information Report (PIR) from the July 1, 2016 through June 30, 2017 as well as July 1, 2017 through December 31, 2017 (PY52) timeframe unless noted otherwise.

Therefore, based upon historical data for all Head Start and Early Head Start ACF Head Start eligible children served by the NCWVCAA Grantee and Delegat3 during PY51 and PY52 up through December 31, 2017 are included in this report unless noted otherwise.

### Head Start Grantee and Delegate Monthly Enrollment Summaries for PY51 and PY52

<b>ANNUAL PROGRAM ATTENDANCE AND ENROLLMENT TOTALS</b>	<b>100.33</b>	<b>103.93</b>	<b>94.50</b>	<b>99.75</b>	<b>135.55</b>	<b>96.64</b>	<b>103.43</b>	<b>101.05</b>	<b>106.41</b>	<b>88.85</b>

Data collected January 2017-PY51 through December 2017-PY52.

August is included in this chart as classes began on August 16, 2017 (Preston County); August 21, 2017 (Taylor County); August 23, 2017 (Monongalia, Pocahontas and Randolph Counties and Marion County EHS Center-based); August 25, 2017 (Marion County); August 28, 2017 (Barbour County) and August 29, 2017 (Webster County).

May was not included in the Total Enrollment Average. Vacancies occurring in May, were within the last 30 days of school and were unable to be filled.

No data available for June and July because classes not in session.

\*Indicates that there was an under-enrollment within the county; however, other counties over-enrolled to ensure full enrollment.

\*\*Monongalia County was not fully enrolled by the first day of school due to child illness.

Data collected January 2017-PY51 through December 2017-PY52

Note: Taylor County EHS II was not in session until November 2017-PY52. Webster County was not in session until December 2017-PY52.

\*Monongalia County Board of Education EHS Grantee

During PY48 or July 1, 2013 through June 30, 2014, the North Central WV Community Action Grantee and Delegate had a 5.27% budget reduction as a result of sequestration mandated by Congress. Due to the amount of money lost, the Grantee cut its Head Start funded enrollment from 663 to 633 (30 slots) and its Early Head Start enrollment was dropped from 52 to 43 (9 slots).

The 5.27% sequestration monies were restored for PY49 or July 1, 2014 through June 30, 2015. This enabled the Grantee to return its Head Start enrollment to 663 and Early Head Start to 52 in PY49 or the 2014-2015 school year; and maintained the same enrollment level for the PY50 or 2015-2016 school year.

The Grantee reduced its Head Start funded enrollment from 663 to 643 during PY51 or 2016-2017 school year due to decrease of eligible children.

For PY52 or 2017-2018 school year, the Grantee converted 50 Head Start slots to 24 Early Head Start slots, thus reducing HS funded enrollment to 593 and increasing EHS funded enrollment to 76. The Delegate's funded enrollment of 181 remained unchanged from PY48 through PY52.

The below summary details the various program options offered during PY52:

**NCWVCAA Head Start/Early Head Start Grantee  
and  
Monongalia County Board of Education Delegate PY52 Program Options**

**NCWVCAA Early Head Start Grantee served 76 prenatal, infants, toddlers and their families in the following options:**

- Two (2) Center-based Classrooms in Marion County;
- Six (6) Home-based sites in Barbour, Randolph, \*Taylor (2nd Home-based), Tucker, and \*Webster Counties.  
(\*new Home-based site established for PY52)

**NCWVCAA Head Start Grantee offered services to 593 three and four-year old children and their families in the follow options:**

- Fifty-eight (58) Center-based classrooms in Barbour, Marion, Pocahontas, Preston, Randolph, Taylor, and Webster Counties.  
Of the fifty-eight,
  - Forty-five (45) operated over 6 hours per day/4 days per week as collaborative classrooms with the Boards of Education except Marion County;
  - Eleven (11) operated 6 hours per day/5 days per week as collaborative classrooms with the Board of Education in Marion County;
  - One (1) operated as a full day collaborative classroom with a Childcare in Pocahontas County;
  - One (1) full-day operated over 6 hours per day/4 days per week as a non-collaborative classroom in Taylor County.

**Monongalia County Board of Education Head Start Delegate served 181 three and four-year old children and their families in the following options:**

- Thirty-four (34) Center-based options across the county.  
Of the thirty-four,
  - All operated full-day over 6 hours per day/4 days per week as collaborative classrooms with the Board of Education

Monongalia County Board of Education is also a Grantee for the Early Head Start Program serving 120 prenatal, infants, toddlers, and their families in a Home-based option.

Head Start’s longtime experience, parental involvement, and performance measures are fundamental to West Virginia’s successful transition to community-based Pre-K programs. NCWVCAA is right in the heart of the Pre-K efforts in North Central West Virginia.

**Head Start Families and Children Served**

The number of families served in PY50 was 909 compared to 857 in PY51.

The number of children served in PY50 was 939 compared to 886 in PY51.

	Barbour	Marion	Monongalia (Delegate)	Pocahontas	Preston	Randolph	Taylor	Webster	PY51 Totals	PY50 Totals

Children Served	76	230	187	26	81	129	99	58	886	939

Information from the PY51 HS PIR July 1, 2016 to June 30, 2017.

**Early Head Start Families and Children Served**

The number of families served by NCWVCAA EHS in PY50 was 76 compared to 70 in PY51. Monongalia County EHS served 119 families in PY50 compared to 150 in PY51.

The number of children served by NCWVCAA EHS in PY50 was 95 children and 7 prenatals compared to 82 children and 8 prenatals in PY51. Monongalia County EHS served 146 children in PY50 and served 136 children and 14 prenatals in PY51.

\*Monongalia County Board of Education Grantee  
Information from the PY51 EHS PIR July 1, 2016 to June 30, 2017.

### Head Start Funded Enrollment

Due to Sequestration, total funded enrollment was 814 in PY48 as a result of slots reduced by the Grantee. Those reduced slots were restored in PY49 and continued at the same level for PY50. The Grantee reduced its funded enrollment by 20 slots (663-20=643+Delegate 181=824) in PY51. For PY52, the Grantee converted 50 HS slots (643-50=593 + Delegate 181=774) to 24 EHS slots. The Delegate’s funded enrollment remained unchanged in PY48 through PY52.

\*\*\*Reduced funded enrollment from conversion of HS slots to EHS slots

### Early Head Start Funded Enrollment

As a result of Sequestration, the NCWVCAA EHS total funded enrollment was reduced from 52 to 43 in PY48. Those slots were restored in PY49 and continued at the same level for PY50 and PY51. For PY52, the Grantee increased EHS slots by 24 as a result of converting 50 HS slots (52+24 converted slots=76). The Monongalia County EHS funded enrollment remained the same (120 slots) from PY48 through PY52.

## Characteristics of Head Start Children and Families

### Gender

The gender comparison showed more male to female ratio for the Delegate and Grantee during both PY50 and PY51. However, more females were served in the Grantee's counties of Barbour and Randolph during PY51.

COUNTY	Females	Males
Barbour	40	36
Marion	108	122
Monongalia (Delegate)	81	106
Pocahontas	8	18
Preston	35	46
Randolph	70	59
Taylor	44	55
Webster	24	34
<b>PY51 Total</b>	<b>410</b>	<b>476</b>
<b>PY50 Total</b>	<b>464</b>	<b>474</b>

Information from DBA FACS Pro-PY51 July 1, 2016 to June 30, 2017.

### Race

Although the majority of the children were Caucasian for both PY50 and PY51, their race composition for the Grantee and Delegate included children in each of the below categories:

COUNTY	Caucasian	American Indian	Bi-Racial	African American	Native Hawaiian	Other or Unspecified
Barbour	69	0	6	1	0	0
Marion	184	0	25	19	0	2-Asian
Monongalia (Delegate)	143	0	12	11	2	5-Asian
Pocahontas	26	0	0	0	0	
Preston	80	0	1	0	0	0
Randolph	123	0	3	3	0	0

Taylor	96	0	3	0	0	
Webster	58	0	0	0	0	0
<b>PY51 Total</b>	<b>779</b>	<b>0</b>	<b>50</b>	<b>34</b>	<b>2</b>	<b>7</b>
<b>PY50 Total</b>	<b>809</b>	<b>1</b>	<b>57</b>	<b>57</b>	<b>1</b>	<b>3</b>

Information from the PY51 HS PIR July 1, 2016 to June 30, 2017.

### Ethnicity

The majority of the children’s ethnicity for both PY50 and PY51 was considered to be Non-Hispanic or Latino for the Grantee and Delegate as follows:

COUNTY	Non-Hispanic or Latino	Hispanic or Latino
Barbour	75	1
Marion	227	3
Monongalia (Delegate)	173	14
Pocahontas	25	1
Preston	80	1
Randolph	127	2
Taylor	99	0
Webster	58	0
<b>PY51 Total</b>	<b>864</b>	<b>22</b>
<b>PY50 Total</b>	<b>878</b>	<b>21</b>

Information from the PY51 HS PIR July 1, 2016 to June 30, 2017.

### Primary Language

English continued to be the primary language for children in the Delegate and Grantee counties during both PY50 and PY51. There were more “other” languages and “Spanish speaking” participants in PY51 than PY50 as noted below:

COUNTY	English as Primary Language	Other	Spanish
Barbour	76	0	0
Marion	228	2- Chinese	0
Monongalia (Delegate)	166	10- Middle Eastern 1- Chinese 2- Pacific Island	8
Pocahontas	26	0	0
Preston	81	0	0
Randolph	129	0	0
Taylor	99	0	0
Webster	58	0	0
<b>PY51 Total</b>	<b>863</b>	<b>15</b>	<b>8</b>
<b>PY50 Total</b>	<b>921</b>	<b>1</b>	<b>2</b>

Information from the PY51 HS PIR July 1, 2016 to June 30, 2017.

## Family Type

For PY50 and PY51, the majority of family types included two parents with children and single parent female as identified in the Grantee and Delegate as follows:

COUNTY	Multi-Adults (w/children)	Single Parent (Male)	Raised by Grandparents	Two Parents (w/children)	Single Parent (Female)
Barbour	14	1	4	27	30
Marion	24	13	9	101	83
Monongalia (Delegate)	17	8	6	97	59
Pocahontas	4	1	0	11	10
Preston	26	0	3	24	28
Randolph	23	3	7	51	45
Taylor	12	2	3	39	43
Webster	5	1	0	37	15
<b>PY51 Total</b>	<b>125</b>	<b>29</b>	<b>32</b>	<b>387</b>	<b>313</b>
<b>PY50 Total</b>	<b>88</b>	<b>32</b>	<b>25</b>	<b>409</b>	<b>386</b>

Information from DBA FACS Pro-PY51 July 1, 2016 to June 30, 2017.

## Foster Children Served

There were twice as many Foster children served in PY51 compared to those in PY50. The number of Head Start Foster children served during PY51 per county compared to the totals in PY50 are as follows:

	Barbour	Marion	Monongalia (Delegate)	Pocahontas	Preston	Randolph	Taylor	Webster	PY51 Totals	PY50 Totals
# of Foster Children Served	4	18	4	1	6	12	6	2	<b>53</b>	<b>25</b>

Information from the PY51 HS PIR July 1, 2016 to June 30, 2017.

## Number of Children with Parent/Guardians in Active Duty or Veteran status.

Between the Grantee and Delegate, there were only 3 active duty Parent/Guardian that were served by the Grantee's Preston, Randolph, and Webster Counties during PY51 compared to 2 in PY50. There were 14 Parents/Guardians that were Military Veterans for PY51 from the counties of Barbour, Marion, and Taylor Counties.

COUNTY	Active Duty Parent/Guardian	Veteran Parent/Guardian
Barbour	0	3
Marion	0	2

Monongalia (Delegate)	0	0
Pocahontas	0	0
Preston	1	0
Randolph	1	0
Taylor	0	9
Webster	1	0
<b>PY51 Total</b>	<b>3</b>	<b>14</b>
<b>PY50 Total</b>	<b>2</b>	<b>Data not collected</b>

Information from the PY51 HS PIR July 1, 2016 to June 30, 2017.

### Homeless Children and Families

There were more Homeless families and Homeless children served as well as the number of Homeless families that acquired housing in PY51 compared to those in PY50. The number of Head Start families considered Homeless, those served, and have acquired housing during PY51 per county compared to the totals of each category in PY50 include the following:

	Barbour	Marion	Monongalia (Delegate)	Pocahontas	Preston	Randolph	Taylor	Webster	PY51 Totals	PY50 Totals
# of Homeless Families Served	8	37	6	1	7	7	20	1	87	61
# of Homeless Children Served	8	38	4	1	7	7	21	1	87	63
# of Homeless Families that Acquired Housing during Enrollment Year	3	11	0	0	2	6	7	0	29	18

Information from PY51 HS PIR July 1, 2016 to June 30, 2017.

### Living Arrangements

For PY51 compared to PY50, more families owned (310), rented subsidized dwellings (140), lived in transitional/sheltered homes or were homeless (27), and other (16). There was a decrease in the number of families that rented unsubsidized dwellings and who lived with friends or family.

Head Start family arrangements are categorized for PY50 and PY51 as indicated below:

COUNTY	OWN	RENT-UNSUBSIDIZED	RENT-SUBSIDIZED	LIVING W/FRIENDS OR FAMILY	TRANSITIONAL /SHELTER/ HOMELESS	OTHER
Barbour	33	21	8	14	0	0
Marion	82	62	33	39	11	3
Monongalia (Delegate)	50	75	31	20	4	7

Pocahontas	10	8	6	1	0	1
Preston	29	29	13	10	0	0
Randolph	49	29	25	16	7	3
Taylor	27	31	17	17	5	2
Webster	30	15	7	6	0	0
<b>PY51 Total</b>	<b>310</b>	<b>270</b>	<b>140</b>	<b>123</b>	<b>27</b>	<b>16</b>
<b>PY50 Total</b>	<b>302</b>	<b>309</b>	<b>131</b>	<b>165</b>	<b>17</b>	<b>10</b>

Information from DBA FACS Pro-PY51 July 1, 2016 to June 30, 2017.

### Parent Educational Attainment

For PY51, there were less parents that had less than a High School education, less some college or vocational, as well as less had a Bachelors or Advanced degree in comparison to PY50. There were more parents that had a High School diploma or GED in PY51 than in PY50. The majority of Head Start participants' parents in both the Grantee and Delegate for PY50 and PY51 had a High School diploma or GED as noted below:

Educational Attainment of Head Start Parents										
	Barbour	Marion	Monongalia (Delegate)	Pocahontas	Preston	Randolph	Taylor	Webster	PY51 Totals	PY50 Totals
# < High School	5	22	14	0	14	4	11	2	<b>72</b>	<b>87</b>
# High School or GED	38	102	89	19	30	88	55	43	<b>464</b>	<b>463</b>
# Some College or Vocational	31	77	48	2	28	28	27	11	<b>252</b>	<b>259</b>
# Bachelors or Advanced Degree	3	16	30	2	1	7	3	1	<b>63</b>	<b>94</b>

Information from the PY51 HS PIR July 1, 2016 to June 30, 2017.

### Characteristics of NCWVCAA Early Head Start (EHS) Grantee and Monongalia County Board of Education Early Head Start (EHS) Grantee Children and Families

#### Gender

For PY51, based on the gender for male versus female, more females were served by both NCWVCAA EHS and Monongalia County EHS. For PY50, NCWVCAA EHS again served more females while Monongalia County EHS served more males as described below:

COUNTY	Females	Males
Barbour	5	7
Marion	13	15
Randolph	12	8
Taylor	14	11
Tucker	2	2
<b>PY51 NCWVCAA Totals</b>	<b>46</b>	<b>43</b>

### Family Type

Two parents with children was the highest family type option served while single parent (female) came in next during PY50 and PY51 for both the NCWVCAA EHS and Monongalia County EHS as follows:

COUNTY	Multi-Adults (w/children)	Single Parent (Male)	Raised by Grandparents	Two Parents (w/children)	Single Parent (Female)
Barbour	6	0	0	5	2
Marion	3	0	2	10	13
Randolph	3	0	3	11	3
Taylor	5	0	1	11	8
Tucker	0	0	0	1	3
<b>PY51 NCWVCAA Totals</b>	<b>17</b>	<b>0</b>	<b>6</b>	<b>38</b>	<b>29</b>
<b>PY51 **Monongalia County Totals</b>	<b>17</b>	<b>1</b>	<b>2</b>	<b>98</b>	<b>32</b>
<b>PY50 NCWVCAA Totals</b>	<b>20</b>	<b>0</b>	<b>6</b>	<b>29</b>	<b>25</b>
<b>PY50 *Monongalia County Totals</b>	<b>0</b>	<b>1</b>	<b>1</b>	<b>82</b>	<b>37</b>

\*Monongalia County Board of Education EHS Grantee  
Information from DBA FACS Pro-PY51 July 1, 2016 to June 30, 2017.

### Foster Children Served

Both NCWVCAA EHS and Monongalia County EHS served more Foster children in PY51 compared to PY50.

	Barbour	Marion	Randolph	Taylor	Tucker	PY51 NCWVCAA Totals	PY51 *Monongalia a County Totals	PY50 NCWVCAA Totals	PY50 *Monongalia a County Totals

Information from the PY51 EHS PIR July 1, 2016 to June 30, 2017.  
\*Monongalia County Board of Education EHS Grantee

### Number of Children with Parent/Guardians in Active Duty

There was only 1 Parent/Guardian served that was in Active Duty for the NCWVCAA EHS for both PY50 and PY51. NCWVCAA EHS did not serve any Parent/Guardian Veterans for PY51. Monongalia County EHS served 2 Parents/Guardians that were in Active Duty and 1 Parent/Guardian Veteran for PY 51 but did not serve any Parents/Guardians that were in Active Duty for PY50 as noted below:

COUNTY	Active Duty Parent/Guardian	Veteran Parent/Guardian
Barbour	0	0
Marion	1	0
Randolph	0	0
Taylor	0	0
Tucker	0	0
<b>PY51 NCWVCAA Total</b>	<b>1</b>	<b>0</b>

### Head Start Special Needs

For both PY50 and PY51, both the NCWVCAA EHS and Monongalia Board of Education EHS served more than 10% of its funded enrollment serving children with special needs prior to January 1 of each year.

For PY52, 61 children received services for Speech compared to 104 children in PY51. The **special needs** in this area stand out in comparison to other disabilities in PY51. 42 children in PY52 compared to 34 in PY51 received services for Non-categorical/Developmental Delay. Other special needs are identified as follows:

Special Need	Barbour	Marion	Monongalia (Delegate)	Pocahontas	Preston	Randolph	Taylor	Webster	PY52 Total by Need	PY51 Total by Need

### Early Head Start Special Needs

All of NCWVCAA EHS children with special needs fell into one of the categories of Speech or Language Impairment, Orthopedic Impairment/Physical Therapy, and Non-categorical/Developmental Delay for PY51 and PY50. Most of Monongalia County EHS children with special needs were found in the Speech or Language Impairment and Non-categorical/Developmental Delay categories for PY51 and PY50.

### Homelessness and Head Start Families

NCWVCAA takes part in the annual “Point-in-Time” count, a one-day count of all homeless persons in West Virginia. Results for the 2014 Point-in-Time count show a great number of homeless persons and families in West Virginia. The following chart contains the total number of sheltered people, which includes Emergency Shelters, Transitional Housing, and Permanent Supportive Housing as well as the number of unsheltered people in NCWVCAA’s region.

#### Homeless Point in Time Count – Emergency Sheltered Homeless Population by Region

Region	Number of Households	Total Adults	Total Children (Under 18)
Marion	52	55	14
Monongalia	38	42	12
Randolph	17	17	3
Greenbrier	13	13	0

*West Virginia Coalition to End Homelessness, July 2015 report*

#### Homeless Point in Time Count – Unsheltered Homeless Population by County

County	Total Househol	Total Adults in Households	Total Children in Households	Actual/ Estimate
Barbour	4	4	0	Actual
Greenbrier	9	10	5	Actual

<b>Marion</b>	2	3	0	Actual
<b>Monongalia</b>	19	20	0	Actual
<b>Pocahontas</b>	2	2	0	Estimation
<b>Preston</b>	0	0	0	Actual
<b>Randolph</b>	5	5	0	Estimation
<b>Taylor</b>	4	4	0	Estimation
<b>Tucker</b>	2	2	0	Estimation
<b>Webster</b>	2	2	0	Estimation

*West Virginia Coalition to End Homelessness, July 2015 report*

\*The following formula was used to produce an estimate of the unsheltered homeless population for Counties without a PIT or minimal PIT results/responses: County's Population/Similar County Population = variable. Variable x Similar County Actual Count = Estimated # of Homeless Individuals (\*Round up to nearest whole number)

### Resources for Special Needs Children

The Center for Excellence in Disabilities (CED) is located in Morgantown and is part of the Robert C. Byrd Health Sciences Center at West Virginia University. The Center is part of a national network of University Centers for Excellence in Developmental Disabilities Education, Research, and Service. The CED supports people of all ages with developmental and other disabilities and their families in the movement from institutional to community settings; in the development of inclusive educational opportunities; in the preparation of professionals to meet the needs of those with the most severe disabilities and behavioral challenges; and in utilizing state-of-the-art services to support the health and related needs of people with developmental and other disabilities. The CED has recently received funding to help families receive Parent Implemented Training for Autism through Telemedicine (PITA-T), which teaches families how to perform applied behavior analysis (ABA) therapy through video or written instruction. (The Center for Excellence in Disabilities, 2012).

West Virginia Birth to Three (WV BTT) is a statewide system of service to assist families in meeting the developmental needs of their toddler or infant with special needs. All children under the age of three who are found eligible by having a developmental delay, medical condition or multiple risk factors are entitled to services needed by them and their family as identified on their Individual Family Service Plan (IFSP). WV BTT provides linkage to specialized therapy services in accordance with Part C of the Individuals with Disabilities Act and assures that family-centered, community-based services are available to all eligible children and families (WV Birth to Three, 2012). Both the Grantee and Delegate renew BTT Agreements on an annual basis.

Each county Board of Education provides or contracts with private professionals to provide hearing screenings, behavior management, speech, and physical therapies to children according to their Individual Education Plan (IEP's). Head Start/Early Head Start also offers developmental screenings. Other specialty services for children with special needs are available through local community mental health centers and/or private practitioners.

The following information was obtained from WV BTT and it lists the number of children who received Individualized Family Service Plan services from December 2013 – December 2014. The numbers include those special needs children already served by Early Head Start.

## PY53 COUNTY HEAD START and Early Head Start CONCLUSIONS AND JUSTIFICATIONS

The following assumptions use the comparative analysis of the most current, county demographic maps for the projected count of eligible 3 and 4-year old children to be served in PY53 and compared to those that were estimated to be served in PY52 based on families who received some form of public assistance from the WV Department of Health and Human Resources; and/or families with 3 and 4-year-olds who have applied for Community Action services in each county that may be interested in Head Start services; and/or other resources as noted.

West Virginia (WV) Universal Pre-K is a free, voluntary early learning program, that includes partnerships between or among the respective county Board of Education (BOE), Head Start (HS), and/or Child Care (CC) that targets serving four-year old children and three-year old children with Individual Education Plans (IEPs). The NCWVCAA HS Program does not have the opportunity to serve three-year olds without an IEP if those collaborative classrooms whether HS operated or BOE operated are located within BOE facilities. This impacts the number of classrooms in each of the following counties that includes: Barbour-5; Monongalia-34; Pocahontas-2; Preston-13; Randolph-12; Taylor-6; and Webster-4. However, three-year olds without IEPs could be served in the NCWVCAA HS operated classrooms (Barbour-2; Marion 11; and Taylor-2) and child care collaborative classrooms (Pocahontas-1) that are not located within BOE facilities. If the classroom is predominately serving three-year olds, the maximum number of children per classroom is seventeen vs. twenty. A selection criteria established by each county (BOE, HS, and CC) is used to determine the priority of enrollment into Pre-K/Head Start as well as the selection criteria established by the NCWVCAA program for its Early Head Start Program.

As part of the 2016 WV Legislative session, "Protecting Quality Child Care" was introduced by the Legislators and signed into law by the Governor that required, "Beginning no later than the school year 2016-2017, and continuing thereafter, these early childhood education programs shall provide at least forty-eight thousand minutes annually and no less than fifteen hundred minutes of instruction per week."

All of the NCWVCAA Delegate and Grantee for Head Start and its Boards of Education Collaborative Pre-K classrooms during PY52 or 2017-2018 school year operated on a full day (over 6 hours daily), 4 days per week schedule for 128 instructional days per year; however, a few West Virginia Boards of Education and some Head Start Programs including the NCWVCAA Marion County Head Start operated classrooms and/or Childcare partners did operate on a 5 day per week schedule. The NCWVCAA Delegate and Grantee HS Program will continue to plan and meet with its Childcare and Boards of Education partners to evaluate daily schedules to determine how and if it will be able to move towards and achieve the 1020 hours timelines as mandated by the new Head Start Performance Standards.

West Virginia (WV) Legislative Law, Senate Bill 186 passed during the 2017 Legislative session, has now changed the date to July 1<sup>st</sup> of each year in which children must meet age requirements for enrollment into Pre-school. The previous age cut-off date was September 1<sup>st</sup>. As noted in the below county summaries, there are concerns for the number of children that will turn four years of age between July 1<sup>st</sup> and September 1<sup>st</sup> that will not be age eligible to be served in Universal Pre-K classrooms but could be served in HS operated

classrooms outside of BOE facilities during the 2018-2019 school year for PY53. Thus, could have an impact on Head Start enrollment across all counties served by NCWVCAA Head Start.

Please note \* denotes those Head Start operated by NCWVCAA Head Start Grantee Program in PY52 as follows:

### **Barbour County**

For estimated eligible children in Barbour County, the demographic map for PY53 showed there are one hundred and twenty-three (123) four-year old children, a significant decrease from the one hundred and ninety-five (195) four-year old children projected to be served in PY52. These reports also suggested that there are one hundred and forty-four (144) three-year old children in PY53 compared to the one hundred and forty-six (146) three-year old children eligible to be served in PY52. Even though the number of eligible children is about the same for three year olds, the decrease of four-year olds suggested that there could be less Head Start eligible children to serve in the classes at Belington Pre-K I, Philippi Elementary I, Philippi Elementary II, Philippi I Head Start\*, Philippi II Head Start\*, Junior Elementary I and Junior Elementary II for the 2018-2019 school year.

At the request of the Barbour County Board of Education (BCBOE) Superintendent to move the HS operated Belington II Pre-K\* classroom to Junior Elementary School in PY52, the NCWVCAA HS Program chose to close that classroom due to the low number of eligible children that needed HS services. The BCBOE then opened a second Pre-K classroom at Junior to serve Pre-K children including HS eligible children from the Belington/Junior area. The BCBOE also operates one Pre-K classroom at Kasson Elementary where HS children are not counted. The BCBOE evaluates yearly to determine if there is enough Pre-K 4-year olds in these communities to keep their Universal Pre-K BOE operated classrooms open from year to year.

A new West Virginia (WV) legislature law requiring children to be four years of age by July 1 instead of September 1 will leave a lapse of fourteen (14) children in the Belington area and fifteen (15) in the Philippi area. These twenty-nine (29) children who will be 4 within those months will not be age eligible to receive Universal Pre-K services for the 2018-2019 school year.

Information for this enrollment projection was gathered from existing family information, recruitment cards, birth announcements in newspaper, referrals from Birth to Three, family response that have saw posters in community, and families who have obtained contact from intranet.

### **Marion County**

The PY53 demographic maps for Marion County indicated that there are two hundred and ninety-eight (298) eligible four-year olds compared to two hundred and ninety-two (292) in PY52 and two hundred and eleven (211) eligible three-year olds compared to two hundred and ninety-nine (299) for PY52. A total of five hundred and nine (509) children are projected to be eligible for PY53 compared to five hundred and ninety-one (591) in PY52, a reduction of eighty-two (82) children. The numbers suggest the continuation of Head Start (HS) services for the following Head Start full-day operated sites: Carolina I\* and Carolina

II\*, Edgemont I\* and Edgemont II\*, Fairmont I\* and Fairmont II\*, Mannington I\* and possibly Mannington II\*, Rivesville I\* and Rivesville II\*, and West Fairmont\* in PY53. However, despite the PY53 projections and current PY52 enrollment and wait lists, numbers may not support the continuation of two classrooms at Mannington in part because there are multiple Universal Pre-K options available in the Mannington area.

The number of three-year olds and four-year olds indicate that it is possible to maintain an adequate wait list for two classes at Carolina, Edgemont, Fairmont, and Rivesville and one class at Mannington and one at West Fairmont. However, it may not support expansion at this time due to the number of already existing Universal Pre-K classrooms and increased family incomes within the county. A new West Virginia (WV) Legislature law requiring children to be four years of age by July 1 instead of September 1 will result in sixty-six (66) children that will no longer be able to be served in WV Universal Pre-K but could be served in HS operated Marion County classrooms as three year olds.

As part of the Universal Pre-K partnership, the MCBOE pays the NCWVCAA Head Start Grantee a per diem for serving four-year olds and three-year olds with IEPs. MCBOE has expressed an interest in negotiating the possibility of serving HS eligible families within certain BOE operated sites in the near future. The MCBOE also has an additional twenty-two (22) collaborative Universal Pre-K classrooms. Of these, nine (9) are with Childcare collaboratives and thirteen (13) are MCBOE operated classrooms. The Marion County Pre-K Core Partners did not make changes to sites during PY52 and none are being planned as of date for PY53; however, the BOE has seen a significant increase in the number of children transitioning from WV Birth to Three.

### **Monongalia County (Monongalia County Board of Education Delegate for HS)**

Currently in PY52, there are seven hundred and fifty-six (756) age eligible four-year olds and forty-three (43) age eligible three-year olds enrolled compared to seven hundred and five (705) four-year olds and thirty-eight (38) three-year olds enrolled during PY51 in the Monongalia County Schools Head Start/Pre-K Program. Monongalia County Schools Universal Pre-K program is in complete collaboration with Head Start, providing services to all four-year old children, three-year old children with IEP's, and three-year old children transitioning from Early Head Start. Due to this joint endeavor, Monongalia County Head Start has maintained full enrollment throughout the 2016-2017 school year, and thus far in 2017-2018. According to West Virginia Educational Information System (WVEIS) data, there are ten thousand, eight hundred and seventy-six (10,876) (Second Month Enrollment Data, 2017-2018) children in Monongalia County enrolled in grades K-12.

Among those students and based on Title 1 eligibility requirements, three thousand, seven hundred and seventy-six (3776) K-12 students were identified as needy. This data indicates that 34.71% of the county K-12 children are within poverty guidelines. According to additional WVEIS reports, there are one hundred and ninety-four (194) preschool age children (four-year olds and three-year olds with IEP's) who are enrolled in county funded classrooms. The above numbers indicated that approximately two hundred and seventy-seven (277) preschool age children would be eligible for Head Start services according to income guidelines. This allows for an approximate "waitlist" of ninety-six (96) preschool age children that would be eligible for Head Start services according to Income Guidelines. However, since all Head Start eligible children above the one hundred and eighty-one (181)

funded enrollment requirement are placed in a Pre-K classroom until a Head Start spot becomes available; there is not a true waitlist of Head Start children.

Due to WV Universal Pre-K, all children are served in a preschool setting without a need for a waitlist. Head Start children are currently being served in thirty-four (34) classrooms. All classrooms are fully inclusive and there are no classrooms with only Head Start children in them. The following are classroom placements for 2016-2017 school year: Brookhaven (4); Cheat Lake (3); Eastwood (3); Mason Dixon (2); Mountainview (3); Mylan Park (3); MTEC (1); North (4); Ridgedale (3); Skyview (4); Suncrest (3); and Westover Annex (1). All classrooms have Head Start, WV Pre-K, and Preschool special needs children enrolled. All children with IEPs are enrolled and are receiving services in the least restrictive environment. Most preschool teachers in Monongalia County Schools have Preschool Special Needs (PSN) degrees, allowing them to serve the IEPs in their classroom without interrupting the child's schedule. Teachers without PSN degrees have itinerant teachers that serve the IEPs in their classrooms.

With the passing of Senate Bill 186 which changes the date in which children must meet age requirements for enrollment into Pre-school, Monongalia County Schools will experience an impact on its Universal Pre-K enrollment during the 2018-2019 school year. Using available resources, Monongalia County Schools estimates that approximately seventy-six (76) children will not be served due to the new age eligibility for Universal Pre-K. As always, our mission is to service our most needy children and families, and at this time, we are seeking guidance and exploring options to support our families.

### **Pocahontas County**

In estimating the number of eligible children to serve for PY53, there are twenty-eight (28) four-year olds compared to thirty-seven (37) in PY52 and twenty (20) three-year olds compared to twenty-six (26) in PY52 in Pocahontas County according to the Demographic Needs Assessment Maps for the communities of Hillsboro and Marlinton served by the Board of Education and School Days Childcare. Although Head Start does not count children in the Green Bank area, there are eleven (11) four-year-old and ten (10) three-year old children. For PY52, it was anticipated to serve almost the same numbers of four and three-year olds in Green Bank for PY52. Even though the proposed eligible children have decreased slightly, it can be concluded that the population of eligible children in Pocahontas County can still support the continuation of Head Start services for the following sites in PY53: Hillsboro, Marlinton, and possibly Green Bank.

The partnership between Head Start and School Days Child Care\* is evaluated annually as to whether this childcare will continue serving Head Start children. This will be based on the number of eligible families with three and four-year old children that select the School Days Child Care site as their Pre-K/childcare placement.

The agency will continue to provide Family and Community Engagement services to Head Start eligible children in PY53 via an agency-employed Family Resource Coordinator that is housed out of the Randolph County office.

Effective for PY53, the West Virginia Legislature approved a change in the eligibility age for Universal Pre-K. Students must be 4 years old before July 1<sup>st</sup> of the year that are applying

for Universal Pre-K services. Previously, the cut-off date was September 1<sup>st</sup>. In Pocahontas County, five (5) students/families will be affected by this legislative change.

### **Preston County**

According to the demographic map in Preston County used to anticipate the number of eligible children for PY53, there are one hundred and sixty-two (162) four-year olds compared to one hundred and eighty (180) four-year olds that were expected to be served in PY52 and one forty-seven (147) three-year olds in PY53 compared to one hundred and forty-eight (148) in PY52. As all Boards of Education, the Preston County Board of Education (PCBOE) will not be taking any Universal Pre-K applications for three-year olds without IEPs this year. There were ten (10) three-year olds with IEPs served in Pre-K classrooms in PY52. Because of the change of age eligibility for preschool from September 1<sup>st</sup> to July 1<sup>st</sup> for the 2018-2019 school year, Preston County will lose twenty-nine (29) Universal Pre-K students. According to the demographic maps, the number of eligible four-year old children in Preston County has dropped by eighteen (18) students between PY52 and PY53.

With the number of four-year old eligible children somewhat decreased for PY53, it can be concluded that the population of eligible children in Preston County can support the continuation of Head Start services in all of the following classrooms for the 2018-2019 school year for PY53: Aurora, Bruceton I, Bruceton II, Bruceton III, Kingwood I, Kingwood II, Kingwood III\*, South Preston I, South Preston II\*, Terra Alta I, West Preston I\* (previously called Valley I that moved into the West Preston Elementary School in January 2017 and renamed West Preston I), West Preston II, and West Preston III. The West Preston classrooms were previously known as Valley I, II, and III. The Bruceton III BOE operated classroom was added during PY52 due to the increase in numbers of preschool children in the Bruceton community while the Terra Alta II BOE operated classroom was closed because of the drop in numbers in the Terra Alta area.

### **Randolph County**

Based on the most recent demographics from the West Virginia Department of Health and Human Resources (WVDHHR) list and information obtained by Family and Community Engagement staff projecting estimated eligible children for PY53, Randolph County currently has one hundred and sixty-eight (168) four-year olds compared to one hundred and eighty-three (183) in PY52 and one hundred and sixty-three (163) three-year olds compared to one hundred and thirty-three (133) in PY52. Based on these numbers, although the 4-year-old population has decreased by fifteen (15), it can be assumed that the population of eligible children will likely support the continuation of Head Start services in Randolph County for PY53.

The composition of Pre-K sites changed for Randolph County in PY52. Due to structural damage at Homestead Elementary, the HS operated Homestead Pre-K classroom was moved temporarily to Beverly and named Homestead/Beverly. In December 2017, the Randolph County Board of Education (RCBOE) voted to close Homestead. The Homestead/Beverly classroom will remain at Beverly and will be renamed Beverly II for PY53.

For PY53, NCWVCAA and the RCBOE will offer Universal Pre-K services at the Head Start-operated classrooms consisting of Beverly II\* (previously Homestead/Beverly), Midland I\*,

and Third Ward II\* and the RCBOE-operated classrooms consisting of Beverly I, Coalton, George Ward I, George Ward II, Harman, Jennings Randolph, Midland II, North, and Third Ward II.

Beginning with the 2018-2019 school year, the West Virginia Legislature approved a change in the eligibility age for Pre-K. Students must be 4 years old before July 1<sup>st</sup> of the year they are applying for Pre-K services vs. the previous September 1<sup>st</sup> cut-off date. In Randolph County, twenty-eight (28) students/families will be affected by this legislative change.

### **Taylor County**

Based upon the demographic maps analysis, there are one hundred and forty-eight (148) children age 4 compared to one hundred and fifty-three (153) in PY52 and one hundred and twenty-nine children (129) age 3 compared to one hundred and thirty-four (134) in PY52 that have been identified to be eligible for Head Start (HS) services. The number of children for both ages have decreased by five (5) four-year olds and five (5) three-year olds compared to the previous year. There are thirteen (13) children that will be four years of age between July 1<sup>st</sup> and September 1<sup>st</sup> that will not be served due to the new age eligibility for Universal Pre-K starting this upcoming Fall 2018-2019 school year. However, estimated numbers still suggest the population of eligible children in Taylor County will support the continuation of HS services in Lucretia\* and the following HS/Taylor County Board of Education (TCBOE) collaborative classrooms in PY53: Anna Jarvis I, Anna Jarvis II, Anna Jarvis III, Anna Jarvis IV\*, Flemington, Webster\*, and West Taylor Elementary.

The TCBOE also has continued partnership with Little Feet Daycare to provide a Universal Pre-K classroom. Head Start children are not part of this partnership so children are not counted at this location. Also, TCBOE has formally announced they will be providing a second Universal Pre-K classroom at West Taylor due to the influx of families moving into this western section of Taylor County. It has not yet been determined if Head Start children will be counted at this location.

All of the above Head Start operated classrooms are considered Universal Pre-K Collaborations between NCWVCAA HS and the TCBOE, except the Lucretia\* classroom that serves primarily three-year old HS eligible children.

### **Tucker County**

According to the demographic map for PY53, there are thirty-nine (39) four-year old children compared to seventy-one (71) in PY52 and (47) forty-seven three-year old children compared to fifty-nine (59) in PY52 that are eligible for HS services. The number of four-year olds has substantially decreased this year with the majority of those children living in the Parsons area. These four-year olds can be served by the Board of Education Pre-K Program at the Tucker Valley Annex Pre-School and the Davis/Thomas Elementary School. Numbers do not support the return of Head Start Home-based services to this county since the majority of families prefer center-based while preschool aged children are served by the Tucker County Board of Education. However, if financial supports for staff, space, and transportation were available for a center-based option, the number of three-year olds still suggests enough children for a classroom.

The new legislature law requiring children to be four (4) years of age by July 1 instead of September 1 will leave a lapse of five (5) children turning 4 in those two months that will not be age eligible for Universal Pre-K this upcoming school year.

Information for the demographic maps were gathered from existing family information, recruitment cards, birth announcements in newspaper, referrals from Birth to Three, family response that have saw posters in community, and families who have obtained contact from intranet.

### **Webster County**

According to the demographic maps for PY53 in identifying eligible children, Webster County has seventy-one (71) four-year old eligible children compared to seventy-six (76) four-year in PY52 and sixty-nine (69) three-year olds compared to seventy-nine (79) in PY52 with the largest numbers being located in the Cowen area. The number of eligible children continues to decline; however, the number of eligible children projected for the county would likely support the continuation of Webster Springs I and II Pre-K and Glade Elementary I Pre-K, 3 classrooms operated by the Webster County Board of Education (WCBOE) and Glade Elementary II Pre-K operated by NCWVCAA Head Start\*.

The WCBOE operates another Pre-K classroom at Hacker Valley Elementary School which is a combined Pre-K and Kindergarten classroom. Head Start children are not counted at this site. The Starting Points Child Care Development Center, located in the Glade Elementary School, chose not to partner with the WCBOE to serve Universal Pre-K children in PY52 due to the sparse number of children that the childcare would have served. No announcement has been made as of date (January 2018) about the future of this partnership for PY53.

A new (WV) legislature law requiring children to be 4 by July 1 instead of September 1 will leave a lapse of nineteen (19) children turning 4 in those two months that will not be age eligible for Universal Pre-K this upcoming school year. Of the nineteen, six (6) children are in the Webster Springs area, two (2) in Hacker Valley, and eleven (11) are in the Cowen area that will be impacted by this age eligibility date change.

Information for the demographic maps were also gathered from existing family information, recruitment cards, birth announcements in newspaper, referrals from the BOE for Birth to Three, family response that have saw posters in community, and families who have obtained contact from intranet.

### **PY53 County *Early Head Start* Grantee Conclusions and Justifications**

The following narrative explains the current count of prenatal to one-year olds, and two-year olds in each county for estimated eligible prenatals, infants, and toddlers to be served in PY53 compared to those that were projected to be served in PY52. This information was gathered from the most current demographic maps from each county and includes families with children prenatal through two-years old within the household who have applied for Community Action services; and/or have received some form of public assistance through the West Virginia Department of Health and Human Resources that may be interested in Early Head Start services; and/or other resources as noted.

### **Barbour County**

The number of eligible children for PY53 compared to PY52 projections have slightly increased for the pre-natal to one-year olds but has greatly decreased for two-year-old children. According to the demographic map analysis for PY53, there are one-hundred and fifty-four (154) prenatal to one-year olds compared to one-hundred and forty-seven (147) projected in PY52 and sixty-five (65) two-year olds in PY53 compared to one-hundred and fifteen (115) estimated in PY52. These numbers indicate that the population of eligible children in Barbour County continue to support the current Early Head Start Home-based services and possible expansion.

### **Marion County**

Currently, there are seventy-eight (78) eligible prenatal to one-year olds in PY53 projections to be served compared to three hundred and forty (340) in PY52 and three hundred and twenty-two (322) eligible one to two-year olds for PY53 compared to four hundred and twenty-nine (429) in PY52 in Marion County according to the demographic maps. In the North Marion area, there are thirty-three (33) prenatal to one-year olds and one hundred and two (102) two-year olds. In the East Fairmont area, there are nineteen (19) prenatal to one-year olds and fifty-seven (57) two-year olds. Therefore, even those these estimates have modestly decreased from PY52, it still indicates that the population of eligible children in Marion County would support the continuation of current Early Head Start center-based services at the East Fairmont High School and the North Marion County Votech Center. According to the current demographic needs assessment numbers, EHS expansion could be also supported at Rivesville, Edgemont, Monongah, Carolina, and West Fairmont.

### **Pocahontas County**

Based on the most recent demographics from the West Virginia Department of Health and Human Resources (WVDHHR) list in projecting the number of eligible prenatals, infants, and toddlers, Pocahontas County currently has fifty-nine (59) prenatal to one-year olds compared to twenty-nine (29) in PY52 as well as forty (40) two-year olds compared to ninety-one (91) in PY52 from a variety of communities within the county. Even though the projected number of eligible prenatals, infants, and toddlers have decreased from ninety-nine (99) in PY53 compared to one-hundred and twenty (120) in PY52, it can be concluded that the population of eligible children in Pocahontas County could still support the potential addition of Early Head Start services.

### **Preston County**

According to the most current demographic maps, there are two hundred ninety-five (295) prenatal to one-year olds projected eligible in PY53 compared to two hundred and seventy-one (271) in PY52 and one hundred fifty-eight (158) eligible two-year olds in PY53 and one hundred and sixty-two (162) two-year olds in PY52 in Preston County. Therefore, it can be concluded that the population of eligible children in Preston County could support Early Head Start services in the county. However, during PY51 the EHS program was removed from the county because a qualified Family Educator could not be hired and/or retained over the past several years. The Preston County Board of Education has not expressed an interest to partner to offer an EHS center-based option at the high school that could serve expectant students. The program will continue to evaluate how and if EHS services could be returned to the county.

### **Randolph County**

Randolph County currently has one hundred and ninety (190) eligible prenatal to one-year olds projected for PY53 compared to fifty-four (54) in PY52 and one hundred and thirty-five (135) eligible two-year olds in PY53 compared to one hundred and seventy-nine (179) in PY52 in the service area for Early Head Start. A total of three hundred and twenty-five (325) potential eligible families are indicated by the demographic assessment for PY53 as compared to two hundred and thirty-three (233) families from PY52. These numbers support the continuation and possible expansion of the Early Head Start services in Randolph County for PY53.

Previous discussions with the Randolph County Board of Education regarding the need for a Center-based program at Elkins High School to serve primarily expectant students concluded that the demographic need did not support this option.

### **Taylor County**

Taylor County currently has identified ninety-one (91) eligible prenatal to one-year of age for PY53 compared to one hundred and forty-eight (148) for PY52 and ninety-nine (99) eligible two-year olds for PY53 compared to one hundred and fifteen (115) for PY52 based on the demographic maps analysis. In comparison to last year's data at this time (January 2018), the population of income eligible children has decreased by fifty-seven (57) in the prenatal to age one range and has decreased by sixteen (16) in the two year of age group. The county's demographic map indicates sufficient numbers of children age two and under to support the continuation of at least twenty-four (24) slots or more in the Early Head Start Home-based option or possibly Center-based at Webster Center for PY53. Preliminary discussions have occurred with the Taylor County Board of Education and they are supportive and interested in partnering to serve expectant teens in an EHS center-based option.

### **Tucker County**

According to the demographic map for PY53, there are seventy-one (71) eligible prenatal to one-year old children compared to the fifty-nine (59) in PY52 and thirty-eight (38) two-year olds for PY53 compared to twenty-seven (27) two-year olds in PY52. Potential numbers show that the populations of eligible children for prenatal as well as one and two-year old children have increased in Tucker County. These numbers continue to support of the current Early Head Start Home-based option that provides services to three (3) prenatal, infants, and toddlers, and their families. With these estimated projections, it appears that more prenatal, infants, and toddlers could be served but there is another successful home visiting program, "Parents As Teachers," in the county that also serves children in these age ranges.

### **Webster County**

According to the demographic maps for PY53 in determining eligible children, Webster County has seventy-eight (78) eligible prenatal to one-year olds compared to seventy-seven (77) in PY52 and fifty-two (52) eligible two-year olds in PY53 compared to sixty-seven (67) in PY52. Even those these numbers show a slight decrease of children two-years of age and under including prenatal, the number of eligible children projected in the county suggests continuing support of the current Early Head Start Home-based program located in Cowen where the largest number of children are located. With the availability of the NCWVCAA HS/EHS owned modular unit in the Cowen area, these numbers also support the

consideration of a center-based option.

**Monongalia County (Monongalia County Board of Education Grantee for EHS)**

According to July 2016 United States Census Bureau data, there were an estimated 104,622 people living in Monongalia County. Of these individuals, five thousand, five hundred and forty-four (5,544) or 5.3% are under the age of 5 and 18.5% of our families are living in poverty. It can be estimated that there are one thousand and twenty-six (1026) Early Head Start eligible and Head Start eligible children in Monongalia County compared to nine hundred and seventy-eight (978) eligible HS and EHS children as indicated in the United States Census Bureau July 2015 data.

Early Head Start provides services to 120 low income families with children who are zero up to three years of age as well as pregnant women, through a home-based option. Currently, Monongalia County Early Head Start has two socialization centers, Mt. View Early Head Start and Daybrook Early Head Start. Each center serves different areas of the community.

While serving 120 families, on occasion there may be drops from the program throughout the year for various reasons such as moving out of the county or out of the state. The program has been able to maintain an appropriate waitlist to fill all available spots within the thirty (30) day requirement. Both sites maintain an active waitlist that is ranked according to the current approved Selection Criteria. The current waitlist for the program is seventy-seven (77) children/pregnant mothers. Within the past several years, there has been an increase in the number of homeless families and families with zero income moving into the county. These families are referred to our program through other community agencies such as the Bartlett House, Department of Human Resources (DHHR), Rape and Domestic Violence Information Center (RDVIC), to name a few.

Based on the number of referrals received annually and the number of families qualifying for services, it is predicted that Monongalia County Early Head Start will continue to be at full enrollment of one hundred and twenty (120) and utilize the two socialization centers at Mountainview EHS and Daybrook EHS.

### **NCWVCAA Head Start/Early Head Start Parent Engagement Activities**

During PY51 or the 2016-2017 school year, the Head Start (HS) and Early Head Start (EHS) programs provided multiple opportunities for parents, community members, and community stakeholders to engage in the program. Parents and community members volunteered in classrooms, participated in leadership roles within the program such as Parent Committees, Policy Council, Advisories and Leadership Teams, as well as provided feedback through School Readiness Surveys and Family Satisfaction Surveys.

As in years past, initial Parent Committee Meetings were held during the month of September by classroom, center, or county. During the meeting, elections were held and parents had the opportunity to engage in leadership roles such as Center Committees, Policy Council, Health, Education, and Partnership Advisories, as well as the School Readiness Leadership Team and the Early Childhood Positive Behavior Implementation Support (ECPBIS) Leadership Team. Parent Committee members made recommendations and assisted staff with the planning of Parent Engagement Events, Parent/Child Activity Monies expenditures, and other program activities and services. Parent Committees chose to spend Parent/Child Activity Monies in a variety of ways, such as family pictures, make-a-plates, creating garden stones, and tie-dying t-shirts.

Policy Council membership remained strong during PY51 with membership composed of at least 51% of parents of enrolled Head Start/Early Head Start children. As per Policy Council By-Laws, Policy Council membership was also made up of Non-ACF enrolled families who were part of the NCWVCAA HS/Board of Education Collaborative Partnerships as well as community stakeholders. Policy Council By-Laws were revised to extend membership to five years as per new Program Performance Standards.

Policy Council members continued to be actively engaged in all aspects of the program including but not limited to the review and approval of monthly financial statements, program information summaries, attendance and enrollment, the annual Self-Assessment, the Strategic Plan, and the Community Needs Assessment. Policy Council members were also invited to directly participate on Self-Assessment teams, NCWVCAA Board of Directors meetings, the Community Needs Assessment, and the budgetary process. Two Policy Council members elected as the WV Head Start Association (WVHSA) representatives attended the WVHSA conferences during PY51.

As part of the program's Parent Engagement efforts, Head Start families were invited to participate in at least 3 Parent Engagement Events and Early Head Start families were invited to participate in at least 4 events during PY51. Parent Engagement Events provided opportunities for families to:

- Obtain training information and resources on topics including child development, budgeting and financial literacy, positive parenting skills, developmentally appropriate activities for children, dental care, nutrition and healthy eating, and mental health topics such as stress management.
- Participate in an activity that encouraged strong family attachment including family dinners, family game nights, literacy activities, children's art galleries, bowling, roller skating, painting pottery, and arts and crafts, etc.
- Engage father/male role models in special activities during Parent Engagement Events such as crafts and family fun nights with fathers/male role models planning and volunteering at the event.

Education, Health, and Partnership Advisories met a minimum of two times during PY51 with staff, parents, and community members in attendance. Advisory members assisted Program Specialists with service area data review, the development of Policies and Procedures to ensure compliance with new OHS Performance Standards, as well as new initiatives such as adopting a Parent Curriculum. The School Readiness Leadership Team (SRLT) and Early Childhood Positive Behavior Implementation Support (ECPBIS) Leadership Team also continued to meet during the school year. SRLT meetings included a presentation of data from all service areas to ensure that NCWVCAA HS/EHS School Readiness Goals are meeting requirements of the WV Early Learning Standards Framework, Head Start regulations, and the needs and interests of parents. The ECPBIS Leadership continued to work towards fully implementing the ECPBIS model with fidelity in HS classrooms while providing support and resources for families to use in the home.

In accordance with the release of new Office of Head Start Performance Standards, the program adopted both a HS and EHS Parent Curriculum during PY51 to ensure parents were offered the opportunity to participate in a research-based parenting curriculum that builds on parents' knowledge and offers parents the opportunity to practice parenting skills to promote children's learning and development. With the input and approval of Policy Council, a Parent Curriculum Selection Criteria was created to identify key aspects of Parent Curriculums that best met the program's needs. Partnership Advisory reviewed multiple Parent Curriculums based upon the Parent Curriculum Selection Criteria prior to make recommendations to Policy Council. Policy Council then reviewed the recommendations and voted to adopt Triple P (Positive Parenting Program) for HS and Parents as Teachers for EHS. EHS Family Educators, the Family and Community Engagement Program Specialist and an Education Program Specialist were accredited in the Parents as Teachers curriculum in June 2017. Family Educators began incorporating the curriculum into home visits. HS Family Resource Coordinators were accredited in the Triple P curriculum in July 2017 in order to implement the curriculum with parents during PY52.

The program continued to recognize the volunteers who accumulated the most volunteer hours in the classroom or homebased setting during PY51 through the Volunteer Incentive Program (VIP). VIP winners along with their immediate families were invited to the end of year Policy Council event held at Valley Worlds of Fun. During the meeting, VIP Winners were recognized for their service and dedication to the program. The Program Option Volunteer Recognition monies were again awarded twice during PY51 to those classrooms per county who had accumulated the most volunteer hours within a given timeframe. The winning site's Parent Committees voted to spend the monies towards allowable activities or items such as parent/child activities that were an extension of the program, classroom supplies, or field trips.

During PY51, the program explored multiple child and family database management systems specifically designed to meet the needs of HS/EHS programs as a supplement to the database management system currently used by the program. ChildPlus data management software was selected by the program due to its ability to collect, analyze, and report child and family outcomes in all service areas to ensure School Readiness Goals are met. ChildPlus data management software was approved by Policy Council as part of the PY52 refunding application.

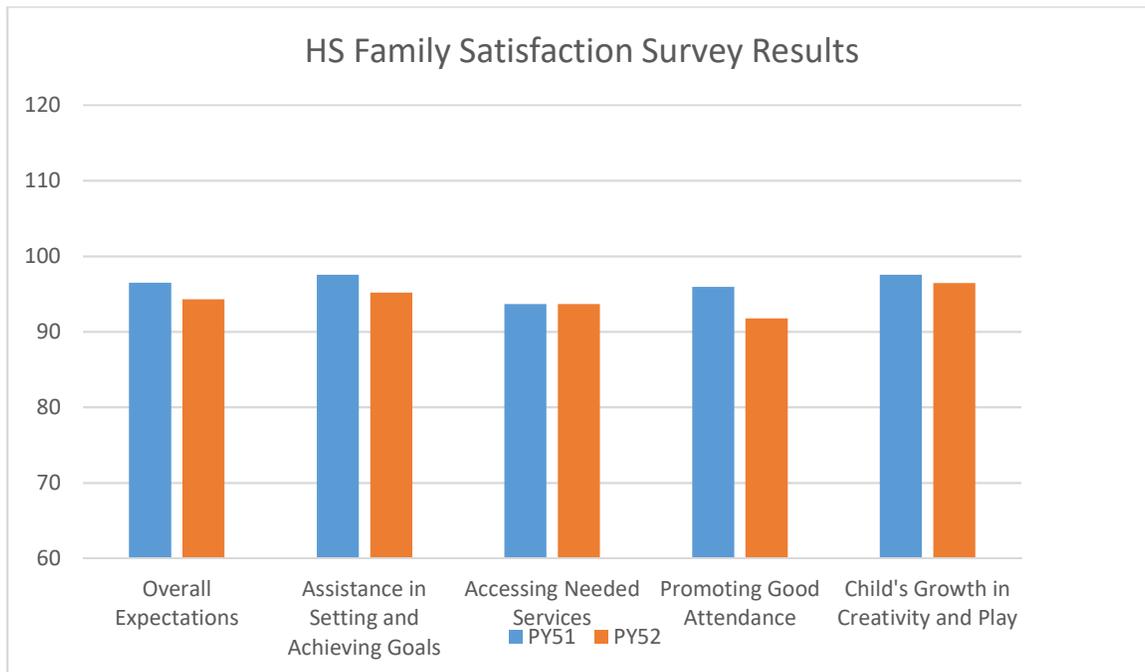

PY51 Family and Community Engagement service area data results reflect that the program continued to meet the needs of children and families in accordance with the Parent, Family and Community Engagement (FPCE) Framework and School Readiness Goals. Data sources, including WV Family Outcomes Matrix, Family Satisfaction Survey Results, Training and Technical Assistance Reports, and

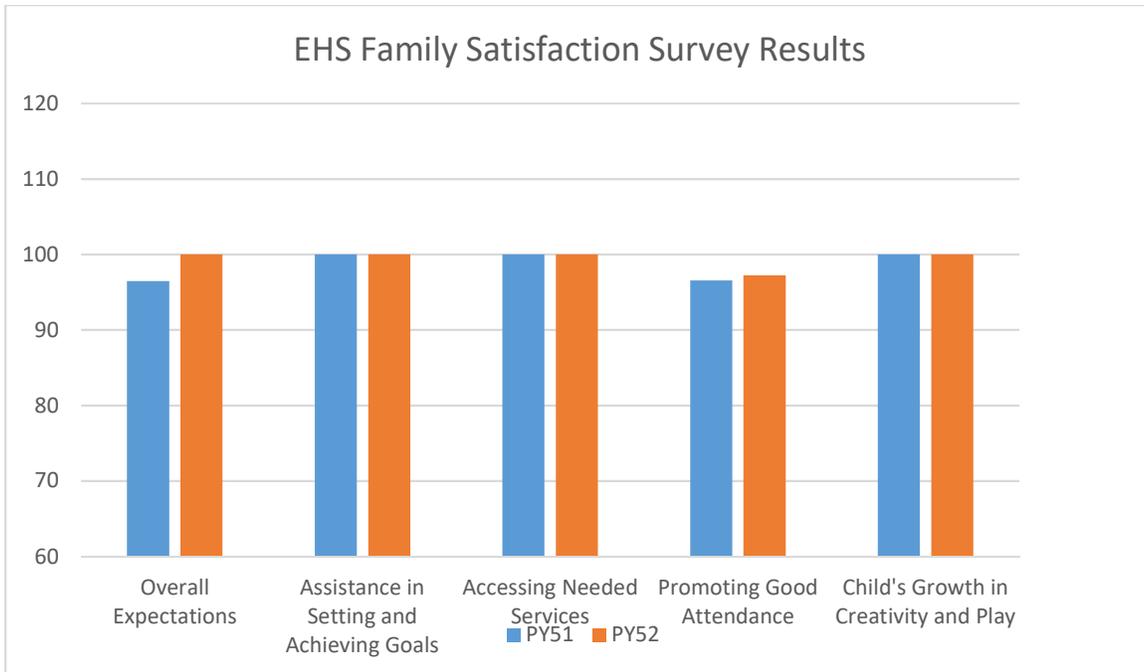

Family Needs/Interests Tracking were aggregated and compared to PY48, 49, and 50 for trends and to ensure the program is assisting families with preparing for transition to the next education setting.

Family Satisfaction Survey data was collected and aggregated to ensure that the program is meeting the needs and interests of individual children and families, as well as achieving School Readiness and PFCE Framework goals. Separate surveys were provided to HS and EHS families based upon the child's enrollment. An additional survey was provided to families that received services from the NCWVCAA Mental Health Specialist to determine their level of satisfaction with services received.

HS and EHS families completed the applicable survey based upon their experiences with the program during the 2016-2017 school year. The program was funded to serve six hundred and forty-three (643) HS children and fifty-two (52) EHS children. Of these enrollees, three hundred and seventy-three (373) or 58% of HS families returned surveys and thirty-six (36) or 69% of EHS families returned surveys. Family Satisfaction Survey results were presented to NCWVCAA HS/EHS staff and Children Services Supervisors, as well as Policy Council and Board of Directors members in order to acknowledge areas of family satisfaction and address areas needing improvement. Administrative staff and Program Specialists used the aggregated data when evaluating School Readiness Goals and the PFCE Framework Action Plan Goals, as well as planning for staff's professional development. The following chart compares the percentage of families that report being satisfied within the highlighted results from PY51 and PY52.

### Family Satisfaction Survey Results

### Monongalia County Board of Education Delegate Family Engagement Activities

Monongalia County Schools Head Start program is a Delegate of North Central West Virginia Community Action Association Inc. Our program takes pride in our efforts to provide our families with opportunities to be active in Head Start, be engaged in their child’s educational experiences, and take part in parent trainings based upon family needs. We believe that building strong relationships between parents and their children are essential. We strive to support family well-being, ongoing learning and development for both parents and children. In addition, we firmly believe that parents are their child’s first teacher and we believe that engaged parents make a positive impact on their child’s learning experiences.

We strive to engage parents and foster an environment of support and appropriate learning expectations. We strongly encourage our parents and families to participate in their child’s classroom, as well as, parent trainings, meetings, and activities that will help them learn more about the program. We also encourage and support them to further develop their skills and thus support their child throughout their educational experience. Furthermore, we recognize the importance of a father figure in our children’s lives and encourage families to participate in program initiatives such as fatherhood events, and other Fatherhood events, evening events such as Family Fun Night, and share a special meal during our Thanksgiving Feast, etc.

With the revision of the Head Start Performance Standards in November of 2016, our program has adopted parenting curricula that will provide parents with targeted skills and support for our children. In the area of Early Head Start, the Parents as Teachers curriculum provide our parents with resources, supports, and innovative solutions for working with their young children. In Monongalia County, Parents as Teachers is delivered in the child’s home environment.

In the area of Head Start, Monongalia County has adopted the Triple P Parenting Curriculum for our Head Start families. We continue to connect Family Service Specialists with training events and plan for full implementation upon completion of the trainings. Triple P (Positive Parenting Program), like Parents as Teachers, is research based and provides parents with evidence based strategies/supports, builds

confidence within the parents in order for them to be self-sufficient and manage challenges independently, and helps them acquire skills which will be used in the early educational years and beyond.

In Monongalia County, family engagement activities begin prior to the start of school. Our Family Service Specialists (FSS) start out the year by making contact with our families. They also hold a Back to School event at each site and all Head Start parents are invited and encouraged to attend. Their goal during the event is to provide parents with important information about the program, classroom schedules, home visits, transportation, etc. In addition to training sessions held at the school, our FSS send important information home in the children's backpack. At the beginning of the school, we also strongly encourage parents to become involved, to volunteer, and/or to participate in parent meetings. Parents have the opportunity to participate on our Parent Policy Committee, Head Start/Early Head Start School Readiness Committees, Health Advisory Committee, and the North Central Community Action Parent Policy Committee. In addition, parents are encouraged to consider participating in our Social Service Advisory, our Pre-K Core Team, our TADPOLE committee, etc. At each school, following discussion about the committees, parents vote on representatives for the previously mentioned committees.

Monthly, our families receive flyers, reminder notes, phone calls, and when available emails with information on upcoming meetings, school events, program events, and parent training. Our FSS and school staff strive to build a relationship of trust, support, and understanding. Our FSS are required to schedule at least four Parent Committee meetings at their assigned schools throughout the year. At these meetings, parents are encouraged to discuss the program, school events, address questions, concerns, and receive training. Trainings can range in topics from behavior management to accessing community resources, to transitioning to kindergarten, etc. It is important for parents, teachers, and school administrators to meet and work towards building a strong relationship for the child's educational experience.

In addition to the efforts listed above, our School Readiness Team uses data to assist us in planning specific opportunities for our families. In reviewing data such as the family engagement calendar data, school readiness calendar activities, comparing participation in specific parent trainings, participation in center events/school events, etc., we look for trends as well as which activities families are interested in and participate in, as opposed to those with less interest and attendance. Data is a strong driving force in our planning of future activities.

Monongalia County Head Start believes collaboration is a key component of Head Start and the cornerstone of success. In addition to our scheduled events, families are informed of events happening in and around their community. Some examples of the extensive collaboration opportunities provide to our families include: Early Head Start, Birth to Three, The Family Resource Network, The SHACK, Scott's Run Settlement House, Morgantown's Service League, WVU, Bo-Parc, and PNC Bank. Our program has also collaborated with Lowe's Building Workshops, local agencies to provide winter clothing for our students, Thanksgiving Baskets, books provided for our young learners, emergency support and Holiday Toy and Food Drive. Through such collaborative efforts, our families benefit from county-wide parent trainings, in areas such as discipline, child development, identify appropriate developmental expectations, etc. When parents express a specific need, we also collaborate with the Parent Education Resource Center, the Office of Guidance and Counseling, and the Office of Special Education Services.

Prior to a child's transition, our FSS work hand in hand with the classroom teacher and school staff to ensure that children are provided with a positive and supportive environment. We encourage our families to be active and engaged participants in their child's classroom and school. We stress the importance of parent involvement not only in Head Start, but throughout their child's educational experiences/career. We offer hands on training that supports our parents as volunteers in the classroom. Parent Involvement Training is offered annually and on an on-going basis. Our goal is for parents to actively participate/volunteer in the classroom or school as they are able. We encourage parents to discover how

children learn through play. We also encourage fathers to take an active role in their child's education. Events such as Fatherhood night, the Build a Bookshelf event, etc. help fathers and/or father figures understand their importance in the life and education of their children.

Of utmost importance in our Head Start Program is the family. We actively seek family input, and parental feedback. Annually, our Head Start families are asked to complete a Parent Interest survey and Program Satisfaction survey. Based upon parent input, Teacher and Head Start Staff input, our annual Family Activity Calendar was created.

This calendar outlines a variety of activities and we aim to encourage family participation in the home, the school, and the community. We also use monthly activity calendars to provide families with activities that outline simple, no-cost, activities parents could complete with their children.

The activities focus on our School Readiness Goals which include: Cognitive Development, Approaches to Learning, and Language and Literacy. Parent and child engagement is very important and based upon our data, the School Readiness Team has decided to look at the family engagement piece more closely. During the upcoming program year, we will be looking at the number of PK children vs. Head Start families completing the data. We will also be monitoring the activities that are consistently completed and those that are not. As we use the data to make changes in our activities, our overall goal will be to increase participation across the domain activities.

Parent input is vital to our program. It is useful and necessary to help program staff plan trainings, family events, and school offerings. Of all of our collaborations, our partnership with our families is of utmost importance. Monongalia County Head Start Program and staff continue to strive for collaborations fostered between the community, schools, parents, children, and families.

Our partnerships have benefited and supported our children, families, and community agencies in our area. Fostering parent engagement and building upon family needs and interest, are the key to program planning. We are proud of our collaborative efforts, and the success of our program, but most of all, we are proud of the families and the differences they will make in their children's lives and educational career because they participated in our Head Start Program.

**HEAD START/EARLY HEAD START PERFORMANCE INDICATORS FOR LOCAL, STATE, AND NATIONAL 2016-2017**

PIR #		HS Grantee	HS Delegate	EHS Grantee	State	State	National	National
					HS	EHS	HS	EHS
101	Percentage (%) of children enrolled for multiple years.	18.7%	20.9%	31.7%	22.7%	43%	33.7%	42.6%
102	Percentage (%) of children enrolled less than 45 days.	2.9%	0.5%	12.2%	3.7%	5%	4.3%	5.7%
103	Percentage (%) of children and pregnant women (if EHS) who left the program and did not re-enroll.	9.4%	3.2%	25.6%	10.6%	25.7%	15.2%	30.8%
111	Percentage (%) of children with health insurance.	100%	100%	100%	98.3%	99.1%	96.8%	97.2%
112	Percentage (%) of children with a medical home.	99.7%	100%	100%	97.5%	97.8%	96.6%	95.6%
113	Percentage (%) of children with up-to-date immunizations or all possible immunizations to date.	99.4%	99.5%	87.8%	94.4%	90.5%	96.7%	91.6%
114	Percentage (%) of children with a dental home.	98%	100%	73.2%	93.7%	79%	92.5%	76.4%
121	Percentage (%) of children with an IFSP or IEP.	20.0%	23.5%	15.9%	19.6%	20%	12.7%	12.9%
122	Percentage (%) of children up-to-date on a schedule of preventive and primary health care per the state's EPSDT schedule.	88.7%	75.4%	85.4%	76.9%	86.9%	84.9%	74.1%
123	Of the children up-to-date on health screenings, the percentage (%) of children diagnosed with a chronic condition needing medical treatment.	4.4%	16.3%	5.7%	6.2%	11.1%	10.9%	7.9%
124	Of the children diagnosed with a chronic condition needing medical treatment, the percentage (%) of children who received medical treatment.	96.3%	4.3%	100%	86.4%	94.2%	91.5%	93.5%
131	Percentage (%) of preschool children that received special education or related services for one of the primary disabilities reported in the PIR.	98.6%	100%	N/A	98.9%	N/A	96.2%	N/A
132	Percentage (%) of preschool children completing professional dental exams.	91.0%	97.9%	N/A	81.6%	N/A	81.2%	N/A
133	Of the preschool children receiving professional dental exams, the percentage (%) of preschool children needing professional dental treatment.	17.5%	14.8%	N/A	12.1%	N/A	17.1%	N/A
134	Of the preschool children needing dental treatment, the percentage (%) of preschool children who received dental treatment.	73.0%	81.5%	N/A	70.5%	N/A	73.3%	N/A
141	Percentage (%) of families who received at least one of the family services reported in the PIR.	87.3%	63.1%	74.3%	67.7%	92.5%	67%	72.6%
142	Percentage (%) of families experiencing homelessness during the enrollment year that acquired housing during the enrollment year.	36.2%	0%	29.4%	44.5%	23.6%	32.7%	35.6%
151	Percentage (%) of preschool classroom teachers that meet degree/credential requirements of Section 648A.(2)(A) (BA or higher- early childhood) that become effective September, 2013.	93.1%	100%	N/A	93.1%	N/A	73.4%	N/A
152	Percentage (%) of preschool classes in which at least one teacher meets the teacher degree/credential requirements of Section 648A.(3)(B) that become effective October, 2011.	96.6%	100%	N/A	95.2%	N/A	87.7%	N/A
153	Percentage (%) of preschool classroom assistant teachers that meet the degree/credential requirements of Section 648A.(2)(B)(ii) (CDA or equivalent) that become effective September, 2013.	96.6%	100%	N/A	96.5%	N/A	89%	N/A
161	Percentage (%) of infant and toddler classroom teachers that meet the degree/credential requirements of Section 645A.(h) that became effective September, 2010.	N/A	N/A	100%	N/A	84.3%	N/A	88%

Revised 9-5-2017

## North Central WV Community Action Association, Inc. Head Start Program Grantee Preparing Head Start Children for Kindergarten Child Outcome Report for PY51 or 2016-2017 and Future Plans for Collecting PY52 or 2017-2018 Outcome Data

The School Readiness Leadership Team consisted of a variety of positions to provide a diversity of expertise by invitation; this team includes:

- Head Start Program Specialists from all services areas
- Children Services Supervisors
- Administrative Advisory (Children Services Director, Children Services Assistant Director and Children Services Program Manager)
- Systems Information Coordinator
- Mentor Family Resource Coordinator
- Mentor Teachers
- Policy Council Members
- Head Start/Early Head Start Parents

The team met three times during the year following each child outcome checkpoint in conjunction with the program created Google Survey to analyze data for the WV Early Learning Reporting System (ELRS) for Head Start enrolled children and COR Advantage for Early Head Start enrolled children. In addition, three-year-old data was collected and analyzed individually for the Fall, Winter and Spring checkpoints.

The team analyzed the data to look for trends to define the next steps necessary for staff's professional development. The program also used this data to help children and families prepare for the next educational setting. The Leadership Team revised the School Readiness Goals to match the language from the Head Start Early Learning Outcomes Framework Ages Birth to Five for PY 51.

School Readiness Leadership Team will continue to meet to analyze data unless achieved as noted in the areas below:

1. Analyzing available data and comparing with the program's School Readiness Goals:
  - **Status:** The program continued to conduct School Readiness Leadership Team Meetings three times during the program year to review and analyze data collected for both Early Head Start and Head Start to ensure that School Readiness Goals were met.
2. Compiling other service areas for data that include: health, mental health, enrollment/attendance, nutrition, and risk assessments, etc., to determine the impacts on infants/toddlers and child and family outcomes:
  - **Status:** Aggregated data was presented during School Readiness Leadership Team Meetings, Program Specialists/Children Services Supervisor Pre-Service, County staff meetings, Policy Council, and Board of Directors meetings. The data was studied to ensure Program Goals were met.
3. The WV Universal Pre-K Health and Safety Checklist committee met and created a checklist to ensure the promotion of safe environments in Pre-K/Head Start classrooms, which endorses school readiness:
  - **Status:** The West Virginia Universal Pre-K Health and Safety Checklist was completed in all Pre-K/Head Start Collaborative classrooms. A Plan of Correction was created for any non-compliances

found. While updates were made as changes occurred, the Plan of Correction was formally reviewed twice a year along with the annual Self-Assessment Plan of Correction. Any findings not completed due to various reasons will be added to PY 52 Plan of Corrections.

4. The Office of Head Start Health and Safety Screener is used in Early Head Start Center-based classrooms and Home-based socialization sites to ensure the promotion of safe environments, which endorses school readiness:

- **Status:** The Office of Head Start Health and Safety Screener was completed in all Early Head Start Center-based classrooms and Home-based socialization sites. A plan of correction was created for any non-compliances found. As with Head Start, updates were made as changes occurred and the Plan of Correction was formally reviewed twice a year along with the annual Self-Assessment Plan of Correction. Any findings not completed due to various reasons will be added to PY 52 Plan of Corrections.

5. Determining a percentage of growth from baseline to the final checkpoint to be considered an area of strength:

- **Status:** The program continued to use The West Virginia Department of Education (WVDE) Office of Early Learning strategy to analyze the Early Learning Rating Scale (ELRS) data. A score of three remains “at standard” and a score of five remains at “above standard.”

- The ELRS did not split three and four-year-old aggregated data as it had in the past. Education Program Specialists used the ELRS generated Outcome Data to manually split the three and four-year old individual scores in-part with a survey created on Google Drive to measure progress in all domains.

6. Collecting Early Head Start data at four checkpoints to analyze frequency and duration of an entire program year.

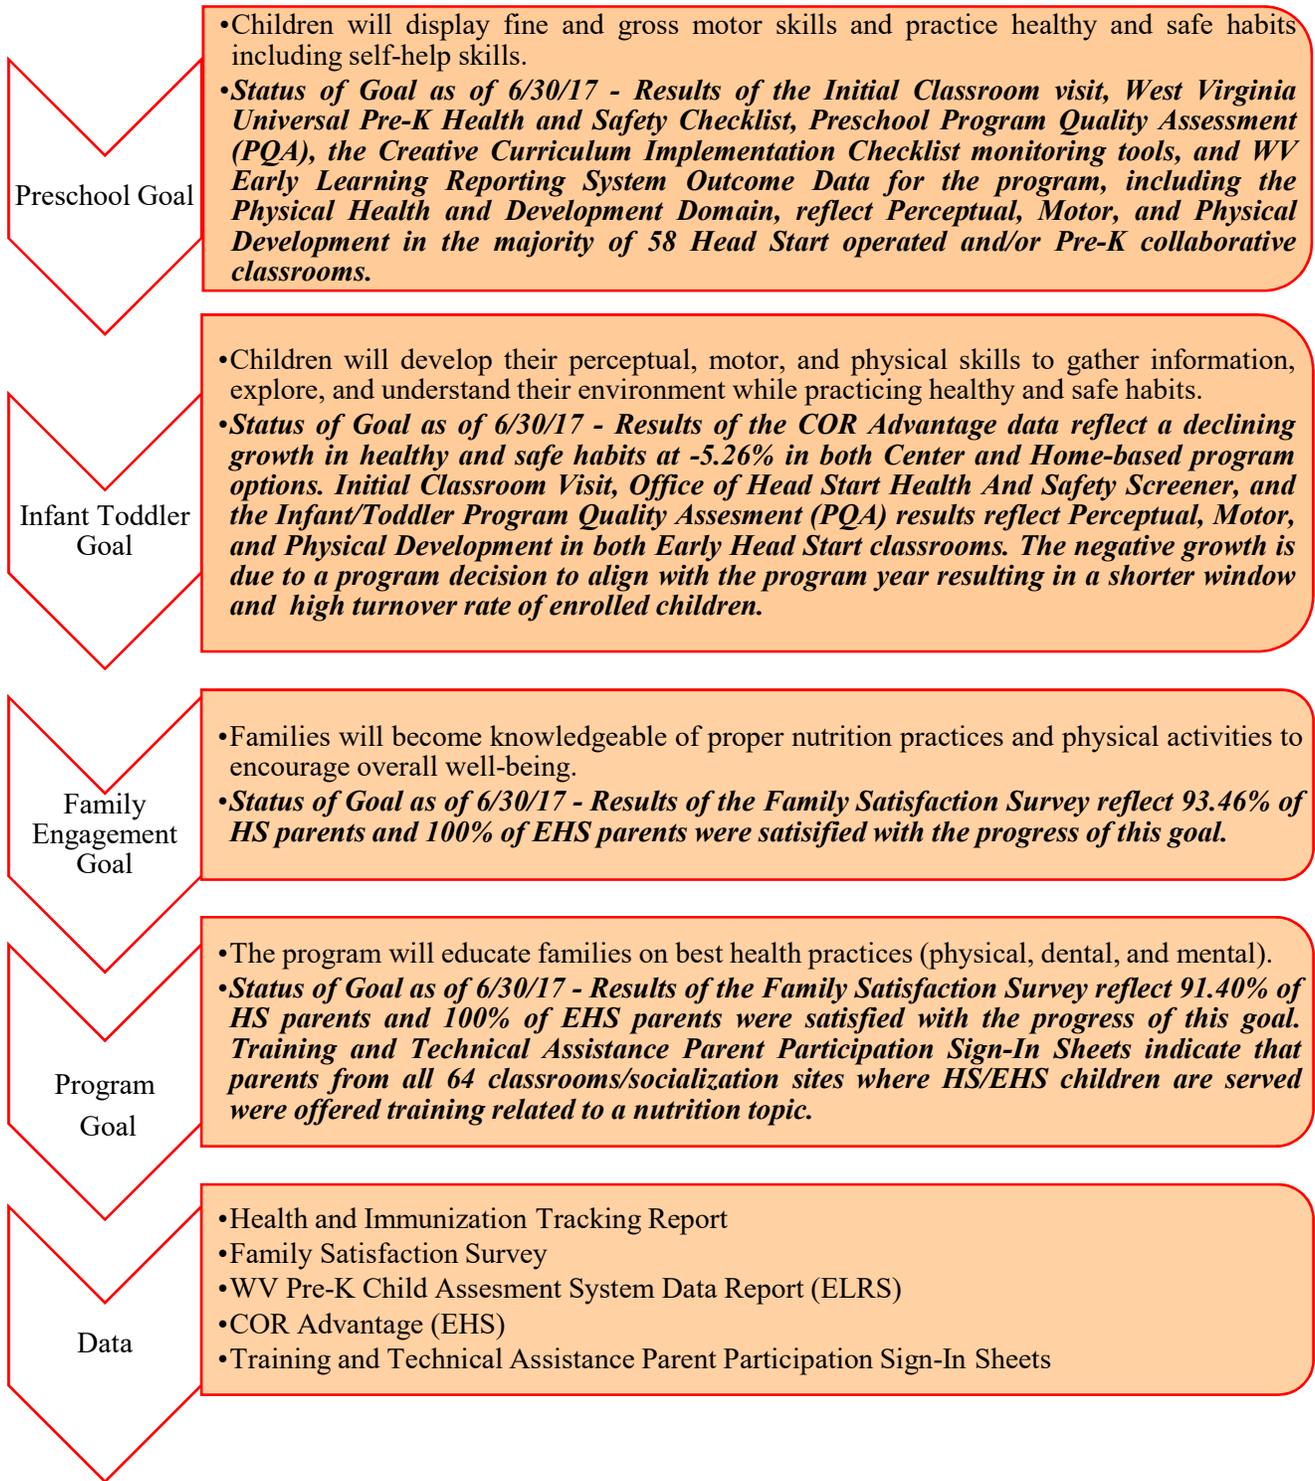

- **Status:** Education Program Specialists scheduled the checkpoints to coincide with the ELRS Checkpoints used in Head Start, while for the first time continuing in the summer months for the fourth checkpoint for Early Head Start. COR Advantage data was collected and analyzed for all four checkpoints.

7. Participating on the WV Early Intervention Interagency Coordinating Council to remain informed on intervention procedures that promote school readiness for infants and toddlers based on individual circumstances.

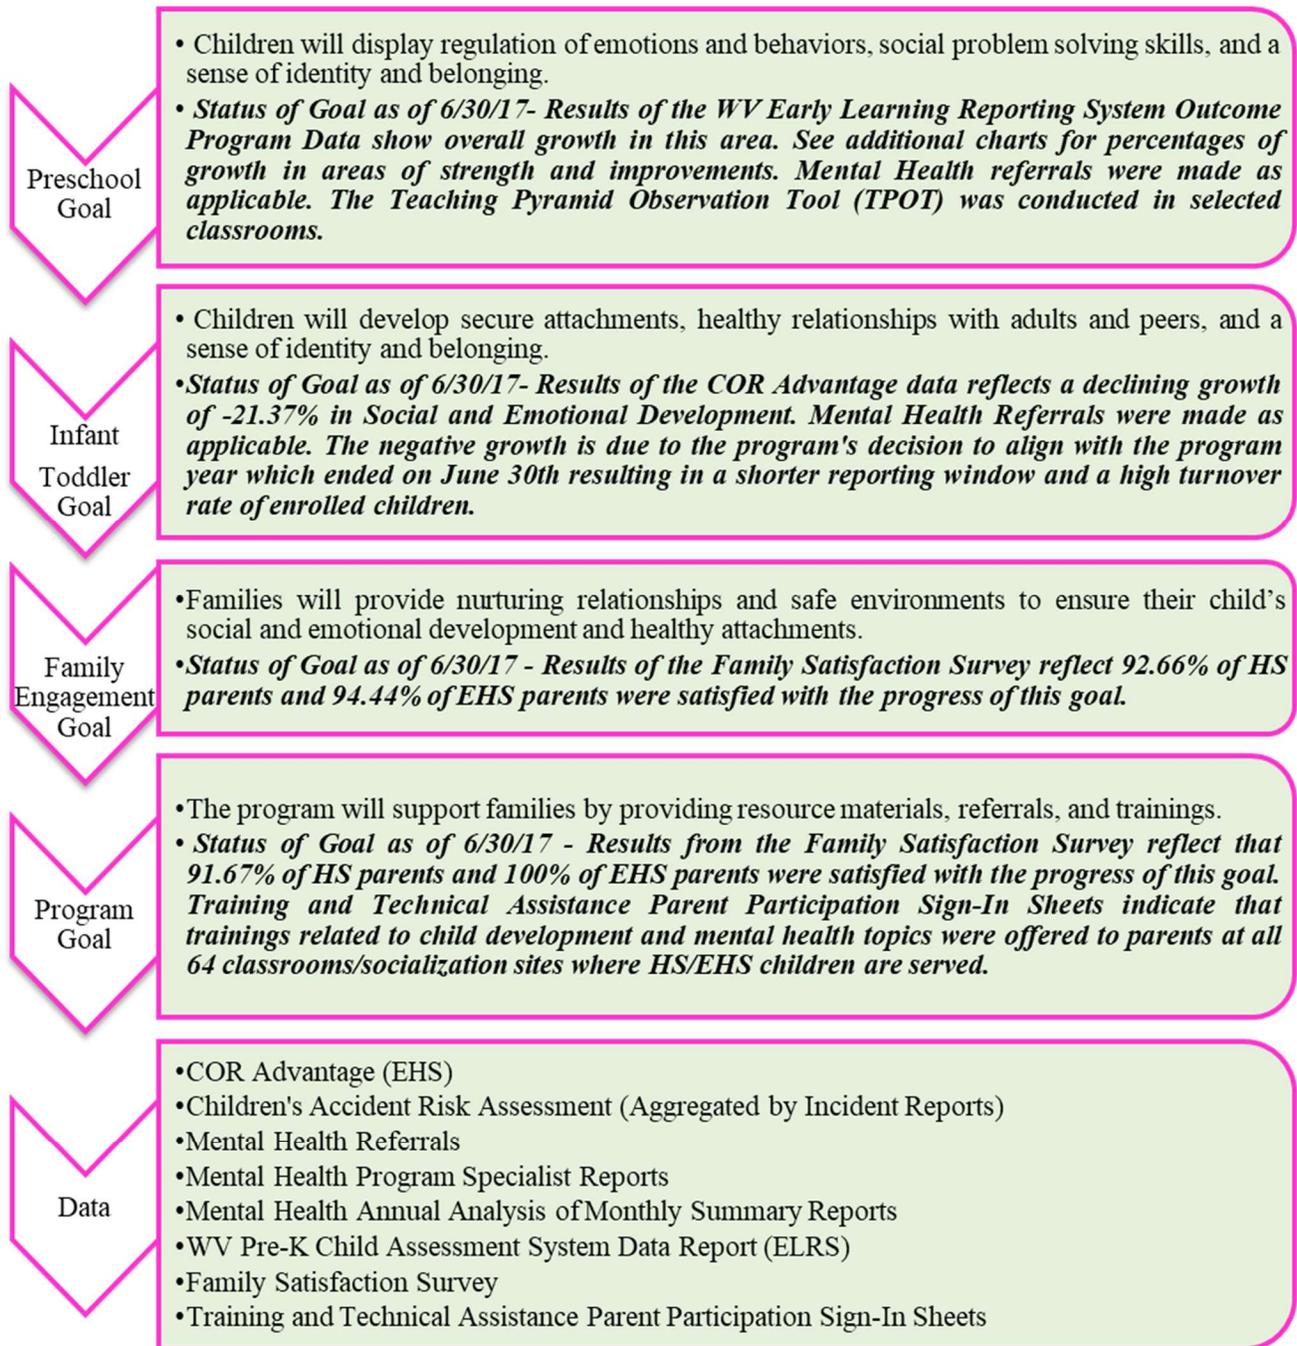

- **Status:** The program continued to stay active on the WV Early Intervention Interagency Coordinating Council to be informed of appropriate intervention techniques that assist in school readiness for infants and toddlers. Education Program Specialists and the Mental Health Program Specialist joined the West Virginia Infant/Toddler Mental Health Association to stay up-to-date on the latest practices for infant and toddler mental health. The association supports the development of professionals to help meet the needs of children and families.

The School Readiness Goals are as follows with updated goal statuses as of June 30<sup>th</sup>, 2017:

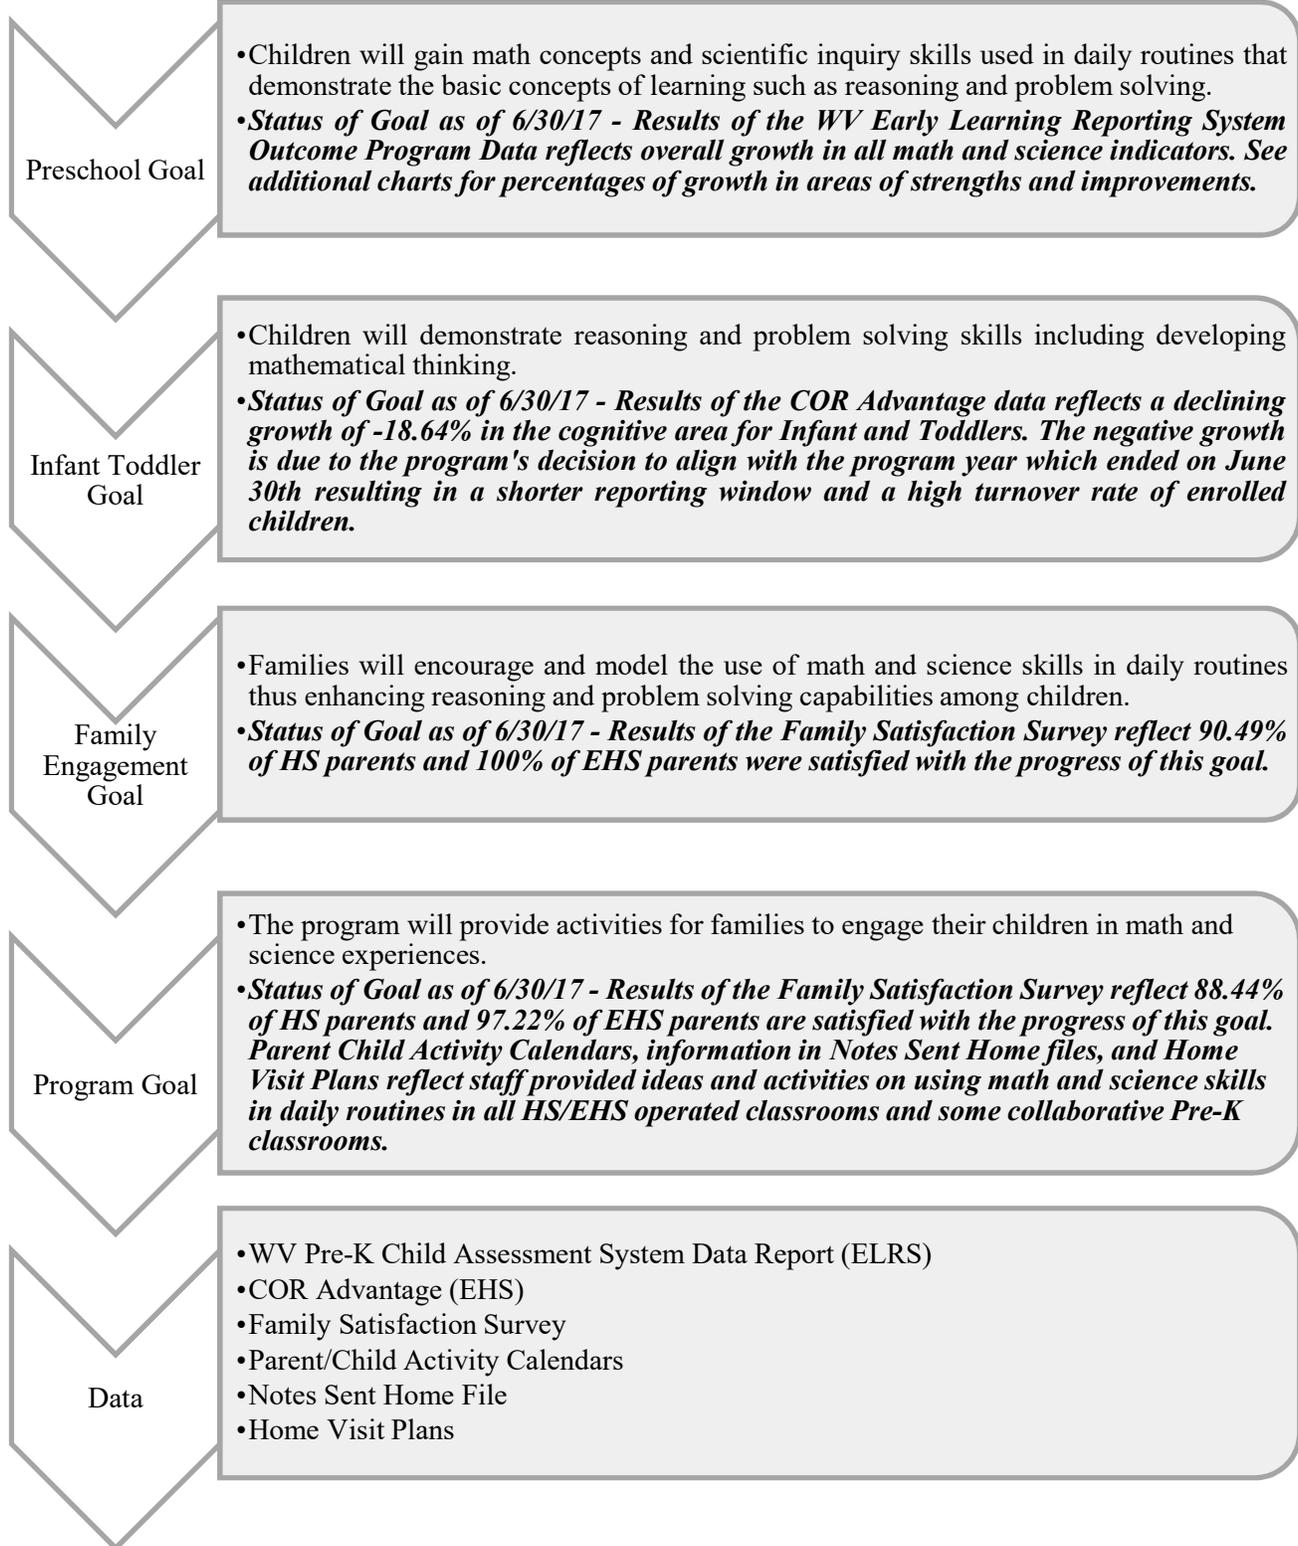

**GOAL: PERCEPTUAL, MOTOR, AND PHYSICAL DEVELOPMENT**

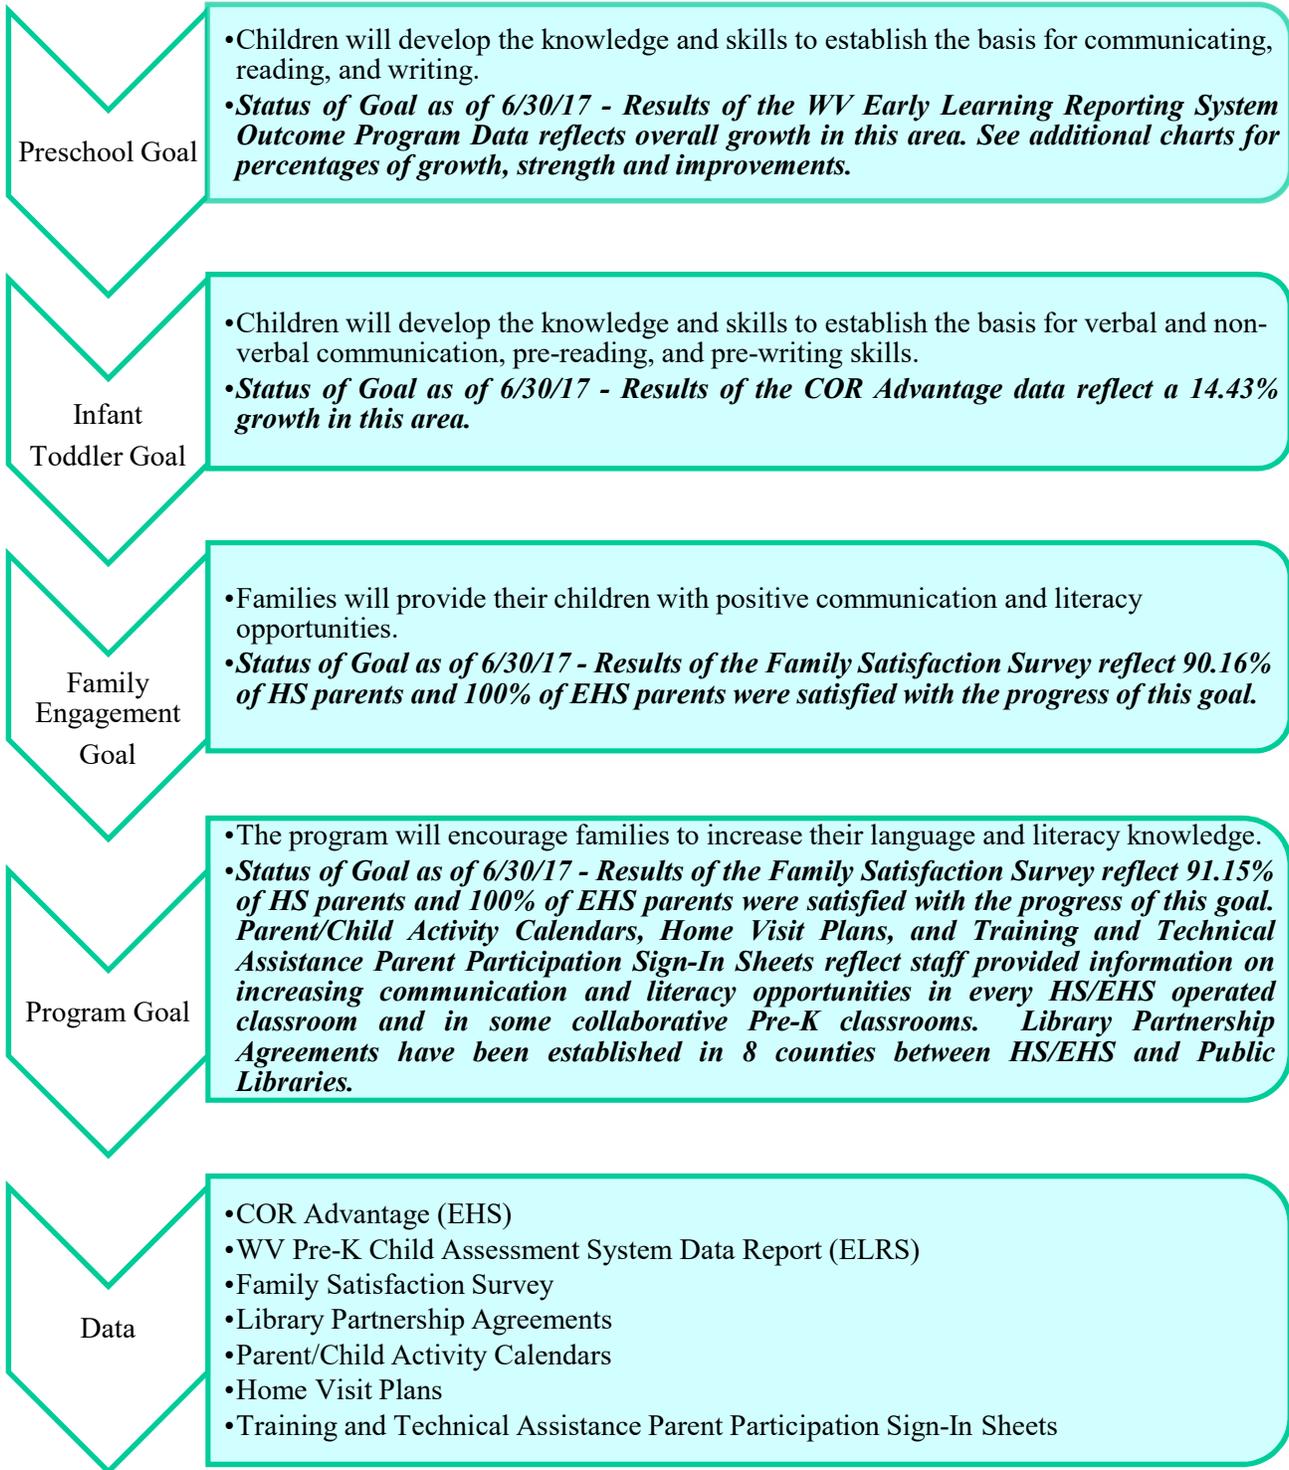

## GOAL: SOCIAL AND EMOTIONAL DEVELOPMENT

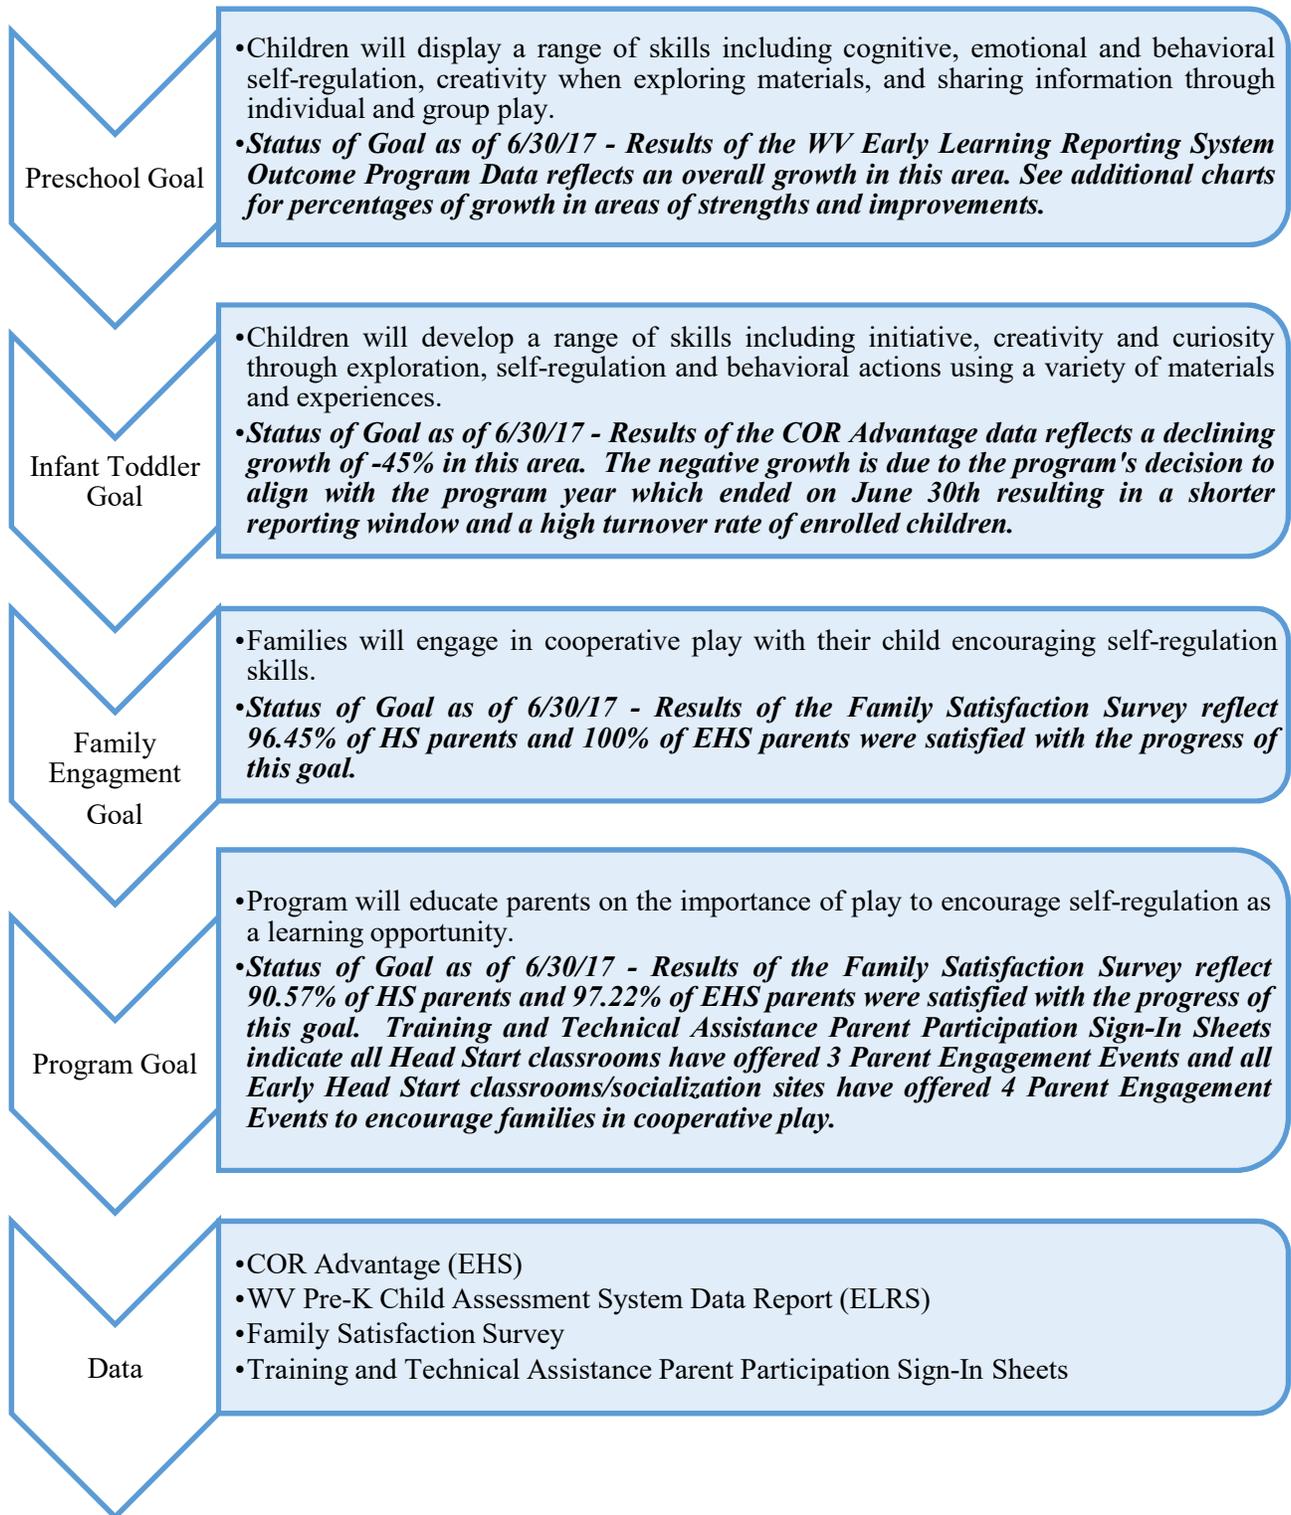

## GOAL: COGNITION

## GOAL: LANGUAGE AND COMMUNICATION

## GOAL: APPROACHES TO LEARNING

## NCWVCAA Grantee School Readiness Goals and Results of Survey

As in previous years, parental input for School Readiness Goals were obtained on an individual and programmatic level. Teaching and Family and Community Engagement staff assisted families with the completion of School Readiness Goal Surveys beginning at the initial home visit and throughout the school year for new enrollees. These surveys also assisted the Teaching Staff to individualize the needs of each child. The School Readiness Leadership Team then analyzed the School Readiness Surveys for all Early Head Start and Head Start families and community members that completed surveys during the 2016-2017 school year.

Separate surveys for the Head Start and Early Head Start families focused on the five domains of School Readiness: 1. Perceptual, Motor and Physical Development; 2. Social and Emotional Development; 3. Cognition; 4. Language and Communication; and 5. Approaches to Learning. Early Head Start survey questions asked parents to identify their top three priorities per domain that they thought their child needed in preparation for Preschool. Early Head Start School Readiness surveys continued to be separated into two surveys, one for infant's ages 0-12 months and one for toddler's ages 12-36 months. The surveys provided examples of developmental milestones with each question to better assist parents and community stakeholders in completing the surveys. Head Start survey questions asked parents of children three to five years of age to select their top three priorities, per domain, regarding their child's preparation for Kindergarten.

Community members were also asked to identify their top three priorities per domain for children birth to three years of age using the Early Head Start Survey and for children age three to five using the Head Start Survey. Community Members were from the counties served by NCWVCAA HS/EHS and functioned as a former Community Assessment participant or an interested early childhood partner. Surveys were completed online using the Google Drive.

See the attached summary results for the Early Head Start Parents, Head Start Parents, and Community Members.

Enters in play when a group of children are already involved (8/17 or 47.1%)</li> </ol>	<p><b>Preschool Goal:</b> Children will display a range of skills including cognitive, emotional and behavioral self-regulation, creativity when exploring materials, and sharing information through individual group play.</p> <ul style="list-style-type: none"> <li>• Provided a vast variety of materials to show individual creativity.</li> </ul>

## CHILD OUTCOME DATA

The NCWVCAA Head Start Program in collaboration with each respective County Collaborative Core Team continued to use two chosen developmentally appropriate and research-based curriculums approved by Policy Council to ensure School Readiness Goals were met. HighScope Curriculum for Preschool was utilized in Barbour, Randolph, and Taylor Counties while the Creative Curriculum for Preschool was utilized in Marion, Pocahontas, Preston, and Webster Counties. Both curriculums are aligned with the Head Start Early Learning Outcomes Framework and WV Early Learning Standards Framework. Curriculum implementation was monitored to ensure fidelity and support outcomes to achieve School Readiness Goals.

Federal guidelines in the Head Start Act requires that programs collect, aggregate, and analyze child outcome data in the following Domains and Elements/Indicators:

1. Language
  - a. Understand an increasingly complex and varied vocabulary
  - b. Develop increasing abilities to understand and use language to communicate information, experiences, ideas, feelings, opinions, needs and for other varied purposes
  - c. Use an increasingly complex and varied vocabulary
2. Literacy
  - a. Phonological Awareness
  - b. Associate sound with written words
  - c. Book knowledge and appreciation
  - d. Print Awareness and Concepts Print Awareness
  - e. Recognize a word as a unit of print
  - f. Identify at least 10 letters of the alphabet
  - g. Know that letters of the alphabet are a special category that can be individually named
3. Math
- a. Numbers and Operations
4. Science
5. Creative Arts
6. Social/Emotional
7. Approaches to Learning
8. Physical Health and Development

Based on the guidelines above, Teachers collected children's work samples and classroom anecdotes throughout the year and analyzed the individual child data three times per year to generate outcomes by using the Early Learning Reporting System (ELRS), created by the National Institute for Early Education Research (NIEER) specifically for the state of West Virginia. The ELRS does not separate aggregated three and four-year-old outcome data. Education Program Specialists used the ELRS generated Outcome Data to manually separate the three and four-year old individual scores in-part with a survey created on Google Drive to measure progress in the following domains: Mathematics/Science, Social Emotional/Social Studies, Language Arts/Literacy, and Physical Health and Development. The WVDE Office of Early Learning State Coordinator has determined that a score of three reflects "at standard," while a score of five is considered "above standard." This concept was used when analyzing the results from the survey on Google Drive.

The following charts represent the percentage of growth defined as the number of children that were “at standard or above” at the Fall (t1) checkpoint, as compared to the number of children “at standard or above” at the Spring (t3) checkpoint. Data was aggregated to reflect three and four-year old children separately, as well as program-wide (combining three and four-year-old children) for the 2016-2017 school year. In continuing to align with the state, the four-year old data includes children with Individualized Education Plans (IEPs). The percentage of growth was determined using the same formula ( $t3-t1 \div t1 = \text{growth}$ ) used on the ELRS generated Outcome Report:

Three-Year Old Four-Year and Program Data

WV Early Learning Scale Indicators	3 yr. Old Growth	4 yr. Old Growth	Program Wide Growth
Functional Counting	340.00%	71.94%	86.94%
Numerical Operations	662.5%	177.63%	201.88%
Written Numbers	400%	123.83%	141.26%
Classification	153.13%	74.00%	82.20%

Observation and Reporting	657.14%	171.69%	192.17%
Prediction	381.25%	91.49%	109.96%
Investigation	625.00%	215.20%	239.85%
Independent Behavior	167.57%	19.40%	31.89%
Regulation of Emotions and Behavior	154.76%	18.45%	31.38%
Prosocial Behavior	141.30%	14.91%	27.69%
Social Problem Solving	176.32%	25.26%	39.13%
Quality and Attributes of Engagement and Exploration	132.65%	4.82%	17.23%
Quality and Attributes of Cooperative Play	169.05%	11.58%	25.81%
Quality and Attributes of Sociodramatic Play	176.92%	28.11%	42.30%
Speaking	127.08%	14.71%	26.54%
Story Retelling	333.33%	81.70%	101.50%
Language Manipulation	406.67%	101.33%	120.42%
Alphabetic Awareness	620.00%	113.50%	137.62%
Print Knowledge	962.50%	53.92%	77.07%
Composing	300.00%	75.19%	89.09%
Production	3050.00%	94.04%	118.99%
Small Muscle Coordination	158.97%	56.00%	67.53%
Large Muscle Coordination	164.10%	26.22%	38.79%
Health Development	134.78%	20.90%	32.73%
Safety Practices	140.00%	20.40%	32.72%

Highest Percentage of Growth – 
  Lowest Percentage of Growth – 
  \*Lowest Percentage of Growth –

Highest Percentage of Growth – 

Investigation	239.85%
Numerical Operations	201.88%
Measurement	197.74%
Observation and Reporting	192.17%
Algebraic Thinking	154.73%
Written Numbers	141.26%
Alphabetic Awareness	137.62%
Language Manipulation	120.42%
Production	118.99%
Prediction	109.96%
Story Retelling	101.50%

Lowest Percentage of Growth – 

Identifying and Using Shapes	92.41%
Composing	89.09%
Functional Counting	86.94%
Classification	82.20%
Print Knowledge	77.07%

Lowest Percentage of Growth – 

\*Baseline Data at Fall Checkpoint (t1) reflect more children came into the program scoring “at standard” or “above standard” resulting in a lesser percentage of children going from “below standard” to “at or above standard” for the Spring checkpoint (t3)

Small Muscle Coordination	67.53%
Quality and Attributes of Sociodramatic Play	42.30%
Social Problem Solving	39.13%
Large Muscle Coordination	38.79%
Health Development	32.73%
Safety Practices	32.72%
Independent Behavior	31.89%
Regulations of Emotions and Behavior	31.38%

Pro-Social Behavior	27.69%
Speaking	26.54%
Quality and Attributes of Cooperative Play	25.81%
Quality and Attributes of Engagement and Exploration	17.23%

The program determined the lowest percentage of growth (highlighted in red above) as determined by the number of children that were “at standard or above” at the Fall (t1) checkpoint, as compared to the number of children “at standard or above” at the Spring (t3) checkpoint. These indicators are considered an area for improvement which will be addressed through ongoing professional development.

Due to a change in the Early Learning Reporting System, outcome data aggregation no longer includes the separation of three and four year old data. Therefore, the program was unable to separate three and four year old outcome data for PY50. PY51 outcome data was manually aggregated by the program for both three and four year olds and program-wide outcomes. Growth was defined as the number of children that were “at standard or above” at the Fall (t1) checkpoint, as compared to the number of children “at standard or above” at the Spring (t3) checkpoint. This varies from previous ELRS data which defined growth as the average numerical score for each indicator at the Fall checkpoint compared to the average numerical score for each indicator in the Spring checkpoint. For PY52, the program will look at all data sources to determine how the data will be aggregated for program-wide outcomes in order to compare with PY51 for trends.

### **Early Head Start**

The following chart represents data from the COR Advantage assessment system for PY51. COR Advantage is aligned with the HighScope Curriculum which continues to be utilized by Early Head Start Home-based and Center-based programs. The program currently collects data at four checkpoints. However, due to the two separate Early Head Start Program Options, Family Educators enter child data year-round for the Home-based option, while Center-based Teachers collect data for the fall through spring checkpoints and the EHS Family Resource Coordinator enters data during the summer checkpoint for the Center-based option. The percentage of growth was determined by using a modified version of the formula used by the ELRS to allow for four data checkpoints as opposed to three data checkpoints in Head Start ( $t4 - t1 \div t1 = \text{growth}$ ). Negative growth was noted in the following domains: Cognition and General Knowledge, Approaches to Learning, Physical Well-Being and Motor Development, and Social and Emotional Development. Variables considered when analyzing this data include the high turnover rate of enrolled children causing a negative growth rate as the children exiting the program may be older and at a different developmental level than those coming in and the program’s decision to align with the program year which ended on June 30<sup>th</sup> resulting in a shorter reporting window. Education Program Specialists scheduled the checkpoints to

coincide with the ELRS checkpoints used in Head Start during the school year, in addition to collecting data in the summer months for the fourth checkpoint.

2016-2017 NCWVCAA Outcome Data for Infants and Toddlers

COR Advantage Content Areas	Fall 2016 (PY51) t 1	Winter 2016 (PY51) t 2	Spring 2017 (PY 51) t 3	Summer 2017 (PY 51) t 4	Average of Growth 2016-2017 (PY51)
Language and Literacy	.97	1.12	1.29	1.11	14.43%
Cognition and General Knowledge	1.18	1.20	1.29	0.96	-18.64%
Approaches to Learning	1.38	1.17	1.39	0.76	-45.00%
Physical Well-Being and Motor Development	1.52	1.49	1.77	1.44	-5.26%
Social and Emotional Development	1.17	1.22	1.38	.92	-21.37%

Highest Percentage of Growth –  
Lowest Percentage of Growth –

Highest Percentage of Growth –  
Lowest Percentage of Growth –

The data above shows highest percentage and lowest percentage of growth for enrolled children:

- The highest percentage of growth was in Language and Literacy at 14.43%
- The lowest percentage of growth was in Approaches to Learning at -45.00%.

The following chart represents the trends of growth between PY50 and PY51.

Trends of Growth between PY50 and PY51

COR Advantage Content Areas	Average of Growth 2015-2016 (PY50)	Average of Growth 2016-2017 (PY51)
Language and Literacy	23.00%	14.43%
Cognition and General Knowledge	32.00%	-18.64%
Approaches to Learning	36.00%	-45.00%
Physical Well-Being and Motor Development	16.00%	-5.26%
Social and Emotional Development	29.00%	-21.37%

**Conclusion:**

There was evidence of childrens' growth in all areas of development and learning for Head Start. Multiple factors contributed to negative results in the Early Head Start Data including a high turnover of enrolled children and data system reporting window changes. Data reviewed from formal and informal assessments, professional development experiences, and individualized program input (school readiness surveys, home visits/conferences, IEP goals, monthly parental contacts, parent-child activity calendars, family satisfaction survey's, lesson plans, etc.) is valuable in achieving success in the school readiness goals as a program.

The program continues to examine collected data to ensure high quality comprehensive school readiness services. This approach includes an all-inclusive method to address child and family needs. Our program continues to implement Early Childhood Positive Behavior Implementation Support (ECPBIS) along with Practice-Based Coaching (PBC) to provide high quality teaching and learning strategies. The Teaching Pyramid Observation Tool (TPOT) was piloted in randomly selected Head Start operated classrooms during the program year. This assessment tool is used to ensure program-wide ECPBIS implementation to fidelity. ECPBIS Modules I and II training occurred during the program year for new staff and on-going support as needed. Early Head Start Family Educators (FE)/EHS Family Resource Coordinator were trained in Parents Interacting with Infants (PIWI) which aligns with ECPBIS Pyramid Modules.

Data is used in the process for supporting Teacher's use of effective teaching practices. Through ongoing monitoring and professional development, the program supports teaching practices to achieve school readiness goals and best practice. A variety of monitorings are conducted by the program to ensure that best practice is utilized. The monitorings that are completed are as follows: TPOT, CLASS, ECERS-R, Creative Curriculum Implementation Checklist, Infant/Toddler and Preschool Program Quality Assessment, WV Universal Pre-K Observation Walkthrough, WV Universal Health and Safety Checklist, and the Office of Head Start Health and Safety Screener. The monitorings listed above are conducted to ensure that classrooms are meeting applicable curriculums, safe environments, and effective Teacher-child interactions, to ensure high-quality early educational experiences.

**Monongalia County Board of Education Head Start Delegate  
Preparing Head Start Children for Kindergarten Child Outcome Report**

To prepare young children and their families for future educational success is the heart and soul of Monongalia County Head Start Staff. To do this, our task is to ensure children are ready for school, families are ready to support their children's learning, and school are ready for our children. We strive to prepare children with the skills, knowledge, and attitudes necessary for success in the early years of school, as well as, later learning and life. For our parents and families, school readiness means that they are engaged in the long-term, lifelong success of their child. School Readiness is at the center of program planning, data collection, analysis and disaggregation. School Readiness Goals and progress towards those

goals provide the necessary information needed in planning professional development needs to appropriately support children through the developmental years from ages birth through five years of age.

In Monongalia County, our School Readiness Team meets several times throughout the program year to review and analyze data, identify program strengths, weaknesses, and challenges. The team also uses this data to update our goals, revise procedures, and make recommendations to the program director on how we can better support our neediest children, their families, and our staff.

All planned experiences provided focus around the Head Start Framework, supporting children’s growth in the areas of language and literacy, cognitive development, social/emotional development, approaches to learning, and physical/motor skills. School readiness goals specifically target the five essential domain subtopics that include: approaches to learning, social and emotional development, language and literacy, cognition, perceptual, motor, and physical development.

To assist us in obtaining data, analyzing meaningful and reliable data, and meeting the revised Head Start Performance Standards, Monongalia County has adopted the Triple-P Parenting Program (Positive Parenting Program) in the area of Head Start. In addition to our parenting curriculum, we use the ELS “Early Learning Scale” as our developmental assessment for gathering data. In the area of Early Head Start, we continue to utilize the Parenting curricula “Parents as Teachers”, and at the end of the previous program year, decided to adopt the Creative Curriculum Gold as our developmental assessment. By using these standardized tools, we can be assured that our data is an accurate indication of our children’s progress, and make specific recommendations regarding our goals, professional development needs, and overall program goals.

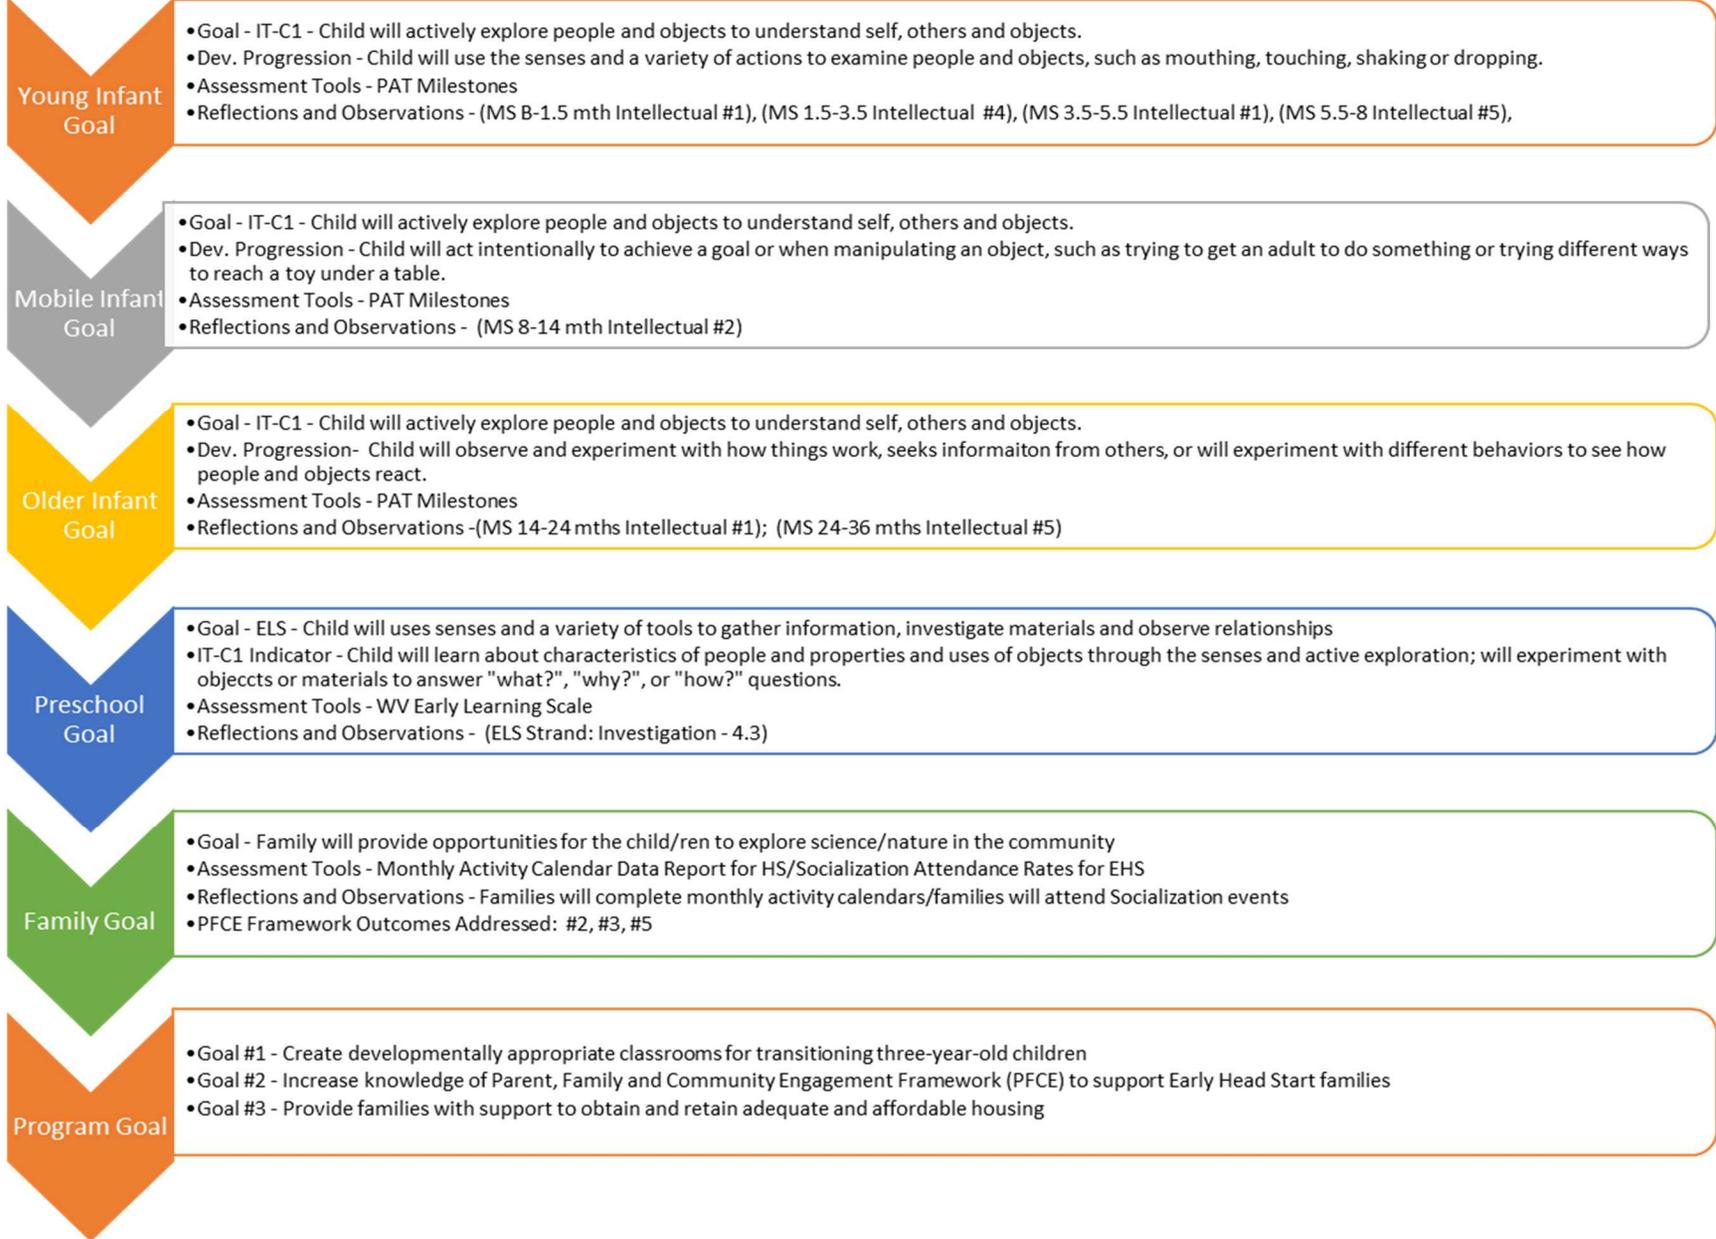

To summarize, the School Readiness Goals and data provide an overview of student progress in each domain. By thoroughly analyzing the data, we can look for strengths, challenges, trends, specific needs by domain, and specific areas of weakness if applicable.

The Monongalia County 2016-2017 School Readiness Goals are as follows:

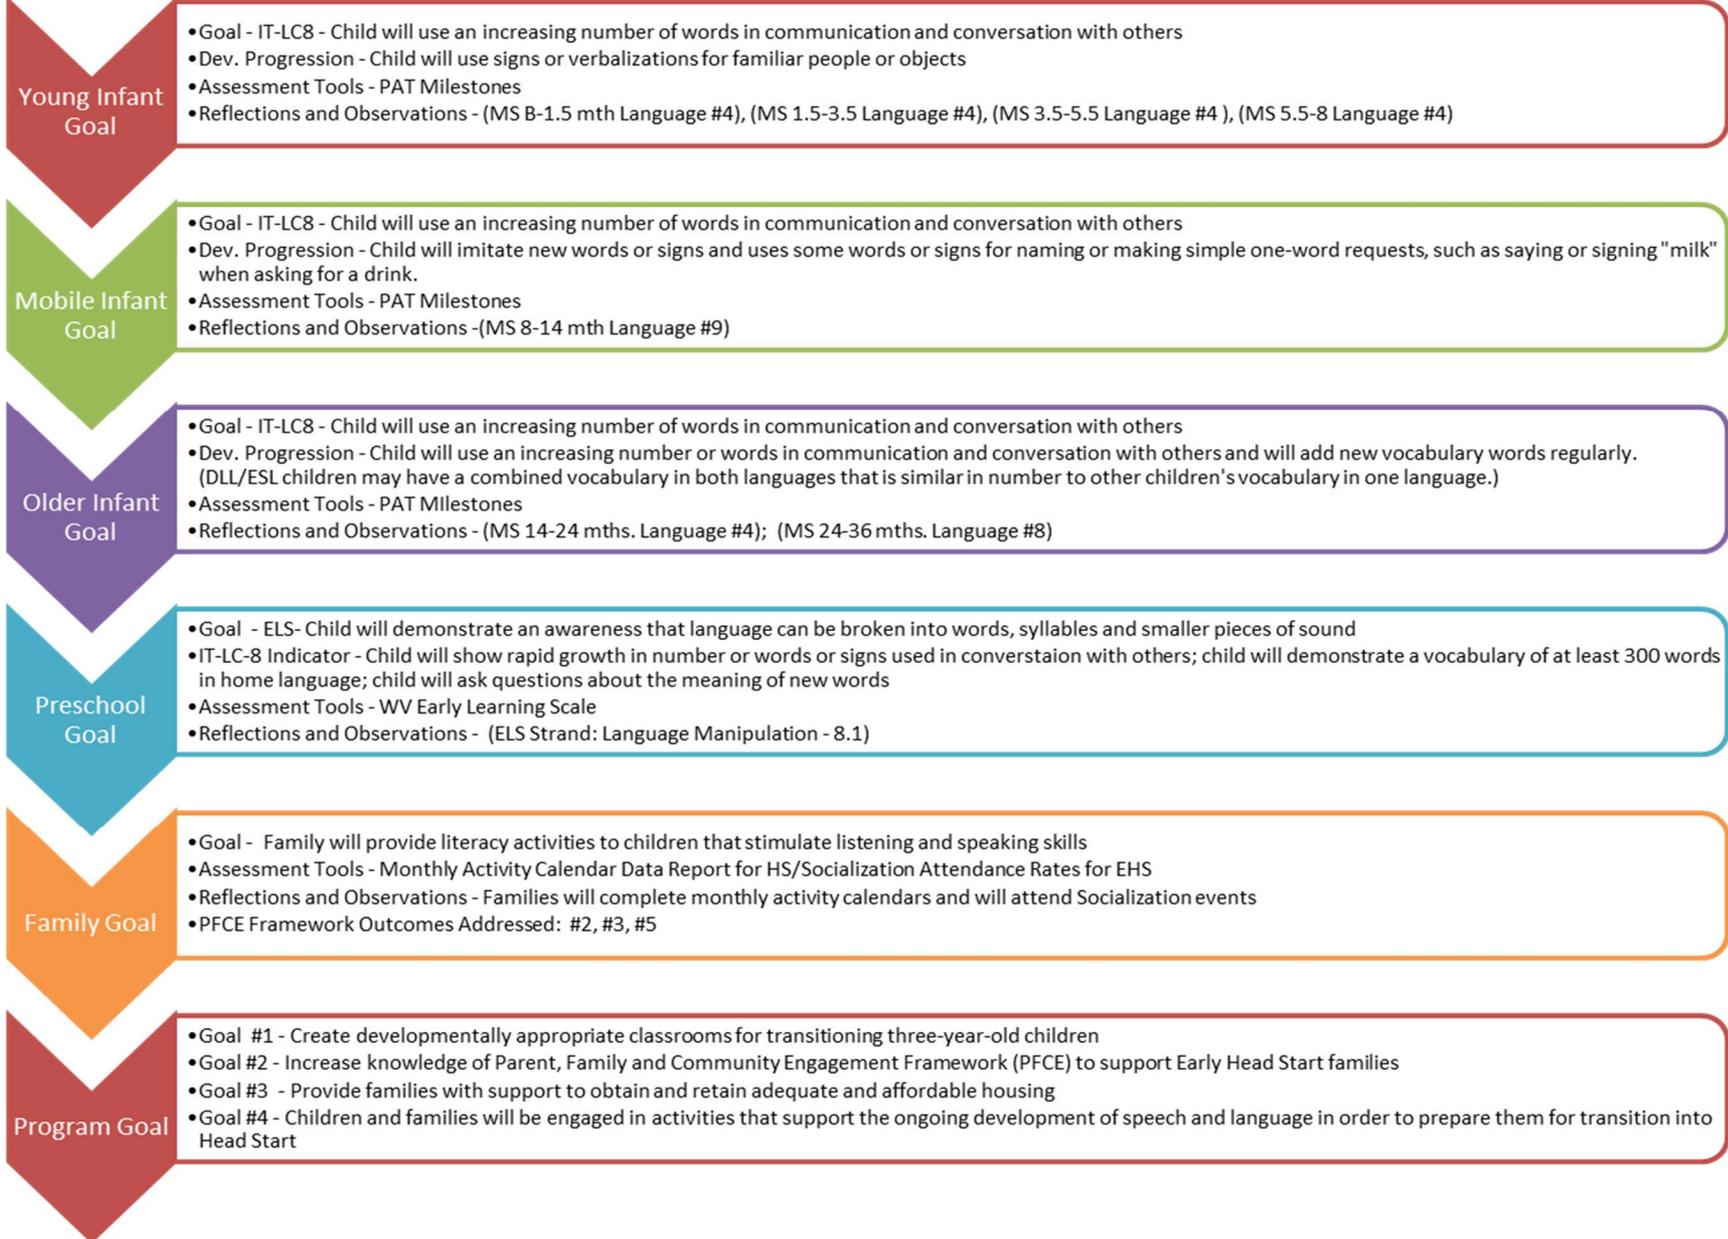

**Domain: Approaches to Learning EHS Sub Domain: Emotional and Behavioral Self-Regulation  
HS Sub Domain: Cooperation**

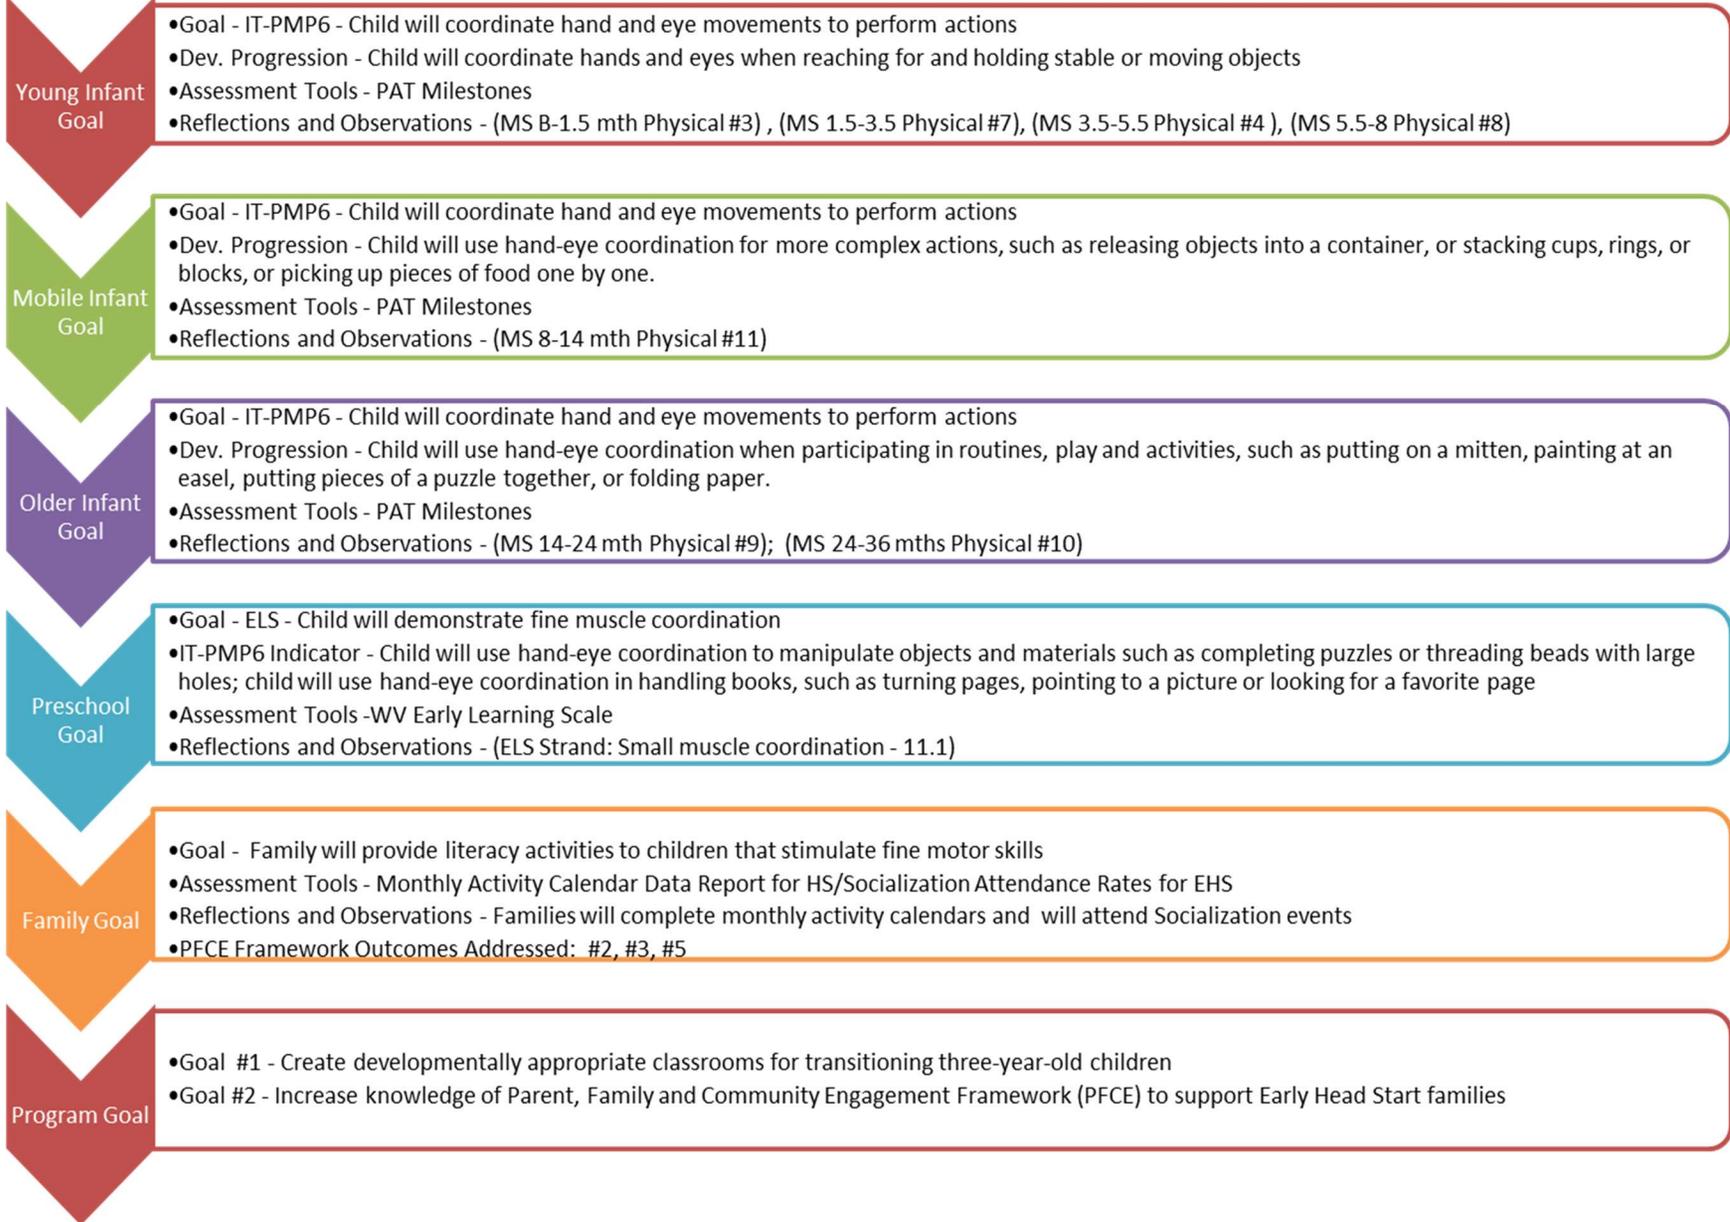

**Domain: Cognition EHS Sub Domain: Exploration and Discovery HS Sub Domain: Scientific Inquiry**

**Domain: Language and Communication/Literacy ELS Sub Domain: Vocabulary HS Strand: Phonological Awareness**

**Domain: Perceptual, Motor, and Physical Development EHS Sub Domain: Fine Motor HS Sub Doman: Physical Health**

**Domain: Social and Emotional Development EHS Sub Domain: Emotional Functioning HS Sub Domain: Social Problem Solving**

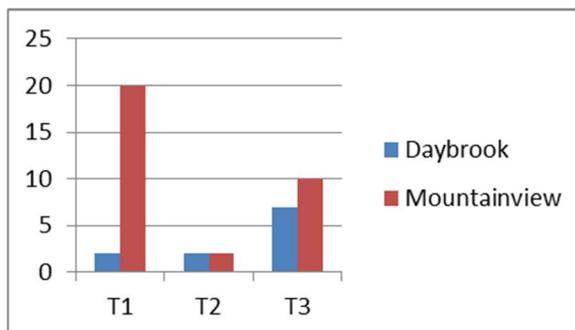

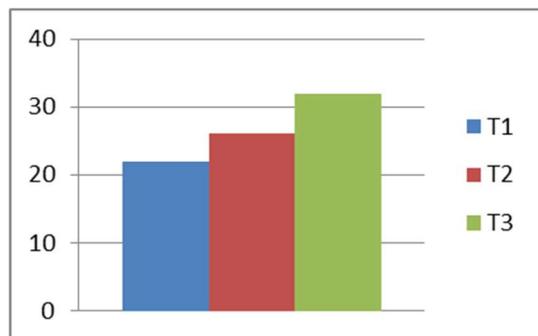

Student/child data play a vital role in our program goals and direction. The School Readiness Team is responsible for gathering, analyzing data in specific goal areas, as well as, overall results across the scope of the program. Based upon the data, the team is also responsible for making recommendations and proposed changes in the areas of assessment, data collection, and disaggregation/analysis of student data. In addition, it is also important for our staff and teachers to look closely at the results of the individual child to meet his or her unique needs. As a program, we strive to provide activities and programs that will strengthen and support each child. With this data, our teachers are able to plan and provide individualized educational experiences to meet these needs.

In the area of Early Head Start, data is compared across centers based upon milestone data, and through attendance in socializations, family fun night(s), etc. In the Head Start area, data is obtained through the ELS “Early Learning System” with is assessed 3x per year, parent engagement data which includes: family engagement calendars, parent volunteers, parent trainings, etc. From this data, any minor modifications in the goals, data collection activities, etc. are formulated. Results of the 2016-2017 program year data are as follows:

**Goal 1: Approaches to Learning - Cooperation**

**Summary**

In Summation, Monongalia County Board of Education Head Start Delegate Program is very proud of the progress that has been demonstrated in our children’s performance across the developmental continuum. Upon review and analysis, we have determined that our children continue to need additional support in the areas of cognitive development, language, and literacy, and social emotional development. We also determined, based upon our data, to continue our efforts with our school readiness goals for the coming year. One mission is to support our children in these areas by providing materials, supplies, professional development, and embedded coaching to further develop these specific areas.

Our staff, teachers, assistant teachers, coaches, and administrators continue to use data from ongoing assessments to individualize instruction, drive instruction, identify program needs, and make changes as appropriate. By using data, we provide professional development to enhance and support developmentally appropriate content to be included in classroom experiences, as evidenced in teacher lesson plans. It is our

hope, our desire, and our goal that student progress is made in all curricular domains, and that our children acquire basic fundamental skills that are necessary for educational success in the future.

**COUNTY SERVICES: HEAD START/EARLY HEAD START**

**Barbour County**

Barbour County **Head Start** partners with the Barbour County Board of Education (BCBOE) serving HS children in seven (7) classrooms. With the closing of the Head Start operated classroom, Belington II (formerly Philip Barbour Pre-K Head Start), at the end of the 2016-2017 school year, the BCBOE opened the Junior II classroom for the 2017-2018 school year. There are five Pre-K collaborative classrooms operated by the BCBOE that serves HS children: two are located at the Philippi Elementary School (Philippi Elementary I and II), one is located at Belington Elementary (Belington I), and two are located at the Junior Elementary School (Junior I and II). Barbour County has two (2) Head Start operated centers that are Pre-K collaborative with the BCBOE: Philippi I and II Head Start in Philippi. Kasson Elementary has a Pre-K class operated by the BCBOE but Head Start services are not provided at this school.

The recruitment areas for Philippi I and II HS is the Philippi town area; Philippi Elementary I and II is also the Philippi community area and the northern end of the county including Galloway and Volga; Belington recruitment area is the Belington town area and southern end of the county while Junior is the Junior community area. Kasson serves the communities of Nestorville and Kasson.

Children are transported at Philippi Head Start I and II by NCWVCAA Head Start. All other sites have transportation provided by the BCBOE. Two Family Resource Coordinators hired and supervised by HS serve only HS eligible families throughout the seven collaborative Pre-K classrooms.

For PY52, there were approximately one hundred thirty-three (133) collaborative Pre-K children being served. Barbour County’s funded enrollment is fifty-two (52), serving an average of fifty-three (53) with a wait list of 3 year olds. The county utilizes the High Scope Curriculum in all Head Start/Pre-K classrooms. During 2011, Barbour County was designated as meeting the West Virginia Universal Pre-K status. The next Universal Pre-K Audit will be held during the 2017-2018 school year. All classrooms in the county are full day, four days per week, and inclusive.

\* # HS Children based upon the October 2017 enrollment count.

**Early Head Start** Home-based services began during PY51 or the 2016-2017 school year serving prenatals, infants, and toddlers due to the difficulty of finding and keeping qualified staff in Preston County as well as the number of eligible children located within Barbour County. This move also

provided an opportunity for the program to expand EHS services into another one of its service area counties. The Family Educator and the socialization site are located in the Philippi I HS building. The program’s funded allotment is targeted to serve nine (9) prenatals, infants and toddlers. If other EHS counties are unable to serve its funded allotment, the Barbour County EHS Home-based program could serve an additional three slots. The EHS Home-based Program has had changes in the Family Educator staff position during PY52 yet has maintained a small wait list. The home-based program also uses the High Scope Curriculum.

### Marion County

Marion County Board of Education (BOE) and Marion County **Head Start** work collaboratively to provide Pre-K services to children throughout the county. Marion County Head Start funded enrollment is two hundred and nine (209) ACF-funded students. Children are served in Marion County in an inclusive setting as no special needs classrooms exist. Marion County uses the Creative Curriculum in all classrooms.

Marion County HS reduced their funded enrollment from 234 to 214 in PY51 and to 209 in PY52. West Fairmont HS was moved from two half day classrooms to a full-day classroom to meet Policy 2525 guidelines to provide at least fifteen hundred minutes per week and forty-eight thousand minutes of instruction annually in PY51. The county has seen a decline in preschool aged children especially in the Carolina, Mannington and Rivesville areas for the past several years, thus reducing its funded enrollment again in PY52.

Since awarded the duration grant application for PY52 or the 2017-2018 school year, all eleven (11) of the center-based classrooms operated by Marion County HS are full day, five days per week. The classrooms and their recruitment areas are: Carolina I and II recruitment area Carolina, Fairview, Farmington, and Monongah; Edgemont I and II recruitment area Edgemont, Watson, and Locust Avenue; Fairmont I and II recruitment area East Side and Kingmont; Mannington I and II recruitment area is Mannington; Rivesville I and II recruitment area Rivesville, Bellview, Baxter, and Grant Town; and West Fairmont recruitment area Downtown Fairmont, parts of East Side, Monumental, Barrackville, and Bellview.

Marion County was recognized as being West Virginia Universal Pre-K during the 2011-12 school year and had its most recent Universal Pre-K audit on November 30, 2017. The results will be received in thirty days.

NCWVCAA HS Program began providing transportation at Rivesville during PY51 and continues to provide transportation at all other HS operated sites in Marion County. As part of the agreement with the Marion County Board of Education, the BOE provides meals for Rivesville while meals and space are provided at Mannington. The program also leases Fairmont HS from the Marion County BOE for \$1.00 per year.

The Marion County Board of Education operates thirteen (13) Pre-K classrooms in this county: Blackshere Elementary, East Dale Elementary (2 classrooms), East Fairmont High School (2 classrooms), White School Pre-K (2 classrooms), Barrackville Elementary, Fairview Elementary, Monongah Elementary (2 classrooms), East Park, and Watson Elementary. Childcare operates an additional nine (9) collaborative classrooms with the Board: Bright Beginnings (2 classrooms), Bumble Bear, Heart Junction, Learning Land, Pierpont Community College, Sunbeam (2 classrooms), and Wonderland.

PY52 HS funded enrollment at Carolina and Mannington has been a challenge to meet and maintain. Carolina and Mannington have not maintained full enrollment during PY52 as there are four year olds in these areas that are opting to attend BOE sites. Although the PY52 funded allotment is two hundred nine (209), the county has served an average of one hundred ninety-four (194) children. All slots unable to be covered by Marion County were covered by other counties in the NCWVCAA service area. The number and location of BOE classrooms in Marion County presents added concerns to wait lists.

\* # HS Children based upon the October 2017 enrollment count.

Marion County operates in collaboration with Marion County BOE two **Early Head Start** classrooms based at local high schools: East Fairmont High School and North Marion Vocational Technical Center. Each classroom serves 8 infants and toddlers/prenatals both using High Scope Curriculum. East Fairmont EHS serves recruitment area of East side while North Marion EHS serves recruitment area of Mannington, Fairview, Farmington, Carolina, Monongah, Grant Town, and Barrackville. The program’s objective is to primarily serve high school students during the prenatal period and/or students with children age birth to three. This program provides center-based services at both high schools while student parents are able to attend classes and complete their high school education (see table below). If each EHS cannot meet their funded enrollment by serving high school students, they can enroll community members who meet the eligibility guidelines. High Scope Curriculum is utilized in both center-based options. North Marion has struggled to meet and maintain funded enrollment during PY52. All slots unable to be covered at North Marion were covered by other counties in the NCWVCAA Early Head Start service area.

## Monongalia County

Monongalia County **Head Start** is a **Delegate** of North Central WV Community Action Agency. This Delegate agency is a Board of Education entity that serves one hundred and eighty-one (181) Head Start eligible children within the Monongalia County attendance area. Head Start children are currently served in ten (10) elementary schools, one vocational school, and an Annex building. Multiple locations enable children throughout all areas of the county to be served. At this time, there are no areas of the county that are not served by the program. Transportation is provided to all Pre-K students within Monongalia County by the Board of Education.

Monongalia County Head Start has, and continues to meet our funded enrollment. In addition, our program continues to meet or exceed the 10% requirement of special needs students. Monongalia County has a population of great need, as well as a population of great wealth. These characteristics make Monongalia County unique. With our unique characteristics, our program maintains a "waitlist" of eligible children. These children are served as Pre-K children in collaborative classrooms until Head Start spots become available. The waitlist is ranked according to the current Selection Criteria. When a spot becomes available, our staff identifies the child with the highest ranking and attempts to enroll them. If parents are no longer interested in Head Start Services, or are no longer eligible, staff then moves to the next child on the list. Monongalia County Head Start has always maintained an adequate waitlist and believes that the neediest families be served.

Monongalia County Head Start has adopted the Creative Curriculum for use in all PK classrooms. All classrooms are collaborative and integrative, and all Head Start, Pre-K, and Special Needs children are provided/exposed to the same curricular and educational experiences. The program uses Preschool Steps, the West Virginia Early Learning Scale, and the WV Early Learning Reporting System to collect and analyze individual student data, classroom data, and programmatic data. Head Start children are assigned to schools based upon their attendance areas and needs.

Monongalia County Teachers hold either a Bachelor's Degree or a Master's Degree in Preschool Education or Preschool Special Needs. All Assistant Teachers have either completed their Early Childhood Classroom Assistant Teacher Authorization (ECCAT) requirements or are on a pathway towards completing the certification. Additional staff, such as Preschool Coaches, Program Areas Support Specialists, and Family Service Specialists, provides additional resources and support to Head Start Teachers and Assistant Teachers as needed. These staff members also serve as liaisons between the program, the schools, the families, and the community.

Three (3) classrooms move at Suncrest Primary School to the newly built Suncrest Elementary School (identified as a STREAM school-Science, Technology, Reading, English/Language, Arts, and Math) with children starting at this new site on January 3, 2017.

All Monongalia County Schools (MCS) Head Start/Pre-K classrooms follow the revised Head Start Performance Standards and West Virginia Policy 2525 in regards to classroom assessment requirements. Currently, all classrooms are assessed according to these procedures. ECERS-R and CLASS assessments are conducted by outside evaluation volunteers or consultants as outlines in our required procedures. Once completed, the school team, along with coach, the principal, and the teacher meet together to review the results. From the results, an individualized Continuous Quality Improvement Plan (CQI Plan) is created and implemented. These results are aggregated and used to create a summary of countywide results. The county CQI Plan is then submitted to the West Virginia Department of Education and is included in the Monongalia County Schools Strategic Plan. School principals are provided with their classroom CQI plans to include in their school-level Strategic Plan as well.

The WV Pre-K Steering Team, as per Policy 2525 conducts a Program Review once every three years. Monongalia County Pre-K Program became Universal in 2010, and is scheduled to be reviewed again February 2017.

Monongalia County Schools is a grantee for an **Early Head Start** Program. This program serves 120 infants, toddlers, and pregnant women in the county. Early Head Start in Monongalia County is a Home-based program that provides weekly home visits to those enrolled. The Early Head Start program has two socialization centers that are located to enable families to be served in all areas of Monongalia County. There are no areas in the county that are unserved by the program.

Monongalia County Early Head Start has, and continues to maintain funded enrollment as well as the 10% special needs requirements. In addition, a waitlist of eligible children and pregnant mothers is maintained by program staff. The waitlist is ranked according to the current selection criteria. As spots become available, staff will identify the child/pregnant mother with the highest ranking and attempts to enroll them. If they are no longer interested, have moved, or are no longer eligible, staff moves to the next child/family on the list. The program has always maintained an adequate waitlist and believes that the neediest families are being served.

The Parents as Teachers (PAT) curriculum is used for children enrolled while the Parents as Teachers and Florida State Curriculum are used for pregnant mothers enrolled in the Early Head Start Program. Two socialization centers for the program offer event sites for enrollees living in town, and in the western end of the county. Mountainview Early Head Start Center in Morgantown offers a location for program events such as socializations, Family Fun Nights, Fatherhood Events, Parent Trainings, Policy Council, Parent Committee Meetings, Advisory Meetings, and Teen Parenting groups. Daybrook Early Head Start Center in the western end of the county offers the same program events in a different location. Collaboration between Early Head Start and Head Start in Monongalia County provide seem-less transitions for children and families.

Monongalia County also has collaborative partnerships with eleven (11) licensed childcare within the county as follows:

<b>Child Care Center</b>	<b>Capacity</b>
Chyleen's Two's, Three's, and Fours, LLC	32 (Ages 2-4)
Early Learning Facility (ELF)	98 (Ages 2-5)
Early Learning Facility #2	38 (Ages 5-12 yrs) Before and After school

### **Pocahontas County**

The NCWVCAA **Head Start** Program collaborates with two entities in Pocahontas County to provide Head Start (HS) services for up to 30 children. School Days Child Care and the NCWVCAA-HS Program collaborate to provide HS services at their site for up to 20 ACF-eligible students. School Days Child Care serves the Buckeye area and those families needing before and/or after school child care serving an average of 18 slots during PY52. There is a wait list of two students for the School Days Child Care site.

NCWVCAA also collaborates with the Pocahontas County Board of Education (PCBOE) to provide services to a maximum of 15 ACF-enrolled students at Hillsboro Elementary (average of 5 children) and Marlinton Elementary (average of 7 children) board-operated Pre-K classrooms. Hillsboro serves the Hillsboro, Seebert, and Mill Point communities. Marlinton serves the Marlinton, Edray, and Slatyfork communities. The PCBOE collaborates separately with School Days Child Care to provide Pre-K services for up to 20 students.

The county obtained West Virginia Universal Pre-K status in 2011 with the last Pre-K audit occurring during the 2016-2017 school year. All sites in the county utilize the Creative Curriculum and transportation is provided by the PCBOE for all sites. The PCBOE operates a Pre-K site at Green Bank Elementary that is not part of any collaboration. Family and Community Engagement (FCE) services are provided by the program with the Family Resource Coordinator housed at the Randolph County FCE office.

**Early Head Start** services are not currently provided in Pocahontas County.

### Preston County

The Pre-K Collaboration between the Preston County Board of Education (PCBOE) and NCWVCAA **Head Start** (HS) provided center-based services to a total of two hundred forty-three (243) children

in thirteen (13) classrooms during PY52. Of this number, an average of fifty-five (55) were HS eligible children served in thirteen (13) all-encompassing classrooms that operate full day, four days per week. The Board also has a childcare partnership with Little Bear Day Care in the Bruceton Mills area; however, HS children are not counted in this classroom. There are three (3) HS operated classrooms in this county: South Preston II serving the areas of Tunnelton and Fellowsville; Kingwood III covering the Kingwood, Howesville, and Albright areas; and West Preston I (formerly called Valley I) serving the areas of Masontown, Reedsville, and Arthurdale.

The funded enrollment allotment for this county was decreased from eighty (2016-2017 school year) to fifty-five for the 2017-2018 school year because of difficulty filling this level of slots the past few years. The county has maintained its reduced funded allotment of 55 this program year. Due to the dwindling number of preschoolers in the Terra Alta area, the PCBOE closed its Terra Alta II classroom prior to school starting in August 2017 and opened a third classroom at Bruceton Mills late August 2017 due to an increase in pre-school children in this area.

The following classrooms that are BOE operated with their recruitment area(s) include: Aurora (Aurora area); Bruceton I, II, III (Bruceton Mills, Brandonville, Albright, and Valley Point areas); Kingwood I and II (Kingwood, Howesville, and Albright areas); South Preston I (Tunnelton and Fellowsville areas); Terra Alta I (Terra Alta area); and West Preston I, II and III (Masontown, Reedsville, and Arthurdale areas). West Preston I, II and III were previously known as Valley I, II and III. The name changes occurred when the school name was changed from Valley Elementary to West Preston School because of the addition of the previous students who attended West Preston Middle School. NCWVCAA's Head Start class, West Preston I (formerly called Valley I) moved into the West Preston School on January 3, 2017. The PCBOE provides transportation to all Pre-K school children.

West Virginia Universal Pre-K status for the PCBOE and NCWVCAA Head Start was achieved during the 2011-2012 school year with the next Pre-K audit to occur during the 2017-2018 school year. All of the Pre-K classrooms use Creative Curriculum.

Based on the 2017-2018 Memorandum of Understanding between the PCBPE and NCWVCAA Head Start, Assistant Teachers are provided in each the following Board of Education classrooms by North Central Head Start: Aurora, Bruceton I, II, III, Kingwood II, Terra Alta I, and West Preston II and III. All of these positions are hired and administratively supervised by the NCWVCAA Head Start Program and are reimbursed at cost by the PCBOE.

The PCBOE decided to auction the land where their old West Preston Middle School was located that included the NCWVCAA owned modular unit. This modular had been vacant since the second half of the 2016-2017 school year since moving the Valley I classroom (now called West Preston I) to the new West Preston Elementary School. The NCWVCAA Policy Council and Board of Directors recommended that this modular unit be donated to the PCBOE. With the Region III approval to release the Federal Interest on this modular in October 2017, the modular unit was donated to the PCBOE with the agreement that NCWVCAA would be entitled to a portion of proceeds from the sale to benefit the Preston County Head Start/Pre-K Program.

**Early Head Start** Home-based services were moved from Preston County to Barbour County in the summer of PY51 because the county had difficulty hiring and retaining a qualified Family Educator during the past several years. Previous discussions have been held with the PCBOE to consider opening an EHS Center-based option at the high school; however, the board has not expressed an interested to pursue this option.

## Randolph County

Pre-K services are provided to approximately 202 children served by the collaboration between NCWVCAA Head Start and the Randolph County Board of Education (RCBOE) at twelve sites in the county that operate on a full day, 4 days per week instructional schedule. Of the total enrollment,

Head Start services are provided to 110 ACF-eligible students. All students enrolled, both ACF and non-ACF, receive Family and Community Engagement (FCE) services as outlined in the Memorandum of Understanding (MOU) between NCWVCAA and the RCBOE. All sites in the county are inclusive for special needs students, serve both ACF and non-ACF students, and utilize the High Scope Curriculum. Classroom space and transportation is provided by the RCBOE.

The program operates three classrooms: Third Ward II, serving the Downtown Elkins area and Crystal Springs; Midland I, serving the Midland, Chenoweth Creek, and Glenmore areas; and, Homestead/Beverly (formerly Homestead), serving the Beverly, Dailey, and Valley Bend communities. On March 1, 2017, Homestead Elementary School, site of the Homestead Pre-K classroom, suffered severe wind damage during a winter storm. The site was temporarily closed and the Pre-K site was moved to Beverly Elementary, re-opening on March 10, 2017. Due to the severity of the damage, the school remained closed at the beginning of the 2017-2018 School Year with no reopening scheduled. Currently, Homestead Pre-K students are still classified as attending Homestead as the school is still considered temporarily closed. However, they attend Pre-K at Beverly Elementary. The RCBOE is in the process of adding an addition at Beverly Elementary. This addition will include a new cafeteria and kitchen and, two new Pre-K classrooms. The RCBOE is also in the process of permanently closing Homestead Elementary. If this occurs, Homestead/Beverly Pre-K students would be classified by the RCBOE as Beverly Elementary students.

The RCBOE operates nine sites. Beverly (Pre-K Special Needs Certified Teacher) serves the Beverly, File’s Creek, and Georgetown Road areas. Coalton serves the Coalton and Norton communities. George Ward I (Pre-K Special Needs Certified Teacher) and George Ward II serve the towns of Valley Bend, Mill Creek, Huttonsville, and Valley Head. Jennings Randolph is zoned for the southern part of Elkins. Midland II (Pre-K Special Needs Certified Teacher) serves the Midland, Chenoweth Creek, and Glenmore areas. North (Pre-K Special Needs Certified Teacher) serves the communities of Highland Park, Montrose, and Kerens. Third Ward I (Pre-K Special Needs Certified Teacher) serves the areas of Crystal Springs and downtown Elkins.

Also, as part of the MOU, the North Central HS Program provides additional staff at George Ward I (Community Collaborative Classroom (CCC) Associate Teacher, CCC Teaching Assistant); Jennings Randolph (CCC Associate Teacher, CCC Teaching Assistant); Midland II (CCC Teaching Assistant); and Third Ward I (CCC Teaching Assistant). A portion of these staff’s salaries as well as some of the Family Resource Coordinators positions are reimbursed by the RCBOE yet administratively hired and supervised by NCWVCAA Head Start Program as per MOU.

Since the 2009-2010 School Year, Randolph County has been an approved West Virginia Universal Pre-K provider that must provide a space for every eligible Pre-K student (4 years of age or 3 year olds with IEPs) so there is no wait list. The next state audit is scheduled for December 12, 2017. Additionally, the RCBOE also collaborates separately with Youth Health Services to provide Pre-K services in a Child Care site.

\* # HS Children based upon the October 2017 enrollment count.

The **Early Head Start** program utilizes the High Scope Curriculum to provide Home-based services to twelve children and their families. The Family Educator (FE) provides weekly Home Visits and FCP services. Currently, families are located in the Coalton, Elkins, Dailey, Valley Bend, Mill Creek, and Huttsville areas. Recruiting occurs throughout the county. The program has maintained full enrollment throughout PY52. Although there is currently a vacancy in the FE position, the temporary assigned FE continues to work with current families as well as to recruit more families to build an adequate wait list. The program has three families currently on the wait list. The program is also actively recruiting to fill the FE vacancy.

## Taylor County

During PY52, the Taylor County Collaborative Preschool continued to include **Head Start**, the Taylor County Board of Education (TCBOE), and Little Feet Daycare who offers preschool services to four year old and three year old children with IEPs in eight (8) Center-based classrooms. The following changes to classrooms occurred during PY51 or 2016-2017 school year and remained the same for PY52 or the 2017-2018 school year: Flemington Head Start part-day operated program remained closed; the TCBOE continued its Pre-K classroom in the Flemington Elementary School where HS children are served; the Lucretia AM class operated by Head Start relocated and continued to be housed in the TCBOE Anna Jarvis Elementary School, now called Anna Jarvis IV; and the Board continued to provide transportation to all Pre-K sites including the HS operated classrooms (Webster Center and Anna Jarvis IV) with the exception of the non-collaborative classroom, Lucretia, in which NCWVCAA HS continued to provide its transportation. These negotiations resulted in all sites in Taylor County the ability to continue to provide four, full days per week of preschool, which meets the demands of the county.

The Head Start operated Pre-K Collaborative classrooms and their recruitment area(s) include: Anna Jarvis IV primarily serves children from the eastern side of the county including Grafton, 119N, Thornton, and Knottsville; and Webster Center primarily serving the towns of Webster, Pruntytown, and Grafton. The TCBOE collaborative board operated sites of Flemington serves the Flemington, Rosemont, and Simpson communities; Anna Jarvis I, II, and III serves children from the eastern side of the county including Grafton, 119N, Thornton, and Knottsville; while West Taylor, serves the western county communities of Pruntytown, Shinnston, Bridgeport, and Hepzibah. Little Feet Daycare continued to collaborate with the BOE to offer the eighth location providing Universal Pre-K. Before and after care is provided at Little Feet Daycare and for all Anna Jarvis sites.

As a result of the Lucretia AM class being relocated to Anna Jarvis Elementary during the 2016-2017 school year, Lucretia PM, now called Lucretia also began and continued to provide a full day, four days per week classroom schedule. Lucretia remains a non-collaborative Head Start operated site serving up to seventeen (17) primarily three year old children. The ninety-five (95) Head Start enrolled children may attend Lucretia and any of the seven (7) collaborative sites operated by NCWVCAA and the TCBOE. The two (2) Family Resource Coordinators funded by Head Start offer services to the ninety-five (95) Head Start enrolled families throughout the county during the 2017-2018 school year.

Although not considered a Pre-K collaborative classroom with NCWVCAA Head Start or TCBOE, the Little Shepherds Preschool (LSP) at the Church of the Good Shepherd served twelve(12) children ages three or four during PY52. The class is offered Tuesday, Wednesday, and Thursday during the morning hours from 8:00am to 11:15am. Based upon the number of applications, LSP could serve up to 28 children in two half-day programs. LSP is a private preschool program and is at cost of the parent/guardian.

All of the Taylor County Collaborative Preschool classrooms including Little Feet Daycare and the Lucretia Head Start three year old classroom implement the High Scope learning methods while Little Shepherds uses Creative Curriculum.

Taylor County became designated as a West Virginia Universal Pre-K county in 2007-2008 school year. Taylor County is scheduled in 2018-2019 for its next Pre-K audit.

\* # HS Children based upon the October 2017 enrollment count.

Using the restored sequestration monies for PY49, the program opened the nine (9) slot **Early Head Start** Home-based program for the first time in Taylor County. During PY51, the Early Head Start Home-based program increased its slots by three (3) due to closing of the Preston County EHS Home-based Program. Early Head Start 1 is now serving twelve (12) EHS prenatal, infant, and toddlers and their families.

Taylor County was also awarded a second EHS Home-based option as proposed in the PY52 Head Start/Early Head Start continuation grant application for the 2017-2018 school year, now called EHS 2. Although projected to begin serving an additional twelve (12) prenatales, infants, and toddlers the first of October 2017, there was a delay in beginning these services for the EHS 2 home-based. The program received formal notice that the grant had been approved on 7/11/17; the Family Educator's (FE) position was posted/advertised 7/11/17; interviews for the FE position was held 8/7/17; an internal FE was offered position 8/8/17 as an in-house FE transfer from Barbour/Tucker Counties to Taylor county; Unable to transfer to Taylor County until 11/20/17 awaiting new FE being hired for Barbour/Tucker Counties; recruitment has been ongoing with the program's intent to be fully enrolled in December 2017.

Both the EHS 1 and EHS 2 home-based programs serve families from all over the county. These home-based options will be using the High Scope Curriculum as well as socializations will be held at the Webster Head Start building.

## Tucker County

The **Early Head Start** Home-based Program in this county is allotted to serve three (3) prenatals, infants, and toddlers but could serve more if another EHS county is unable to meet its allotment. The county has maintained full enrollment throughout PY52 serving primarily the Parsons area. Although there has been a change in the Family Educator position, the county has been able to maintain a small wait list at times. High Scope is the curriculum of choice of the program for this home-based option.

The Family Educator for Tucker County continues to work out of the Barbour County Head Start/Early Head Start office under the supervision of the Barbour County Children Services Supervisor due to the difficulty of finding a qualified applicant within Tucker County. The home visiting programs from the surrounding counties participate in the WV Home Visitation Regional Meetings. The EHS Family Educator, Supervisor along with the Barbour County Family Resource Coordinator attend these meetings to discuss and plan a vision and mission for the home visiting program for the region. A home visiting program, Parents as Teachers, is also offered in the Parsons area and serves 0-5 age children.

**Head Start** services are not provided in Tucker County as Pre-K children are served by the Board of Education.

## Webster County

The Webster County Board of Education (WCBOE) and the NCWVCAA **Head Start** collaborative Pre-K programs are housed in two of the elementary schools. WCBOE operated Glade I and Head Start operated Glade II (formerly Cowen) are located in the Glade Elementary School while Webster Spring I and II board operated classrooms are in the Webster Springs Elementary School. The recruitment areas for Glade include Cowen, Erbacon, and Camden-on-Gauley while Webster Spring I and II serves the southern end of the county including Bergoo and Webster Springs. Two (2) Family Resource Coordinators serve all Pre-K families since the WCBOE pays for half of their salaries.

Since transportation arrangements to bring children to Cowen by the WCBOE as done in the past several years could not be approved by the Head Start Region III office, the WCBOE offered space at Glade Elementary. The Cowen HS operated classroom was relocated in the Glade Elementary School prior to the 2016-2017 school starting and renamed Glade II. This HS operated classroom remained in the Glade Elementary School for PY52.

The WCBOE has one other Pre-K classroom in the county located at the Hacker Valley Elementary School. For the past several years, the WCBOE has also collaborated with Starting Points Child Development Center for preschool also located in Glade Elementary School. However, due to the low number of preschool aged children in this area as well as across the county overall, this collaborative classroom with the WCBOE was closed for the 2017-2018 school year. Head Start services are not provided in these sites.

The 2017-2018 Pre-K enrollment for the county has been one of the lowest since its history of offering preschool services, serving a total of sixty-one (61) Pre-K children compared to seventy-four (74) children last school year. Of the sixty-one, an average of fifty-eight (58) eligible children were served in PY52. There is currently no wait list and all classrooms are not at capacity. It is suggested that the preschool age population has decreased due to families leaving the area because of the devastating floods that occurred in these communities and southern part of West Virginia in the summer of 2016.

The county was designated as establishing WV Universal Pre-K status in the 2009-2010 school year and the last Universal Pre-K audit being completed during the 2016-2017 school year. All collaborative center classrooms use The Creative Curriculum and operate full day (over 6 hours), four (4) days per week and are inclusive.
